(5) conduct not less than four meetings annually with representatives of the departments, agencies, and independent establishments of the Federal Government having responsibility for the administration of research project programs and representatives of appropriate State and local agencies in order to obtain and exchange information relating to such projects;

(6) recommend to the appropriate Federal, State, and local government agencies methods for the carrying out, in an orderly, efficient, and balanced manner, their activities relating to the development, use, and conservation of the resources of the Chesapeake Bay area;

(7) consider the need for, and desirability of, public works and improvements relating, to the water resources in the Chesapeake Bay area or any portion thereof;

(8) consider means of improving and maintaining the fisheries of the Chesapeake Bay area; and

(9) submit an annual report to the Congress and to the Secretary with respect to the administration of this subsection, together with any recommendations for improving research projects or other related activities.

(c)(1) The Secretary shall make available, without reimbursement, to the Office such administrative services and temporary staff as may be reasonably required by thee Office to enable it to carry out its functions under this Act.

(2) The Office may request from any department, agency, or independent establishment of the Federal Government any assistance or information which the Office deems necessary to enable it to carry out its functions under this Act. Each such department, agency, or independent establishment may furnish, without reimbursement, to the Office any such assistance or information so requested.

SEC. 5. CHESAPEAKE BAY ADVISORY COMMITTEE.

(a) There is established a committee to be known as the Chesapeake Bay Advisory Committee (hereinafter referred to in this section as the "Committee")

(b)(1) The Committee shall consist of ten members appointed by the Secretary. Of such members—

(A) one shall be an officer or employee of the Federal Government who, by reason of his knowledge and experience, is qualified to serve as an adviser with respect to research projects; and

(B) nine shall be individuals who, by reason of their knowledge and experience, are qualified to perform the functions of the Committee;

except that the Secretary shall insure, in making appointments under subparagraph (B), that the interests of State and local government, industry, and the scientific community are equally represented.

(2) No individual is eligible to be appointed under paragraph (1)(B)—

(A) unless the individual is a resident of Maryland or Virginia at the time of appointment; or

(B) if the individual is an officer or employee of the Federal Government.

The membership of the Committee (excluding the member appointed under paragraph (1)(A)) shall not at any time consist of more than five members who were residents of the same State at the time of their appointment. Before making any appointments under paragraph (1)(B), the Secretary shall seek the recommendations of the Governor of Maryland or the Governor of Virginia, or both, as the case may be, with respect to individuals who are qualified to serve as members of the Committee.

(c) Members of the Committee shall be appointed for terms of three years; except that of the members initially appointed—

(1) four shall be appointed for a term of one year;

(2) three shall be appointed for a term of two years; and

(3) three shall be appointed for a term of three years,

as designated by the Secretary at the time of appointment.

(d) The Chairman of the Committee shall be elected annually by the membership of such Committee.

(e) The Committee shall—

(1) undertake a continuing review of the research of the projects of the Chesapeake Bay area;

(2) advise the Director of the Office with respect to the carrying out of the duties and responsibilities set forth in section 4(b) of this Act; and

(3) submit a comprehensive annual report to the Director of the Office and the Secretary setting forth an assessment of the ongoing and planned research projects for the Chespeake Bay area, and any comments or recommendations which it may have for improving the effectiveness of the Office.

(f) Members of the Committee (other than the member appointed under subsection (b)(1)(A)) shall, while serving on business of the Committee, be entitled to receive compensation for travel expenses and per diem in lieu of subsistence, in the same manner as the expenses authorized by section 5703(b) of title 5 for persons in Government service employed intermittently.

SEC. 6. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Office for each of the fiscal years ending September 30, 1978, September 30, 1979, and September 30, 1980, such sums, not to exceed $300,000, per annum, as may be necessary to carry out the purposes of this Act.

SEC. 7. RELATIONSHIP OF ACT TO EXISTING FEDERAL, STATE, AND LOCAL POWERS

Nothing contained in this Act shall be construed to affect the jurisdiction, powers, or prerogatives of any department, agency, or officer of the Federal Government or of any State or local government.

CONGRESSMAN JOHN BRADEMAS, OF INDIANA, HOUSE MAJORITY WHIP, SUMMARIZES ACHIEVEMENTS OF A LANDMARK FIRST SESSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

Mr. BRADEMAS. Mr. Speaker, every Member can take pride in the outstanding record compiled so far in the first session of the 95th Congress. We intend, moreover, to cap the achievements of this session with comprehensive national energy legislation and with a measure to insure the solvency of the social security system.

But the achievements of 1977 already make the 95th a landmark Congress before it is halfway through its term.

Our partnership with President Carter has produced a series of accomplishments which, in quality and quantity, are paralleled only by the first year of Franklin D. Roosevelt's administration, the last time so much major legislation was enacted in the first year of a new President's term.

Mr. Speaker, just as important as the record is the spirit in which that record was achieved. After almost a decade of acrimony between the legislative and executive branches, we have returned to a relationship marked by trust and cooperation. That relationship, I feel, is as significant as the legislative accomplishments themselves. The shared commitment which characerizes this new era in Washington and the record that President Carter and Congress have produced has demonstrated to the American people that they can have faith in their Government again.

Mr. Speaker, the energy bill now being worked out by House and Senate conferees is the final of four goals established by President-elect Carter and congressional leaders almost 1 year ago, before the new new administration and the new Congress took office.

The other priorities, accomplished earlier, were the enactment of an economic stabilization plan for the Nation, promulgation of a strong financial ethics code, and authority for the President to propose reorganizations that will streamline the Government and make it more responsive to the people.

Congress intends to round out its priority agenda by returning to Washington later this year for the National Energy Act. Any other conference agreements which have also been filed in the interim will come up for final floor action as well. Social security financing amendments, to assure the solvency of the fund for present and future beneficiaries, is expected to be one of them. Several other important bills are also in conference.

Mr. Speaker, achievements in the first session of the new Congress have been addressed to the basic needs of all Americans.

The economic stabilization package cut taxes, brought Americans 2.7 million new jobs, and reduced inflation.

New laws have created more than a million jobs directly, including work for young adults and older Americans.

The $34-billion, 3-year tax cut put money in consumers' pockets and provided incentives to business to invest in plant and equipment and, through a tax credit for new hiring, to increase employment. These actions have generated heightened confidence in the economy and given hope for greater improvement tomorrow.

Mr. Speaker, I ask unanimous consent that the achievements of this remarkable first session may appear at this point in the RECORD:

ACHIEVEMENTS CHECKLIST

Following is a checklist, as of October 28, 1977, of legislative achievements by the 95th Congress during the first session:

ECONOMIC STIMULUS

Tax reduction and tax simplification: A new law will cut taxes by $34 billion over three years and give businesses a tax credit for certain new employees they hire in 1977 and 1978. The law also provides for simplification of tax computation for individuals, extends the sick pay exclusion and makes other revisions of the Tax Reform Act of 1976. (PL 95–30)

Public works jobs: A new law triples, from $2 billion to $6 billion, the authorization for federal grants for local public works. The projects will create an estimated 600,000 jobs, largely in construction and related industries in areas of high unemployment. (PL 95–28)

CETA extension: Congress enacted a law providing for a simple extension through fiscal 1978 for existing programs under the Comprehensive Employment and Training Act. (PL 95–44)

Supplemental appropriations: Congress enacted a law appropriating $28.9 billion, mostly for federal programs, including $13 billion for assisted housing. The law also contains $200 million to help low- and moderate-income homeowners meet unexpectedly high home heating costs occasioned by the harsh winters. (PL 95–26)

Unemployment compensation: Congress enacted a law extending unemployment compensation under the Federal Supplemental Benefits (FSB) program for seven months, to November 1, 1977, plus a three-month phase-out period through February 1, 1978. FSB, together with regular and extended benefits, provides 52 weeks of compensation. The law also requires roll call votes in the House and Senate on future congressional pay raises under PL 90–206. (PL 95–19)

Economic stimulus appropriations: Congress enacted a law appropriating $20 billion for economic stimulus, including $7.9 billion to increase CETA public service jobs to 725,000 from 310,000 in fiscal 1978; $59 million for 14,800 jobs for older Americans; $4.9 billion for revenue sharing; and $100 million for railroad rehabilitation. (PL 95–29)

Second budget resolution: Both houses adopted in final form the Second Budget Resolution for fiscal 1978 which sets guidelines for a national economic policy aimed at reducing unemployment to 6.5 percent and fostering a 4.8 percent rate of growth in the Gross National Product. The resolution sets a spending target of $458 billion in fiscal 1978 and a deficit of $61 billion. (HConRes 341)

Youth jobs: A new law creates about 203,000 jobs and training positions for young persons by establishing a Young Adult Conservation Corps and authorizing a variety of innovative youth employment and training projects. The programs would be funded at an estimated $1.5 billion for fiscal 1978, including $350 million for the Young Adult Conservation Corps. (PL 95–93)

Antirecession assistance: A new law authorizes $2.25 billion for countercyclical assistance to states and local governments through fiscal 1978. (PL 95–30)

Joint Economic Committee investigation: Congress adopted in final form a concurrent resolution providing $900,000 for an 18-month study of United States and world economic changes and the impact of such changes on the economies of the U.S. and other nations. (HConRes 248)

River Basin authorization: A bill in conference would authorize $1.2 billion for the continuation of projects in 18 river basin plans and $44 million for special projects in the states of California and Ohio. (HR 5885)

Temporary debt limit: A new law provides for a six-month, $52 billion increase in the public debt ceiling. (PL 95–120)

HOUSING AND OTHER ECONOMIC ITEMS

Housing and community development: A new law would authorize $13.7 billion over three years for the Community Development Block Grant Program and assisted housing programs. The new law includes special assistance for older, declining communities, especially at urban centers. Other provisions promote single-family homeownership by decreasing down payments and increasing mortgage loans. (PL 95–128)

Supplemental housing authorization: Congress enacted a law providing $378 million in fiscal 1977 in additional contract authority for housing assistance programs, to support a total of some 400,000 assisted housing units. The law also authorizes an additional $19 million for last winter's heating costs in public housing projects, extends HUD crime insurance and riot reinsurance programs through September 30, 1978, and creates a National Commission on Neighborhoods. (PL 95–24)

SBA Act amendments: A law increased SBA's overall loan ceiling to $7.4 billion from $6 billion and increased the surety bond guarantees fund to $110 million from $56.5 million. (PL 95–14)

Small business amendments: A new law authorizes an additional $2.96 billion for small business programs in fiscal 1978 and 1979, increases loan authorization and surety bond guarantee authority; and improves the disaster assistance, certificate of competency and small business set-aside programs. (PL 95–90)

Investment of public funds: A new law authorizes the Secretary of the Treasury to invest for up to 90 days in obligations of depositaries maintaining Treasury tax and loan accounts. The law also authorizes federally insured and certain other savings and loan associations to act as fiscal agents and depositaries in the Treasury tax and loan account system. (PL 95–147)

Reduced air fares for elderly and handicapped: The House passed a bill authorizing reduced fare transportation on a standby basis for elderly and handicapped persons. The bill also would provide for improved air service on intrastate carriers in California and for a study of the feasibility of reduced fares for youth. (HR 27)

Depository institutions amendments: A new law extends Regulation Q interest rate control authority until December 15, 1977, revives the authority of the Federal Reserve banks to purchase up to $5 billion in public debt obligations directly from the Treasury (until August 31, 1977), and modernizes the Federal Credit Union Act. (PL 95–22)

Indian business development: A new law authorizes $14 million for each fiscal 1978 and 1979 for the Indian Business Development program established by the Indian Financing Act of 1974. (PL 95–68)

SEC authorization: A new law provides $1.5 million supplemental authorization for the Securities and Exchange Commission for fiscal 1977, increasing its total authorization for fiscal 1977 to $56.5 million. (PL 95–20) A bill in conference would authorize $67 million for fiscal 1978 for the Securities and Exchange Commission. (HR 3722)

Council on Wage Price Stability: A new law would extend the Council on Wage Price Stability Act for two years to September 30, 1979. (PL 95–121)

ENERGY

National Energy Act: A bill in conference would establish a comprehensive energy policy for the nation. It would provide for pricing natural gas, levying certain taxes on oil and gas, allowing tax credits for business investment in energy efficiency and for home insulation, stepping up the weatherization program, creating a variety of conservation measures, setting mandatory energy standards for major appliances and requiring that utility rate structures reflect peak and slack periods, and ordering other energy actions. (HR 8444)

Emergency natural gas: A new law authorized the President to make emergency allocation of natural gas and to permit emergency purchase of unregulated gas during last winter's shortage. (PL 95–2)

Urgent power supplemental appropriations: A new law appropriated $6,400,000 for fiscal 1977 to meet the urgent power purchase requirements of the Southwestern Power Administration. The law also lifted limitations on use of ERDA funds. (PL 95–3)

ERDA budget deferrals: The House passed three resolutions to disapprove deferrals of $25,600,000 for ERDA programs. (HRes 305, HRes 306, HRes 307)

Deepwater ports: Congress enacted a law extending the Deepwater Port Act of 1974 for three years and authorizing $2.5 million for each fiscal 1978, 1979, and 1980. (PL 95–36)

Solar energy: The House passed a resolution authorizing $50,000 and directing the Architect of the Capitol to conduct a feasibility study on the use of solar energy in the House Office Building Complex. (HRes 322)

Energy Research and Development Administration, fiscal 1977: Congress enacted a law authorizing $1.6 billion for non-nuclear energy programs and amounts estimated at $3.9 billion for nuclear non-weapons programs for the Energy Research and Development Administration in fiscal 1977. (PL 95–39)

Ad Hoc Committee on Energy: The House established a House Ad Hoc Committee on Energy (40 Members appointed by the Speaker who also appointed Congressman Thomas L. Ashley as Chairman); the committee facilitated House consideration of President Carter's energy package. (HRes 508)

Petroleum marketing practices: The House passed legislation to protect motor-fuel marketing franchisees from arbitrary or discriminatory termination or non-renewal of their franchises. The bill also requires the disclosure of octane ratings of automotive gasoline to consumers. (HR 130)

FEA authorization: A new law authorizes an additional $60.7 million in fiscal 1977 (making a total of $404.6 million) and $1.443 billion for fiscal 1978, including $1.210 billion for the Strategic Petroleum Reserve. (PL 95–70)

Department of Energy: A new law creates a Cabinet-level Department of Energy to coordinate the nation's energy programs. (PL 95–91)

Energy research and development authorization, fiscal 1978: Congress cleared for the President a bill authorizing $6.2 billion for ERDA civilian research and development in fiscal 1978, including funds for the Clinch River Breeder Reactor and other nuclear, fossil, solar and geothermal energy, energy conservation, environmental research and safety, basic energy sciences, program management and sewage demonstration projects. The bill would also authorize loan guarantees for energy technology demonstration programs. (S 1811)

Nuclear Regulatory Commission Authorization: Both houses passed in differing forms a bill authorizing $301,950,000 for the Nuclear Regulatory Commission for fiscal 1978. (S 1131)

SOCIAL SERVICES

Social security financing: A House-passed bill would assure Social Security solvency in the short and long term by increasing employer-employee contributions from 6.05 percent in 1978 in steps to 7.65 by 1990, increasing the taxable wage base, authorizing automatic loans from the Treasury whenever the trust funds drop below 25 percent of annual outgo, and including a "decoupling provision" to guard against disproportionate growth in benefits for future generations. A proposal to include 5.6 million federal, state, local and other workers was rejected by the House. (HR 9346)

Public assistance amendments: The House passed a bill to make administrative improvements in the Supplemental Security Income program and to extend SSI recipients' eligibility for food stamps to October 1, 1978; extend SSI to Puerto Rico, Guam and the Virgin Islands and revise funding provisions for these areas for welfare and social services; make permanent last year's $200 million increase in the Title XX social services annual limitation ($2.7 billion); improve funding and establish an entitlement rather than an authorization for the child welfare program; improve protection for children in foster care programs; allow federal matching funds

for welfare children voluntarily placed in foster care, and authorize protective or vendor payments to benefit 20 percent (rather than 10 percent) of a state's welfare recipients. (HR 7200)

Social services; protective and vendor payments: A bill cleared for the President would extend last years' $200 million increase in the Title XX social services annual limitation ($2.7 billion) through fiscal 1978, continue the delay in the imposition of federal day care standards and authorize protective or vendor payments to benefit 20 percent (rather than 10 percent) of a state's welfare recipients. States would be forgiven payments made in violation of the 10-percent requirement for claims already officially made for periods between 1968 and April 1, 1977. (HR 3387)

Public assistance medicare-medicaid amendments: Congress enacted a law extending for 15 months, until October 1, 1978, the curent eligibility of SSI recipients for food stamps; extending until September 30, 1978, federal matching funds for child support collection and paternity establishment services provided for persons not receiving AFDC; extending the due date to April 1, 1978, for HEW day care standards appropriateness study; and to prevent the cut-off of $142 million in medicaid funds for 20 states which have not achieved certain statutory requirements for evaluations of long-term patient care. (PL 95–59)

SPECIAL TAX PROVISIONS

Tax treatment extension: A House-passed bill would delay until 1978 Internal Revenue Service ruling on commuting expenses to temporary worksites and tax treatment of fringe benefits. The bill would also delay for various periods various provisions of the Tax Reform Act of 1976, including the new more restrictive exclusion on income earned abroad; the freeze on existing tax treatment of certain salary reduction plans, cash and deferred pofit sharing plans and fringe-benefit selection plans; the income exclusion for the Armed Forces health professions scholarship program; the special five-year amortization rules for certain rehabilitation of low income housng; and the new limitations on net operating loss carryover. (HR 9251)

Technical Corrections Act: A House-passed bill would make numerous changes in the Tax Reform Act of 1976, including provisions to except for one year from the tighter foreign-income loss recapture rules income earned in possessions of the United States; to limit to agricultural commodities futures the six-month holding period for long-term capital gains; to grandfather the appreciation in value of certain stock to be taxed under the new estate and gift tax provisions; and to extend the deadline by which charitable lead trusts may be made eligible as tax deductions. (HR 6715)

Duty-free entry of certain Canadian petroleum: A bill cleared for the President would permit the duty-free entry of Canadian crude oil if an equivalent amount of domestic or duty paid oil is exported to Canada. (HR 3259)

ETHICS REFORM AND OTHER HOUSE ACTIVITIES

Ethics Code: The House adopted a strong new financial ethics code as part of the rules of the House. The rules require broad financial disclosure by House Members and key staff; a 15-percent-of salary limit on outside earned income by Members; a $750 limit on any honorarium; limits on gifts; prohibition on personal use of campaign funds; abolition of unofficial office accounts; restrictions on the use of the frank; and curbs on lame-duck travel. (HRes 287)

Select Committee on Ethics: The House adopted a resolution establishing a Select Committee on Ethics to issue regulations to implement and interpret the financial ethics code, to render advisory opinions, and to work with the Senate in putting the new rules into permanent law. (HRes 383)

Korean inquiry: The House adopted a resolution authorizing the Committee on Standards of Official Conduct to make an inquiry to determine whether Members of the House, their immediate families or associates accepted anything of value from the government of the Republic of Korea (HRes 252)

United States-Korean relations: The House authorized an International Relations Subcommittee to examine United States-Korean relations, including activities of the Korean CIA in the United States. (HRes 319)

Select Committee on Assassinations: The House authorized the continuation of the Select Committee on Assassinations throughout the 95th Congress. The committee is to investigate the assassinations of President Kennedy and Martin Luther King, Jr. (HRes 433)

Congressional operations: The House established a House Select Committee on Congressional Operations to continue the work and functions of the now defunct Joint Committee on Congressional Operations. (HRes 420)

Select Committee on Intelligence: The House passed a resolution establishing a permanent Select Committee on Intelligence in the House to oversee the CIA and other intelligence activities. (HRes 658)

Federal Election Commission Authorization: A new law authorizes $8.1 million for the Federal Election Commission for fiscal 1978. (PL 95–127)

Franked Mail Act of 1977: The House passed a bill establishing certain limitations on the use of the franking privilege. (HR 7792)

Eliminating October pay increases: A new law denies the October, 1977, pay comparability adjustment to senior officials of the executive, legislative and judicial branches. (PL 95–66) Earlier this year, Congress enacted a law requiring that future pay raises for Members of Congress recommended by the Quadrennial Commission on Executive, Legislative and Judicial Salaries be approved by a recorded vote in both the House and Senate. (PL 95–19)

District office space: The House passed a resolution providing an additional amount for district office rental. (HRes 687)

Select Committee on Assassinations: The House passed a resolution granting the Select Committee on Assassinations authority to make applications to the courts and bring and defend certain lawsuits. (HRes 760)

House radio and television coverage: The House passed a resolution authorizing closed-circuit televising of House floor sessions to Member, Committee and other House offices; a study through February 15, 1978, of methods of providing radio and television coverage of House sessions to the media and public; and establishment after the study of a radio and television broadcasting system for the press and public under the direction of the Speaker. (HRes 866)

GOVERNMENT OPERATIONS

Reorganization Act of 1977: A new law gives the President authority for three years to transmit to Congress executive branch reorganization plans; such plans would take effect after 60 days unless either house of Congress passed a resolution of disapproval. (PL 95–17)

Reorganization plan No. 1: The House approved the President's Reorganization Plan No. 1, providing for a reorganization of the Executive Office of the President. (HRes 688)

GAO audits of the IRS and the Bureau of ATF: A new law authorizes the GAO to audit and review the operations of the Internal Revenue Service and the Bureau of Alcohol, Tobacco, and Firearms of the Department of the Treasury. (PL 95–125)

Federal Grant and Cooperative Agreement Act: Both houses passed in differing forms a bill to standardize the meaning of the terms federal "contract," "grant" and "cooperative agreement" as recommended by the Commission on Government Procurement in 1972. (HR 7691)

Federal program information: Both houses passed in differing forms a bill to provide for the efficient and regular distribution of current information to the public on federal domestic assistance programs. (S 904)

Federal banking agency audits: The House passed a bill authorizing the General Accounting Office to audit the operations of the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation and the Federal Reserve System. (HR 2176)

Federal Reserve reform: The House passed legislation setting guidelines for Federal Reserve monetary policy, requiring the Board to consult with Congress, broadening representation on the 12 Federal Reserve Bank boards, requiring Senate confirmation for the chairman and vice chairman of the Federal Reserve Board and prohibiting conflicts of interest. (HR 8094)

INTERNATIONAL AFFAIRS

Rhodesian chrome: Congress enacted a law authorizing the President to reimpose the embargo on imports of chrome ore, ferrochrome and nickel from Rhodesia as a sanction against minority rule. (PL 95–12)

International development and food assistance: A new law authorizes $1.6 billion for international food and economic development assistance in fiscal 1978. (PL 95–88)

Export Administration Act amendments: Congress enacted a law to extend the Export Administration Act for two years and prohibit American compliance with foreign boycotts of nations friendly to the U.S. In addition, the bill would prohibit the export of Alaskan oil for two years if the President makes certain findings. (PL 95–52)

International financial institutions: A new law authorizes $5.2 billion for the World Bank and five other international development lending institutions. The law directs U.S. representatives to oppose loans to countries violating human rights unless programs are specifically directed to basic human needs. Representatives must consider the responsiveness of Vietnam, Cambodia and Lacs in accounting for MIAs, and oppose loans for production of palm oil, sugar or citrus crops if the U.S. is a competing producer of that commodity. (PL 95–118)

International security assistance: A new law authorizes $3.2 billion for international security assistance in fiscal 1978, including funds for grant military assistance programs, grant military education and training programs, foreign military sales credits and gaurantees, security supporting assistance, the Middle East Special Requirements Fund, the contingency fund, International Narcotics Control, and the Southern African Special Requirements Fund. (PL 95–92)

Military assistance to Portugal: Congress enacted a law authorizing $32.25 million in supplemental military assistance to Portugal for fiscal 1977. Funds would be used to help equip and train a newly established 4,000 man air-transportable Portuguese brigade which would be assigned to NATO. (PL 95–23)

Soviet Jews: The House and Senate adopted in final form a concurrent resolution expressing the concern of Congress regarding the harassment of Soviet Jews and other minorities. (SConRes 7)

State Department supplemental: Congress enacted a law authorizing $89,650,000 in supplemental funds for the Department of State for fiscal 1977. (PL 95–45)

International Trade Commission: A new law authorizes $11.5 million for the International Trade Commission (ITC) in fiscal 1978 and makes administrative improvements in the commission's operation. (PL 95–106)

Foreign relations authorization: A new law authorizes $1.6 billion in fiscal 1978 for the Department of State, the U.S. Information Agency, and the Board for International Broadcasting. (PL 95–105)

Arms Control and Disarmament Agency: A new law authorizes $14.6 million for the Arms Control and Disarmament Agency in fiscal year 1978. (PL 95–108)

Export-Import Bank: A new law realigns the authorization of the Export-Import Bank with the new fiscal year and requires certain bank actions concerning human rights, export subsidy programs and nuclear proliferation. (PL 95–143)

Atlantic Tuna Convention Act: Congress enacted a law authorizing necessary sums through 1980 to carry out the Atlantic Tuna Convention Act of 1975. (PL 95–33)

Prisoner exchange: A new law implements U.S. bilateral treaties with Mexico and Canada for exchange of nationals in each other's jails. (PL 95–144)

United States-Canadian reciprocal fisheries agreement: A new law gives congressional approval to a Reciprocal Fisheries Agreement between the United States and Canada during 1977. (PL 95–73)

Fishery Conservation Zone Transition Acts: A new law sanctions 200-mile international fishing agreements with six nations; another new law sanctions such agreements for three other countries and the Common Market. (PL 95–6; PL 95–8)

Peace corps authorization: A new law authorizes $82.9 million for the Peace Corps in fiscal 1978. (PL 95–102)

Harp seals: Congress adopted in final form a concurrent resolution expressing the concern of Congress with respect to the killing of new-born harp seals in Canadian waters. (HConRes 142)

Trading with the Enemy Act reform: Both houses passed in differing forms a bill limiting the provisions of the Trading With the Enemy Act to declared wars and authorizing the President to regulate international economic transactions during national emergencies. (HR 7738)

International navigational rules: A new law implements the 1972 Convention on the International Regulations for Preventing Collisions at Sea. (PL 95–75)

Romanian earthquake relief: Congress enacted legislation authorizing $20 million for relief and rehabilitation assistance to victims of earthquakes in Romania. (PL 95–21)

Diplomatic relations: The House passed a bill repealing the immunity statute for the foreign diplomatic community in the United States. The bill also would require liability insurance for all embassy personnel and their families who plan to operate motor vehicles, vessels or aircraft while in the United States. (HR 7819)

Nuclear Antiproliferation Act: The House passed a bill to amend the Atomic Energy Act of 1954 to apply uniform standards for licensing of nuclear exports, to define specific criteria for the negotiation of new Agreements for Cooperation in the exchange of nuclear technology, and to promulgate regulations for timely action on nuclear export licenses by the concerned government agencies. The bill also spells out numerous multilateral steps to combat nuclear proliferation and instructs the President to pursue them. (H.R. 8638)

Cultural property: The House passed a bill to implement Articles of the UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. (H.R. 5643)

Human rights in Cambodia: The House passed a resolution expressing its concern over human rights violations in Cambodia. (H. Res. 724)

Permanent residence status for Indochina refugees: A new law authorizes the creation of a record of admission for permanent residence in the cases of certain refugees from Vietnam, Laos, or Cambodia. (P.L. 95–145)

Fishermen's Protective Act: Both houses passed in differing forms a bill to extend the cooperative insurance program on the Fishermen's Protective Act of 1967 through fiscal 1978. (S. 1184)

NATIONAL DEFENSE

Department of Defense authorization: A new law authorizes $36 billion in fiscal 1978 for military procurement, research and development and civil defense and authorizes active-duty and reserve forces strength of 2.9 million and civilian personnel of 1 million. (P.L. 95–79)

Coast Guard authorization: A new law authorizes $1,262,521,000 for the Coast Guard in fiscal 1978. The law also authorizes active duty personnel of 38,145 and provides for average military training student loads. (P.L. 95–61)

Nuclear rescission: A new law rescinds $664 million, including $453 million which had been intended for a new nuclear carrier and conversion of an existing ship to a nuclear-armed vessel. (P.L. 95–15)

Military enlistment bonus extension: A new law extends for fifteen months, to September 30, 1978, existing authority to pay enlistment bonuses up to $3,000 and re-enlistment bonuses up to $15,000 for enlisted military personnel in the Armed Services. (P.L. 95–57)

Defense Production Act: A new law extends the Defense Production Act by two years, until September 30, 1979. (PL 95–37)

Battle Monuments Commission: The House passed a bill providing that any retired member of the Armed Forces recalled to active duty with the American Battle Monuments Commission shall not be chargeable against the authorized end strengths and grade limitations of the Department of Defense or the military departments concerned. (HR 7678)

Strategic and critical materials: The House passed a bill to amend the Strategic and Critical Materials Stock Piling Act by establishing a stockpile procurement fund, encouraging barter for stockpile materials, and requiring specific rather than standing authorization for acquisition of materials. (HR 4895)

Military construction authorization: A new law authorizes $3.7 billion in fiscal 1978 for certain construction at military installations. (PL 95-82)

ERDA national security authorization: A bill reported from conference would authorize $2.61 billion for the national security functions and programs administered by the Energy Research and Development Administration (ERDA), including enhanced radiation weapons. (S 1339)

National Defense Reserve Fleet: The House passed a bill authorizing the Secretary of Commerce to acquire Mariner class and other suitable vessels in exchange for obsolete vessels in the National Defense Reserve Fleet. (HR 7278)

Department of Defense supplemental authorization: A bill reported from conference would authorize $476.4 million in fiscal 1978 for military procurement of missiles and aircraft, and military research development, test and evaluation, including funds for the air-launched cruise missile in lieu of the B–1 bomber and studies for converting commercial transports to cruise missile carriers. (S 1863)

Survivor benefit plan for military retirees: The House passed a bill making certain improvements in the Retired Serviceman's Family Protection Plan (RSFPP) and the Survivor Benefit Plan (SBP). (HR 3702)

SCIENCE

NASA authorization: A new law authorizes $4.05 billion for the National Aeronautics and Space Administration for fiscal 1978. (PL 95–76)

NSF authorization: A new law authorizes $884 million for the National Science Foundation in fiscal 1978. (PL 95–99)

FAA authorization: The House passed a bill authorizing $85 million for Federal Aviation Administration research in fiscal 1978 (HR 3965)

HEALTH

Health Programs Extension Act of 1977: A new law authorizes $3.3 billion for health programs in fiscal 1978, including health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; the National Cancer Institute; the National Heart, Lung, and Blood Institute, National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; health resources development; and community mental health centers. (PL 95–83)

Renal Disease: The House passed a bill providing incentives to encourage the use of lower cost, medically appropriate self-dialysis as an alternative to high-cost institutional dialysis by suitable patients suffering from renal disease. (HR 8423)

Medicare-medicaid antifraud abuse: Congress enacted a law to strengthen the capability of the government to detect, prosecute and punish fraudulent activities under the medicare and medicaid programs. (PL 95–142)

Black lung benefits: A bill in conference would create an industry trust fund for black lung benefits for coal miners disabled by pneumoconiosis (black lung disease) and their widows and expand eligibility for benefits. (HR 4544)

Mine safety and health: A bill cleared for the President would improve health and safety protection for metal and nonmetal miners and would transfer coal and noncoal mine safety enforcement to the Department of Labor. (S 717)

Medicare-medicaid coverage for rural health clinics: A bill in conference would provide medicare and medicaid eligibility for rural health clinics and would authorize demonstration projects for clinics in medically underserved urban areas and for outpatient mental health centers. (HR 8422)

Saccharin ban moratorium: A bill in conference would authorize a review of information on food additives, prohibit certain restrictions on saccharin for 18 months and authorize during that period warnings in stores of health risks of saccharin. (S 1750)

Health Professionals Education Amendments of 1977: The House passed a bill to revise capitation requirements for schools of medicine and dentistry, authorize an additional $1 million for public health traineeships in fiscal 1979 and 1980, expand traineeship eligibility and make technical amendments to the health professions guaranteed student loan program. (HR 9418)

EDUCATION

Vocational education: A new law makes technical and miscellaneous amendments to the Vocational Education Act, including provisions relating to the use of federal funds for state and local administrative support. (PL 95–40)

School lunch, child nutrition amendments: A bill cleared for the President would extend the summer feeding program three years through fiscal 1980, tighten adminis-

tration, extend commodity purchase authority for the nutrition for the elderly program, make improvements in the food service equipment program and the free breakfast program in extremely needy schools and authorize federal grants of 50 cents per child for a national nutrition education program. (HR 1139)

Education of the handicapped: Congress enacted a law authorizing $1.1 billion over five years for the Education of the Handicapped Act. (PL 95–49)

Higher education: A new law makes higher education technical amendments and authorizes $75 million for each fiscal 1978 and 1979 for Title VI of the National Defense Education Act—Foreign Area Studies and Language Development. (PL 95–43)

Career Education Act: A bill in conference would authorize $275 million over five years for career education programs in elementary and secondary schools. (HR 7)

Law school depository libraries: The House passed a bill providing for the designation of libraries of accredited law schools as depository libraries of government publications. (HR 8358)

Pacific Islands: The House passed a bill to include the Trust Territory of the Pacific Islands in the definition of "state" for the purpose of participating in programs authorized by the Higher Education Act. (HR 9512)

ESEA extension: A new law would extend through fiscal 1979 advance funding for Titles I (disadvantaged aid) and IV (libraries and other support) of the Elementary and Secondary Education Act of 1965 and the Adult Education Act. (PL 95–112)

Library services: A new law would extend the Library Services and Construction Act for five years, through September 30, 1982, and would authorize use of funds for services provided by urban libraries. (PL 95–123)

Center for the book: A new law would establish a Center for the Book in the Library of Congress. (PL 95–129)

LABOR

Minimum wage: A new law raises the minimum wage to $2.65 an hour on January 1, 1978 (from the present $2.30), and to $2.90 in 1979, $3.10 in 1980 and $3.35 in 1981, and decreases the allowance for tip credit. (P.L. 95–151)

Labor law reform: The House passed a bill to enlarge and strengthen the NLRB and expedite union representation elections under the National Labor Relations Act. (H.R. 8410)

Mandatory retirement: A bill in conference would raise to 70 the age for mandatory retirement in the private sector and would eliminate the mandatory retirement age for most federal workers. (H.R. 5383)

CONSUMERS

FTC amendments: Both houses passed a bill in differing forms to amend the Federal Trade Commission Act to expedite the enforcement of cease and desist orders and compulsory process orders; and to authorize $63 million for fiscal 1978 and $70 million for fiscal 1979 for the FTC. (H.R. 3816)

Utility pole attachments: The House passed a bill requiring the Federal Communications Commission to regulate the attachment of communication wires to utility poles when a state does not provide such regulation. (H.R. 7442)

Debt collection practices: A new law prohibits professional debt collectors from harassing or intimidating any person in connection with the collection of a debt and from making false or misleading representations. (P.L. 95–109)

National Consumer Cooperative Bank: The House passed legislation creating a National Consumer Cooperative Bank to make loans at market interest rates to consumer cooperatives. The bill would also provide technical assistance to consumer cooperatives and establish a Self-Help Development Fund to assist emerging cooperatives in the inner cities and rural areas. (H.R. 2777)

Saturday mail delivery: The House passed a concurrent resolution expressing the sense of the Congress that the U.S. Postal Service should not reduce the frequency of home mail delivery service. (H. Con. Res. 277)

JUSTICE

Privacy Protection Commission: Congress enacted a law extending the life of the privacy Protection Study Commission two and a half months until September 30, 1977. (PL 95–38)

Legal Services Corporation: A bill in conference would authorize $217 million in fiscal 1978 and $275 million in fiscal 1979 for the Legal Services Corporation and eliminate certain restrictions on legal aid to the poor.

Federal Rules of Criminal Procedure: A new law approves certain proposed amendments to the Federal Rules of Criminal Procedure and disapproves other proposed changes. (PL 95–78)

Commission on Uses of Copyrighted Works: Congress cleared for the President legislation to extend until July 31, 1978, the term of the National Commission on New Technological Uses of Copyrighted Works. (HR 4836)

Indians claims statute of limitations: A new law extends until April 1, 1980, the deadline for commencing tort or contract actions for Indian claims which accrued before July 18, 1966. (PL 95–103)

Indians claims: A new law authorizes $2.25 million for the Indian Claims Commission for fiscal 1978 and facilitates the transfer of cases from the Commission to the United States Court of Claims. (PL 95–69)

Age discrimination: A new law extends for six months the deadline for the U.S. Commission on Civil Rights' report on age discrimination. The bill also would extend the commodities provision of the Older Americans Act through fiscal 1978 and permit the acceptance of cash in lieu of commodities. (PL 95–65)

Drug enforcement: A new law authorizes $645 million for three years for drug enforcement under the Controlled Substances Act. (PL 95–137)

Juvenile justice: A new law extends the Juvenile Justice and Delinquency Prevention Act of 1974 and authorizes $150 million in fiscal 1978, $175 million in fiscal 1979 and $200 million in fiscal 1980. The law also authorizes $25 million in each fiscal 1978, 1979 and 1980 for the Runaway Youth Act and permits the President to submit a plan to transfer the latter program from HEW after April 30, 1978. (PL 95–115)

Sexual exploitation of minors: A bill in conference would protect children from sexual exploitation through juvenile prostitution and the making of films or photographs of children engaging in sexual conduct. (S. 1585)

Child abuse prevention and treatment amendments: Both houses passed in differing forms a bill to extend the Child Abuse Prevention and Treatment Act for five years through September 30, 1982, and to prohibit sexual exploitation of minors. (HR 6693)

U.S. Commission on Civil Rights: A new law authorizes $10,480,000 for fiscal 1978 for the U.S. Commission on Civil Rights. (PL 95–132)

Customs procedural reform: The House passed a bill to provide customs procedural reform, to simplify certain entry procedures, to revise certain personal duty-free exemptions for liquor, cigarettes and articles. (HR 8149)

Associate Attorney General: A new law establishes the position of Associate Attorney General with the Department of Justice. (PL 95–139)

Victims of Crime Compensation: The House passed a bill authorizing $25 million in fiscal 1978, $30 million in fiscal 1979 and $35 million in fiscal 1980 to assist states and compensating innocent victims of crime. Federal assistance would be limited to $25,000 per person. (HR 7010)

ENVIRONMENT AND NATIONAL PARKS

Clean air: A new law would authorize $211.5 million for the Clean Air Act in each fiscal 1978–80; extend pollution compliance deadlines for automobiles, plants, and other emission sources and enlarge state authority to deal with significant deterioration of clean air areas and to permit growth in "non-attainment" (dirty air) areas. (PL 95–95)

Surface mining control and reclamation: A new law provides for a state-federal program to regulate the surface mining of coal and the surface impact of underground mines, to provide for the reclamation of abandoned mines and to establish mining and mineral institutes, coal research laboratories and graduate research fellowships. Mining is prohibited on developed farmlands of alluvial valley floors, and procedures are established to determine areas unsuitable for surface mining. (PL 95–87)

EPA authorization: A bill cleared for the President would authorize $253.6 million for research, development and demonstration activities of the Environmental Protection Agency (EPA) during fiscal 1978. (HR 5101)

Tinicum National Environmental Center: Both houses passed in differing forms legislation authorizing an additional $7.25 million for acquisition of land and development of the Tinicum National Environmental Center in Pennsylvania. (HR 2817)

Water Resources Council: A new law authorizes $3,905,000 for the U.S. Water Resources Council in fiscal 1978 for coordinating and directing river basin planning. (PL 95–41)

Saline Water Conversion: A new law authorizes $61,950,000 for saline water research and general water research grants. (PL 95–84)

Oceans and atmosphere: A new law establishes qualifications for individuals appointed to the National Advisory Committee on Oceans and Atmosphere (NACOA), sets the number of members at 18 and authorizes $520,000 for the committee in fiscal 1978. (PL 95–63)

National sea grant program: A new law authorizes $58 million for the National Sea Grant Program in fiscal 1978. (PL 95–58)

National wildlife refuges: Both houses passed in differing forms legislation authorizing $32.3 million for the National Wildlife Refuges at San Francisco Bay, Seal Beach and the Great Dismal Swamp in Virginia and North Carolina. (HR 5493)

Land and Water Conservation Fund: A new law establishes a special account of $450 million in the Land and Water Conservation Fund to be used for a 3-year program to acquire remaining private land in previously authorized units of the national park system. (PL 95–42)

Water pollution control: A bill in conference would authorize $18.2 billion over three years for federal water pollution control programs. (HR 3199)

Eleanor Roosevelt Memorial: A new law authorizes $995,000 for land acquisition and development of the Val-Kill retreat of Eleanor Roosevelt as a National Historic Site. (PL 95–32)

Manassas National Battlefield Park: The House passed a bill authorizing an 1800-acre expansion of the existing Manassas National Battlefield Park in Virginia. (H.R. 2437)

Soil and water resources conservation: Both houses passed in differing forms a bill to establish a mechanism for making long-range policy for the conservation, protection

and enhancement of the nation's land, water and related resources. (S 106)

Bull Run Reserve: A new law permits general recreational access and other multiple uses for six months within a 42,500-acre portion of the Bull Run Reserve, Mt. Hood National Forest, Oregon. (PL 95–55)

Safe drinking water: Both houses passed in differing forms a bill authorizing $71 million in fiscal 1978 and $81 million in fiscal 1979 for the Safe Drinking Water Act. (S 1528)

Endangered Species Act: Both houses passed in differing forms a bill authorizing $16 million for fiscal 1978 through 1981 for cooperative agreements with the states under the Endangered Species Act and revising criteria to facilitate the making of such agreements. (S 1316)

Marine protection authorization: Congress cleared for the President a bill authorizing $11,800,000 in fiscal 1978 for the Marine Protection, Research and Sanctuaries Act and prohibiting ocean dumping of municipal sewage sludge after 1981. (HR 4297)

Appalachian National Scenic Trial: The House passed a bill authorizing an additional $85 million from the Land and Water Conservation Fund for the purchase of additional portions of the Appalachian National Scenic Trail. (HR 8803)

Wilderness Lands: A new law provides for the study of 970,000 acres in Montana for inclusion in the National Wilderness Preservation System. (PL 95–105)

Endangered American Wilderness Act: Both houses passed in differing forms a bill designating 1.7 million acres in nine western states for preservation under the national wilderness system. (HR 3454)

Marine mammal protection authorization: A new law authorizes $15.7 million for marine mammal protection programs in fiscal 1978. (PL 95-136)

Earthquake hazards reduction: A new law authorizes $56 million in fiscal 1978, $72 million in fiscal 1979 and $82 million in fiscal 1980 for national earthquake hazards reduction programs. (PL 95–124)

National climate program: The House passed a bill authorizing $50 million in fiscal 1978 for the establishment of a national climate monitoring program. (HR 6669)

Navigation development: The House passed a bill authorizing replacement of locks and dam 26 near Alton, Illinois; levying a fuel tax of four cents in 1979 rising to six cents in 1981 for certain inland waterway users and requiring a three-year study of user charges. (HR 9309)

Rivers and harbors improvements: The House passed a bill establishing a policy with respect to the roles of the Corps of Engineers and private industry in meeting national dredging needs. (HR 7744)

Oil Pollution Liability and Compensation Act: The House passed a bill establishing a fee-funded $200,000,000 oil pollution damages fund and to impose a primary liability on the owner or operator of the pollution sources. (HR 6803)

MARITIME

Maritime authorization: A bill cleared for the President would authorize $553 million for maritime activities in fiscal 1978, including ship construction and operating subsidies, and research and the Merchant Marine Academy, and require action against illegal rebating. (S 1019)

Marine mammal protection (tuna-dolphin bill): The House passed a bill to reduce mortality and serious injury of dolphins incidental to commercial tuna fishing operations and to provide some relief to the United States tuna fleet when taking dolphins during such fishing. (HR. 6970)

Commercial fisheries research and development: Congress enacted a law authorizing an additional $33.9 million through fiscal 1980 for the Commercial Fisheries Research and Development Act. (PL 95–53)

TRANSPORTATION

Highway funds: Both houses passed in final form a concurrent resolution directing the Secretary of Transportation to apportion highway sums authorized for fiscal 1979 for immediate expenditure on Interstate and Defense highways. (HConRes 282)

Urban mass transportation amendments: The House passed a bill to increase the federal share of certain emergency railroad operating assistance. (HR 8346)

Federal highway obligations: The House passed a bill limiting obligations for federal-aid highways and highway safety construction programs to $7,445,000,000 in fiscal 1978. (HR 7462)

U.S. Railway Association: Both houses passed in differing forms a bill authorizing $13 million in fiscal 1978 for U.S. Railway Association litigation arising from the reorganization of the bankrupt railroads in the Northeast and Midwest. (HR 4049)

AGRICULTURE

Food and Agriculture Act of 1977: A new $12 billion, four-year farm and food law adjusts price supports, increases the limitation on payments to individual farmers, establishes an on-farm grain reserve program, extends the Food for Peace program, makes major revisions in the food stamp program and authorizes a variety of farm and rural conservation programs. (PL 95–113)

Disaster payments: A bill cleared for the President would exempt natural disaster payments from the individual payment limitation for the 1977 crop of wheat, feed grains, upland cotton, and rice. (HR 9090)

Deferral of wheat referendum: Congress enacted a law deferring a 1977 wheat marketing quota referendum. (PL 95–48)

Federal Crop Insurance Corporation: Congress enacted a law to increase the authorized capital stock of the Federal Crop Insurance Corporation from $100 million to $150 million. (PL 95–47)

Paperwork reduction in agricultural census: The House passed a bill providing for a 40-percent reduction in farmers' paperwork for the 1979 agricultural census and expanding the census to smaller farms. (HR 7012)

FIFRA: A House passed bill would make major revisions in the Federal Insecticide, Fungicide and Rodenticide Act. The bill would expedite pesticide registration by EPA. It would aid small formulators by authorizing generic registration of chemicals. It would aid the industry by authorizing conditional registration under certain conditions which safeguard against risk to the environment. The bill would encourage research by allowing proprietary rights to manufacturers and formulators who develop safe and effective pesticides, and it would direct the Agriculture Department to give priority to research on biologically integrated alternatives to pest control. (HR 7073)

DROUGHT AND DISASTER RELIEF

Congress enacted four related laws authorizing $325 million and appropriating $275 million for drought assistance. Another law appropriated $200 million under a previous authorization for drought and cold disaster assistance.

Drought emergency relief: A new law authorizes $100 million in fiscal 1977 for water acquisition and other drought relief activities to mitigate the 1976–77 drought in several western states. (PL 95–18)

Community emergency drought relief: Congress enacted a law authorizing $225 million in grant and loans to augment community water supplies in drought areas. (PL 95–31)

Two appropriations laws: The Supplemental Appropriations Act (PL 95–26) appropriates $100 million for the drought emergency authorization in PL 95–18, and the Economic Stimulus Appropriations Act (PL 95–29) appropriates $175 million for the community drought relief act, PL 95–31.

Disaster relief: Congress enacted an urgent supplemental appropriations law providing $200,000,000 under a previous authorization for disaster relief in several Western and Midwestern States suffering from drought or cold this past year. (PL 95–13)

Disaster relief: A new law extends the Disaster Relief Act of 1974 through fiscal 1978 and authorizes certain drought assistance by the Corps of Engineers. (PL 95–51)

FEDERAL EMPLOYEES

Federal life and health benefits during retirement: The House passed a bill reducing from 12 to 5 years the length of service required to retain federal employee group life insurance and health benefits coverage during retirement. (HR 4319)

Restoration of certain annuities: The House passed legislation restoring survivor annuities to certain surviving spouses of federal employees which were terminated because of the remarriage of the spouse before July 18, 1966, and the annuity of a surviving spouse of a Member of Congress who died before January 8, 1971, which was terminated because of the remarriage of such spouse. (HR 3755)

Uniformity for Federal employees health benefits: The House passed a bill providing that any contract under the Federal Employees Health Benefits Program shall preempt any conflicting state or local law. (HR 2931)

Hatch Act reform: The House passed a bill to repeal the prohibitions on candidacy or campaign participation by most federal workers in partisan political elections. (HR 10)

Increase in number of hearing examiners: The House passed a bill increasing by 100 the number of hearing examiner positions which the Civil Service Commission may establish in grade GS-16. (HR 6975)

U.S. Postal Service Arbitration Board: The House passed a bill to establish 3-member arbitration boards to consider disputes between the Postal Service and a supervisors' organization. (HR 7132)

VETERANS AFFAIRS

Veterans compensation: A new law increases by 6.6 percent service-connected disability compensation and dependency and indemnity compensation for veterans and their survivors. (PL 95–117)

Veterans and Survivors Pension Adjustment Act of 1977: Both houses passed in differing form legislation increasing veterans and survivors pensions by 6.5 percent, providing a 25 percent differential to World War I surviving spouses age 78 or older, and increasing the limits on outside income which beneficiaries may receive and still be eligible for a full pension. (H.R. 7345)

Eliminating mobile home inspections by the VA: The House passed a bill eliminating the requirement for inspections of the mobile home manufacturing process by the Administrator of Veterans Affairs. (H.R. 4341)

Veterans home facilities: A new law authorizes $15 million for each fiscal 1978 and 1979 to revise the program of grants to states for construction, remodeling, and renovation of state home facilities for veterans. (PL 95–62)

Medical services for veterans in the Philippines: The House passed a bill extending for 15 months through fiscal 1979 at a rate of $2.1 million per year authority to provide hospital care and medical services for certain Philippine veterans. (H.R. 5029)

VA medical facilities acquisition: The House passed a bill revising procedures relating to the construction, alteration, and

acquisition of VA medical facilities. (H.R. 5025).

VA medical services for veterans in Hawaii and Alaska: Both houses passed a bill in differing forms clarifying a requirement that medical services continue to be provided on a fee basis to service-connected disabled veterans in Alaska and Hawaii. (H.R. 5027)

Automobile assistance allowance for disabled WWI veterans: A new law provides an automobile assistance allowance and automotive adaptive equipment to certain disabled veterans of World War I. (PL 95–116)

Veterans compensation for paired extremities: The House passed a bill providing increased awards of service-connected compensation to certain veterans who have suffered the loss or loss of use of paired extremities. (H.R. 6501)

Disabled veterans housing assistance: The House passed a bill providing specially adapted housing assistance to veterans with a permanent and total service-connected disability due to the loss or loss of use of one upper and one lower extremity. (HR 7658)

Veterans benefits entitlement: A new law denies veterans benefits to certain Vietnamera veterans with upgraded discharges unless a Discharge Review Board makes a separate recommendation. (PL 95–126)

Physicians and Dentists Pay Comparability Act: The House passed a bill to extend through September 30, 1978, special pay and incentive pay to physicians and dentists in the Veterans Administration. (HR 8175)

GI Bill Improvements Act: Both houses passed in differing forms a bill increasing veterans education benefits by 6.6 percent. (HR 8701)

DISTRICT OF COLUMBIA

Borrowing authority for the District of Columbia: A new law provides the District of Columbia with authority until October 1, 1979, to borrow from the U.S. Treasury to finance capital projects. (PL 95–131)

Retirement funds for D.C. police and firemen, teachers and judges: The House passed a bill to establish actuarially-sound retirement funds for D.C. police and firemen, teachers, and judges and to make certain changes in retirement benefits. (HR 6536)

Federal payment for D.C. water and sewer services: A new law provides for a revised system for the billing and collection of charges incurred by the federal government for the consumption of water and sewer services provided by the District of Columbia. (PL 95–122)

Pretrial release or detention in the District of Columbia: The House passed a bill to restrict the pretrial release or detention of persons charged with certain violent crimes in the District of Columbia. (HR 7747)

Air space use for postal conveyor: The House passed a bill to permit the construction of a conveyor bridge across First St., N.E., to carry mail between the post office and Union Station. (HR 7765)

APPROPRIATIONS, FISCAL 1978

	Bill	Compared with President's request
Agriculture (Public Law 95–97)	$12, 749, 378, 000	−$167, 639 000
Defense (Public Law 95–111)	109, 752, 766, 000	−2, 658, 114, 000
H—District of Columbia (H.R. 9005)	326, 466, 000	−164, 650, 000
Foreign assistance (H.R. 7797)	6, 772, 654, 000	−828, 807, 136
HUD-Independent agencies (Public Law 95–119)	69, 370, 554, 000	−1, 403, 858, 000
Interior (Public Law 95–74)	10, 026, 349, 000	+4, 037, 000
C—Labor-HEW (H.R. 7555)	60, 168, 561, 000	−425, 409, 000
Legislative (Public Law 95–94)	990, 067, 800	−144, 653, 800
Military construction (Public Law 95–101)	$2, 977, 720, 000	$37, 880, 000
Public Works (Public Law 95–96)	10, 294, 414, 000	−73, 697, 000
State-Justice-Commerce (Public Law 95–86)	7, 709, 432, 000	+231, 875, 500
Transportation (Public Law 95–85)	6, 196, 609, 023	−85, 175, 000
Treasury-Postal (Public Law 95–81)	7, 473, 254, 000	−115, 242, 000
H—Supplemental, 1978 (H.R. 9375)	7, 182, 602. 000	−653, 122, 000
Total	311, 995, 826, 823	−6, 523, 334, 436

Note: Figures are as enacted except foreign assistance (sent to President), Labor-HEW (conference figure), District of Columbia and supplemental (both are House-passed figures).

First rescission: A law rescinded $47,500,000 in fiscal 1977 contract authority for purchase, processing or transportation of helium. (PL 95–10)

Second rescission: A law rescinds fiscal 1977 appropriations totaling $644 million, including $453 million originally intended for a new nuclear carrier and adaptation of an existing ship to nuclear arms and $143.6 million for military retired pay. (PL 95–15)

Third rescission: The House passed a bill rescinding fiscal 1977 appropriations of $21,090,000 for foreign military credit sales and $75,000,000 for the General Services Administration Federal Buildings Fund. (HR 9019)

Deferrals: The House passed three resolutions disapproving deferrals totaling $25.6 million for energy research and development programs and required the Administration to spend the money. (HRess 305, 306, 307)

FRAMING AN ENERGY CHARTER FOR THE NATION

Mr. Speaker, as I said, energy is one of the major items remaining for consideration by the first session of the 95th Congress. Following is a status report on that legislation as of November 1, 1977, including a description of some of the issues facing conferees and a brief account of the Nation's energy situation today and of the overwhelming need for energy legislation:

Congress goes on standby as House and Senate conferees settle into the task of putting into final form the most important energy legislation in the nation's history.

Floor sessions and other congressional activities have been suspended to permit conferees to concentrate without distraction on the critical work of resolving differences between the House and Senate passed versions of President Carter's proposed National Energy Act.

The final product is expected to be a volume-sized Act of Congress that will become the nation's energy charter.

Need: The need is overwhelming. United States demand for oil grows daily; domestic production continues to decline; and the nation is being forced into dependence on foreign imports at an alarming rate. If things continue as in the past, our oil demand will rise from 17.4 million barrels per day (in 1976) to more than 21 million in 1980 and almost 25 million in 1990. This kind of consumption will mean that we would have to import more than half our oil needs by the mid-1980's and almost 60 percent of our needs by 1990.

Energy supply is irrevocably linked with inflation, as our experience during the 1973–74 oil shortage showed. Purchasers throughout the industrialized world fueled the inflation by bidding up the price of oil. Many countries, including the United States, were forced to devalue their currency. The cost of food, which is heavily dependent on energy supplies, went up dramatically. The unfortunate coincidence of a poor world harvest and a cold winter stepped up the process and brought us the most serious worldwide economic recession since the 1930's.

Just seven years ago, we were importing less than a fourth of our oil needs and paying less than $6 billion for it. Today we import almost half our oil consumption at a cost of $45 billion—twice the size of our projected trade deficit for this year. And the rate is increasing. Oil imports for the first eight months of this year are up 28 percent from the same period last year. We are spending $5 million every hour to buy imported oil. We would need one Alaska oil discovery every two years just to replace the oil we consume. That is why we are working so hard to create an energy policy for America.

Issues: The National Energy Act would seek to encourage conservation in the use of energy, to facilitate the process of conversion to coal and to provide incentives to production. Major issues now before the conferees include natural gas regulation and the question of taxes vs. incentives, or some combination of the two, to promote conservation and production.

National Energy Act: President Carter's energy bill, one of the most important and complex pieces of legislation in our history, passed the House on schedule, 244–177, on August 5. During an intense summer's work, five standing committees and an Ad Hoc Committee on Energy worked on the component parts and ultimately brought them together into an energy charter for the nation. The Senate passed fragmented bills.

Natural gas: The House voted to increase regulated prices of "new" gas to $1.75 Mcf, rising thereafter, and to broaden the category of eligible gas. The Senate would phase out regulation altogether.

Taxes: The House bill would levy a tax on new gas guzzling automobiles, a three-stage equilization tax to raise domestic crude oil prices to world levels by 1980, and a tax on business use of oil and gas designed to encourage conversion to coal. Proceeds from the crude oil tax would be returned to the people. The Senate bill contained none of the taxes, providing $30-to-$40 billion in tax credits instead.

Energy Conservation: The House bill would encourage home insulation. Utilities would be required to offer insulation and energy saving measures to their customers by 1980. Manufacturers would be required to meet energy efficiency standards for refrigerators, air conditioners and other appliances within two to three years. Metal, paper, textile and rubber industries would be encouraged to use recycled materials. A $965-million three-year state-federal program would help schools, health facilities and municipal buildings implement energy savings alterations and operating procedures.

Weatherization: The House bill would authorize an additional $615 million over three years to step up existing weatherization programs for residential buildings and to establish such a program for low-income rural families. Mandatory energy standards would be established for new federally assisted housing. Energy loans to low- and moderate-income families would be eligible for GNMA purchase.

Regulation: The House bill would require utility rate structures to reflect costs and to vary on a time-of-day and seasonal basis. Federal Power Commission would have new authority to regulate bulk power facilities,

to order interconnections, to assure continuity of service, and other authority. The program to convert plants from gas and oil to other fuels would be made mandatory. A three-year, $150-million program would help cities and non-profit groups develop untapped hydro-electric potential of existing dams.

ACHIEVEMENTS OF FIRST DAYS OF NOVEMBER

Mr. Speaker, the first few days of November were very busy for Congress. Both houses cleared for the President important veterans, defense, saccharin and other legislation. I ask unanimous consent to include in the RECORD, following the listing of achievements of the first session and the energy legislation status report, a summary compiled on November 8, 1977, of the significant actions in Congress during early November.

CONGRESS CLEARS VETERANS, DEFENSE, SACCHARIN, AND OTHER MAJOR BILLS FOR PRESIDENT IN BUSY WEEK

Congress cleared for the President major veterans, defense, saccharin and other legislation, including a one-month extension of Labor-HEW funding, during the first few days of November. Important issues remaining for consideration during the first session include the energy legislation, social security financing amendments, abortion langauge and the prohibition on sexual exploitation of children.

The Senate on November 4 passed the social security bill (H.R. 9346) with amendments and requested conference. The Senate also passed the continuing resolution (H.J. Res. 643), funding Labor-HEW functions at the conference report levels and District of Columbia functions at fiscal 1977 levels through November, with the understanding that the Houses would seek to make a final resolution of the impasse on the abortion language late this month. The conference report on exploitation of minors (S. 1585) has passed the Senate and awaits House action. Conferees are working on the energy legislation and other bills.

Pending these actions, the House will meet in pro forma session with no legislative business each Tuesday and Friday until Tuesday, November 29, when the House will convene to consider conference reports and other final business.

President Carter on November 5 vetoed his first bill, S. 1811, ERDA civilian authorizations for fiscal 1978, citing his objections to the Clinch River breeder reactor. It is now up to the Senate to determine whether to return the measure to committee, to attempt to override or to take other action.

Additionally, during the busy first days of November, Congress cleared for the President the following measures:

Saccharin—S. 1750 prohibiting the FDA from restricting the use of saccharin for 18 months, requiring hazardous risk labeling of foods containing saccharin, and authorizing certain studies on saccharin and food additives;

Veterans' education benefits—H.R. 8701 providing a 6.6-percent $510-million-a-year increase in education benefits to some 1.9 million veterans and dependents effective October 1, 1977 (new rates: $311 a month, $13,995 during the benefit term for a single veteran; $370/$16,650 for a married veteran and $422/$18,990 for a couple with one child); authorizing accelerated payments for veterans going to higher-cost schools; increasing veterans' loan limits to $2,500 (from $1,500) per school year and liberalizing eligibility and authorizing for veterans who successfully complete their education programs a joint state-federal cancellation of up to two thirds of the loan to be applied against tuition-and-fee charges in excess of $700 per school term; extending loan entitlement for each of the two years following the 10-year delimiting period for veterans with loan eligibility; and making eligible for veterans benefits (but not retroactively) Women's Air Forces Service Pilots (WASPs) of World War II and certain other civilian federal employees, provided that the Secretary of Defense determines that their service constituted active military duty and issues to each eligible person an honorable discharge;

Veterans pension—H.R. 7345 providing a 6.5 percent increase in pension to 2.5 million veterans and survivors effective January 1, 1978, (House managers said they will try later to enact a 25-percent differential for World War II surviving spouses);

VA physicians and dentists pay—H.R. 8175 extending throughout fiscal 1978 special pay and special incentive pay for VA physicians and dentists but providing that contracts entered into for such pay may not expire later than fiscal 1981; requiring a study by VA of the need for continuing special pay in certain specialty categories in light of the executive salary increase of February 27, 1977, and authorizing reductions as the study may indicate in new agreements signed after April 30, 1978; requiring the meeting of proficiency standards in basic English by VA physicians and other VA health personnel in a direct-patient-care capacity and increasing salaries for VA optometrists and podiatrists to levels comparable to physicians retroactive to October 21, 1976.

Defense supplemental—S. 1863 authorizing $476.4 million in fiscal 1978 for missile and aircraft procurement and research, primarily on the cruise missile and its launcher as an alternative to the B-1 bomber,

ERDA national security—S. 1339 authorizing $2.61 billion for nuclear and other energy research and development for national security programs, including laser fusion research,

River basin plans—S. 2281 authorizing $215 million for continuation of approved water resources projects in nine river basin plans for which funds already have been appropriated (the authorization was previously approved in H.R. 5885, in which the Senate unconstitutionally originated a revenue-raising waterway-user charge amendment; the House will not consider the Senate amendment but passed its own waterway-user fee in H.R. 8309),

Rail commuter service—H.R. 8346 authorizing without new funding an increase to 80 percent (from 50 percent) in the federal share of assistance to certain commuter rail lines and eliminating a restrictive eligibility requirement and accepting a Senate authorization of $30 million for the program in each fiscal 1979 and 1980 with a 50-percent federal matching ratio and adding $20 million for other commuter rail lines not covered by existing law.

Safe drinking water—S. 1528 authorizing $71 million in fiscal 1978 and $81 million in fiscal 1979 for safe drinking water programs, requiring EPA studies of certain toxic pollutants and extending the deadlines by which states must attain primary enforcement responsibility for public water systems.

Maritime authorization—S. 1019 authorizing $553.6 million in fiscal 1978 for ship subsidy and other maritime programs and prohibiting illegal rebates,

Land and water resources—S. 106 authorizing necessary sums (estimated at $58 million over five years) for the Agriculture Department to appraise the nation's soil, water and related resources and to develop a National Soil and Water Conservation Program indicating the direction of future efforts,

Federal crop insurance—H.R. 9704 authorizing $200-million in capital stock for the Federal Crop Insurance Corporation, an increase of $50 million,

Appalachian child development projects—H.R. 8777 authorizing two years of transitional funding at not more than 75 percent of operating costs for certain Appalachian child development projects that have exhausted their five years of eligibility for federal assistance,

Alaska natural gas pipeline—H. J. Res. 621 approving the President's decision on the Alcan route overland through Canada for the Alaska natural gas pipeline,

Regulation Q—H.R. 9710 extending through December 15, 1978, authority for federal regulation of depository institutions interest rates, setting guidelines for Federal Reserve Board monetary policy and making other Federal Reserve improvements,

Federal Aviation Act amendments—H.R. 6010 extending aviation war risk insurance through 1982, authorizing standby reduced air fares for older Americans, requiring 15 days' public notice for changes in air passenger fares and freight rates, authorizing new all-cargo certificates, and making other changes,

Fishermen's Protective amendment—S. 1184 establishing a new program of loans to fishermen for damage of $2,000 or more to vessel or gear from foreign vessels or crew operating within the U.S. 200-mile limit after July 1, 1976, if the American fisherman assigns to the United States rights to recover damages from the foreign nation, in which cause loan repayment shall be forgiven (if the American fisherman was at fault, then he must repay the loan),

Direct purchase authority—H. J. Res. 611 extending until April 30, 1978, authority for Federal Reserve banks to purchase up to $5 billion in government obligations directly from the Treasury,

Distilled spirits—H.R. 4458 changing excise taxes on distilled spirits to encourage exportation, and

U.S. Railway Association authorization—H.R. 4049 authorizing $23 million in fiscal 1978 for the U.S. Railway Association for administration, the monitoring of ConRail operations and for U.S. legal representation in litigation to determine the value of the private properties incorporated into the massive ConRail reorganization of bankrupt railroads in the Northeast and Midwest; and authorizing appointment of special masters and the taking of appeals of certain decisions directly to the Supreme Court.

Following is a summary of other House and Senate actions in early November.

Deferral disapprovals—The House agreed to four resolutions (H. Res. 851, 852, 853 and 854) disapproving deferrals totaling $38.8 million for various nuclear and high-energy research programs and required the Administration to spend the money. No Senate action is necessary. A conference report on S. 1311, authorizing $297.7 million in fiscal 1978 for the Nuclear Regulatory Commission, was agreed to in the House and is in the Senate. Awaiting House consideration are H.R. 9378, as amended by the Senate, to protect the private pension plan insurance program by deferring certain liabilities and raising certain premiums, and conference reports on H.R. 8422 authorizing medicare and medicaid for rural clinics and H.R. 9375 making supplemental appropriations for fiscal 1978.

In conference: House and Senate went to conference on S. 305 prohibiting bribes by American business to foreign officials and foreign politicians, H.R. 9418 requiring an increase in third-year medical student enrollments, H.R. 1316 protecting endangered species, H.R. 3722 authorizing $67 million in fiscal 1978 for the Securities and Exchange Commission, and S. 1678 Federal Insecticide, Fungicide and Rodenticide Amendments. Already in conference are H.R. 9005 District of Columbia Appropriations, H.R. 3454 Endangered American Wilderness, H.R. 3199 Clean

Water Act, H.R. 5383 Mandatory Retirement Age, H.R. 7 Elementary and Secondary Career Education Act, H.R. 4544 Black Lung Benefits, and H.R. 6666 Legal Services Corporation.

Other House actions: In other actions last week, the House passed H.R. 8331 improving investors' financial protection against stock brokers' bankruptcy, disagreed to the Senate amendment to H.R. 9794 approving a fisheries agreement with Mexico and passed in final form H. Res. 871 extending the Select Committee on Ethics into the second session, H. Res. 868 requesting the cooperation of the government of South Korea with the House investigation and H. Res. 784 expressing the sense of the House that the President should establish a Commission on Domestic and International Hunger and Malnutrition. The House also passed and sent to the Senate H. Con. Res. 388 expressing concern about acts of repression in South Africa and H. Con. Res. 387 reaffirming the U.S. commitment to seek compliance with the human rights provisions of the Helsinki agreement.

KEEPING JOBS WHERE THEY ARE

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, for months some Members of the House have been working to develop legislation to encourage industries to modernize older industrial plants. We have seen too many cases where corporations have used various Federal tax benefits to build new, efficient plants in rural areas, only to follow up by closing their older, higher cost plants.

The tragic closing of Youngstown's Sheet & Tube Corp.'s steel plant in Ohio is not the last, but certainly one of the most shocking, examples. In my own city of Akron, the tire industry has lost 25,000 production jobs in the last 25 years, even though the industry has expanded enormously in other parts of the country, mostly by building plants in small, rural communities, thereby transforming them overnight into new industrial centers.

In Akron, unlike Youngstown, there has been no sudden collapse of the economy, only a slow attrition, a leveling of economic growth, with occasional spurts in the unemployment rate in periods of business downturn when workers in the older Akron tire plants are, as usual, the first to be laid off.

Mr. Speaker, the Nation has a tremendous investment in its existing industrial centers. This investment consists not only of manufacturing plants, but also retail businesses, public facilities, schools, universities, cultural institutions—and peoples' homes. It makes absolutely no sense to have national tax policies, or other national economic policies, that fail to protect these investments and, indeed, help bring about their destruction.

Any tax reform worthy of the name must deal with this problem. Earlier this year, I introduced the Investment Tax Credit Act of 1977 to provide an extra 10 percent investment tax credit for modernizing older industrial plants or replacing them with new ones located in the same community. This bill now has 80 cosponsors and has received a favorable response around the country. It is time the Treasury Department got behind it.

Mr. Speaker, I realize that there is no single solution for arresting the decline of our older industrial centers. To reverse this dismal process will require a complex of solutions. One thing stands out however: The time to act to save a local industry is while it is still there and is still a going concern. To do that, we must help it remain competitive. My tax credit bill, by providing an incentive to modernize, in place, addresses itself to one aspect of remaining competitive.

Mr. Speaker, on Saturday, the Washington Post published a fine editorial on this subject following up an excellent article by James Sundquist of the Brookings Institution in the previous Sunday's Post. I placed the Sundquist article in the RECORD last week and am now pleased to offer the editorial for inclusion in the RECORD immediately following these remarks:

WHERE THE JOBS GO

Now that President Carter has postponed his tax-reform plan, the administration has a chance to tie it more closely to employment patterns. There has been rising anxiety in Congress over the shift in the country's economic balance away from the Northeast, toward the South and West. The drift of population out of the big, aging cities of the Northeast imposes one kind of cost; the rapid expansion of the new cities of the Sun Belt imposes another kind. Neither is small.

Rep. Al Ullman (D.-Ore.), chairman of the House Ways and Means Committee, has begun to think about the possibility of using the tax system to slow down that drift. The idea has been floated before, but in the past it has been shouted down by the boosters among us—the states that were growing fastest and the people there who saw a soaring population as a source of pride and wealth. In this decade, some of those states have changed their minds about the desirability of that kind of growth. Mr. Ullman's Oregon is a leading example. The constituency for a stabilization policy seems to be increasing.

In 1950, 32 out of every 100 American jobs were in the Northeast. By 1975 it was down to 24.5 jobs. In 1950, 24 out of every 100 jobs were in the South; in 1975 it was up to 30. The figures come from a study that the Library of Congress did for Sen. Henry Bellmon (R-Okla.), who was concerned that the Sun Belt-Frost Belt debate was outrunning the data. All quadrants of the country have become richer and more heavily populated in those 25 years, but they grew at very different rates. In those years employment nationwide rose by 31 million jobs. Out of that total, there was a gain of 4.4 million jobs in the Northeast, which here includes Pennsylvania and everything beyond it. The gain in the North Central states was 7.1 million jobs, and in the West 7.6 million. In the South, it was 12.2 million.

But even this kind of statistic understates the reality. Within each of these broad regions the local disparities are far more extreme. One great illustration of the process is the abandonment of wide stretches of some of the inner cities, most notably in New York's South Bronx.

The hard question here is not *whether* to try to stabilize employment where people now live—but rather *how* to do it. In this newspaper's Outlook section last Sunday, James Sundquist of the Brookings Institution suggested an expanded investment credit in the areas of highest unemployment. That might be a beginning. But it's difficult to think that an investment credit alone could determine the location of many plants and payrolls.

Effective intervention would be expensive. But it could hardly be as expensive as tolerating complacently the decay of regional economies in one part of the country, while localities in other parts urgently build new schools, new roads and new hospitals for the people moving in. It would be impossible to stop the long-term changes in American economic geography. But it would be useful to pause for another look at the rules of the game, to ensure that the advantages for each employer do not add up to the disadvantage of the country as a whole.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. PEPPER (at the request of Mr. WRIGHT), for Friday, November 4, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BAUMAN) and to revise and extend their remarks and include extraneous matter:)

Mr. BAUMAN, for 15 minutes, today.

(The following Members (at the request of Mr. GEPHARDT) and to revise and extend their remarks and include extraneous matter:)

Mr. NEDZI, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. WIRTH, for 5 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BRADEMAS, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,656.50.

(The following Members (at the request of Mr. BAUMAN) and to include extraneous matter:)

Mr. SYMMS.

Mr. DERWINSKI in two instances.

Mr. HANSEN in three instances.

Mr. KINDNESS.

Mr. ASHBROOK in two instances.

(The following Members (at the request of Mr. GEPHARDT) and to include extraneous matter:)

Mr. VAN DEERLIN in three instances.

Mr. MAZZOLI in two instances.

Mr. ANNUNZIO in six instances.

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. BROWN of California in 10 instances.

Mr. ROSENTHAL.

Mr. VOLKMER.

Mr. DODD.

Mr. TEAGUE in 10 instances.
Mr. CORMAN.
Mr. APPLEGATE in four instances.
Mr. BURKE of Massachusetts.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 405. An act for the relief of Chong Cha Williams; to the Committee on the Judiciary;

S. 432. An act for the relief of Rosalinda Flores Vaow; to the Committee on the Judiciary;

S. 833. An act for the relief of Ah Young Cho Kwak; to the Committee on the Judiciary;

S. 973. An act for the relief of Young-Shik Kim; to the Committee on the Judiciary;

S. 1052. An act for the relief of Brian Patrick Webb and his wife, Laurene Anne Webb; to the Committee on the Judiciary;

S. 1154. An act for the relief of Jin Syen Suh; to the Committee on the Judiciary;

S. 1214. An act to establish standards for the placement of Indian children in foster or adoptive homes, to prevent the breakup of Indian families, and for other purposes; to the Committee on Interior and Insular Affairs;

S. 1215. An act to provide for grants to tribally controlled community colleges, and for other purposes; to the Committee on Education and Labor;

S. 1315. An act to provide more effectively for the use of interpreters in courts of the United States, and for other purposes; to the Committee on the Judiciary;

S. 1401. An act for the relief of Elvi Engelsmann Jensen; to the Committee on the Judiciary;

S. 1563. An act for the relief of Do Sook Park; to the Committee on the Judiciary; and

S. Con. Res. 26. Concurrent resolution expressing the sense of Congress that action should be taken to focus national attention on the extent and consequences of and the need to find a cure for amyotropic lateral sclerosis; to the Committee on Interstate and Foreign Commerce.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1560. An act to restore the Confederated Tribes of Siletz Indians of Oregon as a federally recognized sovereign Indian tribe, to restore to the Confederated Tribes of Siletz Indians of Oregon and its members those Federal services and benefits furnished to federally recognized American Indian tribes and their members, and for other purposes.

ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 10 minutes p.m.), under its previous order, the House adjourned until Friday, November 11, 1977, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2658. A letter from the President of the United States, transmitting a report on the extent to which the Republic of Korea is cooperating with the Department of Justice investigation into allegations of improper activity in the United States by agents of the Republic of Korea, pursuant to section 28 of Public Law 95–92; to the Committee on International Relations.

2659 A letter from the Secretary of the Army, transmitting the annual report of the U.S. Soldiers' and Airmen's Homes for fiscal year 1976 and the report of the 1977 annual General Inspection of the Home, pursuant to the acts of March 3, 1883, and March 4, 1909 [24 U.S.C. 42, 59]; to the Committee on Armed Services.

2660. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–97, "To amend the District of Columbia Revenue Act of 1937 and Title 32 of the District of Columbia Rules and Regulations to provide for the registration as 'Historic Motor Vehicles' of motor vehicles which are at least 25 years old, and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2661. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Act No. 2–99, "To order the closing of a public alley abutting on lots 63, 64, and 65 in square 1192, bounded by 29th, K, 30th, and M Streets NW.," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2662. A letter from Secretary of the Treasury, transmitting a prototype of a set of consolidated financial statements for the Federal Government using accrual accounting; to the Committee on Government Operations.

2663. A letter from the Acting Comptroller General of the United States, transmitting a report on the need for an annual review by Federal agencies to determine whether each automated payment system and its related controls are operating effectively and can be relied on to compute payments that are accurate and legal (FGMSD–76–82, November 7, 1977); to the Committee on Government Operations.

2664. A letter from the Secretary of the Interior, transmitting a report on the annual comsumptive uses and losses of water from the Colorado River system during the period 1971–75, pursuant to section 601(b) of Public Law 90–537; to the Committee on Interior and Insular Affairs.

2665. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the State Department's intention to consent to a request by the Government of Norway for permission to transfer certain U.S.-origin military equipment to the Government of Austria, pursuant to section 3 of the Arms Export Control Act; to the Committee on International Relations.

2666. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of certain defense articles sold commercially to Turkey (MC–3–78), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

2667. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on International Relations.

2668. A letter from the Executive Director, Federal Communications Commission, transmitting a report on the backlog of pending applications and hearing cases in the Commission as of June 30, 1977, pursuant to section 5(e) of the Communications Act, as amended; to the Committee on Interstate and Foreign Commerce.

2669. A letter from the president, Jewish War Veterans U.S.A. National Memorial, Inc., transmitting the annual audit report of the organization for the year ended March 31, 1977, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

2670. A letter from the Acting Comptroller General of the United States, transmitting a report on the worldwide housing shortage and the shelter assistance efforts of the Agency for International Development, the multilateral lending institutions, private and voluntary organizations, and certain bilateral donors (ID–77–39, November 4, 1977); jointly to the Committee on Government Operations, and International Relations.

2671. A letter from the Acting Comptroller General of the United States, transmitting a report on the cost, schedule, and performance status of the National Aeronautics and Space Administration's Pioneer Venus project (PSAD–77–65, November 7, 1977); jointly to the Committee on Government Operations, and Science and Technology.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MAHON: Committee of conference. Conference report on H.R. 9375 (Rept. No. 95–812). Ordered to be printed.

Mr. WHITE: Committee on Armed Services. H.R. 9713. A bill to repeal provisions of title 10, United States Code, which impose certain restrictions on enlisted members of the Armed Forces and on members of military bands (Rept. No. 95–813). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 9203. A bill to provide the means for selection of, and to expedite Federal permits and developments of, transportation systems to move Alaskan crude oil to Northern Tier and other inland States, and for other purposes; with amendment (Rept. No. 95–814, Pt. I). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

[*Submitted November 7, 1977*]

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3350. A bill to promote the orderly development of hard mineral resources in the deep seabed, pending adoption of an international regime relating thereto; with amendment (Rept. No. 95–588, Pt. II). Referred to the Committee on International Relations for a period ending not later than February 10, 1978, for consideration of such provisions of the bill and amendments as fall within that committee's jurisdiction under clause 1(k), rule X, and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions

were introduced and severally referred as follows:

By Mr. BAUMAN (for himself, Mrs. HOLT, and Ms. MIKULSKI):

H.R. 10064. A bill to provide for the coordination of federally supported research efforts regarding the Chesapeake Bay, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries, and Science and Technology.

By Mr. DRINAN (for himself, Mr. AKAKA, Mr. BLANCHARD, Ms. KEYS, Mr. MCHUGH, Ms. MIKULSKI, Mr. RAHALL, Mr. RICHMOND, Mr. SKELTON, and Mr. STEERS):

H.R. 10065. A bill to provide additional assistance to small business concerns in acquiring procurement information and contracts from the United States; to the Committee on Small Business.

By Mr. DRINAN (for himself, Mr. CARR, Mr. COTTER, Mr. EDGAR, Mr. MCHUGH, Mr. MURPHY of Pennsylvania, Mr. OTTINGER, Mr. PATTISON of New York, Mr. ROSENTHAL, Mr. SCHEUER, and Mr. WHALEN):

H.R. 10066. A bill to amend the Internal Revenue Code of 1954 to discourage interstate bootlegging of cigarettes by increasing the Federal tax on cigarettes and to provide payments to States which do not impose a special tax on cigarettes and to amend title 18, United States Code, to impose certain penalities with respect to such bootlegging, and for other purposes; jointly, to the Committees on Ways and Means, and the Judiciary.

By Ms. KEYS (for herself, Mr. BADILLO, Mr BRODHEAD, Mr. PHILLIP BURTON, Mr. CORMAN, Mr. FAUNTROY, Mr. PICKLE, Mr. RYAN, and Mr. GIBBONS):

H.R. 10067. A bill to amend the Internal Revenue Code of 1954 to simplify tax preparation by allowing individuals whose income consists solely of employee compensation and interest to elect to have the Internal Revenue Service compute their income tax liability, and for other purposes; to the Committee on Ways and Means.

By Mr. WIRTH:

H.R. 10068. A bill to create the Indian Peaks Wilderness Area in the Arapaho and Roosevelt National Forests in Colorado and to authorize the Secretary of the Interior to study the feasibility of revising the boundaries of the Rocky Mountain National Park; to the Committee on Interior and Insular Affairs.

By Mr. JONES of Oklahoma (for himself, Mr. SAWYER, Mr. RICHMOND, Mr HUGHES, and Mr. FAUNTROY):

H.J. Res. 658. Joint resolution proposing an amendment to the Constitution of the United States to give citizens of the United States the right to enact and repeal laws by voting on legislation in a national election; to the Committee on the Judiciary.

By Mr. JENRETTE (for himself, Mr. SISK, Mr. CORRADA, Mr. DERWINSKI, Mr. EILBERG, Mr. VENTO, Mr. MURPHY of Pennsylvania, Mr. DUNCAN of Tennessee, Mr. COHEN, Mr. MCCLORY, Mr. LEHMAN, Mr. GUYER, Mr. WINN, Mr. HUGHES, Mr. LENT, Mr. HEFTEL, Mr. LE FANTE, Mr. MAZZOLI, Mr. GILMAN, Mr. WALKER, Mr. CORNWELL, Mr. SANTINI, Mr. KEMP, Mr. MARRIOTT, and Mr. MURPHY of New York):

H. Con. Res. 409. Concurrent resolution relating to the resolution of certain issues in United States-Cuban relations; to the Committee on International Relations.

By Mr. SOLARZ (for himself and Mr. ROGERS):

H. Con. Res. 410. Concurrent resolution expressing the sense of Congress that action should be taken to focus national attention on the extent and consequences of and the need to find a cure for amyotrophic lateral sclerosis; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 1 of rule XXII,

284. The SPEAKER presented a memorial of the House of Representatives of the State of Ohio, relative to proposed mandatory inclusion of public employees in the social security system; jointly, to the Committees on Ways and Means, and Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII.

Mr. MILLER of California introduced a bill (H.R. 10069) for the relief of Antonios Kakoliris-Kekos, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

326. By the SPEAKER: Petition of the Westchester Council for the Social Studies, White Plains, N.Y., relative to alleged improper activities of agents of the Republic of Korea to influence Members of Congress; to the Committee on Standards of Official Conduct.

327. Also, petition of the Family Service Association of America, New York, N.Y., relative to proposed workforce amendments to the aid to families with dependent children program; to the Committee on Ways and Means.

328. Also, petition of Women in Communications, Inc., Austin, Tex., relative to the use of cameras in courtrooms and legislative halls; jointly, to the Committees on Government Operations, and Rules.

EXTENSIONS OF REMARKS

CONSTANTINE M. "GUS" BELLAS

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. APPLEGATE. Mr. Speaker, I consider myself fortunate, indeed, to have the kind of constituency I do in the 18th Congressional District of Ohio. This constituency is of the quality it is because of the kind of people that compose it.

One of the many outstanding citizens I represent is Mr. Constantine M. "Gus" Bellas, a man of distinguished character and total unselfishness.

Mr. Bellas was born on September 4, 1909, in Istanbul, Turkey, the son of Michael and Maria Bellas. At the age of 10, he was brought by his father from the Island of Chios, Greece, to Yorkville, Ohio. There, he stayed with relatives. His father returned to Greece to try to bring the remaining members of the family to Ohio. However, his father did not return until 1953.

From the very beginning, hard work and a keen inquisitive mind characterized his endeavors. While attending Martins Ferry High School, Mr. Bellas, along with his cousin, Alexander Bellas, owned a shoe shine parlor and operated a dry cleaning and clothing store. During the Depression years, he and Alexander Bellas were proprietors of a wholesale candy and tobacco company. In 1937 at the age of 28, he ran for the office of mayor of Yorkville and lost by one vote. A subsequent election recount indicated he had won, but Mr. Bellas decided against becoming mayor.

In late 1937, Mr. Bellas moved to Steubenville, Ohio, and helped establish the companies he is so closely identified with today: The Iron City Distributing Co., the Industrial Tobacco and Candy Co., the Bellcom Corp., the Crown Development Corp., and Choice Brands of Ohio. Over the years, these companies have provided many job opportunities for our area. He is a director of the Union Savings Bank, a past member of the executive committee of the Upper Ohio Valley Area Development Council, a past board member of the Steubenville Area Chamber of Commerce and a member of the tri-State area's steel mark committee. He is also a past director of the Ohio Wholesale Wine Dealers Association and the Wholesale Beer Association of Ohio. He is a recipient of the Stroh Brewery Co.'s 25 year "Silver Tray Award."

Mr. Bellas' community and philanthropic activities are numerous. In the Greek American Community, he is a charter member of the Order of Ahepa and the Pan Chian Society. He is a founder and past director of the Holy Trinity Greek Orthodox Church of Steubenville. Archibishop Iakovos recently presented him the "Archdiocese Laity Award" given to outstanding members of the Greek Orthodox community in the United States. He is a member of the executive board of trustees of the St. John's Medical Center. He is a past trustee of the College of Steubenville and a charter member of its Century Club. He is a past director and life member of the Kiwanis Club. He established the Kiwanis Club's annual "Rose Sale" fund raising program. He is a past director of the Steubenville chapter of the Boy Scouts of America and a charter member of the Steubenville chapter of the NAACP. He is a member of the local Moose, Elks, and Eagles Clubs. Mr. Bellas has also sponsored numerous softball, baseball, basketball, and bowling teams and other youth organizations.

In 1937, Mr. Bellas married the former Kiki Michalopoulos. They have three children, Diana B. Terezis, Michael C. Bellas, and Albert C. Bellas, and four grandchildren. His main hobbies include traveling, especially to the main wine producing countries of the world. He is

considered by many to be the "wine expert" of the Ohio Valley.

Mr. Speaker, Gus Bellas is truly deserving of the testimonial dinner that is being given in his honor. He has earned the respect and admiration of his community and on behalf of his many friends, I congratulate him and thank him for his 40 years of outstanding community service.

PETROLEUM COMPANIES' FOREIGN TAX CREDITS

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. ROSENTHAL. Mr. Speaker, eight members of the Commerce, Consumer and Monetary Affairs Subcommittee of the House Government Operations Committee have joined me in writing a letter to President Carter urging an end to present U.S. tax policy which improperly allows U.S. petroleum companies to claim tax credits to foreign governments. As chairman, I would like to express my appreciation for the time and effort other subcommittee members have devoted to this important subject.

Last year these petroleum foreign tax credits cost the U.S. Treasury $1.2 billion and, since 1974, the aggregate loss has been more than $6 billion. Each day's delay may be costing Treasury an additional $3.5 million. Treasury and IRS have failed to administer properly our tax code in this important area, and one consequence of their failure has been an impairment of our efforts to achieve greater energy independence; and the creation of an unfair advantage by multinational firms over independent domestic petroleum companies. My colleagues signing the letter were ANTHONY MOFFETT, ELLIOTT H. LEVITAS, TOM CORCORAN, ROBERT F. DRINAN, DAVID W. EVANS, FERNAND J. ST GERMAIN, HENRY A. WAXMAN, and CARDISS COLLINS.

The subject attracted the attention of the noted tax columnist E. Edward Stephens. I commend to you the following column as it appeared in the Washington Star for Saturday, November 5:

[From the Washington Star, Nov. 5, 1977]

IRS RULINGS ON ARAB OIL COST TREASURY BILLIONS

(By E. Edward Stephens)

A multibillion-dollar hot potato has been tossed to President Carter by Chairman Benjamin Rosenthal, D-N.Y., and eight of the other 10 members of a House Government Operations subcommittee.

These legislators, and Sen. Frank Church, D-Idaho, are pressuring the President to step in and direct the Internal Revenue Service to revoke several revenue rulings—issued in the 1950s—that have diverted billions from the U.S. Treasury to the coffers of huge American companies that pump oil out of Arab deserts. The lion's share of the cash has ended up in the treasuries of oil-rich Arab nations.

In a nutshell: Arab countries have enacted "taxes" on American oil companies operating there. The rulings now under fire have classified these levies as "income taxes," and this enables the companies to subtract them from their U.S. income taxes, dollar for dollar. Thus, the entire burden of paying the "taxes" to the Arab nations is passed along to the American people.

But the truth is that these taxes aren't "income taxes." In reality, they're royalties exacted by the Arab countries and disguised as income taxes. When the corporations pay the Arab taxes, they should get a business expense deduction, not a credit, in their U.S. federal income tax returns.

There's a big difference. Credits cut their U.S. income taxes dollar for dollar, but deductions reduce their U.S. income taxes by only 48 percent. So, because of the IRS rulings, 52 percent of the foreign taxes come right out of the U.S. Treasury.

Result: The American people are subsidizing multinational oil companies, thus encouraging them to boost their production of Arab oil—in direct conflict with current U.S. policy. Our present policy is to encourage American oil companies to concentrate on discovering new sources of domestic oil, thus reducing our dependence on imports of high-priced foreign oil.

Very few Americans know they're paying these billions of dollars, since tax subsidies aren't out in the open where they can be seen. That's bad.

But the most frightening thing about these particular tax subsidies is that our Congress didn't enact them. These subsidies were created by the Internal Revenue Service, which has now power to subsidize anything.

Another frightening thing about these particular tax subsidies: The rulings that created them have placed the IRS stamp of approval on tax avoidance schemes that are nothing but shams. If an ordinary American taxpayer were to request approval of a similar tax avoidance plan, IRS officials would throw him into the street.

Why, then, did IRS officials issue the phony rulings? An excellent question. The answer reveals another frightening aspect of these tax subsidies.

The truth is that IRS offiials issued the cock-eyed rulings, in the 1950s, because they were pressured by the Department of State.

For foreign policy reasons, our diplomats wanted to help the Arab countries—where the money ends up—without penalizing American oil companies operating there—and, let me add, without letting the American people know that they were slated to pay the entire bill.

Chairman Rosenthal and his eight subcommittee supporters laid the whole mess on President Carter's doorstep in a letter dated Oct. 19. The gist of the bombshell is that, if there ever were foreign policy reasons sufficient to justify the fake rulings, those reasons have not existed for some time, certainly not since the Arab oil embargo of 1974.

Our irate legislators have a point. It's difficult to see why oil-rich Arab nations now need financial help from the debt-ridden American people.

So, the nine legislators urged the Carter administration to heed the "overwhelming weight of evidence" presented during recent subcommittee hearings. They called for an end to the "$1.2 billion-per-year" loss to the U.S. Treasury from the "improper" foreign tax credits claimed by American oil companies.

The legislators also asked that the Carter administration take steps to recover "more than $6 billion" that these corporations have avoided paying in past years.

Sen. Church recently wrote to the President, saying the IRS rulings are "incompatible with the tax laws, extremely costly to the Treasury, and inconsistent with . . . reducing dependence on Arab oil."

In the Sept. 1977 issue of People & Taxes, Robert McIntyre, of the Tax Reform Research Group, concluded that, because of "touchy" foreign policy questions, any decision in this area is likely to be left up to President Carter. As you know, the buck passing stops at his desk.

PRESIDENT VETOES ENERGY AUTHORIZATION

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. TEAGUE. Mr. Speaker, under leave to extend my remarks in the RECORD, I wish to include the statement I made to the press concerning the veto by the President of the authorization bill for the Energy Research and Development Administration.

STATEMENT BY CONGRESSMAN OLIN E. TEAGUE CONCERNING PRESIDENT CARTER'S VETO OF THE DEPARTMENT OF ENERGY AUTHORIZATION BILL

President Carter's first veto is a direct denial of his earlier claim that our energy crisis is "the moral equivalent of war." His veto reveals he does not know either his enemies or allies in that war.

The Congress recognized urgent realities when by big margins it voted to compromise with the President. His veto is an unwarranted, harsh and arbitrary refusal to understand the stern realities of our nation's and the world's energy needs, and the realities of the long and very difficult efforts by House and Senate Members to agree on an energy authorization act that went much more than halfway in meeting his demands.

We on the Hill put months of strenuous, conscientious effort into producing an effective energy research and development program which the President could wisely and to his own satisfaction sign. He was poorly advised to so ruthlessly deny our efforts.

I noted with great concern that neither his Secretary of Energy, nor any other official of the Department of Energy, participated in the announcement of the President's veto. Instead, his spokesmen in announcing the veto were only Stuart Eizenstat, Assistant to the President for Domestic Affairs and Ms. Kitty Schrimer, whom I am told is a crusading environmentalist. That raises a troublesome question as to who it is that really has the President's ear in these matters. Where were his energy and science experts?

In the authorization bill now vetoed, the Congress vigorously supported initiatives for new energy sources we crucially need, such as several potentials for solar conversion, geothermal, coal gasification, and other clean forms of fuel from coal, magnetic fusion and the breeder reactors, all of which will be vital to provide alternatives to oil and gas.

It is those authorizations the President now vetoes, in effect denying the authority of Congress to shape national energy research policy. He focused his veto attack on the Clinch River Breeder Reactor Demonstration Project, especially arguing that the dangers of nuclear proliferation would be increased by that project. But the Congress already had recognized that concern in the compromise it voted. It agreed with the President not to include funds for any actual construction of the Clinch River plant, but only to go ahead with the preliminary licensing process, thus providing sufficient time to work out with the President an effective program to guard against proliferation. The veto denies that Congressional effort.

A large majority in the Congress is convinced that the breeder technology is an imperative need for this nation's and the world's future. Other major nations—France, Germany, Great Britain, Japan and the Soviet Union—are moving vigorously ahead to develop and demonstrate their own breeder reactors. It is imperative that we be in the forefront of any such historic effort. Otherwise, we shall lose any valid claim to lead or influence the world's efforts in these matters. Yes, we will lose our ability to lead in the effort to control nuclear proliferation. The President seems blind to that reality.

There are hundreds of years of potential energy now stored in barrels at Oak Ridge, awaiting safe and useful release. We also have hundreds of years of useful coal resources. Our bill would provide the means to push hard ahead to make good use of those great resources. The President's veto means we again will be too little and too late.

We already are being held hostage because we lack sufficient oil. Now the President's veto can make us doubly dependent and vulnerable, hostage to other nations' superior progress in breeder technology.

I join with many others in the Congress and throughout the nation—yes, the world—who consider this veto a rash, irresponsible act.

Our grandchildren are likely the ones who shall pay most dearly for this Presidential mistake.

COMMENT

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. DERWINSKI. Mr. Speaker, Joseph McCaffrey, commentator on Washington, D.C.'s radio station WMAL, is an experienced and knowledgeable observer of the Capitol scene. His views, carried in a column in the November 3 edition of the Culpeper (Va.) News of which he is editor and publisher, very properly express the feelings in the Congress relating to appropriation of military aid to South Korea.

As I feel that his comments are worth pondering, I insert Mr. McCaffrey's commentary at this point:

COMMENT

(By Joseph McCaffrey)

It would be ironic, but it might just happen. The man who used money and wile to win support for his country from the United States may, in the end, be the reason why this support has been shut off.

It would be a pity if the story ended like that, but the chapters now being written indicate that is what is likely to happen.

The 800 million dollars in military aid for South Korea is sitting in the House International Relations committee because everyone figures that the House would kill it if it came to the floor.

"No one," almost any member will tell you, "wants to vote for anything for South Korea for fear that the folks back home will think the vote had been bought and paid for by a South Korean agent."

Congress, at least the House of Representatives, seems to have become paranoid about the Korean scandal, and because it is so busy looking back over its sholuder it can not see what lies in the road ahead.

One of the reasons we support South Korea, is that Japan feels easier and more secure. If the North Koreans should go over the line and push down to Seoul, the Japanse would have to reevaluate their defense position.

There is no desire on the part of America to have Japan re-arm—but should the Japanese be left undefended and faced with advancing communism?

One wonders what our ambassador to Japan, Mike Mansfield, is thinking as he looks back at Washington and sees how the Tongsun Park scandal is now turning around our foreign policy in Asia.

It isn't enough to say—South Korea is getting what it deserves or/let's get South Korea off our backs. We spent a great deal in blood, lives and money defending South Korea, if because of the Tongsun Park scandal we now abandon Seoul, we will be saying the blood, lives and money were spent all in vain.

If members of Congress are so fearful that they can not justify voting the 800 million dollars in military aid to South Korea, perhaps they underestimate the intelligence of their electorate who, certainly, would be willing to listen to the reasons in support of such a vote.

If members of Congress feel that a vote for aid to South Korea would mean they might be fingered as recipients of Park's largese, then they are running too scared.

There is more at stake here than a domestic scandal, what is at stake is an important aspect of our foreign policy.

It might be time that we asked for a few profiles in courage. And, for the rest of us we might take a look over and beyond the titillating scandal to see the big picture.

OHIOAN OFFERS ENERGY SOLUTION: SOLAR HEATER MADE FROM BEER CANS

HON. THOMAS N. KINDNESS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. KINDNESS. Mr. Speaker, I would like to share a most unusual event which occurred recently. A constituent came to see me to explain what appears to be a very promising solar heating system. The really surprising thing is the fact that he did not come seeking a Federal handout. Instead, he came seeking only my assistance in getting the bureaucrats to help distribute information about his inexpensive "do-it-yourself" solar heating system to all Americans. Seems like a simple, reasonable request does it not? It caused me to wonder why a citizen, who seeks no reward for himself, should have to struggle with his own Government to gain assistance in distributing to fellow citizens information which has the potential for significantly reducing their home heating costs.

My constituent is Bill Tolle of Hamilton, Ohio. Bill has a long background, and a good deal of experience as a handyman, and in the electronic field. I suspect that he is a bit too modest in giving himself and these talents full credit for their role in the success of his solar heating system. He implies that anyone who is at all "handy" with tools could easily duplicate his system. He feels that most homeowners would already have the necessary tools, and that nearly all of the materials needed could be obtained at the local lumberyard and hardware store.

One of the key elements of Mr. Tolle's solar system consists of a readily available material—beer cans. He cut the beer cans in half, painted them black, and installed them in a frame in such a manner that he could circulate air over them, and collect the heat they derive from the sun. This heat is then used to heat the Tolle home directly, or if not needed immediately is stored in a "heat storage bin" for later use. It cost approximately $800 to build a system big enough to provide about 60 percent of the heating needs for his one-story (full basement) home of some 1,200 square feet. His heating bill (oil) for the extremely cold winter of 1976–77 was about $160. The lack of adequate records for prior years prevents a more direct comparison of costs.

A pamphlet explaining Mr. Tolle's system can be obtained for $1 from the Hamilton Journal-News Business Office, P.O. Box 298, Hamilton, Ohio 45012.

I am also inserting in the RECORD at this point an article from the October 17, 1977, issue of U.S. News & World Report entitled "Do-It-Yourselfers Give Solar Energy a Sharp Boost":

DO-IT-YOURSELFERS GIVE SOLAR ENERGY A SHARP BOOST

(Kits for harnessing the sun to heat water and warm homes are catching on fast. But there still are pitfalls for potential buyers.)

Thanks largely to amateur handymen in America's homes, the U.S. is moving deeper into the age of practical solar-energy use.

By some estimates, 5 million square feet of solar collectors are expected to be sold this year—and nearly half will be installed by home-owners themselves using tools they have around the house, not by skilled contractors with elaborate equipment.

"These are the same kind of people who would have been the first to buy an auto when cars first came out," says a spokesman for Grumman Corporation, one of the industry leaders. "They are the type of people who are attracted to new technology."

Altogether, the sales of solar-energy equipment doubled during 1976 among the 500 companies now in the business. Another doubling over last year is expected in 1977 as the sale of solar collectors, pipes, fittings and valves continues to boom. "People are realizing that solar energy is not all that complicated, and they're excited about being able to fight rising utility costs with their own hands," explained an exhibitor at a recent industry show in Dallas.

Two years ago, there were 183 solar-heated homes in the U.S., according to the Solar Energy Industries Association. Now there are about 5,000. Within a year, 15,000 more are expected.

While these homes scarcely make a ripple in the nation's over-all energy picture, the Government is projecting that, by the year 2000, radiation from the sun will supply 7 per cent of the country's energy needs.

FEDERAL APPROVAL

Seed money from Washington, D.C., has played a leading role in bringing hundreds of new and professionally built solar homes onto the market. Despite this, manufacturers say they are amazed at how many people are going it alone—paying for the equipment and installing it themselves.

Aimed at these adventurous handymen is the increasingly common solar kit. Scores of companies are offering them complete with detailed instructions. Kits for sun-powered water heaters sell for $800 to $1,200 and can be installed in a day—some collectors go on the roof, others on the ground. Having the

same equipment installed by a professional can double the price.

"If you can hold a soldering gun, you can do it," says one salesman.

Kits for meeting up to 75 per cent of a home's heating needs are available for $3,500 to $10,000, and they are quite a bit more complicated to install.

Engineers are quick to caution that each house has distinct requirements, based on how it is situated on the lot, the materials from which it is built, and what the area's weather is like. For example, solar collectors designed for a home in Florida are usually inappropriate for one in Illinois.

Information and inducements to venture into solar energy are pouring in on homeowners, local builders and heating conctractors.

FUNDS FOR EXPERIMENTS

As one lure, the Federal Government is handing out millions of dollars a year in direct grants to entice builders into installing experimental collectors. Nearly two dozen States now offer favorable tax treatment.

President Carter's energy program, as passed by the House of Representatives but still subject to final action by the Senate, provides a possible $2,150 tax credit—30 per cent of the first $1,500 and 20 per cent of the next $8,500—for home-owners installing solar equipment. A Senate committee recommended a slightly more generous formula.

Hundreds of universities, for a fee, are making their engineering schools available to the community to help with solar planning.

The Energy Research and Development Administration (ERDA) is using a computer to help individual home-owners evaluate the suitability and likely costs of using the sun to heat their houses. This "Solcost" program, for which there is a $35 user charge, is being handled by the International Business Services Solar Group in Washington, D.C.

Most of the solar-energy devices now on the market collect heat from the sun's rays, rather than convert sunlight directly into electricity with solar cells. These thermal collectors most often are mounted on the roof. The simplest systems consist of black metal plates covered with glass. Water, antifreeze or sometimes just air is heated by being passed over the hot metal and is then carried to storage tanks buried in the basement or back yard for use as needed. Just installing solar-energy equipment itself is not enough to make it work efficiently, industry people say. Repeatedly, they point out that the more thoroughly a house is insulated, the better are the chances that any heating or cooling system will work. Storm windows also are considered vital in Northern climates.

BUYER BEWARE

Dealers admit that a number of disreputable companies are milking the market during this boom period. "There are a lot of ripoff artists in this business, lots of lawsuits floating around," says one dealer in Dallas. Emerging are horror stories of frozen pipes, overheated collectors that simply melted and of antifreeze leaking from rooftop pipes, eating through the shingles and ending up in the living room.

Sheldon H. Butt, president of the Solar Energy Industries Association, says his group will soon publish the industry's first set of standards, which ought to weed out some of the hucksters.

Meantime, the industry recommends that enthusiasts pushing ahead with a solar project check out their dealer with the local Better Business Bureau. A buyer also should ask about the kinds of tes'ing the dealer's equipment has gone through. Most reputable dealers have had their hardware evaluated at independent laborotories.

"A buyer has to be alert," says Jeff Deahl, of Solar Usage Now, an Ohio firm specializing in materials for do-it-yourselfers. "A lot of research is gobbledy-gook, but if a person reads up on solar energy, he can pretty well figure it out himself."

Despite the obvious risks of pioneering an untested technology, America's home-owning handymen appear to be doing just that.

THE GENERAL SAID IT AGAIN—"THE MILITARY IS GAGGED"

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. HANSEN. Mr. Speaker, the general said it again—"The military is gagged." On October 21, I received a reply to my letter of October 17, 1977, to Air Force Chief of Staff, Gen. David C. Jones, condemning actions of senior military officers who untruthfully would have the public believe they are speaking their own unpressured sentiments regarding the proposed Panama Canal treaties. I consider the general's letter an outright evasion of the points at issue and have again sent him a letter asking for a more appropriate reply. This issue is of such vital concern to the Nation, that such important questions cannot be ignored.

Mr. Speaker, it should also be noted that in accordance with the policy of the Joint Chiefs and pronouncements by Gen. George Brown, General Jones has not only been responsible for stifling of Air Force personnel but he has also silenced the members of the Air Force Association.

To better illustrate my contentions I include for the RECORD, first, General Jones' message to Air Force commanders; second, Hansen letter of October 17 to General Jones; third, General Jones' letter of October 21; fourth, an article by Bruce Callander entitled "Who Can Say What? Disagreement Arises Over Canal Opinions," in the November 7, 1977, issue of the Air Force Times; fifth, Hansen letter of November 7 to General Jones; and sixth, a letter from an Air Force Association member:

FOR COMMANDERS FROM GENERAL JONES—PANAMA CANAL TREATIES

1. On 10 Aug. 1977 Panamanian and US negotiators announced agreement in principle on conceptual framework for two new treaties. One, the neutrality treaty, provides for the permanent neutrality of the canal; the second, the Panama Canal Treaty, deals with the operation and defense of the canal. Both treaties would enter into effect after ratification and document exchange processes are complete. The neutrality treaty will be of indefinite duration. Whereas the Panama Canal treaty will terminate in all aspects on 31 December 1999.

2. The Panama Canal is a major defense asset, the use of which enhances United States capability for timely reinforcement of United States forces. Its strategic military advantage lies in the economy and flexibility it provides to accelerate the shift of military forces and logistic support by sea between the Atlantic and Pacific Oceans and to overseas areas. United States Military interests in the Panama Canal are in its use, Not its ownership. The proposed treaties would assure that access to and security of the Panama Canal are protected in time of war and peace.

3. As President Carter has stated, "We will have operating control and the right to protect and defend the Panama Canal with our own military forces until the end of this century. Under a separate neutrality treaty we will have the right to assure the maintenance of the permanent neutrality of the canal as we may deem necessary."

4. The Air Force actively participated in the development of all defense related aspects of the proposed treaties, and fully supports them. They would provide a basis for development of a continuing friendly relationship between the United States and Panama which would be of significant importance in insuring that the Panama Canal would be available to the United States when needed. Once the US no longer operates the canal, the proposed neutrality treaty would provide an adequate basis for safeguarding our interests in the canal.

5. It is important that our personnel, particularly our senior people, understand our support for the proposed treaties.

OCTOBER 17, 1977.

DEAR GENERAL JONES: I am deeply appreciative of your integrity and many years of service to our country. I regret that it is necessary to confront you with a matter of serious concern.

However, I am in possession of an August 20 message which you sent to all major Air Force commands regarding the Panama Canal, the contents of which I have this day released to the Press.

It is appalling that you have apparently "gaged" all Air Force personnel, especially those senior officers who true opinion would be of great use to the public and the security of this nation.

The information I received along with your message indicates that, "Paragraph 5 of this message makes it quite clear that we, as military personnel, are expected to support these treaties," and that any action otherwise would be highly dertimental to a military career. It is quite apparent to me that this is a clever but still blatant attempt to deprive the American people of the full information to which they are entitled on a matter so serious.

In light of the controversy over the Dole interception, are the assurances contained in your message still valid? The question is particularly pertinent in light of the recent so-called agreement between Carter and Torrijos which was not signed by either person and which was gutted by statements of Torrijos on his return to Panama.

If a Senior Officer did express a contrary opinion could he expect the same treatment as General Singlaub?

In light of your contention in paragraph 2 does this mean that the United States with no control over the Canal would have to make good any operational deficits of the Canal's operation or pay for any needed maintenance.

Did you receive any pressure from the White House for your own support or to send such a message to the members of your command?

Your comments in paragraph 2 show significant contradiction between what the military is telling itself about the military value of the Panama Canal and what they were telling the public in past Senate hearings. I would like to know exactly what the official military position really is.

Furthermore, I have serious doubts that in light of recent controversies over treaty interpretation that the Panamanians would accept the unilateral authority of President Carter's statement in paragraph 3 which says that the United States ". . . will have the right to assure the maintenance of te permanent neutrality of te Canal *as we may deem necessary.*" (Emphasis added.)

As I already have strong indications of numerous complaints of senior military

personnel who are being "squelched," I must demand an immediate retraction of this "muzzling" order along with proper apologies from you and any higher authority responsible.

Finally, in your statements to the Congress, the public, or your command, I would strongly suggest that you arrive at a consistency that is compatible with national security and with the basic rights of individuals in a free nation. I assure you that my colleagues will be most interested in observing the action of the high command of the nation's armed forces during deliberations over the proposed Panama Treaties in the days ahead.

Your expeditious reply to my questions will be greatly appreciated.

Sincerely,

GEORGE HANSEN,
Member of Congress.

OCTOBER 21, 1977.

DEAR MR. HANSEN: The thrust of your letter of 17 October 1977 concerning my message to Air Force commanders on the Panama Canal Treaties appears to be contained in the assertion that the message has "gagged" all Air Force personnel.

That assertion is mistaken. The message was categorically not a gag order. It was not intended to muzzle Air Force senior commanders. In fact, the last sentence of my letter makes clear that my intent was rather to let senior Air Force commanders know why the Air Force supported the treaties—not to dictate their personal opinions.

The message of 20 August 1977 was a straightforward communication to the Air Force's senior managers of an official position arrived at by the President and supported by the Joint Chiefs of Staff. There was nothing unusual about the message, and I felt no pressure to send it.

We expect and encourage our people to voice their free opinion on proposed courses of action. Once a decision has been arrived at, however, they are expected to support established policies. This does not mean that they are thereafter prohibited from expressing their personal views when, for example, questioned by the Congress. Quite the contrary, by custom, policy, and law, when asked by Congressional Committees for their personal views our people are expected to say what they think—and the record will show they have.

I fully endorse the proposed treaties. This is my personal view, as well as my view as a member of the Joint Chiefs of Staff.

Since renegotiation of the existing treaty began in 1964, four Presidents have supported the search for a new agreement. The Joint Chiefs of Staff have been deeply involved in the negotiations at every phase. During the most critical stages which occurred over the past two years, a senior military officer representing the Department of Defense and the Joint Chiefs of Staff has been a member of the negotiating team.

The Joint Chiefs have discussed these matters with senior military commanders, have weighed carefully the national security aspects of alternative courses of action, have participated fully in the evolution of the treaties' terms, and unanimously favor ratification.

Sincerely,

General, USAF, Chief of Staff.

WHO CAN SAY WHAT?—DISAGREEMENT ARISES OVER CANAL OPINIONS

(By Bruce Callander)

WASHINGTON.—Sometimes what you said isn't nearly as important as what people say you said or what people think you meant in saying it.

Ever since the Joint Chiefs of Staff voiced their unanimous endorsement of the Panama Canal treaties, some members of Congress have been trying to prove that (1) they were under pressure from the White House to do so and (2) the services have told their members generally that if they can't say anything nice about the pacts, they shouldn't say anything at all.

Gen. George Brown, chairman of the JCS, has found a number of occasions to challenge the first premise. In a recent Florida speech he noted that the chiefs frequently differ with presidential decisions and say so, at least within the executive branch. But, said Brown, the chiefs really favor the Panama agreements and didn't have to be coerced by the White House to say so publicly. (Last week's issue).

That probably hasn't satisfied Brown's critics in Congress, but it's hard to accuse a four-star general of saying something he doesn't mean just to keep his boss happy. It's particularly hard in Brown's case because he has a reputation for speaking his mind even when it makes presidents unhappy.

So the lawmakers are trying to make hay over the second point—that, having voiced their approval of the Panama treaties, the chiefs are moving to muzzle other officers who may not share their view.

That very well may be the case. General Brown put the proposition rather clearly in his recent speech. After telling how the chiefs voice their opinions pro and con in the high councils of government, Brown said, "What we do not do is 'go public' with dissenting views once a decision has been made. Every senior military officer understands the rules of play. Give your best; say what you think; advocate a course of action—and when a decision is made, support it.

"If a decision is unacceptable, and an officer wishes to speak out publicly—fine. He can take off his uniform, leave active service, and express that disagreement."

In short, once the word has come down, the officer has three options—praise the decision (if he approves of it), shut up and support it anyway (if he can) or get out and howl his head off (if he feels that strongly opposed).

Curiously enough, congressional critics of the JCS position do not seem to have picked up Brown's blunt remarks about dissent in service. But, they have latched onto another, milder statement by one of the service chiefs and have made much of it.

In mid-August, Gen. David Jones, AF chief of staff, dispatched a message to commanders about the canal treaties. The message accompanies this story.

Jones' statement follows closely the description the State Department gave of the agreements, but it ends with the sentence: "It is important that our personnel, particularly our senior people, understand our support for the proposed treaties."

Somebody passed a copy of Jones' message to Rep. George Hansen (R-Idaho) who promptly (1) dispatched a biting note to Jones, (2) cranked up a press release headed "Has the Military Been Muzzled on Panama?" and (3) put the whole business—Jones letter, Hansen note, press release and appropriate remarks—into the *Congressional Record*.

In his press release, Hansen said, "It is quite evident that any senior officer who dares express his own feelings will suffer the same fate as General Singlaub. I wonder if the Joint Chiefs received a similar message from the White House demanding their allegiance?"

In the *Congressional Record*, Hansen said he was "shocked and appalled" by Jones' letter. The statements, he said, "are highly indicative of wide-scale 'Singlaubistic' thinking in the military and in addition they provide speculation of White House terror tactics and bullying."

To clinch his charge that senior officers are coerced, Hansen quoted the unnamed officer who sent him Jones' message as saying that he opposed the treaties but now understood that he was not to say so.

Hansen said a good deal more in his press release about the White House's effort "to subvert the truth," about the treaties' being "a fraud" and about the administration's "gagging" the military.

He also put a number of questions to Jones, asking him whether the White House put pressure on him either to support the treaties or to send the message to the field.

Presumably Jones could save time and trouble by sending Hansen a copy of General Brown's speech. It seems to answer the questions pretty clearly.

DEAR GENERAL JONES: Thank you for your reply of October 21 to my letter expressing concern for your message to Air Force Commands regarding the proposed Panama Canal treaties.

However, I am concerned that the problems I posed were not really answered satisfactorily by your response.

Your statement that the message is not a gag order for Air Force personnel is appreciated but apparently not understood by either Air Force personnel or individuals involved in related organizations such as the Air Force Association. Military personnel have complained to me and to other Members of Congress that they do not feel free to personally express positions contrary to Air Force policy. The tone of your message which I earlier brought to your attention, if typical, certainly doesn't do anything to welcome diverse opinions. Your October 21 letter to me in fact noted that your people have opportunity for free opinion only until a decision has been arrived at which, of course, is now the case. You continued on to say that they are then "expected to support established policies." Joint Chiefs of Staff Chairman, General George Brown, also says that "military officers do not go public with dissenting views once a decision is made." Below your level, including a few advisors, who in the military ever really enjoyed the input and freedom of expression regarding the Panama treaty? The answer is not one and you know it. You cited freedom of military people to express personal views when questioned by the Congress. But you must know that such possibilities are remote. With Gen. Singlaub so fresh in mind, it is certainly obvious that no military man who values his career would want to "buck the establishment." Isn't it interesting that polls of retired Admirals and Generals when they are free to speak their mind without coercion, are overwhelmingly against the treaties (300–7 by recent tabulation).

This week I received a letter from a high ranking retired Air Force officer who is an Air Force Association member. He stated that the "recent National AFA meeting in Washington . . . wanted to adopt a resolution condemning the Canal treaties but General Jones had stopped the resolution." Another Senior Member of the Air Force complained about paragraph 5 of your message which he said "makes it quite clear that we as military personnel are expected to support these treaties."

Now General, it is obvious that the assurances you give me that there is no muzzling of Air Force personnel, especially Senior Commanders, is not understood by members of the military or affiliated associations.

Therefore I must challenge you to not only tell me that military people and associates are free to speak but tell them in a way they can believe.

A second major issue revolves around your lightly flipping through the passage of recent history to name-drop those Presidents and others who have been in support of a

new treaty. This gives me no comfort at all, General. Many of those same Presidents and certain military officers and Ambassadors like Mr. Bunker have also been the architects of American withdrawal and defeat around the world for two decades.

The American people are tired of appeasement and incompetence in foreign affairs which has stalemated us in one war and lost another and now finds us becoming more and more dependent upon other nations for even those elements involved in our basic survival. Just look at the oil situation.

Rather than independently achieving energy self-sufficiency, we find ourselves becoming more and more dependent upon foreign nations both in terms of price and supply. This can be similarly said of a number of other situations. Now, of all people, you in the military want to put our two-ocean naval capability and commercial maritime link between two great sea coasts at the mercy of another power.

With a track record like this, then the political and military leadership of this nation could hardly wonder why the people are skeptical of not only supporting the proposed Panama Canal treaties but also of even supporting the military in its enlistment programs and other necessary ways. One word of advice to you from one in Congress who has long supported the military is that you have few real stalwart friends among the liberal elements of Congress and you are fast losing the support of the moderates and conservatives.

A third point of concern is that of dichotomy of sales pitch. When high military officers professing support of the treaties give a strong statement of need for continued access to the Panama Canal to all military personnel as you did in your message to all commands and then tell another story to the public, it doesn't wash well. For instance, in contrast to your message, General Brown before the House Armed Services Committee on October 21 stated that he doesn't believe the Panama Canal is "vital" to the United States.

This business of telling different stories to the Civilian and Military sectors of our society is no more tolerable than the situation of President Carter and General Torrijos, each telling their own nation that which might sound popular even though the positions are in contradiction with one another.

Finally, any person such as yourself who professes to know what the treaties are all about must know what you are doing to the pocketbooks of the taxpayers who support your very existence. Once you have given away, as the treaties propose, the very land which American military bases now occupy to defend the Canal, how do you propose to continue such defense after the year 2000 without the same convenient established bases of operation? Of course, it is obvious. You will do it just as we do in Europe and other places across the world—rent property from the nations concerned under limited conditions at costs of hundreds of millions of dollars per year.

But it is only money, isn't it General? And buying peace seems so convenient that some people never want to look back to the lessons of history which shows that principles, not payoffs, preserve the peace.

And General, you had better check the diversion of water problems and water shed damage possibilities to see if you would have a full-time canal under Panamanian operation and ownership. You should also check if Panamanian leadership would be able to withstand "tapping the cash register" and using maintenance funds for social programs thereby ending up with a broken-down canal. Just who besides Uncle Sam would then be called on to step in and pay the tab to upgrade the facilities?

And don't forget to see just how much of the payments proposed in the new treaties will never get into the Panamanian economy but actually go to service the massive debts of General Torrijos.

And General, isn't it more important from the point of view of the citizens of the United States whom you serve that we keep our two great coasts bound together by continued unimpeded ownership of the Panama Canal than that we unite the two parts of Panama by surrending this property?

We are a good neighbor and we can perhaps improve upon this. But we will not be a good neighbor if we give the Canal to Panama with strings attached as provided in the treaties which could permanently subject them to us in colonial status. Right now an independent Canal Zone owned by the United States needs no interfering in Panamanian affairs to protect and operate the Canal. In your own message to the commands you quoted President Carter as stating that "we will have the right to assure the maintenance of the permanent neutrality of the Canal as we may deem necessary." This absolutely means we have the right to meet any threat in Panama from within or without—which constitutes a dangerous and unnecessary blank check for our involvement and interference in Panamanian affairs. The proposed Canal treaties, contrary to claims of proponents, will deeply involve the U.S. in interventionism, colonialism, and imperialism.

General, I strongly feel that some kind of wishful-thinking euphoria has engulfed the high military command in which you serve and honestly believe that somehow you are operating on limited facts and unrealistic political assurances. I am prepared to back up this contention if you are concerned enough to discuss the matter further. In the meantime, I think it is vitally important that I receive further communication from you regarding the matters raised in this letter.

Sincerely,

GEORGE HANSEN,
Member of Congress.

NOVEMBER 2, 1977.

DEAR MR. HANSEN: Bravo on your stand against the Air Force being stifled in any adverse comments on the Canal treaties.

General David Jones' muzzle is particularly galling since he has obviously taken an active political role in this debate.

At our last local Air Force Association (AFA) meeting it was reported from an attendee to the recent National AFA meeting in Washington that the conference wanted to adopt a resoluion condemning the Canal treaties but General Jones had stopped the resolution. One man one thought.

From my 33 years association with the Air Force, I would be very skeptical of the opinion from an Air Force officer as to how many ground troops it would take to defend any territory.

Sincerely,

———— ————.

MR. AUGUSTINE G. LEONARD

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. APPLEGATE. Mr. Speaker, it is indeed a privilege for me to bring to the attention of my colleagues in the House of Representatives a constituent of mine, Mr. Augustine G. Leonard, who has just recently been presented a membership in the Order of St. Gregory the Great by Pope Paul VI. His selection to the order is indicative of his devotion to God and outstanding character.

A native of the Upper Ohio Valley, Mr. Leonard graduated from the University of Cincinnati Law School in 1933. He served as assistant attorney general of Ohio and solicitor for the city of Mingo Junction for 26 years and is a past district governor of Serra, an organization for the fostering of vocations to religious life for Ohio. Mr. Leonard is the immediate past president of the Jefferson County Bar Association.

As is indicated by his list of achievements, too long to mention here, Augustine Leonard has demonstrated the kind of love for his fellow man that should be instilled in all of us.

Mr. Speaker, on behalf of the 18th Congressional District, I congratulate Mr. Leonard, and thank him for the outstanding contribution he has made to the Upper Ohio Valley.

HON. FRANCIS E. KELLY

HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. BURKE of Massachusetts. Mr. Speaker, it is with great pleasure that I take this opportunity to share with my colleagues an article which appeared in the magazine section of the Boston Herald American on Sunday, October 30. It concerns itself with the illustrious career of a well-known constituent and friend of mine, the Honorable Francis E. Kelly.

Francis made his mark over the years in local and State politics. His is, by all accounts, a career of dedication and service to his fellow man. In retrospect, Francis' foresight is remarkable; he was always ahead of his time. While he has now retired from active politics, the tradition of public service established by Francis is being carried forth by his nephew, Representative Brian Donnelly, who ably serves the people of Dorchester at the State House.

Mr. Speaker, it is a great honor for me to pay tribute to this outstanding individual:

"SWEEPSTAKES" KELLY HAS A JILLION MEMORIES

Memories. His head is filed with memories. Memories of politics, power and people. Francis E. "Sweepstakes" Kelly has a jillion tidbits stored away. After all, he's been involved in Boston politics in one way or another for the past umpteen years.

"Memories . . . good memories . . . nice memories. If the Good Lord lets me, I'm going to live to be 105," says Kelly, now approach his 75th birthday and still practicing law at his Beacon Street offices.

He remembers his opposition to Mayor James Michael Curley: "I had asked Mayor Curley to hire two persons as constables," Kelly recalls. 'They wouldn't have been hired to serve subpoenas—constables were paid for each one they served. They would have been hired for something like the health department.

"Well, time passed and the fellows did not receive their appointments, as had been promised. I'd go to see the mayor, but never received any satisfaction.

"So, I began to introduce measures in the City Council that would anger Mayor Curley." One measure dealt with keeping pay telephones sanitary and other would have made swimming instruction compulsory for children 10 and under.

"And every time one of these council ordinances would pass, Curley would yell to his secretary, 'And who was responsible for that? His secretary replied each time, 'Kelly,' which would set off a stream of invective from his honor."

Kelly is proud of the fact that he was elected to the City Council in his first try . . . and beat Curley's machine—and his hand-picked candidate—in his run for reelection.

"You know, in those days, you only voted for one man for the City Council or School Committee. Each ward would send one person to the council," he recalls. "There were twenty-two wards, hence twenty-two councilors.

"And, in those days, being a city councilor was considered more important than being a state representative. Each ward in Boston sent two persons to the state legislature, but only one person to the council. It was more difficult to get elected to the council than to the legislature."

Thus, it was a bit surprising when the 29-year-old Kelly beat a pro like incumbent Thomas McMahon in his first political attempt. It was even more startling that a one-term councilor like Kelly would beat Curley and his machine in his second go-'round.

"That time, I was opposed by Dick Garvey, an old pro and the mayor's man. Curley sent in many of his workers to campaign for Garvey—and, let me tell you, they were tough.

"But, when the votes were counted, I took all fifteen precincts in Ward Fifteen." It was an event that he's still mighty proud of.

But, Curley is the man who gave Kelly his words to live by. "It was back at the Democratic State Committee's headquarters at the Hotel Bellevue (on Beacon Street between Tremont and the State House). Someone asked me to go over and tell 'that old s.o.b.' to step aside (not run for governor) and let some younger man have a chance.

"Well, with the exuberance of youth, I went over and asked him, gruffly. And he said something I'll never forget.

" 'When you're as old as I am, you'll find that there's no substitute for experience.' I've found those words to be true. There is no substitute for experience."

Francis E. Kelly was born on March 26, 1903, the oldest of nine children. "We lived on Topliff Street in the Meetinghouse Hill section of Dorchester. As a matter of fact, I lived there until I was married." By then, he was already lieutenant governor.

"I was captain of the Dorchester town football team," he recalls. As a matter of fact, he was elected captain twice—something he claims was not common in those days.

"We played such teams as the Providence Steamrollers. They were all topnotch clubs. Unfortunately, we didn't do too well."

Kelly's father died when Frank was 15, "so I had to work to help the family. I sold papers—morning and night, every day, including Sunday. Papers . . . papers . . papers," he remembers.

He graduated from English High School, Staley College of Oratory and Suffolk Law School. "I worked my way through school. I had a laundry truck—Kelly's Wet Wash, it was called."

After law school, he began his extraordinary political career. He won two consecutive terms on the Boston City Council and, in 1936, ran for lieutenant governor. He defeated Phillip Philbin in the primary and then proceeded to hand Leverett Saltonstall his only political defeat in the November election.

Until current Lt. Gov. Thomas P. O'Neill III was elected in 1974. Kelly was the youngest man to win that job. Kelly only served one term.

Later, he was chosen state finance commissioner for Fall River when that city went bankrupt.

And, in 1948, he was elected to his first of two terms as attorney general of the Commonwealth.

"I would say that I won about fifty percent of all the elections I ran in," he says.

He was also an innovator. He points to the fact that he is the father of all veterans' bonuses in the nation; that he led a 25-year campaign to lower the voting age to 18; that he headed up a 36-year fight to abolish "the boss-controlled primaries."

But, more than all that, Kelly is most proud of his long battle to establish a lottery in Massachusetts.

"I started the idea back in Nineteen Forty-Two," he recalls. "I first proposed a national lottery to help the war effort. Tickets would have been sold in banks and post offices. I wanted the prizes to be paid fifty percent in war bonds.

"Well, I went down to Washington to testify before a House committee. Things went so well that, on my way back to the plane, I predicted it would be passed before we took off. Well, it's thirty-five years later and I'm still waiting for the bill to come out of committee."

He fought the battle for about 30 years, and took a good deal of ridicule along the way. "Of course, they wouldn't do it," he says. "That's the trouble with America. They (the politicians) always act fifty years too late."

One obstacle Kelly had to overcome was the opposition of Richard Cardinal Cushing . . . wherein lies Kelly's favorite story.

"Cardinal Cushing was quite a foe of the lottery. Well, I heard that his opposition may have been softening, so I called him up and asked for a meeting. 'Is it about your favorite subject?' the Cardinal asked me. I said it was and asked His Eminence if I could bring two friends along with me. He said that was fine with him.

"I brought the co-chairmen of the board of Massachusetts Sweepstakes Commission, Joe Griffin of West Roxbury and Bob Donaldson of Wellesley, along with me. We went to the Cardinal's residence on Commonwealth Avenue and who should open the door but (Rabbi) Joe Shubow, who was a great friend and neighbor of the Cardinal.

"Shubow said, 'Come on in. Dick will be right down.' We all sat down and I gave the Cardinal all of my arguments for a state lottery. I emphasized the fact that organized crime—bookies—would be hurt by a sweepstakes.

"Rabbi Shubow turned to the Cardinal and said, 'See, didn't I tell you, Dick? Frank Kelly is right.'

"Cardinal Cushing turned to me and said, 'Frank Kelly, you'll never hear me speak against the lottery again.' And he didn't. The result was that the lottery was passed within three or four years."

And, Frank Kelly, father of the lottery, got the first ticket.

Frank Kelly is thinking of retiring. After all, he'll be 75 next March. He is already out of politics . . . actively, that is. "I helped my nephew's campaign a while back. He's state Rep. Brian Donnelly. I helped him in his first campaign. He asked me for help in his next campaign, but I told him that he had done his 'homework' well . . . kept his promises, called people he promised to contact. He didn't need my help after that."

So, though he is still practicing general law, "Sweepstakes" is finally relaxing.

"You know, as I think of it, I'll never retire. I don't know what I'll do. I don't like that word—retire—anyway. I'll never retire."

What he will do is relax, head to Florida with his wife of almost 41 years ("We eloped, you know . . .") during the winter months and cruise out of Boston Harbor on his 32-foot power boat during the summer.

The walls of his office are lined with pictures, newspaper clippings and other framed mementos.

All the memories—memories of a time past, memories of a system of politics whose time has passed.

But, there's something indefinable there . . . something that says we haven't yet heard Frank Kelly's last hurrah.

DR. ANTHONY V. SCURTI

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. APPLEGATE. Mr. Speaker, it is indeed a privilege for me to bring to the attention of my colleagues in the House of Representatives a constituent of mine, Dr. Anthony V. Scurti, who has just recently been presented a membership in the Order of St. Gregory the Great by Pope Paul VI. His selection to the order is indicative of his devotion to God and outstanding character.

Born and raised in Steubenville, Ohio, Dr. Scurti was educated in the Catholic school system, and received his B.A. degree in 1966 from the College of Steubenville. He received his medical degree at the University of Guadalajara in 1966 and served his internship and family practice residency in Montreal General Hospital.

Among many of the organizations to which Dr. Scurti belongs is the American Medical Association, Ohio State Medical Association, Jefferson County Medical Society, Fourth Degree, Knights of Columbus, and is a member of the diocesan school board.

As is indicated by his list of achievements too long to mention here, Anthony Scurti has demonstrated the kind of love for his fellow man that should be instilled in all of us.

Mr. Speaker, on behalf of the 18th Congressional District I congratulate Dr. Scurti and thank him for the outstanding contribution he has made to the Upper Ohio Valley.

DR. GEORGE E. MUELLER

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. TEAGUE. Mr. Speaker. the August 1977 edition of Nation's Business magazine carried an excellent article on my very good friend. Dr. George E. Mueller, president of System Development Corp. and former director of the Apollo program for the National Aeronautics and Space Administration.

Dr. Mueller is a most unique individual and certainly possesses all the qualities of leadership and what is more uses

them to get things done. It was a genuine pleasure working with him in NASA and it is still a pleasure to work with him in the fields of science and technology.

PROFIT FROM THE REVOLUTION IN TECHNOLOGY

(NOTE.—George E. Mueller moved from a top job in the space program to head a company struggling for survival on the frontiers of science. This is his success story—and his forecast of radical changes that technology will bring in the future.)

"It doesn't really matter whether it is a $30 billion program or a $30 million program. You still have people to deal with, to motivate, and to get working as a team toward an objective."

George E. Mueller speaks softly when he talks about his management philosophy, but his decisions have packed a wallop.

He directed the nation's manned space flight program as associate administrator of the National Aeronautics and Space Administration from the beginning of the Gemini flights in 1963 to the second Apollo moon landing in 1969. Later he took over System Development Corp., a onetime think tank struggling for a foothold in the commercial world. Under his leadership the corporation went from annual revenues of $45 million to $125 million in five years.

KEY DECISIONS

One of the best decisions he thinks he made in the manned space flight program was to go to "all-up testing," in which not only were components tested one by one, but all were tested together to see if everything meshed.

One of the most crucial decisions he thinks he has made for his company was to cut executive salaries 20 percent and install an incentive plan which would more than make up for the cut if managers became more profit-motivated.

At 58, Dr. Mueller is one of a handful of people who have grown up with the electronics industry and had a significant part in this century's pell-mell rush into the age of technology.

He was involved in early television, helped to midwife radar, and was responsible for the design, development, and testing of components and systems in the Atlas, Titan, Minuteman, and Thor ballistic missile programs.

As a government official prior to the manned space flight program, he directed the first successful space probe with Pioneer 1, and he helped establish the Air Force SPAN satellite tracking network.

SCIENTIST TURNED MANAGER

His first love was pure science, but most of his life has been spent as a hardheaded administrator.

Now, as chairman of System Development Corp., he heads a 4,000-employee enterprise based in Santa Monica, Calif., but doing business around the world.

A closely held corporation, it will go public one of these days, he says, "whenever the stock market appears to believe that new issues of companies like this are very valuable for investors."

The firm designs data processing systems for newspapers, financial institutions, industrial firms, and public safety officials. It also provides a host of computerized information services for scores of customers, including its No. 1 customer, the federal government.

NEED FOR "THINK TIME"

Dr. Mueller usually has about ten projects going at once, but manages to keep an almost spotless desk. He keeps a computer terminal in his home, writes notes to himself, and keeps a steady stream of memos going to his secretary, beginning in the morning, when he usually brings in a handful of ideas he has jotted down at home.

George Mueller has a quiet "think time" from 10 p.m. to midnight, nearly every night.

He relaxes by scuba diving, skiing, sailing, and working in a home workshop. He spends a great deal of time reading, usually while traveling. His favorite subjects are science, of course, and some science fiction.

Dr. Mueller obtained a bachelor's degree in electrical engineering at the University of Missouri at Rolla, a master's at Purdue University, and a doctorate in physics at Ohio State. He has taught electrical engineering, and he has worked for a number of companies—he was senior vice president for General Dynamics Corp. when he decided to come to System Development Corp. in 1971.

In this interview with Nation's Business, he talks about his career and his company.

What is the major difference between running a manned space program and a commercial business?

Perhaps the most significant difference is that in government you report to many authorities—to Congress; the executive branch, particularly the Office of Management and Budget; and your own agency.

In business you have a board of directors and shareholders. Therefore, in business it is easier to make decisions and do things than it is in government.

ARE CHALLENGES SIMILAR?

One thing made it relatively easy for the manned space flight program to reach its goal. That was the fact that President Kennedy set a specific target date for getting men to the moon. We overlaid on that a specific number of dollars. So we had a clearly defined goal, with a clearly defined amount of dollars to accomplish it.

In industry, or at least in our industry, the challenges aren't as clear-cut. Our industry changes so rapidly that you have to reevaluate targets almost every six months to be sure you are headed in the right direction.

So, in a real sense, it is a greater challenge to make the right decisions in business than it was in the manned space program.

Which allows the greatest margin for managerial error? A vast government project, such as the space program, or a business?

There is a much more direct relationship between making a poor management decision in business than in government.

In private industry, if you overrun a major fixed-price program by a factor of four, you would almost certainly use up your net worth and go bankrupt. In government, if you overrun a program by a factor of four, you simply go back for more money.

How did you gravitate from pure science to administration?

I really got into administration by default. Electron emission phenomena and electromagnetic theory are as far removed from administration as you can get, and those were the areas I was involved with in my early career, when I was at Bell Telephone Laboratories.

I worked on the ballistic missile program as a consultant for Ramo-Wooldridge, Inc., in Los Angeles in the program's early days and continued to consult after I had gone back to Ohio State to teach. Then my bosses at Ramo-Wooldridge asked me to come back. Eventually, I decided to do this, since it was more fun than almost anything else in that time of starting up on the ballistic missiles.

I arrived back on the scene one Monday, and two weeks later my two bosses said: "You know, we have decided to move out and start our own company. We would like you to take over running the division here." Two weeks later I was running the electronics engineering division at Ramo-Wooldridge.

Then we started working on the first Air Force satellite, and I found myself running that division, too. That's how I got into administration.

When you first came to System Development Corp., it is said, you cut everybody's salary 20 percent.

I didn't cut everybody's salary. You need a bit of background on this.

The company had gone from almost $100 million in sales two years before to about $45 million at the time I took over. We had gone from a profit of about $1 million a month to essentially a break-even point. The company was likely to go broke. Managers were not really profit-motivated. You have to be, if you are going to have a successful company.

The quickest way I could think of to cause management to worry about profits was to cut the salaries of about 50 top executives but then extend incentives which would allow the executives to more than make up for the cuts.

The move turned out to be quite constructive, I think. We were able to do some profitable things in the next year. By and large, everyone ended up making more than he had made before.

You took over a company which was not profit-oriented. Did you have a preconceived plan of where you wanted to go and how to get there?

In general terms, yes. One of the first things was to assemble a group of the brightest people we could find in the organization to do long-range planning. Parallel with that, we did some things that had to be done immediately, such as straightening out the accounting system and providing some management training.

We took a five-year plan that this group developed, decided which parts made sense and which didn't, and proceeded to reorganize the company to start meeting those objectives. Looking back, I think we have accomplished every goal.

We wanted to become a prime contractor and have done so. We also wanted to develop and market some commercial products. We are doing this today.

You put that five-year plan into effect in 1972. Do you have a new five-year plan now?

Actually, we make a new five-year forecast every year. So we have an annual update of our long-range plan.

You have said that American technological development has slowed. Why is this?

The reason lies in some basic social pressures. Once we landed on the moon, the whole population seemed to say: "Man, that is a great scientific achievement, but we have doe everything now."

I guess there is a subconscious feeling that we have done all we really need to do.

Whatever the reason, Washington has backed off very considerably from investment in research and development. The result is that we aren't developing the technological base needed to permit us to lead the world in new technology.

Many people contend technology has created as many problems as it has solved.

I know that feeling exists. It was brought to a focus by the environmental groups saying: "You are destroying the world in which we live."

Some people fail to recognize a basic fact. That is, if we are to continue to increase our standard of living, we must find the resources to support it.

You can't find these new resources without continuing technological advances.

Is there to be a new frontier for technology or just a consolidation of what we have?

We are in a completely new era of technology. I don't think the full impact of the microprocessors now available in large-scale integrated circuits is beginning to be understood even by industry, much less the public.

I think we are on the threshold of completely changing our way of life. Whether this is good or bad, I don't know.

For example, take those little electronic games you can now play on your TV set—you can use the same technology to provide home instruction for your children. We are just beginning to understand the full implications, in terms of how we live, of the computer's entry into the home.

I don't think the impact of technology is going to be diminished. My concern is that we aren't doing the basic and applied research to take full advantage of this next revolution.

What is going to take the place of the solid-state circuit developments, which are now 30 years old?

How will this revolution affect us most?

I would guess the full implication is the eventual elimination, in many instances, of the need to go to work. You could work just as effectively in your own home. That should solve a fair amount of the transportation problem.

Except when you wanted to meet people face-to-face, you wouldn't have to go anywhere. You wouldn't have to attend college classes. You could do all of your classwork at home and could progress at whatever rate you wished. You would have to pass certain tests, of course, to demonstrate what you had learned.

What about technology's ability to solve pollution problems? Nuclear waste, for instance.

In my opinion, the nuclear waste problem is greatly exaggerated. One difficulty is that people get emotional over the issue and cease to look at the facts.

The facts are that we can effectively process nuclear waste products and effectively contain them. Many of these waste products are short-lived isotopes. The long-lived isotopes are so small a fraction of the total waste that you could put them on a rocket and fire them into the sun, if you liked. It would just contribute slightly to the fusion processes going on in the sun now. So it would be absolutely no problem.

It is expensive to shoot things into the sun, but not expensive in terms of what it costs us not to have nuclear power.

Didn't the space shots give solar energy a big boost because of the solar energy panels on our spacecraft?

Right.

Can you see, at some future date, giant panels in the sky providing energy for us?

There has already been a great deal of looking into that. The best analyses I have seen indicate we would be better off using sunlight to grow plants here on the earth and processing the plants to get alcohol or some other fuel from them. The economics are greatly in favor of using the sun that way instead of trying to capture the sun's energy and beam it down to the earth in some fashion.

You have said the computer will, in the future, be much different.

There is no question about that. Special purpose computers are going to take the place of the general-purpose large central processors in most applications. You don't need one of those large crunchers capable of analyzing and processing nuclear phenomena for most of the tasks computers do today.

Will we ever have a computer that will accept verbal instructions?

Oh, yes. In fact, here at System Development Corp. we have developed a system that has some 1,000 words of vocabulary. We can see the development of machines that would not be too large or expensive to provide true voice input. Voice output is relatively easy to do with a computer.

It really is just a question of spending the research and development money necessary to accomplish this. One of the economics that the government has made is to reduce its support of research in the voice input area.

What would be the ultimate aim? Just to carry on a conversation with the computer?

What you ought to be able to do is carry on a rather consistent discussion with the computer to get the results you would like. If you are willing to type out the questions, you can query computers in free-form fashion now, to a large extent.

However, voice input and voice output would be a tremendous step forward. I am not too bad at typing, but I get tired of having to type questions in and watching the answers typed back.

Someone has described System Development Corp. as a software factory. Is that a good description?

You might call the company that, at least the part of it that is devoted to building and merchandising computer software programs. we are trying to use the basic technology we have developed in data-base management systems for that purpose.

One application is a newspaper editing system. Our research service is another application. It increases your effectiveness in carrying out bibliographic searches of one sort or another.

Claims administration service is another example of taking our basic knowledge and packaging it in a software program that hospitals, insurance companies, and other organizations that administer health-care claims can use.

How much of your business is government and how much commercial?

Roughly 60 percent government, 40 percent commercial. In the next year or so it will be about half and half. Five years ago our business was 95 percent government and five percent commercial.

What kind of manager are you?

One who believes in organizational changes to fit changing needs. When I first came here, we didn't have too centralized an operation. So we centralized it and placed very stringent controls on all activities.

This lasted about two years; then I began to decentralize. Now we operate essentially in four independent divisions, or units—government systems, commercial business, field services, and energy. We also have a fifth area, international operations, and a separate research and development division which reports directly to me.

It is a great mistake to believe that, once you have an organization that works, you have to stick to it forever. No organization works that effectively over a long period. At least this is true of an industry as subject to change as ours.

Then you're apt to change your four-division structure at any time?

Whenever there is a need to do so.

After college, your first job was with Bell Laboratories?

Yes. I went to work for the television research group at Bell in 1910. It was working on a picture telephone. Then the war broke out, and we got involved in radar. I got to work on the first of the airborne radars built in this country.

After that I went to another division and worked on microwave circuitry.

I was working at Ball Laboratories when integrated circuits—transistors and that sort of thing—were invented. I had a ball there. It was fun.

Was the moon program fun?

Not in that sense. The pressure was too great. Every moment was devoted to getting that last little detail in line. The challenge was the greatest, though.

Were there ever moments of doubt about the program's success?

No. It was something that could be done, and we were going to do it. There were some problems, believe me. But even during the worst disaster—the Apollo fire—I never had any doubt that we would succeed.

You were dealing with some rather strong-willed people. How much of a challenge was it to blend egos together?

A big challenge. But you have that in business, too. One of an executive's challenges is to blend egos, goals, and aspirations to reach an objective.

Have you made any decisions, good or bad, which stand out in your mind?

A couple. I think one of the best was the decision to go to all-up testing for the space program. In this company, I think the decision to cut executive salaries and install an incentive program was good for that time.

There was quite a bit of flak about that all-up testing decision, wasn't there?

Oh, yes. We had a lot of flak about some other things, too. Such as not building a rescue ship to be ready to launch in case of emergency. Then there was the medical question: Could we really fly men for long periods of time in space?

You never really gave the space crews suicide pills, did you?

Never did.

As a scientist, do you find today as exciting as yesterday, when there were all of those worlds to conquer?

If anything, the excitement is greater. We have all of this knowledge we didn't have 30 years ago. We are just beginning to understand something about body chemistry, biophysics, and biomedicine. As a result, we are on the threshold of doing some very constructive things with life, both in terms of a longer life span and of physical well-being during that extended time.

We also have instrumentation that allows us to understand more about the universe than ever before.

With our ability to build large space structures, we are also in a position to begin controlling the weather.

When I was at NASA, I had a study performed on a large mirror in space. With it, you could concentrate enough of the sun's energy to impact on the temperature of the upper and lower atmospheres. This permits you to influence the motions of the air. One application is to control the path of hurricanes and guide them offshore.

There is no end to the exciting things that we can do today.

What do you need in order to do them?

Consistent support from the public.

To get that, do American scientists need a glamorous effort, such as a new moon program?

Right. I tried hard to get us to go to Mars, but I didn't succeed.

You are pretty enthusiastic about technology?

I am enthusiastic about the world.

MR. ROBERT ANGLIN

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. APPLEGATE. Mr. Speaker, it is indeed a privilege for me to bring to the attention of my colleagues in the House of Representatives a constituent of mine, Mr. Robert Anglin, who has just recently been presented a membership in the Order of St. Gregory the Great by Pope Paul VI. His selection to the order is indicative of his devotion to God and outstanding character.

Robert Anglin graduated from Notre Dame University with a bachelor of arts degree in 1935 and from the Ohio State University College of Law in 1937. He

served as attorney for the Diocese of Steubenville, Ohio from 1945 to 1970. He presently sits on the board of education of Central Catholic High School in Steubenville, and board of trustees at St. John Medical Center. Mr. Anglin is a charter member and past president of the Serra Club of Steubenville, an organization for the fostering of vocation to religious life, and served one term as Jefferson County, Ohio, representative in the Ohio General Assembly.

As is indicated by his list of achievements too long to mention here, Robert Anglin has demonstrated the kind of love for his fellow man that should be instilled in all of us.

Mr. Speaker, on behalf of the 18th Congressional District, I congratulate Mr. Anglin, and thank him for the outstanding contribution he has made to the Upper Ohio Valley.

F-15'S TO SAUDI ARABIA—PART I

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. DODD. Mr. Speaker, I was disturbed to learn earlier this fall that the Defense Department had recommended the sale of 60 F-15 supersonic fighters to Saudi Arabia. I wrote to both the President and the Secretary of Defense in September urging the administration to refrain from this sale because I believed that sale of our most advanced attack fighter to Saudi Arabia would dramatically alter the military balance in the Middle East.

I have been pleased to learn that as a result of questions raised by several Members and various administration officials, the Defense Department is now reexamining its prior approval of the sale and considering various alternatives to the F-15. I believe that before we proceed further down the road toward this sale or other sales of sophisticated equipment, Congress must carefully examine what effects any sale would have on regional military balances and on the possible outbreak of war.

To this end, I have asked several organizations and individuals to prepare detailed studies of various aspects of this question for the consideration of my colleagues. Today, I am including in the RECORD the first part of a study prepared for me by Dr. Jo Husbands of the Center for Defense Information (CDI) entitled "The Proposed Sale of F-15's to Saudi Arabia." The first segment describes the F-15 Eagle, and briefly assess the potential effect that acquisition of the F-15 would have on Saudi Arabia's air combat capabilities. It also analyzes the potential impact of a sale to Saudi Arabia of F-16's, which some have proposed as an alernative to the F-15.

Dr. Husbands draws two major conclusions in this brief segment of her analysis. In the first place, she finds that "the F-15 could deliver more sophisticated weapons over longer distances with greater precision and ordnance flexibility than any aircraft now in the RSAF. The alternative purchase of F-16's would reduce the weapons loading and the performance envelope but still equip the RSAF with considerable increases in its present capabilities."

Before proceeding with a sale of either F-15's or F-16's to Saudi Arabia, I believe that we in Congress must carefully examine the impact that this dramatic increase in military might would have on the Arab-Israeli arms balance, on regional competition in the Persian Gulf, and on potential arms races that might involve several nations.

Second, Dr. Husbands concludes that the sale of F-15's or F-16's to Saudi Arabia would almost inevitably be followed by the sale of advanced radar systems, possibly including the AWACS. Because the radar of the F-15 has a problem analogous to tunnel vision and because the F-15—like other aircraft—has unreliable IFF (Identification Friend or Foe) beyond visual range, Dr. Husbands finds that "some sort of advanced radar capability would be required for the F-15 to reach maximum performance and therefore to function as a cost-effective aircraft." Accordingly, she concludes that any proposal to sell F-15's to Saudi Arabia "should * * * be evaluated in terms of its impact on Saudi capabilities and as the first in a series of potential sales of advanced weapons."

Mr. Speaker, in the months to come, I hope to be able to submit valuable information concerning this proposed sale to my colleagues so that we can come to a reasoned judgment if the administration should decide to proceed with the sale of F-15's or F-16's to Saudi Arabia. In my view, we in Congress must inform ourselves to the greatest extent possible about the potential effects of given arms sales before they are formally proposed so that we can avoid hasty last-minute judgments often required by the press of the arms sales process.

I hope that the information I will be providing will help elevate the level of debate in this critical area, and I welcome the assistance of other Members in this effort.

Mr. Speaker, I commend this first segment of Dr. Husbands' study and insert it at this point in the RECORD:

PROPOSED SALE OF F-15S TO SAUDI ARABIA

(By Dr. Jo L. Husbands, Center for Defense Information)

THE PROPOSED SALE OF F-15S TO SAUDI ARABIA

The F-15 is an all-weather air superiority fighter with excellent capabilities for air-to-air interception and ground interdiction missions. The plane represents the highest state-of-the-art technology in the U.S. Air Force inventory. The F-15 has an exceptional thrust to weight ratio, very high maneuverability, a large flight envelope, and an impressive external payload capacity. Its sophisticated "look up, look down" radar gives the F-15 the capability to detect and engage very high altitude targets flying at high speed (e.g., MIG-25s), or low altitude targets more difficult to spot with less capable radars.[1] The aircraft is in serial production and operational with Air Force units in the United States and Europe; limited numbers have been ordered by the Israeli Air Force.[2]

ROLE OF THE F-15 IN THE ROYAL SAUDI AIR FORCE (RSAF)

The 60 F-15s proposed for Saudi Arabia are to replace British-made BAC Mk. 52 and Mk. 53 Lightnings, interceptors in the RSAF since the late 1960s. These Lightnings were specially equipped, but still represent 1950's aircraft technology. There are reports that the Saudi Lightnings have metal fatigue problems;[3] they are also difficult to maintain, requiring more man-hours of maintenance than newer, more efficiently designed aircraft.

At present, the RSAF is built around the F-5, a less sophisticated lightweight fighter developed by Northrop for export to developing countries. By 1980 the Saudis will have more than 100 F-5E/F-5F for strike, ground attack, and tactical reconnaisance missions. The F-5s would have a secondary role in air defense if the F-15s are acquired.

An eventual first-line combat strength of six multi-role fighter squadrons, four of F-5s and two of F-15s, are planned.[4] Four other squadrons, three of F-5s and one of F-15s, are for training and a back-up defense capability. The curent RSAF inventory is summarized below.

ROYAL SAUDI AIR FORCE[5]

15,000 men and 164 aircraft (fighters and COIN).

Fighters

70 F-5Es (20 F-5Fs on order).
20 F-5Bs.
37 Mk. 52/53 Lightnings.
7 T54/55 Lightnings.
(Maverick ASM and Sidewinder AAM on order).

Counter-insurgency

30 BAC-167 Strikemaster (11 on order).

Helicopters

16 AB-206.
24 AB-205.
1 AB-204.
12 Alouette III.

Transport and Support

39 C-130 E/H.
4 KC-130 tankers.
2 Falcon 20s.
2 Jetstar transports.
1 Boeing 707.
6 Cessna T-41A trainers.

As the above shows, the RSAF is at present a relatively small, unsophisticated air force suited to a defensive posture.

CAPABILITIES OF THE F-15

The comparison of combat capabilities is a difficult task, affected by a large number of factors. One should avoid becoming attached to any static figures; at best, they represent possibilities, not actual operational data. Air Force combat radii estimates for the F-15 are still classified.

CDI estimates the intercept radius of the F-15 in an ideal mission profile (hi-hi-hi) at <2200 km; an average "in use" radius may be 1100-1500 km. If sustained high-Mach speed is required, the F-15's combat radius drops dramatically to approximately 300 km.

In a ground strike mode (hi-lo-hi), the F-15 could reach <2200 km. carrying external Fast Pack fuel cells, and under 1600 km. without them. The aircraft's speed, the skill of its pilot, climate and weather conditions, fuel and ordnance loads, and the combat environment itself all strongly affect combat radii.

Comparable estimates for the RSAF Lightnings are not available, but CDI estimates combat radii of only ⅓ to ½ the F-15's. By any measure, however, the F-15 would bring a major increase in the air defense and strike capabilities of the RSAF. From bases in Saudi Arabia, the F-15s would be able to reach into Iran, Iraq, or into Israel and the Sinai Peninsula.

ARMAMENT

In deliverable armament per sortie, the F-15 would substantially increase current

Footnotes at end of article.

RSAF capabilities.[6] The Lightning is equipped with two 30mm. Aden guns, with a total of 240 rounds. The F–15 has one 20mm. M61–A1 gun with 950 rounds. The Lightnings carry two Red-Top infra-red air-to-air missiles, with an effective range of about 12 km. The F–15 can carry four Sidewinder (AIM–9L) infra-red and four Sparrow (AIM–7F) semiactive radar air-to-air missiles, plus two Fast Packs. The effective range of the Sidewinder is 3–5 km., of the Sparrow more than 25 km.

Beyond this capability, the Lightning has a total over and under-wing possible load of 144 air-to-ground rockets or six 1000 lb. bombs. The F–15 can carry up to 14,000 lbs. of mixed ordnance on its 9 external hard points. The weapons mixes available for the F–15 are listed in the table below. Different missions would require different mixes of these weapons. The essential point is that the F–15 could deliver more sophisticated weapons over longer distances with greater precision and ordnance flexibility than any aircraft now in the RSAF. The alternative purchase of F–16s would reduce the weapons loading and the performance envelope but still equip the RSAF with considerable increases in its present capabilities.[7]

ADVANCED RADAR AND THE F–15

For maximum and most effective performance, the F–15 requires the support of sophisticated ground or airborne radars. With such support, the F–15 can be vectored to targets at ranges over 100 miles, but without it may be limited to little more than visual range.[8] This limitation results from two features of the aircraft. The "look up, look down" capacity of the F–15's own radar has "tunnel vision," with long distance focus but restricted lateral scan. The pilot thus needs the assistance of other radars to direct his search pattern and to orient him to a target "lock-on."

The second feature is the unreliability of IFF (Identification Friend or Foe), a problem common to all aircraft systems. The support and enhanced capabilities of other radars are again required if the F–15's pilot is to acquire distant targets and launch missiles against them with reasonable assurance that he is firing at his opponents.

Long range identification and tracking are a necessity if the F–15 is to achieve its full combat potential. Without such support systems, the combat performance record of the F–15 is mixed. In an Air Intercept Missile Evaluation exercise completed at Nellis, AFB, Navada in June 1977, F–5s, F–14s, and F–15s consistently "destroyed" one another during close-in engagements. Major General Frederick C. Blesse (USAF, Retired) observed the exercise and explained:

". . . it doesn't make much difference how fast your airplane is or how high it will fly. Once you get inside your enemy's missile envelope you're not likely to escape."[9]

With advanced radar support systems, however, the F–15 has an impressive record in its combat performance tests.[10] In the NATO theater, the support for the F–15 will come from AWACS and the existing ground-based radar and command and control network.

MORE SALES AFTER THE F–15?

Selling F–15s to Saudi Arabia would not necessarily mean the sales of AWACS at a later point, but some sort of advanced radar capability would be required for the F–15 to reach maximum performance and therefore to function as a cost-effective aircraft. The U.S. Navy's E–2C Hawkeye or the British Nimrod airborne systems could be used, or a network of ground radars could be constructed for the Saudis. As was discovered in Iran, however, ground radars are more costly and require thousands of American technicians to operate and maintain.[11] In any event, either air or ground C³ would represent an addition to Saudi capabilities well beyond present capacity.

CONCLUSIONS

Any analysis of the over-all impact of the F–15 must await other components of this study. These will include an assessment of RSAF ability to absorb advanced weapons, and an estimate of the military threats perceived by Saudi Arabia which relate to its request for the F–15.

At this point, one can say that the RSAF has traditionally been a defensive force with limited capabilities. The Saudis began a modernization program in the early 1970s, largely through the purchase of U.S. weapons and services.[12] The purchase of F–15s or F–16s would amount to grafting extremely sophisticated offensive aircraft onto a relatively unsophisticated air force. RSAF combat capabilities would increase markedly. The sale is also likely to create a demand for other sophisticated equipment to support or to complement the F–15. Any proposal to sell F–15s should thus be evaluated in terms of its impact on Saudi capabilities and as the first in a series of potential sales of advanced weapons.

ERA—STRETCHING THE GIRDLE

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. HANSEN. Mr. Speaker, getting old means getting broader for most creatures, and the ERA seems to be no exception. As the national courtship of this female legislative apparition approaches its seventh year, the baggy stockings and sagging girdles are beginning to show. A rush and a swirl are heard, and we see an extension of dating time now proposed in hopes of still getting this aging creature a constitutional marriage.

ERA has been embraced by many States, but her controversial charms have also caused her to be oft-spurned, even accepted and then rejected on some three occasions.

Age will not necessarily make ERA more attractive and in fact some suitors may also develop hostility if forced to keep later hours than their date originally called for.

Mr. Speaker, I am deeply concerned that the constitutional issues regarding ratification, rescission, and extensions of time be properly aired from all points of view particularly in light of the deep-seated controversy regarding the equal rights amendment.

If ever a constitutional procedure should be precisely formulated and adhered to it is now. The Nation is torn not only by ERA but by a number of other issues of serious philisophical magnitude and the only way to preserve confidence in Government is through fairness and precise practice of the law and lawmaking.

Unfortunately there is a strong tendency by activists and specially dedicated interests to interpret law and constitutional procedure by the force of political pressure where "might makes right." This Republic provides checks and balances to preclude such mob rule and pressure tactics and I feel it absolutely essential that we make decisions by due process and eternal wisdom and not because of emotional panic.

There is substantial precedent for one-time action by State legislatures regarding constitutional amendments where a decision to ratify or not ratify is held binding. There is also substantial precedent for allowing a State to change its mind and ratify after refusing to ratify or rescind after ratification. Whichever method prevails it should be applicable uniformly, whether to allow no change or to allow both changes. This matter should be heard.

Certainly there is a question as to precedent for changing the rules in the middle of the ball game such as the requested extension for approval by the States of a constitutional amendment as proposed in the Holtzman resolution before the House Judiciary Committee. Is this fair, is it legal, does it have proper precedent? These questions can only be adequately answered after hearing both sides. In view of the efforts to gain extension of ratification time without allowing for a State legislature to change its mind, can the Congress legally and properly be a party to arbitrarily holding States hostage to actions taken under different specifications and rules?

I think not, Mr. Speaker, and to bring corrective action, I have introduced the Hostage Relief Act of 1977 which is described in the following letter I have prepared seeking support of my colleagues in the House.

HOSTAGE RELIEF ACT OF 1977

I believe it is patently unfair and contradictory to the spirit of the United States that the sovereign States of this Nation should be held hostage to hasty action taken in any cause. This is indeed the case in the thinking of those who would make legislation and constitutional processes a one-way street such as in the matter of rescissions on proposed constitutional amendments.

My State of Idaho found itself initially stampeded toward the proposed equal rights amendment and upon reconsideration has rescinded its actions. Other States have also rescinded. To suggest as the U.S. Attorney General's office has done that there is no repentance and no recourse for hasty actions in the legislative and constitutional process is an insult to the viability of the process of self-government and to the basic principles of fairness. It is a doctrine of entrapment.

This is particularly so in the opinion of the Department of Justice issued October 31, 1977, as a "Memorandum for Honorable Robert J. Lipshutz, Counsel to the President" on the subject, "Constitutionality of Extending the Time Period for Ratification of the Proposed Equal Rights Amendment," the author Mr. John M. Harmon, Assistant Attorney General in the Office of Legal Counsel would have us believe, though his opinion is strewn with conjecture and speculation, that not only can States not rescind under the original 7-year period, but they cannot rescind during a 7-year extension period.

The equal rights amendment should have to stand on its own merits and not be propped up and promoted by illegal activity and preferred treatment. Nevertheless this is the case.

First, the GAO has released in a report earlier this year that funds were illegally diverted from a whole host of Federal agencies for International Women's Year activities which improperly included promotion and lobbying for ERA. In order to recover such funds and preclude further illegal activities in this regard, I filed a lawsuit in the U.S. district court on September 20, 1977.

Second, ERA proponents now through legislation introduced by Representative ELIZABETH HOLTZMAN (H.J. Res. 638) want to change the rules after the ballgame has begun. As they approach the final year of a seven-inning ballgame behind in the score, they seek to double the innings—something that offends precedent and fair play whether on the playing field or in the constitutional ball park, and of course they want the 14 years for approval of ERA to preclude any rescissions. This would mean that States will be held hostage for 14 years to a commitment made under rules providing for a 7-year approval period.

Thus, it appears the equal rights amendment may never have the opportunity to fly on its own merits as something so serious as a constitutional amendment should. Instead it enjoys or stands to enjoy the favoritism of diverted funds to promote it, the favoritism of doubling the period of time for proponents to round up support and the favoritism of preventing States from reversing ratifiation not just for 7 years but even for 14 years. To help correct this blatant manipulation of the process of constitutional amendments, I introduced H.R. 9812 on October 28, 1977. This legislation is designed to release the hostages, those States who have and would reverse ratification of a constitutional amendment during the accumulation process and prior to the final approval of 38 States.

This hostage relief legislation has also been prepared in amendment form which I plan to propose for committee consideration or present on the floor of the House in the event extension legislation such as proposed by Representative HOLTZMAN is seriously considered.

Mr. Speaker, in the name of fairness and sound constitutional practices I invite my colleagues to cosponsor my bill, H.R. 9812. Following is the text of this bill:

H.R. 9812

A bill providing that any State legislature which rescinds its ratification of a proposed amendment to the Constitution shall not be considered to have ratified the amendment

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any State legislature which rescinds its ratification of an amendment to the Constitution of the United States shall not be considered to have ratified the amendment, if the amendment has not, before the date of the enactment of this Act, been adopted as part of the Constitution, and if any period within which the ratification of the amendment by the legislatures of three-fourths of the several States is required by the Congress to be completed has not expired. Such rescission may be made before, on, or after the date of the enactment of this Act, but shall be valid for purposes of this Act only if made before the first date on which the amendment is ratified, without being rescinded, by the legislatures of three-fourths of the several States.

THE CARTER ADMINISTRATION SALT PROPOSALS—AN ANALYSIS, PART 2

HON. STEVEN D. SYMMS

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 8, 1977

Mr. SYMMS. Mr. Speaker, in the CONGRESSIONAL RECORD of Thursday, November 3, I discussed the first part of an in-depth analysis of the Carter administration SALT proposals that are currently in the final negotiating stages. This analysis was prepared, Mr. Speaker, by our colleague from Tennessee, the Honorable ROBIN BEARD. Congressman BEARD is a member of the House Armed Services Committee and is chairman of the Republican Task Force on Defense, of which I am a member.

In my remarks last November 3, I discussed Carter administration strategic policies, SALT objectives, and the generalities of SALT II. Today, I want to continue with the Beard analysis and discuss specific SALT negotiating points and issues surrounding SALT II and how they affect the future security of the United States:

SALT PROPOSAL ANALYSIS—PART 2

ISSUES

The proposed terms of the SALT–II agreement raise a number of questions, both in terms of what the agreement will apparently include and what it excludes.

Let me just highlight a few of the major issues that concern me, and I believe will concern the Congress as a whole.

Backfire

The Soviet Backfire bomber will be treated as a separate item, entirely apart from the SALT–II agreement. The Soviets apparently are prepared to agree that they will not increase the present production rate of the Backfire bomber.

At the outset, it deserves pointing out that the Soviets have yet to concede levels of production or deployment for any strategic systems. The figures we use are based entirely on our own estimates and they are tied to our national technical means of verification.

The reason the Soviet refuse to consider the Backfire as part of SALT is because of their position that it is not a strategic system. This same system, as was recently publicly reported, has a range of 6,200 miles; if once refueled its range is reportedly 8% greater than the most advanced B–52 and 17% greater than the cancelled B–1. Further, a fleet of about 400 Backfire bombers, according to public Congressional testimony, could deliver on the order of one-half the potential Soviet radioactive contamination against the U.S. in the next decade. We could presumably counter this potential threat through the deployment of an airborne radar warning control system in conjunction with an interceptor force, but the critical issue is why would a system with this capability not be constrained by SALT?

Unilateral statements by the Soviets that they would not deploy the Backfire in the Arctic would be meaningless in a crisis, and there is no way to verify any refueling restraints we might seek to impose because commercial or military aircraft could be quickly converted to tankers during crisis periods.

Cruise missile

The range restrictions on the air-launched cruise missile raise serious questions about adequate U.S. hard target kill capability in the next decade, and it is contrary to the recommendation made by the JCS to the President. In light of the President's recommendation to cancel the B–1, the JCS had recommended a range of 3,000 kilometers, immediately, and extending it to 3,500 kilometers if improvements in Soviet air defense continue.

The definition of range, of course, has yet to be finalized. Will it be the operational range, or the aerodynamic range? The latter definition would cut in half the actual target coverage capability of the system, a range which already has been determined to be inadequate according to our military planners.

Verification of any cruise missile constraints in any event is not possible, thus a potentially serious problem exists once the Soviets exploit the large size and volume of their cruise missiles with modern technology. However, the Soviets do not require the same range the U.S. does for their cruise missile systems. For example, the Shaddock cruise missile, currently deployed on Soviet submarines and within the 600 kilometer range, could cover some 50% of U.S. population and industry while the U.S. or Europeans, under such a constraint, could cover only some 10% of similar Soviet targets.

The United States apparently has not yet acquiesced to Soviet demands that the treaty

incorporate a non-transfer of technology provision. Whether this provision is or is not included, however, seems to matter little. Mr. Leslie Gelb, Director, Bureau of Critical Military Affairs at the State Department, and a chief architect of present U.S. Salt policy, has already apparently indicated that we would not want to do anything to violate the spirit or intent of the agreement.

From recent press reports you have seen that the Europeans have reacted strongly and negatively to any efforts by the U.S. to constrain them in their cruise missile development and deployment. The reason is that this system provides a very cost-effective way for the Europeans to counter the Soviet military threat to them.

There is one additional issue which I will raise now, but elaborate on in a moment, and that relates to counting ALCM carries as MIRVs. This will have a significant impact on the overall strategic balance and force structure. The point I would make here is that Mr. Gelb at State apparently has already declared that the U.S. cannot unilaterally determine what aircraft can carry cruise missiles. To date, air-launched cruise missiles are limited to "heavy bombers", namely, the B–52. Thus, their use on wide-bodied aircraft the FB–111H and probably tactical aircraft, would be precluded.

LIGHT VERSUS HEAVY ICBM SYSTEMS

The United States, contrary to the original definitions provided at SALT I, has accepted the Soviet interpretation of light and heavy ICBMs, the SS–9, which at SALT I was supposed to be the ceiling for a heavy missile, had approximately 12,000 pounds throw-weight. The new definition for a heavy missile is the SS–18 with approximately 16,000 pounds throw-weight. The original definition of a light missile was based on the SS–11 (1,500 lbs. throw-weight); the new standard is the SS–19, with approximately 7,500 lbs. throw-weight. By way of comparison, the throw-weight of our aged 54 Titans is around 8,000 lbs.; MX would be 7,500 lbs.; Minuteman is around 2,000 to 2,500 lbs. In short, there is no comparison in the throw-weight and lift capability of the strategic missiles possessed by the United States and the Soviet Union. This Soviet throw-weight advantage, when combined with MIRV and accuracy improvements, threatens to provide the Soviets with significantly more warheads than the U.S. and a potentially decisive counterforce capability.

SOVIET ICBM RELOAD CAPABILITY

Another issue which the U.S. has ignored in the past is the Soviet cold-launch technique, a technique which enables the Soviets to reload their ICBM silos. There are indications that the Soviets traditionally build many more missiles than launchers and studies have shown that exploitation of a silo reload capability could have a major effect on the strategic balance. Apparently, U.S. negotiators are considering allowing the Soviets to keep extra missiles, although located a few hundred miles from the silos. This is a proposal which would not diminish the Soviet reload threat. Moreover, while the Administration is arguing that the cold-launched technique has not yet been applied to Soviet silo-based missiles, there is little doubt that at least these Soviet ICBM systmes have a reload capabiilty.

NEW ICBM RESTRICTIONS

An issue of serious concern to me will be the provision governing the testing or deployment of new ICBM systems, including mobile systems. The U.S. has advanced that there will be no testing of systems not tested and no deployment of systems not deployed at the time of the agreement. The Soviets take the position that there should be no testing or deployment of new MIRVed systems. With regard to mobile ICBM systems, the language will permit the testing of a mobile missile and a mobile launcher, but not a mobile missile from a mobile launcher; moreover, the deployment would be prohibited during the period of the protocol.

These issues will be dealt within the Protocol and the compromise of the U.S.-Soviet positions will be critical.

Under the Soviet language and our proposed language, the MX would be confined to R & D. However, with the exception of deploying a mobile ICBM the Soviet ICBM development program might well be allowed to go unconstrained.

While the definition of terms will be critical, the new Soviet ICBM systems, (or modifications to the systems I mentioned earlier) if the Soviet language is accepted, would not be constrained since testing of those systems had been undertaken prior to the signing of the Treaty. Additionally, Soviet systems tend to be tested in both a single and a MIRV configuration, thus the U.S. could not verify which version would be deployed if deployment or modification to existing systems is permitted. Even if only operation and maintenance of ICBM systems is permited verification would not be possible.

A further concern to me is what will happen to the SS–16; the Administration continues to call this system the SSX–16 (The "X" designating Experimental) even though the system is deployed and operational. As you also know, the SS–20, which is unrestricted, reportedly consists of the first two stages of the SS–16, thus providing the Soviets with further dramatic breakout potential.

An additional potential problem exists with the Soviets beginning deployment of MIRVed strategic submarine missiles and their ability to circumvent U.S. national technical means of verification should they seek to replace single RV systems with MIRVed systems.

I would now like to turn to the meaning of all these numbers and terms of the proposed treaty that I have just discussed.

You can extrapolate the figures I have cited in numerous ways, and define a variety of force structure one overriding conclusion stands out—the Soviet strategic capability under SALT II will be awesome and contrary to U.S. objectives.

The strategic balance

In my views, the proposed SALT treaty represents no significant contribution to arms control and strategic stability. Further, the critical terms of the SALT agreement are essentially unverifiable and thus may prove a continuing source for dispute.

I submit that the proposed SALT package merely ratifies the proposed Soviet strategic force deployment program and it restricts the United States strategic capabilities in many significant ways which, in my view, will contribute to strategic instability.

To begin with, the aggregate of 2160 strategic Nuclear Delivery Vehicles for the U.S. is probably our best projected force level, whereas the 2,250 proposed by the Soviets, is probably the most reasonable assessment of the projected Soviet force level. For the U.S. to reach that latter ceiling with non-MIRV weapons, we would probably have to retain the costly Polaris and/or reactivate retired, mothballed B–52s.

MIRV aggregate

The aggregate MIRV ceiling of 1,320, 1,200 of which could be ICBMs and SLBMs lead most to conclude that we can have 120 MIRV carrying bombers. Unfortunately, it will probably not work out that way. If, as proposed, each bomber carrying 10 ALCMs is counted as one MIRV, and a bomber carries 20 ALCMs we would be permitted only 60 bombers; if a bomber carried 30 ALCMs, we would be permitted 40 bombers, before having to trade in other MIRV systems to compensate for additional MIRVed bomber deployment.

Additionally, if you consider the U.S. has some 31 Poseidon boats with 496 tubes, 10 Trident boats with 240 tubes, and 550 MM III, we have a total of 1286 MIRVed systems. So, to meet the sublimit of 1,200 MIRVed ICBM and SLBM systems, we will have to give up 86 MIRV systems, and I suspect the Administration will propose dismantiling 86 MM 111s, as the Trident joins the fleet.

MIRVed ICBM—Ceiling

The ceiling of 820 for MIRVed ICBM systems will permit the Soviets to deploy 308 heavy ICBMs, namely the SS–18. They could then deploy 512 SS–17s and SS–19s in any combination they wanted. If you assign 10 warheads to the SS–18, and an average of 5 of the SS–17 and SS–19, you come up with a staggering 5,640 ICBM warheads, excluding the 900 or so SS–11s they have. If you include the latter number, the Soviets will have around 7,000 warheads in their ICBM force structure, as compared to about 2,000 for the United States.

Now you see, I believe, where the concern lies with those who argue that the Soviets could expend a small fraction of their ICBM force to eliminate the U.S. silo-based ICBM force and still retain overwhelming superiority.

In closing, Mr. Speaker, let me say that in the third and final part of this SALT analysis I will discuss the Soviet ICBM threat and how this threat is increased by the Carter SALT proposal currently pending. I will also discuss the implications of Soviet superiority on world stability and the threat posed to the liberty and security of the American people.

HOUSE OF REPRESENTATIVES—*Friday, November 11, 1977*

The House met at 10 o'clock a.m.

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BRADEMAS) laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
November 11, 1977.

I hereby designate the Honorable JOHN BRADEMAS to act as Speaker pro tempore for today.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rev. Charles Mallon, St. Matthias Church, Lanham, Md., offered the following prayer:

Happy are they whose way is blameless, who walk in the way of the Lord. Happy

are they who observe His decrees, who seek Him with all their hearts.—Psalms 119: 1, 2.

Father, you have given us authority to make rules and establish precedence. This prayer is offered by virtue of these same rules and precedence. Happily, our Government permits us to walk in your ways and to seek you with all our hearts. Therefore, we ask you to grant harmonious continuity to this Government.

Bless those national leaders who observe Your decrees and who make blameless decisions. Keep them close to your heart.

Father, give us the wisdom to use the wealth of this Nation wisely. Protect us from selfish and greedy acquisition of material wealth. Intercede in our lives with gentle chastisement and bring happiness into our lives.

We ask this through Christ our Lord. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair desires to announce that, pursuant to the authority granted the Speaker on Tuesday, November 8, 1977, the Speaker did on that day sign the following enrolled bills and resolution.

H.R. 2770. An act to amend section 142 of title 28, United States Code, relating to the furnishing of accommodations to judges of the courts of appeals of the United States.

H.R. 6348. An act to convey to the Ely Indian colony the beneficial interest in certain Federal land.

H.R. 8777. An act to amend the Appalachian Regional Development Act of 1965 to permit an extension of the period of assistance for child development programs while a study is conducted on methods of phasing out Federal assistance to these programs; and

H.J. Res. 643. A joint resolution making further continuing appropriations for the fiscal year 1978, and for other purposes.

SUBMISSION OF EXTENSION OF REMARKS

The SPEAKER pro tempore. I take this time to make an announcement for the benefit of the Members. During the period of time that the House is meeting in pro forma sessions, the rule concerning the submission of extension of remarks will be suspended. Members having received permission to insert remarks can submit their remarks to the Official Reporters of Debates, room H–132, the Capitol, up to 6 p.m. on the days that the House is meeting. This does not exclude the rule requiring that all submissions must be signed by the Member and also there is no suspension of the two-page limit concerning extraneous matter.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
November 9, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 7:00 p.m. on Wednesday, November 9, 1977, and said to contain H.R. 2521, An Act to provide for the mandatory inspection of domesticated rabbits slaughtered for human food, and for other purposes, and a veto message thereon.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

MANDATORY INSPECTION OF DOMESTICATED RABBITS—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–261)

The SPEAKER pro tempore laid before the House the following veto message from the President of the United States:

To the House of Representatives:

I am returning, without my approval, H.R. 2521, an Act "To provide for the mandatory inspection of domesticated rabbits slaughtered for human food and for other purposes."

This Act would establish a new mandatory Federal inspection program for domesticated rabbits and rabbit products processed for human consumption. The program would be similar to that already applicable to poultry products, and would apply to imported rabbit meat as well as rabbit meat processed in the United States.

In my view, the costs to the general taxpayer associated with H.R. 2521 cannot be justified on several grounds:

—A voluntary inspection program operated by the Department of Agriculture, but paid for by the processors of rabbit meat, is already available to processors wishing to enjoy the marketing benefits of Federal wholesomeness certification and grading. Moreover, rabbit meat marketed in the United States (including imports) is subject to inspection by the Food and Drug Administration to ensure sanitation and wholesomeness. Neither the Agriculture Department nor the Food and Drug Administration has been able to substantiate a significant health problem with rabbit meat in this country.

—Existing Federal inspection programs are intended to apply to meats consumed by large numbers of Americans. Rabbit is essentially a specialty food purchased by a relatively small number of consumers. I believe that it would be inequitable to require all taxpayers to support extension of Federal inspection of specialty meats to include rabbits. While the initial Federal cost is small, once in the law, the subsidy may grow increasingly over the years. Moreover, signing this bill would provide an incentive for Federal payments for the inspection of other exotic or specialty foods.

—Requirements for on-site inspection of foreign processing facilities by Department of Agriculture employees would strain relations with the People's Republic of China, a major exporter of domesticated rabbit meat to the United States. Extensive Food and Drug Administration inspection of Chinese imports have uncovered no health problems.

The primary beneficiaries of this special interest legislation would be a few large processors of rabbit meat which would no longer be required to reimburse the Federal Government for inspection services required to market their product as USDA inspected and graded. A significant source of competition from the People's Republic of China also would be severely restricted or eliminated with little or no improvement in consumer health protection.

Accordingly, I do not believe that approval of H.R. 2521 would be in the best interest of the American people.

JIMMY CARTER.

THE WHITE HOUSE, *November 9, 1977.*

The SPEAKER pro tempore. Without objection, the objections of the President will be spread at large upon the Journal, and the message and bill will be printed as a House document.

There was no objection.

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that further consideration of the veto message on the bill, H.R. 2521, be postponed until Tuesday, November 29, 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
November 10, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 12:35 p.m. on Thursday, November 10, 1977, and said to contain a message from the President wherein he transmits in accordance with the Impoundment Control Act of 1974 the third special message for fiscal year 1978 on budget deferrals.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

FOUR NEW DEFERRALS IN BUDGET AUTHORITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–262)

The SPEAKER pro tempore laid before the House the following message

from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals totalling $908.6 million in budget authority. The deferrals affect the Departments of Defense and Energy, the National Science Foundation, and the Emergency refugee and migration assistance fund.

In addition, I am reporting revisions to five deferrals previously transmitted. Three of these revisions change the agency name and related identifiers of the deferrals from the abolished Energy Research and Development Administration to the new Department of Energy. The amount deferred for the Department of Energy's Plenum Fill experiment has also been increased by $0.8 million. In addition, two supplementary reports for deferrals in the Office of the Secretary of the Treasury report an increase of $26.3 million in the amount deferred.

The details of each deferral are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *November 10, 1977.*

MICHAEL STRAIGHT

(Mr. BRADEMAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BRADEMAS. Mr. Speaker, following the swearing in of a new Chairman, Michael Straight will be leaving the National Endowment for the Arts. Since 1969 he has served with great distinction as Deputy Chairman of the Endowment.

Prior to joining the Endowment, Michael Straight worked in the Departments of State and Interior during the New Deal period and served as editor of the New Republic. He also held positions with several organizations dedicated to peace, justice, and civil rights. Michael Straight, therefore, brought to the National Arts Endowment both long experience in government service and a keen sensitivity to the problems and concerns of the American people.

Mr. Speaker, as chairman of the Subcommittee on Select Education, with responsibility in the House of Representatives for the legislation authorizing the National Endowment for the Arts, I have observed Michael Straight's steady, tireless, and creative contributions to our Nation's cultural life. His commitment to encouraging artistic activities of high quality as well as to bringing the enrichment of the arts to more Americans has been unwavering. He provided invaluable guidance for the Arts Endowment during the period of its most remarkable growth and its coming to maturity.

Mr. Speaker, like many of my colleagues, I have welcomed and benefited from Michael Straight's counsel and have appreciated his outstanding service to the arts and to the Nation. His tenure at the Endowment has added another illustrious chapter to his distinguished career and I take this opportunity to pay him tribute for a job well done.

Mr. Speaker, I ask unanmious consent to insert at this point in the RECORD a most thoughtful essay by Michael Straight, entitled "Public Funding of the Arts in America," which was published as part of "A Symposium on Culture and Society" as reprinted from "The Great Ideas Today 1977":

PUBLIC FUNDING OF THE ARTS IN AMERICA

(By Michael Straight)

For the past ten years, Congress and the state legislatures have provided direct funding in support of the arts in America. This funding has grown rapidly in a decade marked by resistance to the further encroachment of government in our lives. During that interval, arts institutions have flourished, audiences have multiplied, contributions to the arts from private sources have sharply increased, artists themselves have set out to regain the role they once held at the center of our society. Public funding is not the root cause of these advances, but it has been an essential ingredient. The federal government and the state governments have provided the working capital needed for expansion, and they have provided it without seeking domination or control.

THE LEGISLATIVE FRAMEWORK

The framework for this rapid growth in public funding has been provided by the governing statute of the National Endowment for the Arts: the National Foundation on the Arts and the Humanities Act of 1965, which also established a National Endowment for the Humanities. Its provisions, like those which govern the state arts agencies, are based upon six underlying concepts.

1. Excellence

Throughout the act, emphasis is placed upon excellence as the criterion by which all arts activities must be judged. The arts endowment is directed to support "productions which have substantial artistic and cultural significance, giving emphasis to . . . the maintenance and encouragement of professional excellence." It is further directed to support "projects that will encourage and assist artists . . . to achieve standards of professional excellence." And, in directing the endowment to transfer a portion of its funds to state arts agencies, the Congress adds that the state projects and productions must also meet the standards of excellence set forth in the act.

The impact of this principle can be felt day by day in the operations of the endowment. At the time of its creation it was widely believed that government funding of the arts would lead to the support of mediocrity. Instead, the endowment, armed with this guiding principle, has been able to resist whatever pressures have been brought to bear upon it to support activities which are entertaining rather than enlightening, or, in terms of performance, second-rate.

2. Independence

The act, in its Declaration of Purpose, holds that "it is necessary and appropriate for the Federal Government to help create and sustain . . . a climate encouraging freedom of thought, imagination, and inquiry." It goes on to state that "the Endowment shall be headed by a Chairman . . . appointed by the President, by and with the advice and consent of the Senate." The chairman serves, not "at the pleasure of the President," but for a term of four years. And while the endowment's budget is set, first by the president's executive arm, the Office of Management and Budget, and then by the Congress, neither the OMB nor the oversight committees of the Congress interfere with the prerogatives of the chairman in determining how and where the funds appropriated to the endowment are to be spent.

The chairman is advised by the National Council on the Arts and, once again, the act, in creating the council, ensures that it will not be a means of injecting political considerations into the endowment's decisions. The council is purely advisory to the chairman. Qualifications for membership are stern and require that appointees must be either "practicing artists, civil cultural leaders, members of the museum profession" or other art-related professions; they may also be "citizens . . . who are widely recognized for their broad knowledge of, or expertise in, or their profound interest in, the arts."

By these means the independence of the endowment is effectively safeguarded. Safeguards have been given added force over the past decade because the Democratic and Republican parties and the press have understood that the nonpolitical, nonpartisan nature of the endowment must be respected if it is to carry out its assigned role of supporting excellence in the arts. The two individuals who have been selected thus far to be chairman have been outstanding professionals in arts-related fields. They have submitted their recommendations on appointments to the council to the White House, and while their recommendations have not been taken on all occasions, successive presidents have respected the standards for council membership set forth in the act. It is of course true that the sums appropriated for the endowment have been small in comparison with those administered by other federal agencies. It is also true that as appropriations increase, patronage, rather than artistic purpose, may become the cement which holds the endowment in place. The Congress, in reauthorizing the endowment in 1976, amended the act to provide that, henceforth, appointments to the council will be subject to the advice and consent of the Senate. While this adds stature to the council, it could in time lead to the kind of political intrusion which has weakened other independent agencies of government.

3. Nonintervention

The third principle embodied in the act, of great importance, is nonintervention by the government in the operations of organizations and institutions to which public funds are given.

The fear that government patronage would lead to government censorship and control was widely held at the time of the endowment's creation. In recognition of that concern, section 4(c) was written into the act. It provides that:

"In the administration of this Act, no department, agency, officer, or employee of the United States shall exercise any direction, supervision, or control over the policy determination, personnel, or curriculum, or the administration or operation of any school or other non-Federal agency, institution, organization, or association."

This provision is as vital to the integrity of the Congress and of the endowment as it is to the freedom and independence of the grantees. The past decade has been a turbulent one, marked by women's liberation, the black revolution, and opposition to the war in Vietnam. Each of these upheavals has found expression in the arts. The expression has been characterized by frankness, bitterness, anger, and militancy. It has extended the vocabulary of literature, of film, and of the theater to words and phrases which in past years have been widely held to be offensive. The endowment, in its commitment to seriousness of intent and excellence in

execution, has funded many of these activities. And, understandably, taxpayers and their elected representatives have been upset. The endowment on occasion has been called upon to bring its grantees into line with prevailing values, or else to cut off their funds. In each instance, it has cited section 4(c) of the act. Congressmen, in turn, have acknowledged the force and wisdom of the section and have allowed common sense to prevail.

4. Nondomination

More insidious than outright censorship, because it is less visible, is the threat that government may come to dominate the artistic life of the nation through its predominance in funding arts institutions and organizations. This threat, foreseen by the Congress, was countered by the provisions of the act which limit the proportion of arts budgets which may be funded by the endowment. Save for contracts, which it may enter into for its own purposes, and for a small portion of grants, given in exceptional circumstances, the act provides that the endowment shall not fund more than 50 percent of the cost of the projects and productions which it supports.

The wisdom of this provision is demonstrated day by day in administrative as well as artistic terms. At the level of 5 to 15 percent funding, which prevails for most performing arts institutions, the endowment with its small staff (220 in all) exercises a minimum degree of oversight. The survival of each institution turns on its own inner vitality and on the response of the constituency which it serves. In contrast, at 50 percent funding, the endowment would, sooner or later, be drawn into questions of management: unions, contracts, salary scales, the competence of key personnel, the nature and composition of boards of directors. Its support, or lack of support, could become a matter of life or death—a nightmare which the endowment has been spared thus far.

The endowment, guided by the National Council on the Arts, has clung tenaciously to the 50 percent rule. In developing its own guidelines, it has absolved itself of the psychological pressures that flow from a parental relationship by specifying that it will not fund a theater company, for example, until it has been in existence for two years. In positive terms, the endowment has supported arts organizations and institutions in ways that encourage them to obtain increased funds from private sources. An oversight committee of the Congress, reviewing the record of the endowment in 1970, concluded:

"The fear that Federal support would mean that the traditional private sources of funds for the arts would withdraw proved unfounded. On the contrary, it has proved a stimulus to private funds from sources never before involved with the arts."

5. Decentralization

Section 5(g) of the National Foundation on the Arts and the Humanities Act authorizes the chairman of the endowment to carry out a program of grants-in-aid to the several states in support of the arts.

This provision, added almost as an afterthought to the legislation, has been a key element in the success of public funding over the past ten years.

Only five states had functioning arts agencies when the act was passed in 1965. It was accompanied by an appropriation of $25,000 to each state to assist in the creation of a state arts agency. The response was immediate: within a year, state agencies were operating with appropriated funds in twenty-two states and in Puerto Rico; by 1974, agencies were functioning in every state and special jurisdiction.

In addition to the basic state agency grant, the endowment provides matching funds to the state agencies. It gives them administrative responsibility for a number of programs, including the Dance Touring Program and the Artists-in-Schools Program.

By these means, public for the arts has been decentralized. Given the rapid growth in public funding, the alternatives to decentralization would have been either formula funding, with a consequent loss of oversight of artistic standards, or else the emergence of a massive federal bureaucracy in the endowment. In contrast, the federal-state partnership has enabled the endowment to safeguard its standards during a decade of growth, and yet to remain small.

6. Professionalism

Public patronage of the arts, like private patronage, is ultimately measured by the taste and perception of those who make the artistic judgments on which funding is based.

Section 10(a)(4) of the act authorizes the chairman of the endowment to "utilize from time to time, as appropriate, experts and consultants, including panels of experts." The first chairman, Roger Stevens, moved promptly to carry out this provision and appointed panels of professional advisers in most program areas. When Nancy Hanks became chairman in 1969, added emphasis was given to the panel srtucture. A congressional oversight committee, reporting in 1973, noted that:

"Professional advisory panels now play a major role in Endowment programming with 185 individuals residing in 68 communities in 31 states, assisting ten different Endowment program areas."

Panelists are appointed by the chairman of the endowment; they may serve up to four years. They are selected primarily for their professional competence but also with the need for maintaining a balance within each panel of background, residence, and artistic viewpoint. The panels review the 20,000 applications that are now received each year. They also review the categories within which the applications are submitted. The National Council on the Arts advises the chairman on the allocation of funds between art forms, but the chairmen of the standing panels attend council meetings and speak out on the art forms which they represent.

The panels make the basic recommendations on which grants are given. While these recommendations are only advisory, the council and the chairman rarely overturn them, and almost never for artistic reasons. The panels are protected by confidentiality and by the assurance that aristic merit must always be their primary consideration. Thus they are insulated against external pressures. Nonetheless, as the endowment's appropriations mount and its grants grow in size, it would be naive to suppose that these pressures will not increase.

It is of critical importance that until now neither the White House nor the oversight committees of the Congress have encroached upon the chairman's authority to select individual panelists. However, the committees have instructed the chairman on how they are to be selected. Thus, in hearings held in 1973, members of the Congress decided that too large a proportion of the endowment's funds was being allocated to urban centers in New York and California. They came, in turn, to the belief that a disproportionate number of panelists had been drawn from these centers. In consequence, section 10(a)(4) of the act, which gives the chairman the power to appoint the panels, was amended to read:

"Provided, however, That any advisory panel appointed to review or make recommendations with respect to . . . funding shall have broad geographic representation."

Again, in 1976, the two authorizing committees dealt with the panel structure in a general way, the House committee calling for "frequent rotation of the panel members in order to foster a greater involvement of the public in the decision-making process" and the Senate committee urging "the broadest possible representation of viewpoint on each panel so that all styles and forms of expression which involve quality in the arts . . . may be equitably treated."

These generalized comments are sound enough, given the commitment of our nation to democracy and to cultural pluralism. They do not damage the endowment. In contrast, were the Congress to undertake to control the selection of panelists, it would undermine the endowment's ability to recruit the nation's leading artists and critics as its professional advisers and to give free rein to their insights and skills.

The current programs of the endowment

The endowment's current program can be summarized in a table, showing estimates by program area for 1977.

Architecture plus environmental arts	$3,470,000
Dance	5,622,077
Education	4,488,000
Expansion arts	5,591,000
Federal-State partnership	15,764,960
Literature	2,150,000
Media arts	7,102,040
Museums	9,550,563
Music	12,880,655
Special projects	4,819,705
Theater	5,921,000
Visual arts	3,650,000

These programs have developed in their own ways, and they vary substantially in their impact upon the constituencies they serve.

Architecture plus environmental arts

The program began in 1967 with eleven small grants, mostly in support of environmental design projects. Ten years later, in addition to awarding grants, the architecture office has undertaken to raise standards of design, or architecture, and of graphic work throughout the federal government. It has organized national and regional design assemblies to increase design awareness among federal officials. It has required teams of nationally known designers to improve the graphic materials of forty-six federal agencies. It has published task force reports on the opportunities and the constraints which determine the quality of federal architecture.

Dance

The program, established in 1966, soon moved into massive support for large companies whose audiences were multiplying and whose financial problems were acute. Grants were made to assist new works and, more importantly, to encourage touring, an activity which for the first time provided continuous employment for dancers and which furthered the endowment's purpose of making the arts available to all Americans.

In 1977 the touring program has allocated $1,180,000 in grants which provide 30 percent of the company's minimum weekly fee to sponsors of the American Ballet Theatre, the Joffrey Ballet, and the New York City Ballet. It also has provided $2.1 million in support of touring by smaller companies, a program administered through regional agencies and through the state arts councils.

The program, as the Senate Committee on Labor and Public Welfare noted in its 1976 report, has been instrumental in raising the number of resident professional dance companies in America from ten to sixty in a single decade.

Education

In its second meeting in June 1965 the National Council on the Arts called for an

expanded role for the arts in education, one that would advance professional training as well as awareness and appreciation of the arts.

The council went on to set in motion two collaborative efforts with the Office of Education. The first, the Laboratory Theater Project, was innovative, daring, expensive, and short-lived. The second, which the Office of Education helped to fund for only two years, became the federal government's most notable art-in-education program. The program, to which $3,392,000 was allocated in 1977, is directed by the endowment but administered by the state arts agencies. Matching funds are offered to the states in recommended categories for the employment of actors, architects, craftsmen, dancers, filmmakers, poets, painters, sculptors, photographers, printmakers, jazz, folk, and classical musicians, and other artists. The selection of the artists is made by the state agency and the participating schools. The program, which began with six schools in 1969, is operating in 7,500 schools in all the states and the special jurisdiction.

Expansion arts

In the first four years of its existence, the endowment gave a few grants within its program areas to projects involving ethnic minorities or the residents of inner cities. These grants were plainly inadequate, and in 1971 a new program office, Expansion Arts, was created to support arts activities among groups whose cultures had been historically undervalued or ignored. The program, building on the prior efforts of the Ford Foundation and the Rockefeller Brothers Fund, quickly identified a large number of professionally led, community-based enterprises. Its support of these enterprises was then extended to professional artists at work in social contexts, most notably in prisons and hospitals.

The money allocated to the program in 1977 is being spent for workshops and performances in a wide variety of arts forms. Grants are almost entirely in the $5,000–$30,000 range, but, since the scale of operations is small, the endowment's contribution may be 20 to 30 percent of the budget of an expansion arts grantee as against the 3 to 5 percent contribution which the endowment makes to the nation's leading symphony orchestras and opera companies.

Federal-State partnership

The largest component of this program is the basic state agency grant allocation, which this year is $11,935,000. This allocation is given in equal amounts to the arts agencies of the states and the special jurisdictions.

The sums set aside for the state agencies were once determined by the chairman of the endowment. Since 1973 they have been set by the Congress, under an amendment to the act which provides that the state agencies and regional associations shall receive no less than 20 percent of the endowment's program funds.

The act requires that the basic grant be matched within the states. The additional funds advanced to the state agencies, for regional associations, for community councils, and for specific projects are given on a matching basis on the recommendations of the federal-state panel.

In principle, in order to be eligible for the basic grant, the state agencies must meet the qualitative standards set forth in section 5 of the act. In practice, review of the state programs has, so far, been minimal. In contrast, applications by the state agencies for project assistance have been subjected to qualitative reviews.

Literature

This program has been allotted a small share of the endowment's funds, although fine writing is basic not only to literature but to theater, to film, and to other art forms. The reason is two-fold: government finds it difficult to gear itself down to the individual writer, and writers in turn are loners, neither trained nor organized to deal with government in meeting their needs.

The Writers-in-the-Schools program has in fact, made it possible for poets to earn their living as poets in America. In addition, the Literature Program, in alternate years, provides fellowship awards of $7,500 to writers to advance work-in-progress. Applications from 2,500 published writers were reviewed in 1976 by the program's professional advisers, and 165 awards were given.

The program has not provided general support for creative writing courses or for workshops for teachers of English. It has given direct support to small presses which publish contemporary work. It has provided indirect support to over 200 literary magazines through the Coordinating Council of Literary Magazines. It has funded innovative efforts to bring contemporary poetry and fiction to wider audiences and it has supported service organizations such as PEN.

Media arts

One-third of the Media Arts budget is allocated to the American Film Institute. A grant of $1.1 million supports the institute's Center for Advanced Film Studies in Los Angeles and other activities; contracts, awarded to the institute, are for filmmaker fellowships and for film preservation.

In addition to the sums, the Media Arts Program awards direct grants in support of film, radio, and television. Programs in film include grants to forty-six regional film centers, grants for workshops, study courses, and festivals, and awards to individuals engaged primarily in making documentary and experimental films. Programs in radio include grants to Minnesota Public Radio for live presentations of poetry and folk music and for "Earplay," a series of plays produced for public radio by the University of Wisconsin. Programs for television include fellowships for young filmmakers in residence at cable television stations and for projects funded jointly with private corporations and foundations and the Corporation for Public Broadcasting and carried over the public television network.

Museums

The act creating the endowment listed museums as one of its legitimate concerns. A report prepared in 1968 for the Federal Council on the Arts and the Humanities found that "a pervasive and insistent financial crisis" confronted the nation's museums and added: "A strong case can be made for Federal support."

The small size of the endowment's budget made a program in support of museums impracticable in its early years. Pilot grants were made to three art museums in 1967 to help them "stimulate awareness of the visual arts and to make their collections more readily available to a wider public."

A second category of support, began in 1968, provided matching funds to museums for the purchase of works by living American artists. Then, in November 1970, the council approved a report calling for the creation of a new program of project support for all types of museums.

The program now provides a wide range of assistance to museums in mounting and touring exhibitions, in training professional staff members, and in conserving collections through restoration of works of art and renovation of the buildings in which they are housed. General support is not provided, and endowment grants to museums amount to less than 2 percent of their operating costs each year. Congress in 1976 added a new title to the act of 1965 entitled the Museum Services Act. The title established within the Department of Health, Education, and Welfare an Institute of Museum Services. It authorized appropriations of $15 million for the institute in 1977 and $25 million in 1978. If funds are in fact appropriated for the institute, it will be enabled to provide general operating support for museums of all kinds. It is understood that the arts endowment and the humanities endowment will continue to provide project support to museums.

Music

Projects in support of music were undertaken at the inception of the endowment in a wide-ranging, somewhat arbitrary way. The small size of the endowment's budget made categorical support impracticable; in fact, the minutes of an early council meeting record an occasion on which the trustees of the Ford Foundation, prior to approving their own $80-million allocation to the nation's symphony orchestra associations, asked for and were given an assurance that the endowment was not about to fund the orchestras.

The symphony orchestra associations, at late as 1968, held that they did not want or need federal funds. Then, in October 1969, they reversed their stand and held that endowment support was essential to their survival. In turn, they were instrumental in mobilizing sentiment behind President Nixon's request that the Congress double the appropriations of the two endowments in 1970.

For seven years the orchestras have been assured of limited but continuing support from the endowment. Thirty major orchestras, with annual budgets of over $1,500,000, received $4,710,000 in 1977; that is, about 4 percent of their gross receipts. Sixty-five regional and metropolitan orchestras, with annual budgets between $100,000 and $1,500,000, received $1,700,000, a sum less than 4 percent of their gross receipts.

In principle, the grants are given in support of projects such as touring, youth concerts, and summer concerts in parks. In practice, at a time when orchestras are committed to year-round employment of musicians, the endowment funds have amounted to general support.

In support of opera, forty-six professional companies were granted $3,201,000 for the 1976–77 season. The grants range from $7,500 to the Nevada Opera Guild to $600,000 to the Metropolitan Opera Association.

In other categories, $850,000 is allocated to support of jazz, ethnic, and folk music in 1977; $1,058,280 to training and career development; $172,995 to contemporary music performance; and $400,000 to composers and librettists to advance work-in-progress. A small sum, $70,000, is allocated to support of choral music and none to chamber music as such.

Special projects

The Office of Special Projects has funded programs which do not fall into categories set by art forms. Currently it encompasses folk arts, service organizations, art centers and festivals, fellowship exchanges with Great Britain, and "City Spirit," a program to assist communities which seek to employ the arts as a catalytic force.

Theater

In signing the act of 1965, President Johnson stated: "We will create a national theater." This concept of one predominant and heavily subsidized institution on the European model proved to be ephemeral and inappropriate. Instead, the endowment undertook to encourage the decentralization of professional theater in America by providing continuing support to a growing number of resident professional theater companies. Its grants, given as general support rather than for projects, coincided with and reinforced the rapid expansion of these companies across the nation. Fifty-six companies in forty-one cities, all operating with Equity contracts, were given grants for the 1976–77 season. The

total allocation of $3,780,000 is about 7 percent of their gross receipts for the year.

In other categories, the Theater Program supports experimental companies of national or regional standing; companies performing for short seasons, and for children; service organizations; and some training institutions. A new category of support provides funds for state arts agencies to encourage touring by professional companies within their areas.

Visual arts

The program, operating without a standing panel, has developed a wide range of categories of support. The largest, with a total allocation of $1,350,000 for 1977, provides fellowships for visual artists, printmakers, photographers, craftsmen, and art critics. A second category provides $600,000 in matching funds to communities for the commissioning of works of art in public places. In a comparable program, the visual arts office has assisted the General Services Administration in carrying out a program under which 0.5 percent of the cost of new federal buildings has been set aside for works of art.

Challenge grants

A supplemental appropriation provided the endowment with $9 million for challenge grants in 1977. The grants, given for one-time projects, are intended to encourage forward planning by cultural institutions. They thrust the endowment itself in a new direction by imposing criteria such as financial reliability, managerial competence, and community responsiveness onto the panels and the council whose judgments up to now have been based solely upon artistic merit.

ISSUES IN SEARCH OF A CONCEPT

Public funding of the arts has worked well for a decade. Its success was heightened because so much else that government did during the decade seemed misguided or wrong. Yet innovative ideas often harden into restrictive categories, and the programs that generated growth in one decade may inhibit it in the next. Continuity is essential. But a new chairman, working with a new administration, will need to consider underlying issues which up to now have not been confronted, let alone resolved.

Institutions of national standing

One of the purposes for which endowment grants are given is preservation of our cultural heritage. At the center of this heritage are certain key institutions of national and international standing. The following table lists the total expenditures of a group of these institutions in 1976, along with the endowment's grants to these institutions and the grants as percentages of the total expenditures of each institution.

(1) Institution	(2) Total expenditures	(3) Arts endowment grants	(4) Percentage (3) of (2)
American Ballet Theatre	$6,619,200	$627,790	7.8
New York City Ballet	6,334,000	267,330	4.2
Guthrie Theatre	2,443,825	150,000	6.1
American Conservatory Theatre	3,006,000	150,000	4.9
Chicago Symphony	6,420,456	150,000	2.2
Los Angeles Symphony	5,975,000	150,000	2.5
Metropolitan Opera	27,833,000	600,000	1.1
San Francisco Opera	5,189,522	150,000	2.9
Metropolitan Museum	27,733,000	308,480	1.1
Cleveland Museum	4,005,000	84,750	2.1
Museum of Modern Art	8,700,000	290,644	3.3

Many of the institutions listed here are in serious financial difficulties. In some instances dissolution may be inevitable; in others, greatly increased public funding may be the price of survival. What will the response of government be?

In Europe the response presumably would be massive support for the preeminent institutions. A comparable response in America is more problematical. We are committed to the view that government should not be a predominant patron. Moreover, the concept of preeminence is abhorrent to us. Therefore, funding that is provided to one institution must be offered to many others.

Leading advocates for the arts have argued that the federal government should shift from project support to general support and from varying levels of support to a minimum level of 10 percent funding of arts institutions.

While projections are uncertain, 10 percent funding of arts institutions of regional or national standing would point to expenditures of this magnitude in 1980:

	Total expenditures	Arts endowment grants
106 symphony orchestras	$204,000,000	$20,000,000
46 opera companies	114,000,000	11,400,000
55 theater companies	77,000,000	7,700,000
79 dance companies	68,000,000	6,800,000

In addition, if the operating costs of the nation's museums are estimated at $800 million in 1980, then the combined funding provided by the two endowments and the new Institute of Museum Services would amount to $80 million.

Expenditures of this magnitude would suggest an annual budget for the arts endowment in 1980 of $160 million. It could operate effectively at this level within the principles set forth in the act. But even at 10 percent funding, the future of the key institutions would by no means be assured.

The training of professional artists

If the federal government is to provide $100 million and more each year in support of arts organizations, it must be concerned with the institutions in which professional artists are trained.

The National Science Foundation has made $900 million available in support of the training of scientists. In contrast, no funds have been granted for the training of artists by the Office of Education or any major federal department. The endowment's record by art form has been:

Literature, visual arts, dance: no support.

Architecture, museums: fragmentary projects support.

Films, music, theater: limited institutional support.

In films, support has been given only one institution, the American Film Institute. In theater, pilot funding of some professional training institutions was judged unsuccessful, and funds are given to only nine university departments affiliated with professional theater companies. In music, support has so far been limited to small grants given to nine conservatories. To take three examples in 1976:

(1) Institution	(2) Total expenditures	(3) Arts endowment grants	(4) Percentage (3) of (2)
Juilliard School	$6,872,000	$55,000	0.8
Cleveland Institute	2,090,225	40,000	2.0
Peabody Institute	2,763,497	40,000	1.4

Speaking on behalf of five private universities and colleges, Grant Beglarian, a dean of the University of Southern California, told the National Council on the Arts in September 1976 that the costs of professional training were mounting beyond the capacity of students and private institutions to bear. He proposed that:

"It shall be a prime objective of the National Endowment for the Arts to help the education of future professionals in the arts through programs designed to share a part of the heavy financial burden carried by qualified students and the institutions they attend."

The statement was not adopted by the council. But the problem remains and demands serious consideration, and a committee of the council has been established to address this concern.

Beyond the professional core

Beyond the boundaries of the professional core for which the endowment has accepted limited responsibility lies the much larger constituency of nonprofessional artists and art institutions.

In Alabama there are no professional resident theater companies, but there are eighteen community theaters. If the live experience of the arts is important for the participant and for the audience, then community theaters deserve attention. If the endowment will not directly assist them, does it follow that the state agencies will accept this responsibility? The Alabama State Council on the Arts and Humanities does in fact make grants to community theaters. Many state councils do not. No state agency program is worked out in collaboration with the endowment; no federal program is prepared in conjunction with the states; no division of roles has ever been defined between the endowment and the states.

In principle, it might seem logical that the endowment should accept primary responsibility for funding institutions of national and regional standing and that the state agencies should accept responsibility for all others. In fact, this division of roles has been unacceptable to the state agencies. Many of them feel that they must fund the major institutions in order to obtain their backing in the state legislatures. In addition, many state agencies sense that for the endowment to take the best and to leave them the good is to relegate them to second-class status.

It may well be that the state legislatures should accept some funding responsibilities for their major institutions, just as New York State does today. It may be that no uniform division of roles can be agreed on by the arts agencies of the nation. Nonetheless, if a community orchestra or theater company or dance troupe is advised by the endowment to seek funds from its state agency, only to be told in turn that the state agency has allotted its funds to the endowment's grantees, the result is exasperation.

A new factor in this situtaion is the community arts council. Ten years ago there were 125 community councils; today there are 1,000. Their combined budgets are over $50 million a year. In the past, these councils have had to seek federal funds through the state agencies. As they grow, they may well insist upon direct and substantial support. In the process of becoming a partnership, the federal-state relationship may be enlarged to include community councils, above all, in the big cities.

Support or employment

In his statement on the arts of October 21, 1976, Jimmy Carter declared:

"The greatness of the Roosevelt years as compared to the past eight years was that Roosevelt did not view the arts merely as something to be supported. Roosevelt treated artists as an integral part of society—workers who had an important job to do in rebuilding our nation."

He added:

"We must again have a government that is prepared to make active use of the arts."

The president's view, in my opinion, is sound. To hold that society must *support* its artists is to separate the artists from society. It is demeaning, because it implies that artists are unable to support themselves. It is self-defeating, because it incites resentment and scorn in those who provide support for those who seek it. The old French fable about the cricket and the ant is a variation on this theme. It ends badly for the cricket when winter comes.

In the long run, whatever its initial success may be, a public agency dedicated to supporting one class of citizens at the taxpayer's expense is likely to find that it has enclosed itself within invisible boundaries, for the basic ethic on which it operates is against the American grain.

But if support for artists is ultimately a self-defeating concept, what about support for arts organizations and institutions? Museums plainly are educational institutions, entitled to public support. Performing arts centers may be included in the category of physical facilities which each municipality must maintain. However, no such historical sanction exists in this nation for symphony orchestras, opera companies, and theater and dance groups.

In requiring its grantees to conform to the guidelines it prepares, the endowment is providing more than support but far less than employment. It is a public foundation, operating within the framework that has legitimized all foundations over the past fifty years. The growth of foundations during this period is impressive, but it should not blind us to recent trends. There is ample evidence in congressional actions and in studies, such as the Report of the Filer Commission, that the foundation, like the spirit of philanthropy which gave birth to it, has seen its best days. As a democratic people gain in self-esteem, they are increasingly intolerant of the notion that the privileged are entitled to the nation's gratitude if they bestow a part of their bounty upon the less privileged.

In contrast to the narrowing horizons of support, employment of artists offers immense opportunities of expansion at a time when more and more citizens find their lives frustrating and seek enrichment through the arts. The Artists-in-Schools program of the endowment is one pilot program of proven worth. Prisons, hospitals, community centers, and centers for the aging are among the social contexts in which artists are now at work. The actors who work for the Cell Block Theater or the poets, painters, potters, and weavers who work as a team for COMPASS in St. Paul may not stand at the peak of their professions. But they are committed professionals, and by their own testimony their perceptions have been deepened and their skills strengthened by the work they do.

If President Carter carries out his commitment, we can expect a shift in emphasis toward employment of artists and of organizations such as symphony orchestras and dance companies which today receive grants from the endowment for services they perform in parks and in schools.

Awards to individuals

The first grants announced by the National Council on the Arts included awards to individuals (an action questioned by the writer at that time). Awards were given to painters and sculptors undergraduate students of architecture and elderly poets.

The Congress objected. In reauthorizing the two endowments in 1968, it struck the term individuals from the relevant sections of the act. Notwithstanding, the council and the chairman insisted on continuing awards to individual artists. The Congress relented and permitted awards to be made to "individuals of exceptional talent."

The endowment has continued and expanded its programs in support of individual artists.[1] In 1976 it provided the following fellowships:

Program:	No.	Amount
Architecture	50	$428,935
Dance	95	532,964
Literature	245	1,230,580
Media arts	34	286,965
Museums	29	137,741
Music	328	847,070
Visual arts	326	1,399,000
Total	1,107	4,863,255

These awards are unanimously supported by the council, the chairman, and the program directors of the endowment. In my opinion they are misguided, for these reasons:

First, the competitive nature of all awards sets artists against each other and is contrary to what Robert Henri called "the art spirit." The lasting benefit gained by the hundreds of artists who are given grants is problematical. The damage done to the thousands who apply and are rejected is indisputable. Belief in self is essential to the artist's creativity. Rejection can only undermine it. Rejection by a private jury may be discounted by the artist. Rejection in the name of the United States may do great harm.

Second, individual awards are a misuse of the resources of government. The proper role of government is to raise the general level of aesthetic awareness in the nation, not to pick and choose among the end products of the arts. The proper role of a small agency such as the endowment is to provide vision, to apply leverage, to employ its pennies in order to activate the dollars of others in employment in the arts. This role cannot be assumed by program offices overburdened with the peripheral tasks of handing out $5 million a year to one in one thousand of our professional artists. To say "overburdened" may seem an exaggeration, but no one who has watched panelists and staff members poring for hours over manuscripts, transparencies, and tapes, and who has seen the corridors of the endowment barricaded by piles of unopened packages from individual applicants, can doubt that the term is fair.

Third, in a democratic culture aesthetic judgments should, as far as possible, be dispersed.

The endowment can and must assess the relative merits of symphony orchestras and theater companies. But no such rating system can be applied to individuals. In literature a panel of acknowledged authorities may reach a consensus on the relative talents of applicants. A second and a third gathering of experts may confirm the conclusions of the first. In contrast, in the visual arts the formlessness of the "form" makes any such consensus illusory. In its determination to keep abreast of every passing fad, the endowment has, through its awards, funded activities which I can only characterize as frivolous.

All this is not to say the public funds cannot be effectively channeled to individuals. A current program provides matching funds to museums for the purchase of works by contemporary Americans. The program in my opinion is effective, first, because it disperses among many authorities the aesthetic judgments which must be made, and second, because it ends in a transaction, not a handout. The program, I believe, can and should be greatly expanded.

[1] Save for apprentice jazz musicians, performing artists are not directly assisted in advancing their careers.

The endowment in its first decade has operated in contrasting ways. Its flexibility has been its strength, but the pressures upon it are mounting. Substantial institutions are clamoring for substantial assistance. Neglected areas as large as the Western Reserve are crying out for settlement. Pilot programs endure, but like the unborn they have a period of gestation that cannot be extended for long.

Is the endowment, in its primary emphasis, to become a leadership agency or an operating agency? Will it be a catalytic force or an integral part of a large department of the federal government?

In itself, the endowment is unimportant, but from now on the federal government is bound to have a substantial impact upon the development of our culture. It may act consciously and purposefully; it may act in a fragmented manner, without comprehension of or concern for the aesthetic impact of its action.

If President Carter and his advisers sense that aesthetic values are important, the coming decade may see the emergence of a policy which relates the two endowments, the Office of Education, the Corporation for Public Broadcasting, the State Department, and the social agencies in a series of collaborative efforts, all in the service of an overarching design. If, on the contrary, aesthetic values and the arts are thought not greatly to matter, the endowments may go their separate ways, gaining just enough in appropriations to keep up with inflation, letting the human environment be shaped only by the blind, contending forces of the marketplace. Other questions may seem more pressing, and perhaps they are. But there is wisdom in the poet's insight: *Life is short, art is long; the songs outlives the singer; the coin, Tiberius.*

BIOGRAPHICAL NOTE

Michael Straight, who has served since 1969 as deputy chairman of the National Endowment for the Arts, is also a patron of the arts—as well as a painter, a musician, and even a former dancer with the Martha Graham company—in his own right.

Born in 1916 into a prominent New York family, he attended the London School of Economics and Cambridge University, from which he received an M.A. From 1937 to 1940 he was a writer-researcher for President Franklin D. Roosevelt and economist with the Department of State. In the latter year he became contributing editor from Washington to *The New Republic*, a magazine of which he was subsequently editor and publisher.

During the Second World War, in which he was a bomber pilot for the Air Force, he wrote a book, *Make This the Last War* (1943), a study of U.S. war aims and the emerging United Nations. In 1954 he published *Trial by Television*, an account of the Army-McCarthy hearings in Congress. A former board member of the Washington Theater Club, and vice-chairman of the National Repertory Theatre, he is the author of a play about the seventeeth-century Italian painter Caravaggio. He has also written two novels.

Mr. Straight is head of the William C. Whitney Foundation, which makes grants to the performing arts. In addition, he collects paintings and has contributed works to the White House, the Corcoran Gallery, the National Collection of Fine Arts, the Cleveland Museum of Art, and Cornell University.

SCRANTON SUFFERS A TRAGIC LOSS

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Pennsylvania (Mr. McDADE) is recognized for 10 minutes.

Mr. McDADE. Mr. Speaker, I am deeply saddened by the loss of one of Scranton's first citizens, Phil Brady. It was the English poet, John Donne, who said:

Every man's death diminisheth me for I am involved in mankind.

All of us are diminished by Phil's death.

Phil Brady was born without many of the blessings we take for granted so he gave his time so that workingmen everywhere could enjoy what he did without. In our Nation's Capital and here at home, Phil was a champion of the worker and a spokesman for our community.

It is one thing to be a dedicated labor leader. But to expand your concern for your workers to every corner of our community is an act of true patriotism. And this decent, caring man did just that. Every drive for better health care, every chance for civic improvement, every campaign for new jobs, and every endeavor for charity could measure its success by Phil Brady's participation.

Ours may be the only community in the Nation where the chamber of commerce and organized labor work together to bring new jobs to our region. This kind of cooperation attracted national attention. And if we look around us we see thousands of northeastern Pennsylvania families who have a good job who have a better paycheck, and the best chance for success because Phil Brady cared about them.

The Bible tells us: "He that has mercy on the poor, happy is he."

Phil Brady gave his entire life to those less fortunate. Even through the last years when his health was failing and when he and his family endured great personal suffering, Phil was still a strong voice for a better community.

That strong voice has now been stilled. We shall miss him. To his lovely wife Floss and to the wonderful family he raised go our sympathies and our prayers with the knowledge that we all loved him and that he is at peace.

PRESIDENT CARTER OPPOSES RIGID QUOTAS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

Mr. LEVITAS. Mr. Speaker, true equality of opportunity for every American is a goal which this Nation has been pursuing, in one form or another, since its founding. We have struggled to attain it against deep-rooted opposition and during periods of indifference and unconcern. We are still trying. The fight to achieve equality of opportunity has taken many forms. Most recently, we have tried to overcome the inequalities that the past has left us by acting affirmatively to provide equal opportunity for those deprived by past actions.

I support the idea of affirmative action programs—so long as they are aimed at achieving desirable goals and so long as they do not require another sort of discrimination. Affirmative action must be affirmative not negative. The Constitution, and those who execute its provisions, must be colorblind, as well as blind to place of origin, sex, race, and religious beliefs. It is the individual who must count in this society, the individual who should be judged solely on his or her own merits.

In order to foster this spirit, I have joined with Mr. WALKER of Pennsylvania, to introduce H.R. 9286, a bill prohibiting the use of Federal funds to enforce quotas and other numerical requirements in education and employment.

The imposition of numerical quotas must not be a part of affirmative action programs. When quotas or numerical qualifications are established, people are automatically excluded because of their race, religion, sex, or national origin, and that is discriminatory. That is reverse discrimination. Discrimination is discrimination. I am opposed to all types, not just some.

I am happy to know that President Carter agrees with us on this matter, and I would like to insert into the RECORD to a letter dated October 27, 1977, from President Carter to Richard Maass, president of the American Jewish Committee, explaining his views of this issue. It is important to note that our bill, H.R. 9286, accomplishes nothing more nor less than what the President of the United States has stated:

There is a distinction between flexible affirmative action programs using goals and inflexible racial quotas.

His statement that "rigid, racial quotas are exclusionary," is the essence of our bill. With this agreement between our views and the President's, I trust that Congress will now proceed to enact H.R. 9286.

I submit herewith the President's letter.

THE WHITE HOUSE,
Washington, October 27, 1977.

Mr. RICHARD MAASS,
President, American Jewish Committee,
New York, N.Y.

To Richard Maass:

I appreciate your informing me of the American Jewish Committee's strong support for affirmative action programs.

As you may know, I share the Committee's view that such programs are necessary if all Americans are to be assured equal educational and employment opportunities. My commitment to affirmative action programs was made clear during the campaign. Since taking office, I have honored that commitment through a number of actions designed to ensure that minorities have an equal opportunity to participate fully in our society.

One of the most recent of those actions was the filing of an amicus brief by the Administration in the Bakke case. That brief firmly supported affirmative action programs as a way to overcome the effects of prior discrimination. By contrast, the brief recognized that programs using rigid, racial quotas, are exclusionary and therefore unconstitutional. I support the position which the brief took, recognizing the distinction between flexible affirmative action programs using goals and inflexible racial quotas. It is my understanding that you take the same position.

The American Jewish Committee's interest in this vital issue is appreciated.

Sincerely,

JIMMY CARTER.

COMPUTER SECURITY IN HEW AND OTHER AGENCIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. PREYER) is recognized for 5 minutes.

Mr. PREYER. Mr. Speaker, in response to my letter of August 11, HEW Secretary Califano recently provided a copy of the final report of HEW's automated data processing (ADP) security review task force to the Subcommittee on Government Information and Individual Rights, which I chair. The objective of this task force was to determine the level of compliance by HEW organizations with the security standards which that department developed in implementing certain provisions of the Privacy Act of 1974.

The task force reports that, although the situation has improved since its review began, the level of compliance for "ADP systems security in HEW was far from meeting minimum acceptable standards." In an attempt to quantify this conclusion, the task force stated that "the average compliance was only 36.9 percent," at the time of the review. Section 3(e)(10) of the Privacy Act requires each agency to:

Establish appropriate administrative, technical, and physical safeguards to insure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity which could result in substantial harm, embarrassment, inconvenience, or unfairness to any individual on whom information is maintained.

The HEW review, conducted from October 1976 through March 1977, examined activities at 93 sites in Washington, D.C., and throughout the country. Although the report does not discuss the status of individual computer systems, it summarizes the major problems as including "lack of organized programs, insufficient management control over systems development and maintenance; lack of, or inadequate, contingency plans; and lack of training in risk management." In laymen's terms, for example:

Unauthorized individuals can, in many cases, simply walk into work areas where computers and computer terminals are housed;

Passwords, the key to actually using a computer terminal, are easily obtained;

Personal information is improperly disposed of, so that it becomes available for further use by unauthorized individuals;

Authorized individuals can frequently get access to more information than they need to perform their assigned tasks, and

There is inadequate control of data being transferred to and from computer facilities.

These findings are similar to those of an earlier audit of the Social Security Administration's SSADARS system, which is currently undergoing investigation by the General Accounting Office. I think it is fairly reasonable to assume that the conclusion of the earlier audit team that "low priority by top management was placed on insuring a sound security program," is more widely appli-

cable within HEW than originally anticipated.

The task force findings are disquieting because they pertain to an agency with a longstanding commitment to the personal privacy of its clientele. Furthermore, the weight of the evidence currently available tends to indicate that HEW experience may be, at best, commonplace. For example, in recent months, GAO has reported that most Federal data processing facilities are not adequately protected; GAO has also reported that the situation in the Internal Revenue Service is similar to that of HEW; the Office of Telecommunications Policy has criticized safeguarding aspects of the proposals for the tax administration system (TAS); and the Office of Management and Budget, some 2 years after the effective date of the Privacy Act requirement, is just now proposing a plan for developing a coherent and consistent policy for the security of Federal automated information systems.

In light of these events, I have written to the Comptroller General to request an immediate examination of the status and effectiveness of the computer security programs of the major recordkeeping agencies.

With respect to HEW's efforts, I would be remiss if I did not give that Department credit for the initiative it has shown in both establishing security standards and undertaking a self-assessment of compliance with those standards. Moreover, I think it is important to note that Secretary Califano has approved the task force recommendation for a vigorous corrective action program. If the proposed schedule is adhered to, the existing deficiencies will be remedied within the current fiscal year.

It is my understanding that the first step in the HEW corrective action program, a review and update of its computer security standards, is already underway. The current standards were, according to the task force report, developed as "an acceptable minimum." There was apparently full recognition that total security was not possible and that cost must be weighed in relation to risk. The result is, I am told, a reasonable set of standards which have become a basic building block in the programs of several other agencies. Nonetheless, inasmuch as the adequacy of these standards is the linchpin to a successful program, this certainly seems a logical first step. I am, however, troubled by the prospect of lowered standards as an easy way to achieve a seemingly higher level of compliance with the Privacy Act requirement for safeguards.

I have written HEW to urge that its computer security standards not be lowered without sufficient cause. It would indeed be unfortunate if changes were made simply to accommodate the interests of those who may be more concerned about adverse publicity than with the security of the computer systems for which they are responsible. I anticipate that the same forthrightness which led Secretary Califano to make the ADP Security Task Force report public will prevail in any decisions involving the adjustment of computer security standards.

RESOLUTION TO ASSURE EQUAL ACCESS TO QUALITY HEALTH CARE FOR RURAL POPULATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

Mr. BEDELL. Mr. Speaker, on September 23, the Department of Health, Education, and Welfare published some proposals for national health planning guidelines in the Federal Register. Since that time, I have received over 4,000 letters protesting the potential effect of these guidelines on the quality of rural health care. There has been considerable concern that implementation of the proposals as currently written could result in numerous hospital closings in Iowa, and I believe that the social costs of such a development are clearly unacceptable.

The HEW guidelines mandate several standards that a local health systems agency must meet in preparing a health care plan for its region of the country. The guidelines propose, among other things, a bed occupancy rate of 80 percent; 500 annual deliveries by an obstetrical unit; and less than 4 beds per 1,000 population. These standards are clearly unrealistic for rural areas, and health officials in my district tell me that many hospitals in rural America would not be able to meet them.

I should mention at this point that HEW officials have advised me that the Department currently has no real means of enforcing these proposed guidelines, should they be implemented. Yet, representatives of the health systems agency for my district tell me that while this statement is technically correct, it does not reveal the whole story. In the future, when a hospital requests permission to buy new equipment to upgrade, renovate or simply replace deteriorating equipment, HEW could deny that hospital permission to make necessary repairs. It seems clear to me that such a development could seriously jeopardize the proper functioning of the hospital. I cannot perceive the sense of such a plan if it could cause the closure of the only hospital providing primary care service for a local community. Surely this would contradict our Nation's effort—as stated in these guidelines—to provide equal access to quality health care at a reasonable cost for populations in rural areas.

The purpose of the National Health Planning and Resources Development Act, and the ensuing proposed guidelines for health planning which are the subject of this discussion, is to control burgeoning health care costs. I support this objective. However, the basic issue at stake here cannot be restricted to cost considerations alone. It involves the ability of our health care system to provide access to high quality medical care for all Americans, including the residents of rural America. I believe that the Congress has a responsibility to insure that the proposed guidelines for health planning do not impair this vital function of our health care system. We should not lose sight of the human factor in striving to cut the cost of Government.

Mr. Speaker, I am concerned that the proposed HEW guidelines for health planning may inadvertently jeopardize the quality of health care in rural America, and, as a result, I am today introducing a concurrent resolution expressing the sense of the Congress that these guidelines should not be allowed to close small, rural hospitals.

The text of my resolution follows:

H. CON. RES. 411

Concurrent resolution to assure equal access to quality health care for populations located in rural areas

Whereas the Notice of Proposed Rulemaking regarding National Guidelines for Health Planning filed by the Secretary of Health, Education, and Welfare on September 22, 1977 (42 Fed. Reg. 48502–48505), has generated great public concern that the guidelines would impose unfeasible performance requirements upon small, rural hospitals, ultimately forcing many of those hospitals to close;

Whereas many small, rural hospitals provide local communities with medical care of a kind and a quality that are not readily available at less accessible metropolitan hospitals; and

Whereas equal access to quality health care at a reasonable cost for populations in rural areas is a priority of the Federal Government: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the Secretary of Health, Education, and Welfare should not include in the National Guidelines for Health Planning any guidelines which would directly or indirectly cause the closing of any small, rural hospital which is the only hospital providing primary care services to a local community.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. GARY A. MYERS) and to revise and extend their remarks and include extraneous matter:)

Mr. MCDADE, for 10 minutes, today.

(The following Members (at the request of Mr. WIRTH) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. LEVITAS, for 5 minutes, today.

Mr. DRINAN, for 60 minutes, today.

Mr. PREYER, for 5 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. BEDELL, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BRADEMAS, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,610.

(The following Members (at the request of Mr. FRENZEL) and to include extraneous matter:)

Mr. FRENZEL.
Mr. GILMAN.
Mr. SARASIN.
Mr. ASHBROOK in three instances.
Mr. DERWINSKI in two instances.
Mr. SYMMS in two instances.
Mr. STOCKMAN.

(The following Members (at the request of Mr. WIRTH) and to include extraneous matter:)

Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. HAMILTON in two instances.
Mr. VENTO.
Mr. RYAN in two instances.
Mr. MAZZOLI.
Mr. PREYER.
Mr. CORMAN in two instances.
Mr. EILBERG in two instances.
Mr. STUDDS.
Mr. LEVITAS.
Mr. STOKES in three instances.
Mr. MCDONALD.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2770. An act to amend section 142 of title 28, United States Code, relating to the furnishing of accommodations to judges of the courts of appeals of the United States;

H.R. 6348. An act to convey to the Ely Indian Colony the beneficial interest in certain Federal land;

H.R. 8777. An act to amend the Appalachian Regional Development Act of 1965 to permit an extension of the period of assistance for child development programs while a study is conducted on methods of phasing out Federal assistance to these programs; and

H.J. Res. 643. Joint resolution making further continuing appropriations for the fiscal year 1978, and for other purposes.

ADJOURNMENT

Mr. WIRTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 10 minutes a.m.), under its previous order, the House adjourned until Tuesday, November 15, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2672. A communication from the President of the United States, transmitting his determination (78–1) that the sale and financing of certain defense articles to Turkey during fiscal year 1978 is necessary to enable her to fulfill her obligations as a member of the North Atlantic Treaty Organization, and his suspension of the provisions of section 620 (x) of the Foreign Assistance Act and section 3(c) of the Arms Export Control Act, pursuant to section 620(x)(1) of the Foreign Assistance Act of 1961, as amended (90 Stat. 757), together with notice of the Air Force's intention to issue related letters of offer, pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

2673. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of November 1, 1977, pursuant to section 1014(e) of Public Law 93–344 (H. Doc. No. 95–263); to the Committee on Appropriations and ordered to be printed.

2674. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report on the value of property, supplies, and commodities provided by the Berlin Magistrate, and under the German Offset Agreement, during the quarter ended September 30, 1977, pursuant to section 719 of Public Law 94–419; to the Committee on Appropriations.

2675. A letter from the Secretary of Transportation, transmitting a report on negotiated contracts for experimental, developmental, test or research work, or for industrial mobilization in the interest of the national defense, covering the period April 1, 1977, through September 30, 1977, pursuant to 10 U.S.C. 2304(e); to the Committee on Armed Services.

2676. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Army National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2677. A letter from the Secretary of Housing and Urban Development, transmitting the first annual report on the urban homesteading demonstration program, pursuant to section 810(e) of the Housing and Community Development Act of 1974; to the Committee on Banking, Finance and Urban Affairs.

2678. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Act No. 2–100, "To establish a certificate of need program for health care facilities and services in the District of Columbia," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2679. A letter from the District of Columbia Auditor, transmitting copies of two reports entitled "Recoupment of Improperly Billed Medicaid Payments," and "Mayor's Order 77–141a transferring CETA Public Service Employment Program from the Office of Budget and Management Systems to the Department of Manpower," pursuant to section 455 of Public Law 93–198; to the Committee on the District of Columbia.

2680. A letter from the U.S. Commissioner of Education, Department of Health, Education, and Welfare, transmitting a report on part-time financial aid counselors in institutions of higher education, pursuant to section 493B of the Higher Education Act of 1965, as amended (90 Stat. 2149); to the Committee on Education and Labor.

2681. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting a report on actions taken in response to the recommendations contained in the annual report of the President's Council on Physical Fitness and Sports, dated October 19, 1976, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations.

2682. A letter from the Assistant Secretary of Agriculture, transmitting notice of an existing records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2683. A letter from the Secretary of Housing and Urban Development, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2684. A letter from the Deputy Assistant Secretary of the Interior, transmitting a copy of a proposed contract with Unidynamics/St. Louis, Inc., St. Louis, Mo., for a research project entitled "Evaluation of the Construction of Fire Doors, Air Doors, and Bulkheads for Noncoal Mines," pursuant to section 1(d) of Public Law 89–672; to the Committee on Interior and Insular Affairs.

2685. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds in two awards of the Indian Claims Commission to the "Pottawattomi Tribe or Nation of Indians as it existed during the treatymaking period 1795 to 1833," pursuant to sections 2 and 4 of Public Law 93–134; to the Committee on Interior and Insular Affairs.

2686. A letter from the Secretary of State, transmitting a report on progress which has been made toward achieving full respect for the human and legal rights of U.S. citizens detained in Mexico, pursuant to section 408(b)(2) of Public Law 94–329; to the Committee on International Relations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITE: Committee on Armed Services. H.R. 8647. A bill to amend chapter 55 of title 10, United States Code, to establish a ceiling for payments to physicians under CHAMPUS, and for other purposes. (Rept. No. 95–815). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CORCORAN of Illinois (for himself, Mr. LEACH, Mr. MCEWEN, and Mr. LEDERER):

H.R. 10070. A bill entitled "The College Tuition Tax Relief Act of 1977"; to the Committee on Ways and Means.

By Mr. DODD:

H.R. 10071. A bill to authorize the Secretary of Health, Education, and Welfare to make grants to the States to reimburse the costs of studies to assess the cost of compliance wih section 504 of the Rehabilitation Act of 1973 with respect to educational programs, and to make grants to educational institutions to pay the Federal share of the costs of such compliance, and for other purposes; to the Committee on Education and Labor.

By Mr. HARRINGTON:

H.R. 10072. A bill to provide for automatic annual cost-of-living increases in Veterans' benefits; to the Committee on Veterans' Affairs.

H.R. 10073. A bill to amend title 38, United States Code, to improve the quality of hospital care and medical services in Veterans' Administration health care facilities, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 10074. A bill to amend title 38, United States Code, to increase the limitations with respect to direct loans to veterans from $33,000 to $48,000; to the Committee on Veterans' Affairs.

By Mr. MURPHY of New York (for himself, Mr. EIAGGI, Mr. RUPPE, and Mr. TREEN):

H.R. 10075. A bill to amend the Federal Boat Safety Act of 1971 to extend authorization for appropriations for financial assistance to State boating programs; to the Committee on Merchant Marine and Fisheries.

By Mr. PREYER (for himself, Mr. KOCH, and Mr. GOLDWATER):

H.R. 10076. A bill to protect the privacy of individuals from governmental and nongovernmental intrusion, and for other purposes; jointly to the Committees on Agriculture, Banking, Finance and Urban Affairs, Education and Labor, Government Operations, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. RODINO (for himself, Mr. FLORIO, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. LE FANTE, Mrs. MEYNER, Mr. MINISH, Mr. PATTEN, Mr. RINALDO, Mr. ROE, and Mr. THOMPSON):

H.R. 10077. A bill to create the Energy Corporation of the Northeast and to authorize the Secretary of the Treasury to provide guarantees for the obligations of such corporation and other financial assistance to such corporation; jointly, to the Committees on Interstate and Foreign Commerce, Banking, Finance and Urban Affairs, and the Judiciary.

By Mr. STUDDS:

H.R. 10078. A bill to establish a program of loans for the U.S. commercial fishing industry, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H.R. 10079. A bill to amend the Tariff Schedules of the United States to provide for a lower rate of duty for certain fish netting and fish nets; to the Committee on Ways and Means.

H.R. 10080. A bill to amend section 1207 (f) (4) of the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. BEDELL:

H. Con. Res. 411. Concurrent resolution to assure equal access to quality health care for populations located in rural areas, jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. CORCORAN of Illinois (for himself and Mr. LEACH):

H. Con. Res. 412. Concurrent resolution to encourage a comprehensive program promoting foreign sales of American agricultural commodities; jointly, to the Committees on Agriculture and International Relations.

MEMORIALS

Under clause 4 of rule XXII:

The SPEAKER presented a memorial of the Legislature of the State of Michigan, relative to an accurate accounting of American service personnel and civilians listed as missing in action in Indochina; to the Committee on International Relations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII:

Mr. BREAUX introduced a bill (H.R. 10081) for the relief of M. Sgt. Francis H. Comeaux, which was referred; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

329. By the SPEAKER: Petition of Lincoln Rodon, Miami, Fla., and others, relative to reaffirmation of Congress' commitment to a free and independent republic in Cuba; to the Committee on International Relations.

330. Also, petition of the Irish Society of Philadelphia, Pa., relative to a congressional investigation of the violation of human rights in Northern Ireland and particularly of abuses against Pearse Kerr, an American Citizen; to the Committee on International Relations.

331. Also, petition of the Tennessee Black Caucus, Nashville, Tenn., relative to U.S. support of proposed UN sanctions against the Government of the Union of South Africa; to the Committee on International Relations.

332. Also, petition of Marjorie A. Mullins, Cape May, N.J., relative to redress of grievances; to the Committee on the Judiciary.

333. Also, petition of the city council of Willoughby Hills, Ohio, relative to proposed mandatory inclusion of public employees in the social security system; jointly, to the Committees on Ways and Means, Post Office and Civil Service.

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House Rule X. Previous listing appeared in the CONGRESSIONAL RECORD of November 3, 1977 (page 37036).

H.R. 6500. April 21, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to make grants to States to facilitate adoption and reduce the need for, and duration of, foster placements.

Establishes mandatory standards for States to comply with in order to receive funds for foster child maintenance.

Directs the Secretary to appoint a Committee on Uniform Adoption Regulations to review current adoption conditions, practices, and laws, and to propose to the Secretary uniform regulations facilitating adoption.

Establishes a national adoption information exchange.

Directs the Secretary and the Attorney General to jointly undertake a study of private adoption placement persons and agencies.

H.R. 6501. April 21, 1977. Veterans' Affairs. Authorizes the provision of increased awards of service-connected disability compensation by the Administrator of Veterans' Affairs to veterans who have suffered the loss or loss of use of paired extremities.

H.R. 6502. April 21, 1977. Veterans' Affairs. Includes veterans of World War I who have a service-connected disability among those disabled veterans eligible for an automobile assistance allowance and for automobile adaptive equipment.

H.R. 6503. April 21, 1977. Merchant Marine and Fisheries. Amends the Intercoastal Shipping Act, 1933, with respect to the filing of general increases or decreases in rates by water carriers with the Federal Maritime Commission sets time limits by which the Commission must complete hearings and issue a final decision on proposed rate changes or practices. Sets forth restrictions regarding the Commission's authority to conduct such proceedings and to suspend tariff schedules.

H.R. 6504. April 21, 1977. Veterans' Affairs. Increases from 10 to 12 years the delimiting period for a veteran to complete a program of education.

H.R. 6505. April 21, 1977. Veterans' Affairs. Increases from 10 to 12 years the delimiting period for a veteran to complete a program of education.

H.R. 6506. April 21, 1977. Merchant Marine and Fisheries. Directs the Secretary of the department in which the Coast Guard is operating to require the inspection of certain towing vessels before such vessels are put into operation and at least every two years thereafter.

Authorizes the Secretary to issue regulations regarding: (1) the design, construction, alteration, or repair of towing vessels; (2) the operation of towing vessels; and (3) the staffing of such vessels.

H.R. 6507 April 21, 1977. Small Business. Amends the Small Business Act to limit to three percent the rate of interest on the Small Business Administration's share of disaster relief loans made to business affected by: (1) catastrophes such as floods, riots, or civil disorders; (2) disasters, as defined by specified laws; or (3) disease or toxicity introduced into products intended for human consumption.

H.R. 6508. April 21, 1977. Government Operations. Establishes a Department of Education within the executive branch. Transfers to the Secretary of Education educational functions now handled by various offices including the Office of Education, the Office of Economic Opportunity, the Department of Health, Education, and Welfare and the Department of Defense.

H.R. 6509. April 21, 1977. Education and Labor. Grants an annuity to dependents of deceased members of the armed forces who performed the service required under the Retired Serviceman's Family Protection Plan which made them eligible for retired pay but who died before the effective date of such Plan.

Amends the Occupational Safety and Health Act of 1970 to provide that the requirements of such Act apply to the Congress, Federal agencies, and the courts of the United States.

Assigns to the Secretary of Health, Education, and Welfare, the case of any workplace under the authority or jurisdiction of the Secretary of Labor and, the Occupational Safety and Health Review Commission, the powers otherwise assigned to the Secretary of Labor or to such Commission, including the authority to (1) conduct investigations and inspections; (2) issue citations; and (3) conduct hearings and issue orders.

H.R. 6510. April 21, 1977. Judiciary. Amends provisions of the Gun Control Act of 1968 which impose additional sentences for using or unlawfully carrying a firearm during the commission of a Federal felony to (1) revise such sentences and (2) prohibit suspended or probationary sentences with respect to first, as well as to subsequent, convictions.

H.R. 6511. April 21, 1977. Interior and Insular Affairs. Exempts from the excess land provisions of Federal reclamation laws certain lands receiving a supplemental water supply from the Shoshone project, Wyoming.

H.R. 6512. April 21, 1977. Judiciary. Amends the Clayton Act to prohibit specified concentrations of control in the energy-producing industries. Prohibits joint ventures between large producers, transporters or refiners of petroleum, petroleum products, or natural gas.

H.R. 6513. April 21, 1977. Judiciary. Amends the Indochina Migration and Refugee Assistance Act of 1975 to extend through 1980 funds for the provision of financial, medical, employment, and relocation assistance to refugees from Cambodia, Vietnam, or Laos.

H.R. 6514. April 21, 1977. Judiciary. Amends the Indochina Migration and Refugee Assistance Act of 1975 to extend through 1980 funds for the provision of financial, medical, employment, and relocation assistance to refugees from Cambodia, Vietnam, or Laos.

H.R. 6515. April 21, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the automatic cost-of-living increases in benefits be made on a

semiannual basis (rather than only on an annual basis as at present).

H.R. 6516. April 21, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the automatic cost-of-living increases in benefits be made on a semiannual basis (rather than only on an annual basis as at present).

H.R. 6517. April 21, 1977. Ways and Means. Amends the Tariff Schedules of the United States to exclude alcoholic beverages from those articles eligible for duty-free importation as gift articles imported by residents or nonresidents.

H.R. 6518. April 21, 1977. Interstate and Foreign Commerce. Amends the Uniform Time Act of 1966 to change the starting and terminating dates of daylight saving time.

Requires the Federal Communications Commission to make such adjustment with respect to hours of operation of daytime standard amplitude modulation broadcast stations as may be consistent with the public interest.

H.R. 6519. April 21, 1977. Ways and Means. Amends the Internal Revenue Code to repeal the excise taxes on buses and bus parts and accessories.

H.R. 6520. April 21, 1977. Post Office and Civil Service. Changes the organizational structure of the United States Postal Service by: (1) transferring the authority of the Board of Governors to the Postmaster General; (2) revising the procedures for adjustment of rates and services; (3) creating a procedure for review of proposed capital investments; and (4) requiring the Postal Rate Commission to submit to the President a separate annual budget.

Prohibits a reduction in the frequency of mail delivery service below the frequency in effect on April 21, 1977.

H.R. 6521. April 21, 1977. Veterans' Affairs. Subjects all decisions of the Administrator of Veterans' Affairs to judicial review and provides that all rules, regulations, orders and determinations of the Administrator be subject to the provisions of the Administrative Procedure Act. Repeals the requirement that the Administrator determine and pay fees to agents or attorneys in allowed claims for monetary benefits.

H.R. 6522. April 21, 1977. Small Business. Authorizes the Small Business Administration to make grants to support the development and operation of small business development centers in order to provide small business with management development, technical information, product planning, and development and international market development. Establishes a Small Business Management and Technical Assistance Division within the Small Business Administration to administer the Small Business Development Center program.

H.R. 6523. April 21, 1977. Interior and Insular Affairs. Revises the boundaries of Gateway National Recreation Area, New York, and New Jersey, to include specified sections of Sound View Park and Pugley Creek Park.

H.R. 6524. April 21, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to allow the use of a food additive found to induce cancer in animals if the Secretary of Health, Education, and Welfare determines that such food additive does not present a significant risk to human health.

Directs the Secretary to consider certain factors in making such a determination.

H.R. 6525. April 21, 1977. Judiciary. Amends the Immigration and Nationality Act to increase the maximum penalty for transporting and harboring illegal aliens.

Makes it a felony to hire or to refer for employment an alien not lawfully admitted into the United States.

Directs the Immigration and Naturalization Service to increase the number of its Border Patrol and Investigation branch personnel.

H.R. 6526. April 21, 1977. Post Office and Civil Service. Requires the withholding of city income taxes from the pay of Federal employees who are residents of the city imposing such taxes.

H.R. 6527. April 21, 1977. Post Office and Civil Service. Sets forth a plan for the conduct of labor-management relations in the Federal service. Establishes the Federal Labor Relations Authority, responsible for carrying out the purposes of this Act.

H.R. 6528. April 21, 1977. Judiciary; Ways and Means. Directs district courts to award court costs to prevailing individual parties in civil actions where (1) an action is brought by the United States or agent thereof and the court finds that bringing of the action constituted harassment or (2) the court finds that the conduct of the United States or agent thereof which gave rise to the action constituted harassment.

Directs the Tax Court to award costs to individual taxpayers who substantially prevail in a proceeding for redetermination of a deficiency.

H.R. 6529. April 21, 1977. Post Office and Civil Service. Classifies all deputy United States marshals holding non-supervisory or non-specialist positions at GS–5 through GS–11. Classifies such marshals in supervising or specialist positions at GS–12 through GS–14. States that all law enforcement personnel performing the duties of a marshal shall be classified as a marshal. Sets the salary level of the Director of the United States Marshals Service at level V of the Executive Schedule. States that the Director shall set the salary levels of non-law enforcement employees of the Service.

H.R. 6530. April 21, 1977. District of Columbia. Amends the District of Columbia Self-Government and Governmental Reorganization Act to extend the time in which the Secretary of the Treasury may make and the Mayor of the District of Columbia can accept loans for the completion of capitol projects.

Extends the time in which the Mayor must submit a complete financial report to the Council in each fiscal year.

Stipulates that payments due on bonds, notes, or other obligations shall be made without further approval or authorization.

Repeals the authorization for the Secretary of the Treasury to make loans to the District of Columbia for maintenance and construction of a sewer system between Dulles International Airport and the District of Columbia.

H.R. 6531. April 21, 1977. International Relations. Authorizes appropriations for fiscal year 1978 for the Department of State, the United States Information Agency, and the Board for International Broadcasting. Authorizes annual appropriations for the Inter-American Foundation.

Revises limitations on the acquisition of Foreign Service buildings.

Creates Assistant Secretaries of State for Human Rights and for Consular Affairs.

Establishes an advisory board on toll increases on the St. Lawrence Seaway and the Welland Canal.

Permits retired and reserve members of the uniformed services to accept employment by foreign governments.

Revises the Foreign Service Retirement System with respect to Foreign Service Reserve officers.

H.R. 6532. April 21, 1977. Ways and Means. Amends the Social Security Act to provide that an individual who would be fully qualified at age 62 for benefits under the Old-Age, Survivors, and Disability Insurance program may qualify for disability benefits under such program if such individual has 40 quarters of coverage, regardless of when such quarters were earned.

H.R. 6533. April 21, 1977. Ways and Means. Amends the Trade Act of 1974 to authorize the President to waive prohibitions against the designation of a nation (1) which is a member of OPEC, (2) which is a party to an international arrangement to raise prices to unreasonable levels, or (3) which participates in an international arrangement to withhold vital resources, as a beneficiary developing country for purposes of certain tariff preferences, if the President determines such waiver to be in the National economic interest. Prohibits such waiver if the country is participating, or has participated in such withholding.

H.R. 6534. April 21, 1977. Government Operations; Rules. Abolishes within three years of the enactment of this Act, or three years after they have been established, all Federal regulatory agencies unless the President and Congress determine that such agencies should continue to exist.

H.R. 6535 April 21, 1977. Merchant Marine and Fisheries. Amends the Merchant Marine Act, 1936, to make Federal ship mortgage insurance available for obligations for fishing vessels which do not exceed 87½ percent of the actual or depreciated cost of such vessels.

H.R. 6536. April 21, 1977. District of Columbia. Establishes three retirement funds encompassing: (1) District of Columbia firefighters and police officers; (2) District of Columbia teachers; and (3) District of Columbia judges.

Establishes the District of Columbia Retirement Board to manage the retirement funds created by this Act.

Details provisions relating to the administration of such funds and revises provisions relating to specified retirement and disability benefits under the retirement programs of such personnel.

H.R. 6537. April 21, 1977. Public Works and Transportation. Directs the Administrator of General Services to establish a solar hot water and space heating program designed to place solar hot water and space heating devices in 15,000 federally owned buildings within six fiscal years following enactment of this Act.

Establishes a Federal Photovoltaic Utilization Program for the annual acquisition and use of photovoltaic solar electric systems, primarily for use by the Department of Defense and administered by the Administrator of General Services and the Secretary of Defense.

H.R. 6538. April 21, 1977. Banking, Finance and Urban Affairs; Interstate and Foreign Commerce. Amends the Energy Supply and Environmental Coordination Act of 1974 to authorize the Administrator of the Federal Energy Administration to make and guarantee loans to assist industries in the purchase and installation of air pollution control devices for coal-fired boilers and heating devices.

Requires that facilities subject to coal conversion orders issued under the Act be given priority consideration.

H.R. 6539. April 21, 1977. Agriculture. Repeals the Food Stamp Act of 1964. Replaces the existing program with a new program substantially similar, but: (1) eliminates charges for coupon allotments and makes coupons redeemable for cash; (2) requires national income standards of eligibility to be income guidelines for the nonfarm United States prescribed by the Office of Management and Budget; (3) directs that food stamp applications be included on application forms for other public assistance programs; (4) directs the Secretary to make

contracts or grants for research that will help improve the administration and effectiveness of the food stamp program.

H.R. 6540. April 21, 1977. Banking, Finance and Urban Affairs. Creates the National Consumer Cooperative Bank, the Self-help Development Fund, and the Cooperative Bank and Assistance Administration to assist the formation and growth of consumer and other types of self-help cooperatives.

H.R. 6541. April 21, 1977. Banking, Finance and Urban Affairs. Creates the National Consumer Cooperative Bank, the Self-help Development Fund, and the Cooperative Bank and Assistance Administration to assist the formation and growth of consumer and other types of self-help cooperatives.

H.R. 6542. April 21, 1977. Government Operations. Obligates the Federal Government to pay to the appropriate State or local government payments in lieu of real property taxes for property which is owned by the Government but leased to a private person for the purpose of conducting a business for profit thereon. States that the amount of such payment shall equal the amount of tax that would be due if the lessee were the owner of the leased property.

H.R. 6543. April 21, 1977. Ways and Means; Interstate and Foreign Commerce. Revises the maximum Federal share for the Maternal and Child Health and Medicaid programs under the Social Security Act. Delimits dental services for which a State may receive Federal payments under the Medicaid program.

H.R. 6544. April 21, 1977. International Relations. Amends the Agricultural Trade Development and Assistance Act of 1954 to revise the formula for allocation of food aid commodities to prohibit more than 25 percent of such aid from being allocated to countries which do not meet the poverty criteria of the International Development Association, with certain exceptions.

H.R. 6545. April 21, 1977. Ways and Means. Amends the Internal Revenue Code to increase the investment tax credit to 20 percent for the replacement of equipment which is fueled by natural gas or oil with equipment which burns other fuels.

H.R. 6546. April 21, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to extend the coverage of such Act to individuals 65 or over, and to make unlawful seniority systems and employee benefit plans which require the retirement of individuals 40 or over.

H.R. 6547. April 21, 1977. Education and Labor. Amends the Age Discrimination in Employment Act of 1967 to extend the coverage of such Act to individuals 65 or over, and to make unlawful seniority systems and employee benefit plans which require the retirement of individuals 40 or over.

H.R. 6548. April 21, 1977. Judiciary. Declares a certain individual conditionally eligible for naturalization under the Immigration and Nationality Act.

H.R. 6549. April 22, 1977. Public Works and Transportation. Authorizes the Secretary of Commerce to establish a program of Federal grants and loans to assist emergency drought impact areas.

H.R. 6550. April 22, 1977. Interior and Insular Affairs. Authorizes certain appropriations for the territories of the United States. Authorizes consolidation of certain grants made to insular areas. Abolishes the office of Comptroller General for Guam and the Virgin Islands. Empowers the legislature of Guam to levy a surtax on income. Provides that the legislature of the Virgin Islands may override a veto of legislation by the Governor. Equalizes certain provisions of law applying to Guam, the Virgin Islands and the Northern Mariana Islands. Authorizes grants to American Samoa, Guam and the Virgin Islands to offset tax revenue losses.

H.R. 6551. April 22, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited deduction for amounts paid by or on behalf of an individual for an individual retirement account, a trust, or an annuity contract.

H.R. 6552. April 22, 1977. Government Operations. Requires the Secretary of the Treasury to prepare and make public annual consolidated financial statements for all expenditures of the United States, utilizing the accrual method of accounting.

H.R. 6553. April 22, 1977. International Relations. Restricts payments of the United States to the United Nations to the ratio of the population of the United States to the total population of member nations.

H.R. 6554. April 22, 1977. Interstate and Foreign Commerce. Amends the Securities Act of 1933 to include specified State, territory, and municipal securities under the provisions of this Act. Authorizes the Securities and Exchange Commission to exempt such securities by rule or regulation.

Includes industrial development bonds under the provisions of this Act.

H.R. 6555. April 22, 1977. Ways and Means. Amends the Internal Revenue Code to allow limited income tax credits for the installation of solar heating and cooling equipment in residences. Provides for an investment tax credit for the installation of insulation and solar energy equipment in structures used in a trade or business, or held for the production of income, including lodging facilities. Allows the accelerated amortization of depreciable geothermal, solar, shale oil and waste-energy equipment.

H.R. 6556. April 22, 1977. Post Office and Civil Service. Permits any Federal employee or Member of Congress who, at the time of retirement, does not elect a reduced annuity in order to provide a survivor annuity to a spouse or other person to make such an election within one year after retiring. Requires such employee to refund to the Government an amount equal to the amount such employee's annuity would have been reduced during the period from the date of retirement to the date of election plus interest.

H.R. 6557. April 22, 1977. Interior and Insular Affairs. Revises the boundaries of the Manassas National Battlefield Park in Virginia. Authorizes the Secretary of the Interior to acquire additional lands for the battlefield and to make minor revisions in the boundary. Establishes procedures to allow owners of property within the boundaries of the battlefield to retain a right of use and occupancy.

H.R. 6558. April 22, 1977. Ways and Means. Amends the Internal Revenue Code to provide for the discharge of unrecorded tax liens on personal residences which are purchases from the delinquent taxpayers by individuals. Allows individual purchasers of such property to bring civil suit, within six years after the notice of the lien is filed, for discharge of the lien, in any district court of the United States.

H.R. 6559. April 22, 1977. Education and Labor; Ways and Means. Amends the Employee Retirement Income Security Act of 1974 to repeal the provision permitting pension plans providing annuities before normal retirement age to pay such benefits in a form other than one having the effect of a qualified joint and survivor annuity.

Requires a plan to provide a survivors annuity to the spouse of a participant who dies before the earliest retirement age.

Amends the Internal Revenue Code to make similar revision with respect to requirements for qualifying pension trusts thereunder.

H.R. 6560. April 22, 1977. Judiciary. Amends the Immigration and Nationality Act to make it unlawful to knowingly hire an alien not lawfully admitted into the United States. Requires that employees of the Department of Health, Education, and Welfare disclose the names of illegal aliens who are receiving assistance under the Social Security Act.

Makes punishable by a fine or imprisonment the making of false border crossing cards, alien registration receipt cards, and other documents used for entry into the United States.

H.R. 6561. April 22, 1977. Ways and Means. Amends title II (Old-Age, Survivors, and Disability Insurance) to decrease from 20 to 10 to number of years a divorced woman must have been married to an insured individual in order for her to qualify for wife's or widow's benefits on his wage record.

H.R. 6562. April 22, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals a limited income tax deduction for uncompensated repairs to certain residential water wells damaged by drought.

H.R. 6563. April 22, 1977. Interior and Insular Affairs; International Relations. Amends the Mineral Leasing Act of 1920 to prohibit exports of domestically-produced and pipeline-transported crude oil to foreign nations, with the limited exceptions of exchanges or temporary exports for convenience or increased efficiency of transportation.

H.R. 6564. April 22, 1977. Interior and Insular Affairs; Merchant Marine and Fisheries. Designates specified lands and waters in Alaska as units of the National Wildlife Refuge System, the National Park System, the National Wild and Scenic Rivers System, and the National Forest System. Directs the Secretary of the Interior to study the feasibility of designating specified lands in Alaska as wilderness.

H.R. 6565. April 22, 1977. Education and Labor. Amends the Elementary and Secondary Education Act of 1965 to direct the Commissioner of Education to make grants to, and enter into contracts with, institutions of higher education for the purpose of offering five-year demonstration programs to encourage disadvantaged secondary education students to pursue professional training in the biomedical sciences.

Sets forth the activities each demonstration program must provide and the criteria each applicant must meet in order to be eligible for assistance under such program.

H.R. 6566. April 22, 1977. Science and Technology; Armed Services. Authorizes appropriations to the Energy Research and Development Administration for fiscal year 1978 for national security programs.

H.R. 6567. April 22, 1977. Small Business. Amends the Small Business Act to reduce the rate of interest on the Small Business Administration's portion of disaster relief loans with respect to major disasters occurring on or after April 1, 1977, and prior to June 6, 1977.

H.R. 6568. April 22, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to include within the medical and other health services covered by such Title the transportation of patients confined to a stretcher or wheelchair in a vehicle which is not equipped as an ambulance but which is adequately equipped to transport such patients.

H.R. 6569. April 22, 1977. Interstate and Foreign Commerce. Amends the Clean Air Act to revise carbon monoxide and nitrogen oxide emission standards for light-duty motor vehicles. Extends interim emission standards for hydrocarbons and carbon monoxide through model year 1979. Extends interim standards for nitrogen oxides through model year 1981. Authorizes revisions or waivers of nitrogen oxide standards in subsequent model year.

Authorizes non-disclosure of emission data to the public where deemed necessary to pre-

serve trade secrets. Establishes procedures for public participation in hearings on proposed motor vehicles emission standards.

Authorizes appropriations to carry out the Act through fiscal year 1980.

H.R. 6570. April 25, 1977. Agriculture. Permits the Secretary of Agriculture to make loans to persons in the United States who obtain at least 80 percent of their gross income by carrying out cattle-raising activities, for the the purpose of refinancing an indebtedness to a lending institution incurred by such activities.

H.R. 6571. April 25, 1977. Ways and Means. Amends the Internal Revenue Code to repeal the income limitation for the income tax credit for the elderly.

H.R. 6572. April 25, 1977. Agriculture. Amends the Agriculture Act of 1949 by establishing the support price of milk at not less than 90 percent of the parity price on the date of enactment, and by providing for quarterly adjustments.

H.R. 6573. April 25, 1977. Interior and Insular Affairs. Amends the Energy Reorganization Act of 1974 to require that the Energy Research and Development Administration notify legislatures of affected States of plans to explore sites for radioactive waste storage facilities. Prohibits the Administration from contracting for construction of any such facility at a site where the State legislature has indicated disapproval.

H.R. 6574. April 25, 1977. Judiciary. Amends the Indochina Migration and Refugee Assistance Act to provide a 2-year extension of Federal funds for the provision of financial, medical, employment, and relocation assistance to refugees from Cambodia, Vietnam, or Laos.

H.R. 6575. April 25, 1977. Ways and Means; Interstate and Foreign Commerce. Sets forth a program to constrain the rate of increases in total acute care hospital inpatient costs. Directs the Secretary of Health, Education, and Walfare to promulgate annually an "inpatient hospital revenue increase limit." Promulgates formulae for the computation of such limit.

Amends the Internal Revenue Code of 1954 to establish an excise tax on charges for hospital services in excess of the limit.

Amends the Public Health Service Act to limit the annual amount of hospital capital expenditures to spending for essential hospital needs.

H.R. 6576. April 25, 1977. Government Operations. Stipulates the circumstances under which executive agencies are to use procurement contracts, grant agreements and cooperative agreements to reflect a relationship between the Federal Government and a State or local government or other entity.

Directs the Office of Management and Budget to undertake a comprehensive study of alternative means of implementing Federal assistance programs and to determine the feasibility of developing a comprehensive system of guidance for such programs.

H.R. 6577. April 25, 1977. Education and Labor; Interstate and Foreign Commerce. Establishes the Office of Independent Living within the Department of Health, Education, and Welfare to administer grants to establish independent living centers for the disabled.

Requires such centers to provide specified services including: (1) counseling regarding attendant care; (2) health programs; (3) housing and transportation assistance; (4) independent living skills; and (5) legal and economic counseling.

Establishes the Task Force on Independent Living with H.E.W. to review the operations of such Office and of the centers.

H.R. 6578. April 25, 1977. Banking, Finance and Uban Affairs. Establishes in the Department of Housing and Urban Development a low-interest loan program to assist low-and middle-income owners of homes to finance necessary major improvements to their homes.

H.R. 6579. April 25 1977. Interstate and Foreign Commerce. Requires franchisors to give franchisees 90-day notice, with limited exceptions of intent to cancel, or failure to renew, a franchise agreement. Allows such cancellation or failure to renew only for certain specified reasons. Requires a franchisor to compensate a franchisee for the value of the franchisee's business when the franchisor, for a legitimate business reason, fails to renew the franchise. Sets forth the judicial remedies available to a franchisee for a violation of this Act by the franchisor.

H.R. 6580. April 25, 1977. Interstate and Foreign Commerce. Amends the Railroad Act of 1974 to stipulate that whenever a retired employee who is receiving a larger annuity under such Act than would be payable to the spouse of such employee, the amount payable to the surviving spouse of such an individual shall be the same amount which would have been payable to the retired employee but for his or her death.

H.R. 6581. April 25, 1977. Ways and Means; Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to increase by 15 percent of all monthly benefits and lump-sum death payments under Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

Amends such Title to require the payment of full social security benefits at age 50 when eligibility is based on the attainment of retirement age.

Amends such Title and Title XVIII (Medicare) of the Social Security Act to require the extension of Medicare coverage to an individual at age 50.

H.R. 6582. April 25, 1977. Armed Services. Abolishes one of the two present positions of Deputy Secretary of Defense within the Department of Defense. Establishes an Under Secretary of Defense for Policy. Renames the present position of Director of Defense for Research and Engineering as the Under Secretary of Defense for Research and Engineering.

H.R. 6583. April 25, 1977. Small Business. Amends the Small Business Act to reduce the rate of interest on the Small Business Administration's portion of disaster relief loans with respect to major disasters occurring on or after April 1, 1977, and prior to June 6, 1977.

H.R. 6584. April 25, 1977. Public Works and Transportation. Authorizes the President to provide public service employment for unemployed United States citizens in forestation, fire prevention, pest control, and other conservation projects on public lands, including national park and national forest improvement projects.

H.R. 6585. April 25, 1977. Interstate and Foreign Commerce. Establishes a utility services stamp program to assist low-income and fixed-income households in meeting monthly utility costs. Directs the Secretary of Health, Education, and Welfare to issue coupons and administer the program.

H.R. 6586. April 25, 1977. Ways and Means. Amends the Internal Revenue Code to allow an additional investment tax credit for machinery and equipment placed in service in existing manufacturing plants or in nearby areas.

H.R. 6587. April 25, 1977. Judiciary. Authorizes the President to nullify and cancel for as long as he deems necessary any Federal agency rule or regulation which he determines: (1) may be harmful to human life; (2) may restrict the Nation's supplies of fuel or energy resources; (3) may threaten the Nation's supplies of food and fiber; (4) may interfere with military maneuvers or national security; or (5) may have an adverse effect on the Nation's economy disproportionate to the ecological benefits of such rule or regulation. Permits Congress to disapprove such presidential action within 30 days after it is taken.

H.R. 6588. April 25, 1977. Interstate and Foreign Commerce. Directs the Administrator of the Environmental Protection Agency, the Consumer Product Safety Commission, the Food and Drug Administration, and any other appropriate Federal agency to take action within their respective jurisdictions to provide more effective protections against asbestos in the air, the water, and in the production and distribution of goods and services.

H.R. 6589. April 25, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the automatic cost-of-living increases in benefits be made on a semiannual basis (rather than only on an annual basis as at present).

H.R. 6590. April 25, 1977. Veterans' Affairs. Directs the Secretary of Labor to provide (1) such comprehensive, coordinated, and interrelated programs as are deemed necessary to facilitate training, readjustment, and rehabilitation, and (2) career, veterans benefits and rights, and personal adjustment and motivational counseling to promote the productive employment of Vietnam era veterans, especially disabled veterans.

H.R. 6591. April 25, 1977. Veterans' Affairs. Directs the Secretary of the Army to establish one or more national cemeteries in the central west coast area of Florida, and to acquire such land as may be necessary for such establishment.

Directs the Administrator of the General Services Administration, upon requests, to transfer to the Department of the Army without reimbursement or transfer of funds any Government-owned land in the central west coast of Florida which the Secretary may determine suitable for a national cemetery.

H.R. 6592. April 25, 1977. Ways and Means. Amends the Internal Revenue Code to allow Members of State legislatures the same income tax business deduction for living expenses as is allowed Members of Congress.

H.R. 6593. April 25, 1977. Public Works and Transportation. Amends the Airport and Airway Development Act of 1970 to establish a minimum annual apportionment to States for airport development projects under such Act for fiscal years 1978, 1979, and 1980.

H.R. 6594. April 25, 1977. Public Works and Transportation. Authorizes States to sell State lottery tickets at rest and recreation areas on the rights-of-way of the Interstate Highway System within the State.

H.R. 6595. April 25, 1977. House Administration. Repeals the Presidential Primary Matching Payment Account Act.

H.R. 6596. April 25, 1977. Judiciary; Education and Labor. Eliminates the jurisdiction of Federal courts to issue busing orders based on race, color, religion or national origin.

Prohibits any Federal agency from inducing such busing through withholding or threatening to withhold Federal assistance.

H.R. 6597. April 25, 1977. Banking, Finance and Urban Affairs. Amends the Housing and Community Development Act of 1974 to require localities to provide as part of their housing assistance plans a plan to identify and reclaim deteriorated housing stock where feasible.

Amends the Housing Act of 1964 to require the designation of concentrated revitalization areas in which 90 percent of rehabilitation loan funds must be allocated.

H.R. 6598. April 25, 1977. Agriculture. Amends the Federal Insecticide, Fungicide, and Rodenticide Act to revise pesticide registration proceedings under such Act. Authorizes conditional registration of certain pesticides without full and complete test data.

Revises requirements for non-disclosure of trade secrets under such Act. Authorizes appropriations for fiscal year 1978 to carry out the Act.

H.R. 6599. April 25, 1977. Interstate and Foreign Commerce. Repeals the provisions of the Communications Act of 1934 allowing telegraph carriers to consolidate or merge.

H.R. 6600. April 25, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to deem a food additive safe if the Secretary of Health, Education, and Welfare (1) makes a finding that the public benefit from permitting the use of such additive would exceed the public risk resulting from such use; (2) gives notice in the Federal Register of such a finding and opportunity for public comment; and (3) issues a final order not earlier than 120 days from such publication.

Specifies factors that must be taken into consideration when evaluating a food additive.

Deems saccharin a safe food additive unless the Secretary declares it unsafe under the provisions of this Act.

H.R. 6601. April 25, 1977. Interstate and Foreign Commerce. Establishes mandatory standards for State no-fault benefit plans for the compensation and rehabilitation of motor vehicle accident victims.

Establishes within the Department of Transportation the Standards for No-Fault Benefits Review Panel to evaluate the performance and effect of approved State plans.

H.R. 6602. April 25, 1977. Judiciary. Directs the Attorney General to make grants to qualified State programs for the compensation of victims of crime.

Establishes an Advisory Committee on Victims of Crime to advise the Attorney General with respect to the administration of such grant program and to the compensation of victims of crime.

H.R. 6603. April 25, 1977. Ways and Means. Amends the Internal Revenue Code to provide an income tax credit for expenses incurred in the conversion of farm and ranch land into qualified wind erosion control or wildlife habitat areas. Provides Federal reimbursement to State and local governments for the real property taxes which would otherwise be collected on such property.

H.R. 6604. April 25, 1977. Judiciary. Prohibits the transportation of contraband cigarettes in interstate commerce.

H.R. 6605. April 25, 1977. Education and Labor. Amends the Community Services Act to permit the Director of the Community Services Administration to furnish assistance for the installation of security devices in the residences of elderly persons.

H.R. 6606. April 25, 1977. Education and Labor. Amends the Older Americans Act of 1965 to provide assistance for the installation of security devices in the residence of elderly persons. Includes projects to assist older persons to install security devices in the list of projects eligible for grants from the Department of Housing and Urban Development.

H.R. 6607. April 25, 1977. Judiciary. Directs the Attorney General to make grants to qualified State programs for the compensation of elderly victims of crime.

H.R. 6608. April 25, 1977. Ways and Means. Amends Title XX (Grants to States for Services) of the Social Security Act to include among the services provided under that Title the installation of security devices in the homes of the elderly.

H.R. 6609. April 25, 1977. Post Office and Civil Service. Amends the Postal Reorganization Act Amendments of 1976 to extend to October 31, 1977, the period during which the Postal Service is prohibited from: (1) increasing rates and fees to levels exceeding those in effect on the date of enactment of the Act; (2) offering levels and types of services which are less than those available on July 1, 1976; and (3) closing certain postal facilities which were in operation on July 1, 1976.

H.R. 6610. April 25, 1977. Banking, Finance and Urban Affairs. Prescribes procedures and standards covering the disclosure of customer records by financial institutions to Federal agencies.

H.R. 6611. April 25, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to provide that new drugs for human or animal use will be regulated under such Act solely to assure their safety, and not their effectiveness.

H.R. 6612. April 25, 1977. Interior and Insular Affairs. Restores certain Indian benefits and mineral rights to the members of the Pascua Yaqui Association, Incorporated of Arizona.

Provides for the establishment of a reservation for the Pascua Yaqui upon the transfer of certain land in trust by the Association to the Secretary of the Interior.

H.R. 6613. April 25, 1977. Judiciary. Directs the Secretary of the Treasury to redetermine the liability for tax under the Internal Revenue Code of a certain individual for a specified period of time.

H.R. 6614. April 25, 1977. Judiciary. Directs the Secretary of the Treasury to pay a specified sum to a certain individual in full settlement of such individual's claims against the United States.

H.R. 6615. April 25, 1977. Interior and Insular Affairs. Directs the Secretary of the Interior to amend a specified oil and gas lease held by a certain individual to include specified lands.

H.R. 6616. April 26, 1977. Agriculture. Amends the Consolidated Farm and Rural Development Act to increase the amount of any Department of Agriculture grant to local associations for water or waste projects. States general formulae for the calculation of grant amounts according to prescribed maximum rates for the project facility use payment made by an average domestic user of an area to be served by a project. Revises the priorities for recipients of project grants.

H.R. 6617. April 26, 1977. Merchant Marine and Fisheries; Interstate and Foreign Commerce; Judiciary. Requires the Secretary of the Interior to issue certain regulations relating to traps and trapping. Sets forth standards for approval of traps.

Establishes an advisory commission to advise the Secretary on traps designed or intended for use.

Prohibits trapping on Federal lands where such trapping will adversely affect any species of mammal or bird.

Sets forth a procedure for the application and issuance of trapping permits.

Requires shipping certificates for packages containing specified parts of trapped animals shipped in interstate commerce.

H.R. 6618. April 26, 1977. Government Operations; Rules. Requires the President to submit to Congress plans to reform once every ten years the regulatory activities of specified Federal agencies according to a staggered schedule set forth in this Act. States that if Congress fails to enact comprehensive regulatory reform legislation dealing with such plan within a specified period the applicable agency shall cease to exist.

H.R. 6619. April 26, 1977. Education and Labor. Amends the Civil Rights Act of 1964 to include as an unlawful employment practice discrimination on the basis of handicap.

H.R. 6620. April 26, 1977. Ways and Means. Amends the supplemental security income program of the Social Security Act to increase the guaranteed annual income under such act, to exclude certain assets and forms of income from consideration in the determination of eligibility and benefit amounts under such program, and to require the establishment of an outreach program to inform all individuals who may become eligible for such benefits of the availability of such benefits and the steps to be taken in obtaining them.

H.R. 6621. April 26, 1977. Interior and Insular Affairs. Designates specified lands within the George Washington National Forest in the State of Virginia as wilderness.

H.R. 6622. April 26, 1977. Education and Labor. Amends the Education Amendments of 1974 to authorize the Commissioner of Education to grant to the District of Columbia, as to any State, financial aid for the development and administration of an equalization plan.

H.R. 6623. April 26, 1977. Post Office and Civil Service. Stipulates that any increase in the rate of pay for Members of Congress, and the adoption of or increase in any other financial benefit specifically applicable to such individuals shall not take effect unless established by statute or approved by resolution.

Prohibits any such increase or benefit from taking effect before the beginning of the following Congress.

H.R. 6624. April 26, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to study remedial stabilization measures for the bank of the Illinois River near Hardin, Ill.

H.R. 6625. April 26, 1977. Interior and Insular Affairs. Provides for the establishment of a Pine Barrens National Ecological Reserve in the State of New Jersey.

H.R. 6626. April 26, 1977. Veterans' Affairs. Denies veterans' benefits to an individual whose discharge from military service during the Vietnam era under less than honorable conditions is administratively upgraded, under temporarily revised standards, to discharge under honorable conditions; but only when such veteran's claim for benefits is based solely on such upgraded discharge. Requires the Secretary of the Army to supply a complete list of individuals receiving an upgraded discharge to the Administrator of Veterans' Affairs.

H.R. 6627. April 26, 1977. Interstate and Foreign Commerce. Amends the Motor Vehicle Information and Cost Savings Act to establish mandatory minimum motor vehicles fuel economy standards for passenger automobiles manufactured in model years 1982, 1983, 1984, and 1985.

H.R. 6628. April 26, 1977. Interior and Insular Affairs. Directs the Secretary of the Interior to assist in the establishment of water research and technology institutes to study water resources related problems. Authorizes appropriations to fund such institutes and related water research activities. Repeals the Water Resources Research Act of 1964.

Directs the Secretary to study the feasibility of converting saline or other contaminated water into usable water. Repeals the Saline Water Conversion Act of 1971.

H.R. 6629. April 26, 1977. Interior and Insular Affairs. Amends the Wild and Scenic Rivers Act to designate a specified portion of Black Creek in Mississippi as a potential addition to the wild and scenic rivers system.

H.R. 6630. April 26, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals limited income tax credits with

respect to certain elementary, secondary and higher education expenses, and a limited income tax deduction for certain contributions to qualified higher education savings plans. Provides all taxpayers with standing to challenge the constitutionality of the tax credit for elementary and secondary education expenses within three months of enactment. Vests exclusive jurisdiction to bring such challenges in the District Court for the District of Columbia.

H.R. 6631. April 26, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deferral of an individual's income tax liability to the extent it equals a limited portion of the higher educational expenses incurred for the taxpayer, his spouse and dependents. Defers payment until the year following the end of the individual's attendance at an institution of higher education, or the tenth year following the taxpayers' initial deferral, whichever is earlier.

H.R. 6632. April 26, 1977. Armed Services. Authorizes the Administrator of General Services to dispose of a specified amount of tin now held in the national and supplemental stockpile.

H.R. 6633. April 26, 1977. Post Office and Civil Service. Entitles a Federal employee whose position is reduced in grade to have the grade of such position treated as if such reduction had not occurred so long as such position is continued to be filled by such employee without a break in service.

H.R. 6634. April 26, 1977. International Relations. Requires that the Hungarian Crown of Saint Stephen and other relics of Hungarian royalty be kept in the United States, unless Congress specifically provides otherwise.

H.R. 6635. April 26, 1977. Ways and Means. Amends the Second Liberty Bond Act to allow the interest rates paid on United States retirement plan and individual retirement bonds to be increased to the rate paid on United States series E savings bonds.

H.R. 6636. April 26, 1977. Interstate and Foreign Commerce; Public Works and Transportation; Ways and Means; Merchant Marine and Fisheries. Directs the Secretaries of Transportation and the Treasury to promulgate cargo security regulations. Establishes an Office of Cargo Security within the Department of Transportation. Creates an Interagency Council on Cargo Security to coordinate governmental activities in the field of cargo security.

H.R. 6637. April 26, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to extend public safety officer death benefits to members of volunteer ambulance, first aid, or rescue squads.

Makes coverage under the Public Safety Officers Benefits Act retroactive so as to apply to deaths occurring after 1971.

H.R. 6638. April 26, 1977. Government Operations. Establishes the Office of Spanish-Speaking Affairs in the Executive Office of the President to assist Federal agencies in developing and implementing programs and policies designed to help Spanish-speaking and Spanish-surnamed Americans.

Establishes a coordinating Council on Spanish-Speaking Affairs to develop and implement agreements designed to reduce conflict among Federal agencies in carrying out programs to assist Spanish-speaking Americans.

H.R. 6639. April 26, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Housing and Urban Development to make grants to local agencies for converting closed school buildings into community centers, senior citizen centers and specified educational, medical or social service centers.

Directs the Secretary to serve as a national clearinghouse for local agencies by providing information on possible alternative uses for closed school buildings.

H.R. 6640. April 26, 1977. Ways and Means. Entitles taxpayers, under the Internal Revenue Code, to elect to take a deduction with respect to the amortization of any qualified school or hospital property, which was purchased from a tax-exempt organization, based on a period of 180 months.

H.R. 6641. April 26, 1977. Ways and Means. Interstate and Foreign Commerce. Amends title XVIII (Medicare) of the Social Security Act to provide payment for rural health clinic services pursuant to the program of Supplementary medical insurance benefits for the aged and disabled of such title.

H.R. 6642. April 26, 1977. Ways and Means. Interstate and Foreign Commerce. Amends title XI (General Provisions and Professional Standards Review) of the Social Security Act to assure the participation by registered professional nurses in the peer review and related activities authorized under such title.

H.R. 6643. April 26, 1977. Interior and Insular Affairs; Interstate and Foreign Commerce; Public Works and Transportation. Amends the Interstate Commerce Act to establish procedures for regulation of coal pipeline carriers under such Act. Prohibits coal pipeline carriers from transporting coal in interstate commerce where such carriers have interests in such coal. Requires prior approval of proposed mergers, transfers, and acquisitions by the Interstate Commerce Commission.

H.R. 6644. April 26, 1977. Veterans' Affairs. Provides that the recipient of a veterans' pension or dependency and indemnity compensation will not have the amount of such pension or compensation reduced because of cost-of-living increases in social security benefits railroad retirement annuities, or other retirement benefits.

H.R. 6645. April 26, 1977. Veterans' Affairs. Provides that the recipient of a veterans' pension or dependency and indemnity compensation will not have the amount of such pension or compensation reduced because of cost-of-living increases in social security benefits, railroad retirement annuities, or other retirement benefits.

H.R. 6646. April 26, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals an income tax deduction for all the ordinary and necessary expenses paid or incurred in traveling between the individual's principal place of construction related employment and a temporary construction project worksite.

H.R. 6647. April 26, 1977. Ways and Means. Amends title XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to make benefits under such Title payable to a resident alien only if such alien has continuously resided in the United States for at least five years.

H.R. 6648. April 26, 1977. Judiciary. Amends the provisions of the Gun Control Act of 1968 which impose additional penalties for using or unlawfully carrying a firearm during the commission of a Federal felony to (1) replace ranges of authorized sentences with sentences for a specified number of years and (2) prohibit a probationary or suspended sentence for first, as well as for subsequent convictions.

H.R. 6649. April 26, 1977. Public Works and Transportation; Banking, Finance and Urban Affairs; Education and Labor; Small Business. Amends the Disaster Relief Act, the Public Works and Economic Development Act, and the Small Business Act to provide for Federal assistance to areas stricken by a drought emergency.

H.R. 6650. April 26, 1977. Education and Labor. Amends the Labor-Management Reporting and Disclosure Act to prohibit use by a labor organization of any money, other than sums voluntarily contributed to a separate fund, collected from any person subject to a compulsory membership agreement for any purpose not directly related to representing employees or promoting or defeating legislation directly affecting such role.

H.R. 6651. April 26, 1977. Judiciary. Establishes a Select Commission on Immigration and Refugee policy to study and analyze the effects in the United States of the Immigration and Nationality Act and the policies and procedures governing the admission of immigrants and refugees to the United States and to make appropriate recommendations to the President and to Congress.

H.R. 6652. April 26, 1977. Ways and Means. Amends (Grants to States for Old-Age Assistance and Medical Assistance for the Aged), IV (Aid to Families with Dependent Children), X (Grants to States for Aid to the Blind), XIV (Grants to States for Aid to the Permanently and Totally Disabled), and XVI (Supplemental Security Income for the Aged, Blind, and Disabled) of the Social Security Act to insure that future increases in benefits under a Federal retirement or disability program shall not be taken into consideration in determining a person's eligibility for aid or assistance under the programs established by such Titles.

H.R. 6653. April 26, 1977. Public Works and Transportation. Amends the Urban Transportation Act of 1964 to prohibit the Secretary of Transportation from approving any grant or loan under such Act unless the applicant gives satisfactory assurances that prior to the establishment or change in any fare or service which may substantially effect any community or segment thereof, the applicant will conduct public hearings with adequate notice and consider the impact on the community of such establishment or change in fare or service.

H.R. 6654. April 26, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to prohibit the Secretary of Transportation from approving any grant or loan under such Act unless the applicant gives satisfactory assurances that prior to the establishment or change in any fare or service which may substantially effect any community or segment thereof, the applicant will conduct public hearings with adequate prior notice and consider the impact on the community of such establishment or change in fare or service.

H.R. 6655. April 26, 1977. Banking, Finance and Urban Affairs. Amends the specified housing and community development laws to set forth a formula which the Secretary of Housing and Urban Development must follow in order to determine the amount to be allocated to each city under the supplemental block-grant program, and to increase the limit on funds that are authorized to be appropriated for annual contributions to low-income housing projects.

Extends specified Federal Housing Administration insurance programs.

Amends the Home Owners' Loan Act to extend the lending authority of Federal savings and loan associations.

Makes changes in national urban policy.

Authorizes appropriations for specified rural housing programs.

H.R. 6656. April 26, 1977. Banking, Finance and Urban Affairs. Amends specified housing and community development laws to set forth a formula which the Secretary of Housing and Urban Development must follow in order to determine the amount to be allocated to each city under the supplemental block-grant program, and to increase the limit on funds that are authorized to be appropriated for annual contributions to low-income housing projects.

Extends specified Federal Housing Administration insurance programs.

Amends the Home Owners' Loan Act to extend the lending authority of Federal savings and loan associations.

Makes changes in national urban policy.

Authorizes appropriations for specified rural housing programs.

H.R. 6657. April 26, 1977. Ways and Means. Repeals the provision of the Internal Revenue Code dealing with deductions for individual retirement accounts and replaces it with a provision allowing a deduction for amounts paid in cash.

H.R. 6658. April 26, 1977. International Relations; Interior and Insular Affairs. Requires that all timber harvested from lands owned by the United States located west of the one hundredth meridian be processed in the United States and that only specified products from the processing of timber harvested from specified lands owned by the United States be exported.

H.R. 6659. April 26, 1977. Ways and Means. Amends the Tariff Schedules of the United States to repeal the duty imposed on: (1) articles assembled abroad with components produced in the United States; and (2) certain metal articles manufactured in the United States and exported for further processing.

H.R. 6660. April 26, 1977. Interstate and Foreign Commerce. Amends the Federal Power Act to authorize the Federal Power Commission to take additional steps to improve the efficiency in the generation of electricity and to meet unanticipated shortages. Establishes procedures to eliminate unfair methods of competition and discriminatory rate structures. Requires hearings prior to increases in utility rate schedules.

Establishes procedures for planning of bulk power facilities by electric utilities. Imposes national minimum standards for State-regulated and nonregulated utilities.

Amends the Energy Conservation and Production Act to authorize Federal assistance to State regulatory agencies. Establishes procedures for representation of consumer interests in Federal Power Commission proceedings.

H.R. 6661. April 26, 1977. Interstate and Foreign Commerce; Ways and Means. Directs the Federal Energy Administrator to study the feasibility of a national program to implement waste heat energy recovery technology. Authorizes grants to State utility regulatory authorities to encourage waste heat energy recovery.

Amends the Internal Revenue Code of 1954 to establish financial incentives to encourage distributors of electric power to utilize waste heat energy.

H.R. 6662. April 26, 1977. Judiciary. Deems as creditable service for civil service retirement purposes a specified period of time during which a certain individual was imprisoned by the Government of Yugoslavia as a result of his employment in the United States Embassy in Belgrade, Yugoslavia.

H.R. 6663. April 26, 1977. Judiciary. Entitles the gain realized and reinvested in eligible replacement property, by a certain corporation as a result of an eminent domain transaction, to deferred recognition under the Internal Revenue Code of 1954.

H.R. 6664. April 26, 1977. Judiciary. Declares a certain individual lawfully admitted to the United States for permanent residence, under the Immigration and Nationality Act.

H.R. 6665. April 26, 1977. Judiciary. Gives Congressional consent to a certain retired Air Force Colonel to accept an office or position in King Faisal University in Saudi Arabia, and to accept compensation for services performed in such office or position.

H.R. 6666. April 27, 1977. Judiciary. Amends the Legal Services Corporation Act to: (1) revise guidelines regarding eligibility for, and priorities relative to, assistance under such Act; (2) subject to Corporation and State advisory councils to Government in the Sunshine Act requirements; (3) revise restrictions on political activities with respect to staff attorneys; (4) revise limitations on the use of funds made available by the Corporation; (5) authorize appropriations; and (6) authorize independent hearing examiners.

H.R. 6667. April 27, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to revise the eligibility requirements for disability insurance benefits for blind persons. Revises the method of computing the primary insurance amount for blind persons under such Act.

H.R. 6668. April 27, 1977. Education and Labor. Amends the Age Discrimination Act of 1975 to extend, until November 28, 1977, the deadline for transmittal of the United States Commission on unreasonable discrimination based on age in Federally funded programs. Authorizes the Commission to provide technical assistance regarding its findings and recommendations to Congress, the President, and heads of executive departments and agencies.

H.R. 6669. April 27, 1977. Science and Technology. Requires the President to establish a National Climate Program for research, collection, analysis, forecasting, modeling, and dissemination of data concerning climate and its variations, and for the assessment of the impact on human activities for climatic changes. Requires that the head of a Federal agency, to be designated by the President, establish within such agency a National Climate Program Office to administer the Program.

Requires the establishment of a Management Council and an Advisory Council for the Program.

H.R. 6670. April 27, 1977. Science and Technology. Requires the President to establish a National Climate Program for research, collection, analysis, forecasting, modeling, and dissemination of data concerning climate and its variations, and for the assessment of the impact on human activities for climatic changes. Requires that the head of a Federal agency, to be designated by the President, establish within such agency a National Climate Program Office to administer the Program.

Requires the establishment of a Management Council and an Advisory Council for the Program.

H.R. 6671. April 27, 1977. Interior and Insular Affairs. Directs the Secretary of the Interior to convey all mineral interests reserved to the United States in specified land to Oklahoma State University.

H.R. 6672. April 27, 1977. Public Works and Transportation; Interior and Insular Affairs. Transfers from the Secretary of the Army to the Secretary of the Interior the authority, real property, project authorization and unexpended appropriations for the Tocks Island Reservoir Project, Pennsylvania, New Jersey, and New York. Terminates authorization of the project as part of the Delaware River Basin project under the Flood Control Act of 1962. Stipulates the priorities of the Secretary of the Interior in administration of the project.

H.R. 6673. April 27, 1977. Banking, Finance and Urban Affairs. Amends the National Flood Insurance Act of 1968 to increase flood insurance coverage available under the Act for certain residential, business, and other properties.

Specifies that certain criteria for land management and use in flood-prone areas shall not apply to the repair or improvement of a structure unless the cost of such repair or improvement exceeds a specified figure.

H.R. 6674. April 27, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service. Requires the Federal Communications Commission to make specified findings in connection with Commission actions authorizing specialized carriers.

H.R. 6675. April 27, 1977. Interior and Insular Affairs. Allows larger acreages of specified lands to be retained by the owner of such land and still remain qualified for irrigation water under Federal reclamation laws.

H.R. 6676. April 27, 1977. Interstate and Foreign Commerce. Amends the Controlled Substances Act of 1977 to set forth penalties for (1) breaking and entering a pharmacy with intent to unlawfully obtain a controlled substance and (2) obtaining, or attempting to obtain, a controlled substance from a pharmacy by force or violence.

H.R. 6677. April 27, 1977. Judiciary. Sets forth guidelines relative to State and local government liability and Federal court abstention in civil actions for the deprivations of a constitutional or Federal statutory right, including the right to enjoy ones reputation, by persons acting under color of law.

Renders a prosecuting officer of a State, municipality, or other unit of local government liable for damages or subject to an injunction for failure to disclose material evidence.

H.R. 6678. April 27, 1977. Banking, Finance and Urban Affairs. Amends the Truth in Lending Act to eliminate the inclusion of agricultural credit under such Act.

H.R. 6679. April 27, 1977. Ways and Means. Amends the Internal Revenue Code to allow a taxpayer, who is entitled to a depletion allowance, to elect to exclude from gross income amounts attributable to production from any exploratory oil or gas well drilled within five years from the effective date of this Act.

H.R. 6680. April 27, 1977. Agriculture. Amends the Emergency Livestock Credit Act of 1974 to require the loan applicant, instead of the lender, to certify in writing that the applicant has met the conditions for a loan guarantee. Extends the Act through 1979.

H.R. 6681. April 27, 1977. Agriculture. Amends the Consolidated Farm and Rural Development Act to establish a flat interest rate on emergency loans, regardless of whether the amount of a loan exceeds the amount of actual loss caused by a disaster. Reduces the loss of production an applicant must show to be sustained as a result of a disaster, if such applicant seeks financial assistance based on production losses.

H.R. 6682. April 27, 1977. Ways and Means. Amends the Social Security Act by entitling an Old-Age, Survivors, and Disability Insurance claimant to a reconsideration of the initial decision concerning such claimant's eligibility for benefits. Allows such claimant to request a hearing on such reconsideration determination. Requires that such a hearing be presided over by an administrative law judge and conducted on the record.

Directs the Secretary of Health, Education, and Welfare to appoint administrative law judges to conduct such hearings.

Sets forth criteria requiring the remand of a disputed claim to the appropriate regional commissioner of the Social Security Administration.

H.R. 6683. April 27, 1977. Science and Technology; Interior and Insular Affairs. Directs the President to establish: (1) a National Earthquake Hazard Reduction Program; (2) an Office of Earthquake Hazard Reduction; (3) a National Advisory Committee on Earthquake Hazard Reduction; and (4) an Earthquake Prediction Evaluation Board.

Specifies the duties of the Office of Earthquake Hazard Reduction, including the development of an Earthquake Hazard Reduction Program plan.

Directs the Earthquake Prediction Evaluation Board to monitor prediction methods and issue earthquake predictions.

H.R. 6684. April 27, 1977. Science and Technology. Directs the President to establish:

(1) a National Earthquake Hazard Reduction Program; (2) an Office of Earthquake Hazard Reduction; (3) a National Advisory Committee on Earthquake Hazard Reduction; and (4) Earthquake Prediction Evaluation Board.

Specifies the duties of the Office of Earthquake Hazard Reduction, including the development of an Earthquake Hazard Reduction Program plan.

Directs the Earthquake Prediction Evaluation Board to monitor prediction methods and issue earthquake predictions.

H.R. 6685. April 27, 1977. Veterans' Affairs. Directs the Administrator of Veterans' Affairs to require State nursing homes to provide up to four beds per thousand veteran population (currently, two-and-one-half beds) in order for a State to qualify for Federal assistance in constructing nursing homes for veterans.

H.R. 6686. April 27, 1977. Banking, Finance and Urban Affairs. Requires the establishment of escrow accounts in connection with federally related mortgage loans, under specified conditions. Requires that interest be paid on such accounts. Regulates the requirements of advance deposits in escrow accounts.

H.R. 6687. April 27, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to permit the Secretary of Housing and Urban Development to insure mortgages and loans with varying rates of amortization corresponding to anticipated variations in family income on a regular basis.

Amends the Internal Revenue Code to establish tax-exempt savings accounts which would be available to first-time home buyers, known as individual housing accounts.

H.R. 6688. April 27, 1977. Ways and Means. Amends the Tariff Schedules of the United States to permit the duty-free importation of Tricot and Raschel warp knitting machines until June 31, 1980.

H.R. 6689. April 27, 1977. International Relations. Authorizes appropriations for fiscal year 1978 for the Department of State, the United States Information Agency, and the Board for International Broadcasting. Authorizes annual appropriations for the Inter-American Foundation.

Revises limitations on the acquisition of Foreign Service buildings.

Creates Assistant Secretaries of State for Human Rights and for Consular Affairs.

Establishes an advisory board on toll increases on the St. Lawrence Seaway and the Welland Canal.

Permits retired and reserve members of the uniformed services to accept employment by foreign governments.

Revises the Foreign Service Retirement System with respect to Foreign Service Reserve officers.

H.R. 6690. April 27, 1977. Post Office and Civil Service. Requires all revenues and fees collected by the Postal Service to be deposited in the general fund of the Treasury of the United States. Requires the Postal Service to describe all operations and provide any other necessary information to Congress when seeking appropriations for its operations before the appropriate Congressional committees as required by this Act.

Requires the Postal Service to provide door or curbline mail delivery to all permanent residential addresses receiving such service on or after the date of enactment of the Postal Reorganization Act Amendments of 1976 until September 15, 1977.

H.R. 6691. April 27, 1977. Veterans' Affairs. Denies veterans' benefits to an individual whose discharge from military service during the Vietnam era under less than honorable conditions is administratively upgraded, under temporarily revised standards, to discharge under honorable conditions; but only when such veteran's claim for benefits is based solely on such upgraded discharge.

H.R. 6692. April 27, 1977. Education and Labor. Authorizes appropriations under the Education of the Handicapped Act for fiscal year 1978 through fiscal year 1982 for developing: (1) regional resource centers; (2) centers and services for deaf-blind children; (3) programs for the early education of handicapped children; (4) special regional education programs; (5) programs for training personnel working with handicapped children; (6) research and demonstration projects; and (7) instructional media for the handicapped.

H.R. 6693. April 27, 1977. Education and Labor. Amends the Child Abuse Prevention and Treatment Act to extend the authorization of appropriations contained in such Act to include fiscal year 1978 through fiscal year 1982.

H.R. 6694. April 27, 1977. International Relations. Amends the Foreign Assistance Act of 1961 to terminate foreign assistance and military sales unless the President certifies that the recipient country is taking adequate measures to control illegal narcotics trade.

H.R. 6695. April 27, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Housing and Urban Development, acting through the States, to make loans to homeowners to assist them in purchasing and installing qualified solar heating and cooling equipment.

Directs the Secretary to disseminate information concerning recommended standards and types of qualified solar heating or solar and cooling equipment appropriate for use in residential structures.

H.R. 6696. April 27, 1977. Judiciary. Amends the Federal Rules of Evidence with respect to the introduction in cases of rape or assault with intent to rape of evidence of a person's past sexual behavior.

H.R. 6697. April 27, 1977. Judiciary. Amends provisions of the Gun Control Act of 1968 which impose additional sentences for using or unlawfully carrying a firearm during the commission of a Federal felony to (1) impose mandatory sentences of specified duration and (2) render knowing principals and conspirators liable to such penalties.

Denies pretrial release to a person charged with such a firearms violation if the proof of guilt is evident or the presumption is great.

H.R. 6698. April 27, 1977. Interstate and Foreign Commerce. Amends the Regional Rail Reorganization Act of 1973 to direct the Consolidated Rail Corporation (ConRail) to make premium payments in order to maintain insurance policies providing medical or life insurance benefits to employees and retirees under such Act. Entitles the corporation to a loan under such Act to make such payments. Deems such costs to be expenses of the administration of the respective estates of the railroads in reorganization.

H.R. 6699. April 27, 1977. Post Office and Civil Service. Amends the Legislative Reorganization Act of 1946 to stipulate that any cost-of-living pay adjustment for Members of Congress may take effect only if both Houses adopt a pay approval resolution by a recorded vote.

H.R. 6700. April 27, 1977. Ways and Means. Amends the Regional Rail Reorganization Act of 1973 and the Internal Revenue Code to exclude from the gross income of an individual railroad worker, for income tax purposes, any amount payable to such individual as a monthly displacement allowance, separation allowance, or termination allowance.

H.R. 6701. April 27, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion from gross income for any amount received as an annuity, pension, or other retirement benefit.

H.R. 6702. April 27, 1977. Science and Technology. Directs the Administrator of the Energy Research and Development Administration to study the uses of grain or grain products in the development and use of fuel.

H.R. 6703. April 27, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to design and construct on an expedited basis certain flood control facilities on portions of the Big Sandy River in Kentucky and West Virginia.

H.R. 6704. April 27, 1977. Public Works and Transportation. Authorizes the Secretary of the Army, acting through the Chief of Engineers, to design and construct on an expedited basis certain flood control facilities on portions of the Big Sandy River, and the Cumberland River, in Kentucky and West Virginia.

H.R. 6705. April 27, 1977. Public Works and Transportation. Amends the Flood Control Act of 1954 to authorize the Corps of Engineers to furnish technical assistance to any State for removing snags and clearing and straightening channels in navigable streams.

H.R. 6706. April 27, 1977. Interstate and Foreign Commerce. Amends Title XIX (Medicaid) of the Social Security Act to require State plans for Medicaid to include a Child Health Assessment Program for the early, periodic screening of physical and mental defects in children under the age of 21 who are members of families eligible for Medicaid or Aid to Families with Dependent Children.

H.R. 6707. April 27, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XI, part B (Professional Standards Review) of the Social Security Act to exempt hospitals and inpatient facilities having fewer than 100 beds from the requirement of review by a Professional Standards Review Organization and from the related requirements and provisions of that part.

H.R. 6708. April 27, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for optometric and medical vision care under the supplementary medical insurance program.

H.R. 6709. April 27, 1977. Armed Services. Authorizes the recomputation at age 60 to the retired or retainer pay for members or former members of the uniformed services whose retired or retainer pay was computed on the basis of pay scales in effect prior to January 1, 1972, in order to reflect any retired or retainer pay increases for other members which was based on changes in the Consumer Price Index since that date.

H.R. 6710. April 27, 1977. Interstate and Foreign Commerce. Amends the Health Programs Extension Act of 1973 to prohibit any entity receiving Federal funds from discriminating against any applicant for study because of the views of the applicant regarding abortion or sterilization.

H.R. 6711. April 27, 1977. Government Operations; House Administration. Directs the installation of telecommunications devices which permit two-way communication of textual messages in alphanumeric form by telephone lines in specified Federal agencies to facilitate communication with such agencies by the deaf and provides assistance in such installations in State and local governmental offices. Permits the installation of such a device in the office of any Member of Congress who requests one. Provides for the installation of such devices throughout the United States for the use of deaf persons wishing to communicate with such government agencies or Members of Congress.

H.R. 6112. April 27, 1977. International Relations. Amends the Agricultural Trade Development and Assistance Act of 1954 to require the President to require sales of all agricultural commodities financed by the Commodity Credit Corporation to be made on the basis of a public tender, to be publicly opened in the United States, and to

prohibit the payment of a commission to any selling agent.

H.R. 6713. April 27, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to allow use of a food additive for human health purposes, even though such additive induces cancer in animals, if the Secretary of Health, Education, and Welfare determines the benefits of such use outweigh the risks.

Directs the Secretary to consider in his evaluation (1) scientific data and information on the additive; (2) the scientific validity and other conditions concerning the additive's testing on animals; and (3) the reliability of predicting cancer in humans from use of an additive found to induce cancer in animals.

H.R. 6714. April 28, 1977. International Relations. Amends the Foreign Assistance Act of 1961 to authorize appropriations for fiscal year 1978 for: (1) food and nutrition, family planning, health, education, and environmental damage assistance; (2) development assistance for the Sahel; (3) American schools and hospitals abroad; (4) assistance to international organizations and programs; (5) international disaster assistance; (6) relief assistance to victims of the 1976 Italian earthquakes; and (7) operating expenses. Repeals the prohibitions on assistance to countries trading with Cuba and Vietnam. Sets forth certain foreign assistance policies and restrictions.

Amends the Agricultural Trade Development and Assistance Act of 1954 to establish food for development programs.

H.R. 6715. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to make technical, spelling, clerical and other corrections to the income, estate and gift tax provisions of the Tax Reform Act.

H.R. 6716. April 28, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 6717. April 28, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 6718. April 28, 1977. Judiciary. Amends the Omnibus Crime Control and Safe Streets Act of 1968 to condition certain assistance to States, local governments, and agencies thereunder on the adoption of a law enforcement officers' bill of rights.

H.R. 6719. April 28, 1977. Agriculture. Amends the Agricultural Act of 1949 to establish a price support program for soybeans.

H.R. 6720. April 28, 1977. Education and Labor. Requires each State receiving financial assistance under the Elementary and Secondary Education Act of 1965 which is operating a program designed to insure reading readiness for educationally deprived preschool children or children in grades 1, 2, or 3 to continue such programs at their present level.

Prohibits the exclusion of children enrolled in such program from further participation on the ground that such child has achieved a reading aptitude equal to or greater than the normal reading aptitude for the grade in which the child is enrolled.

H.R. 6721. April 28, 1977. Public Works and Transportation. Directs the Secretary of Transportation to compile information on the motor vehicle safety devices and to make such information available to the States. Authorizes the Secretary to make incentive grants to any State which uses such information as part of its procedure for issuing motor vehicle operating permits.

H.R. 6722. April 28, 1977. Post Office and Civil Service. Makes National Guard civilian technicians members of the competitive service. Gives such individuals certain rights relating to order of retention and procedures for removal or suspension from employment.

H.R. 6723. April 28, 1977. Education and Labor. Directs the Secretary of Agriculture and the Secretary of the Interior to establish a Civilian Conservation Corps to provide employment for unemployed persons in projects connected with conservation of the Nation's land and water resources. Authorizes grants for State conservation projects which meet eligibility requirements under this Act.

H.R. 6724. April 28, 1977. Government Operations. Establishes a Consumer Protection Agency within the executive branch to represent the interests of consumers before Federal agencies, to receive and act upon consumer complaints, to perform research on consumer products, and to gather and disseminate information on consumer products and services.

Requires Federal agencies considering policies or regulations which may affect the interests of consumers to notify the Agency, and to consider the interests of consumers.

H.R. 6725. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to exempt certain corporations substantially owned by members of two or three families from the requirement that corporations engaged in farming use the accrual method of accounting.

H.R. 6726. April 28, 1977. Public Works and Transportation. Designates the Federal building located at 501 Broadway in Paducah, Ky., as the "Frank Albert Stubblefield Federal Building."

H.R. 6727. April 28, 1977. Science and Technology; International Relations. Amends the Federal Nonnuclear Energy Research and Development Act of 1974 to direct the Administrator of the Energy Research and Development Administration to establish a program to assist less development and impoverished nations and regions in the development and utilization of unconventional, nonnuclear energy technologies.

H.R. 6728. April 28, 1977. Interior and Insular Affairs. Imposes additional restrictions on sales and resales of excess lands sold to qualify for water rights under the Federal reclamation laws.

H.R. 6729. April 28, 1977. Merchant Marine and Fisheries. Amends the Marine Mammal Protection Act of 1972 to require the establishment of progressively lower quotas for the taking of marine mammals incidental to commercial tuna fishing.

Requires the Secretary of the Treasury to ban the importation of fish and fish products from foreign nations causing the incidental killing of or serious injury to marine mammals in excess of standards set by this Act.

Revises the procedure for placing observers upon commercial fishing vessels.

H.R. 6730. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to allow limited, nonrefundable income tax credits for individuals who: (1) install qualified insulation in their residences; (2) install qualified solar heating and cooling equipment in dwelling units used by them, or leased to others as residences; (3) replace the heating system in any dwelling with a reversible, compressible refrigerant system (i.e., a heat pump system); or (4) purchase personal or family electric highway vehicles between 1976 and 1982.

H.R. 6731. April 28, 1977. Agriculture. Amends the Food Stamp Act of 1964: (1) to require the Secretary of Agriculture to establish uniform national eligibility standards for participation in the Food Stamp Program; (2) to define household income limits and the amount of household assets which will be permitted in determining eligibility; (3) to stipulate the conditions under which unemployment or underemployment will disqualify an applicant; (4) to establish regulations for the redemption of coupons; and (5) to set the value of a household's coupon allotment and the amount the household must pay therefor.

H.R. 6732. April 28, 1977. Ways and Means; Veterans' Affairs; Judiciary. Directs the Social Security Administration, the Veterans' Administration, and the Immigration and Naturalization Service to issue to any person requesting assistance from such agency a call card soliciting such person's opinion concerning the promptness, courtesy, and fairness with which his or her request was handled.

H.R. 6733. April 28, 1977. Eduction and Labor. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child to be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual act; (3) knowingly transport a film or photograph depicting a prohibited sexual act; or (4) receive for sale or sell any such film or photograph; if such individual knows or should know such film or photograph has or may be transported in such a manner as to affect interstate or foreign commerce.

H.R. 6734. April 28, 1977. Judiciary. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child to be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual acts; (3) knowingly transport a film or photograph depicting a prohibited sexual act; or (4) receive for sale or sell any such film or photograph, if such individual knows or should know such film or photograph has or may be transported in such a manner as to affect interstate or foreign commerce.

Imposes criminal penalties for violations of this Act.

H.R. 6735. April 28, 1977. Small Business. Amends the Small Business Act to authorize the Small Business Administrator to offer reinsurance against excess losses resulting from products liability claims or completed operations claims against small business concerns.

H.R. 6736. April 28, 1977. Veterans' Affairs. Exempts courses which lead to a standard college degree from the "85–15" rule under which the Administrator of Veterans' Affairs is required to disapprove enrollment of any eligible veterans, not already enrolled, in any course where more than 85 percent of the students enrolled have their fees paid by either the Federal Government or the educational institution itself.

H.R. 6737. April 28, 1977. Education and Labor. Amends the Comprehensive Employment and Training Act of 1973 to direct the Secretary of Labor to provide financial assistance to prime sponsors submitting approved plans for school year youth incentive and summer youth incentive programs.

H.R. 6738. April 28, 1977. Public Works and Transportation. Amends the Urban Mass Transportation Act of 1964 to require that applicants for funding under the urban mass transit grant program charge handicapped and elderly persons at most one-half the fare charged other individuals for mass transportation services during both peak and nonpeak hours.

H.R. 6739. April 28, 1977. Interstate and Foreign Commerce. Amends the Regional Rail Reorganization Act of 1973, the Railroad Revitalization and Regulatory Reform Act of 1976, and the Department of Transportation Act to extend for 15 months the period during which the Federal share of rail service assistance programs is 100 percent.

H.R. 6740. April 28, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange serv-

ice. Requires the Federal Communications Commission to make specified findings in connection with Commission actions authorizing specialized carriers.

H.R. 6741. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to permit individuals to deduct contributions to a qualified fund, where the beneficiary is a dependent child, nephew or niece of the taxpayer, and where the distributions from the fund are to be made only to defray the cost of room, board, and tuition at an institution of higher education.

H.R. 6742. April 28, 1977. Public Works and Transportation. Prohibits the expenditure of Federal funds for the conversion of highway signs to the metric system unless the Congress specifically authorizes such an expenditure.

H.R. 6743. April 28, 1977. Interior and Insular Affairs. Authorizes the Secretary of the Interior to designate lands in Hyde Park, New York, as the Eleanor Roosevelt National Historic Site and to acquire and manage such lands.

H.R. 6744. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to allow individuals alternative, limited income tax credits or deductions for the tuition paid for the primary, secondary or higher education of the taxpayer, his spouse and dependents.

H.R. 6745. April 28, 1977. Ways and Means; Interstate and Foreign Commerce. Amends the Social Security Act to extend specified public assistance benefits to Guam and the Virgin Islands on the same basis as other States.

H.R. 6746. April 28, 1977. Education and Labor. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child to be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual act; (3) knowingly transport a film or photograph depicting a prohibited sexual act; or (4) receive for sale or sell any such film or photograph, if such individual knows or should know such film or photograph has or may be transported in such a manner as to affect interstate or foreign commerce.

H.R. 6747. April 28, 1977. Education and Labor. Prohibits the sexual exploitation of children by making it unlawful for any individual to (1) cause or permit a child be photographed or filmed engaged in a sexual act prohibited under this Act; (2) photograph or film a prohibited sexual act; (3) knowingly transport a film or photograph depicting a prohibited sexual act; or (4) receive for sale or sell any such film or photograph, if such individual knows or should know such film or photograph has or may be transported in such a manner as to affect interstate or foreign commerce.

H.R. 6748. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 6749. April 28, 1977. Banking, Finance and Urban Affairs. Amends the National Housing Act to limit the rates which may be charged for property insurance under State FAIR plans to the advisory rates set by the State licensed rating organization.

Permits the Secretary of Housing and Urban Development to allow higher rates upon a showing of extraordinary need.

H.R. 6750. April 28, 1977. Banking, Finance and Urban Affairs. Authorizes the President to create an Interagency Task Force on Consumer Cooperatives to study the relationship of cooperatives to the economy and to ongoing Federal programs.

Creates a pilot loan program for cooperatives.

H.R. 6751. April 28, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to eliminate the five-month waiting period which is presently a prerequisite of eligibility for disability insurance benefits.

H.R. 6752. April 28, 1977. Interior and Insular Affairs. Amends the Water Resources Planing Act of 1965 to repeal the limitation on the authorization of appropriations for fiscal years 1976 and 1977 for the preparation of assessments and of regional or river basin plans.

H.R. 6753. April 28, 1977. Ways and Means. Amends the Internal Revenue Code to exclude winnings from State lotteries from gross income.

H.R. 6754. April 28, 1977. Agriculture. Authorizes the Secretary of Agriculture to enter into agreements with owners and operators of land in the Great Plains area to promote conservation of soil and water resources through the conversion of cropland from soil depleting uses to conserving uses including the production of soil conserving cover crops.

H.R. 6755. April 28, 1977. Veterans' Affairs. States that application for service disabled veterans' insurance must be made after separation or release from active duty, and that no such insurance shall be effective until after 120 days following separation or release.

States that any insurance policy purchased by the Administrator of Veterans' Affairs shall not be effective for any National Guardsman or Air National Guardsman until such Guardsman is assinged to a unit or position in which he may be required to perform active duty.

H.R. 6756. April 28, 1977. Interstate and Foreign Commerce. Directs the Secretary of Health, Education, and Welfare to identify tertiary eye care centers that need upgrading and to make grants to accomplish such purpose. Directs the Secretary to create a commission to assess the present state of eye care facilities in the United States, to develop plans for improving and expanding such facilities, and to make grants to public and nonprofit private tertiary eye care centers to implement such upgrading.

H.R. 6757. April 28, 1977. Government Operations. Creates a Federal Program Information Center to establish and maintain a computerized program information system which is capable of identifying all existing Federal domestic assistance programs.

Requires the Director of the Center to publish an annual catalog containing all information on Federal domestic assistance programs that is in the data prepared pursuant to this Act and requires that such catalog shall be made available to the public at a reasonable price.

H.R. 6758. April 28, 1977. Merchant Marine and Fisheries. Amends the Merchant Marine Act, 1936, to extend the age limitation before which passenger ships delivered on or after December 1, 1952, can qualify for operating differential subsidies from 25 to 30 years.

H.R. 6759. April 28, 1977. Judiciary. Confers jurisdiction on the United States District court for the District of Puerto Rico to hear, determine, and render judgment on any claim filed by a certain individual against the United States arising out of specified circumstances.

H.R. 6760. April 28, 1977. Judiciary. Directs the Comptroller General to pay a specified sum of money to a certain individual in full and final settlement of all of his claims against the United States.

H.R. 6761. April 29, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to establish within the Department an Office of Youth Camp Safety to be headed by a Director of Youth Camp Safety. Charges the Director with the development and implementation of youth camp safety standards.

Establishes the Advisory Council on Youth Camp Safety to advise and consult with the Director.

H.R. 6762. April 29, 1977. Veterans' Affairs. Requires the Administrator of Veterans' Affairs to pay (in addition to any already paid) a monthly pension to each veteran of World War I who meets specified service requirements, or to the surviving spouse of each such veteran, or when there is no surviving spouse, to the child or children of each such veteran.

H.R. 6763. April 29, 1977. Merchant Marine and Fisheries; Interstate and Foreign Commerce; Judiciary. Requires the Secretary to issue certain regulations relating to traps and trapping. Sets forth standards for approved traps.

Establishes an advisory commission to advise the Secretary on traps designed or intended for use.

Prohibits trapping on Federal lands where such trapping will adversely affect any species of mammal or bird.

Sets forth a procedure for the application and issuance of trapping permits.

Requires shipping certificates for packages containing specified parts of trapped animals shipped in interstate commerce.

H.R. 6764. April 29, 1977. Education and Labor. Amends the surplus commodities provision of the Older Americans Act of 1965 to require the Secretary of Agriculture to donate surplus commodities to recipients of grants and contracts at a rate of at least 30 cents per meal during fiscal year 1978. Allows a State to elect to receive cash payments in lieu of donated foods with regard to programs for older Americans. Stipulates that payments of such funds to States may only be used by the States to purchase food for nutrition projects.

H.R. 6765. April 29, 1977. Armed Services. Credits female members of the armed forces, for purposes of computing years of active service in the Armed Forces, with service performed during World War I by such individuals as members of telephone operating units of the Army.

H.R. 6766. April 29, 1977. Interstate and Foreign Commerce. Reaffirms the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce. Grants additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest. Reaffirms the authority of the States to regulate terminal and station equipment used for telephone exchange service.

H.R. 6767. April 29, 1977. Public Works and Transportation. Amends the Federal-Aid Highway Act of 1976 to increase and extend the appropriations authorized under such act for the Federal-aid primary system. Increases the Federal share of the cost for construction projects financed with primary funds on the Federal-aid primary system.

H.R. 6768. April 29, 1977. Government Operations. Requires all rules proposed by any Federal agency to be submitted to Congress together with an estimate of the costs to be incurred by the Federal Government, State and local governments, nongovernmental entities, and individuals affected by such proposed rule. States that such rule shall become effective not sooner than 60 days after submission to Congress unless, within such period, either House disapproves such rule.

H.R. 6769. April 29, 1977. Ways and Means. Amends title II (old-age, survivors, and disability insurance) of the Social Security Act to increase the increment by which an individual's old-age benefits shall be increased because of delayed retirement beyond age 65.

H.R. 6770. April 29, 1977. Armed Services. Permits the enlistment of Vietnamese and Cambodian refugees into the Armed Forces under specified conditions.

SENATE—*Friday, November 11, 1977*

(Legislative day of Tuesday, November 1, 1977)

The Senate met at 10 a.m. on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will stand in recess until Tuesday, November 15, 1977, at 10 a.m.

RECESS UNTIL 10 A.M. TUESDAY, NOVEMBER 15, 1977

Thereupon (at 10 o'clock and 6 seconds a.m.) the Senate recessed until Tuesday, November 15, 1977, at 10 a.m.

EXTENSIONS OF REMARKS

PHILADELPHIA BREAKS GROUND FOR ISAAC D. LEVY MEMORIAL PARK

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. EILBERG. Mr. Speaker, I am pleased to be able to announce that groundbreaking ceremonies for the new Isaac D. Levy Memorial Park were held recently in the city of Philadelphia.

The $470,000 park, located next to the monument to the 6 million Jewish martyrs, was a gift to the city by Dr. and Mrs. Leon Levy, noted philanthropist. The brothers were cofounders of the Columbia Broadcasting System television network.

The Levys donated the funds for the park in memory of Dr. Levy's brother, Isaac, a philanthropist who contributed to many charities in the Philadelphia area and in Israel. Isaac Levy died 2 years ago.

Participating in the groundbreaking ceremony were Mayor Frank L. Rizzo, City Council President George X. Schwartz, Deputy City Representative Kenneth S. Mugler, Fairmount Park Commission President Robert W. Crawford, Dr. and Mrs. Levy, and Robert P. and Lynn Levy, Isaac's nephew and niece, respectively.

At the ceremonies, Mayor Rizzo called the park "a fine tribute to a great civic leader." The Mayor called Isaac Levy a man who "has had a tremendous impact upon Philadelphia" and a person whose memory "will never be forgotten."

The city purchased two parcels of land with the Levys gift and will construct the park on the site of an abandoned two-story garage and parking lot.

Isaac Levy served for more than 25 years on the Philadelphia Park Commission, and, at his death, was its vice president.

He was one of the founders of the CBS Television Network with his brother, Leon; a founder of WCAU, Radio, in Philadelphia; the original owner of the Yellow Cab Co.; and a one-time owner of the Philadelphia Eagles.

Throughout his life, Isaac Levy contributed to many charities in Philadelphia and in Israel. Among them are the William S. Paley Library at Temple University, projects of the University of Pennsylvania, the Children's Hospital of Philadelphia, and the Police Athletic League.

The new park is scheduled to be completed in early spring, 1978.

POSSIBLE ADDITIONAL F-16 AIRCRAFT FOR IRAN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues some correspondence I have had with the State Department regarding the possible sale to Iran of 140 additional F–16 aircraft.

In 1976, Congress approved the sale of 160 F–16 aircraft for Iran. Iran now seeks an F–16 inventory of 300 planes. The State Department indicates in their reply that in making a decision on the second Iran request they will take into account both the AWACS airrcaft sale and the denial of the sale of 250 F–18L aircraft.

The decision on this pending request will be our indicator of the ability of the U.S. Government to start a downward trend in arms sales.

My correspondence with the State Department follows:

SEPTEMBER 28, 1977.

Hon. CYRUS R. VANCE,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: It is my understanding that there is presently under discussion in the State Department a proposal to sell Iran an adidtional 140 F–16 aircraft to bring that country's inventory of the F–16s to 300. I had been given the impression by executive branch officials that this sale would be denied.

I would like to know whether in fact, a decision has been made on this request, whether if the sale has not been denied and may be approved, its approval is related in any way to the denial of Iranian participation in any development of an F–18L aircraft and whether or not any potential second F–16 sale will be affected by the Congressional approval of the pending proposed sale of 7 AWACS aircraft.

I would appreciate an early response to this inquiry.

Sincerely yours,
LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., October 21, 1977.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to your letter of September 26, 1977 concerning Iran's request to purchase the F–16 aircraft.

It is correct that the Government of Iran has requested permission to buy 140 F–16 aircraft, in addition to the 160 already agreed to. The fact that the total Iranian request was for 300 F–16s was noted by the Administration witnesses during last September's hearings about the sale of the 160.

The Administration has as yet made no decision on the Iranian desire to purchase an additional 140 F–16s. A review of the request is underway within the Executive Branch.

The President's decision not to agree to the Iranian request to buy 250 F–18L aircraft, which the Iranians wanted as replacements for their F–4s, was based on the President's arms transfer policy, specifically that portion which states that advanced weapons systems must be operationally deployed with United States forces before a commitment can be made for foreign military sales. In considerating our decision on the sale of additional F–16s, the denial of the F–18L will be a factor, among many others, to be taken into account.

The AWACS aircraft which the Government of Iran has requested to buy will be a major component of that country's air defense system. As such, the Executive Branch will take the AWACS into consideration in reviewing any additions, such as the F–16, to that defense system.

Sincerely,
DOUGLAS J. BENNETT, Jr.,
Assistant Secretary for Congressional Relations.

U.S. BUSINESSMEN ENDORSE RETURN OF CROWN OF ST. STEPHEN

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. FRENZEL. Mr. Speaker, on November 7, Mr. Erwin Tomash, chairman, Data Products Corp. of California and chairman of the U.S. section of the Hungarian-U.S. Economic Council, wrote the following message about the President's decision to return the Crown of St. Stephen to the people of Hungary:

The Hungarian-U.S. Economic Council, representative of a broad cross section of American businesses active in Hungary, thoroughly endorses President Carter's deci-

sion to return the Crown of St. Stephen to that country. We believe this unilateral gesture is consistent with the recent improvement in Hungarian-U.S. relations, as it is with the American tradition of respect for rightful ownership and national sovereignty.

We, as other Americans, hope to see further improvements in Hungarian-U.S. relations in the months ahead. Clearly this move contributes to the momentum in this direction.

WATERWAY USER CHARGES: AN ECONOMIC AND POLITICAL DILEMMA

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. JONES of Oklahoma. Mr. Speaker, the controversy over waterway user charges is not a cut-and-dried issue by any means. Two academicians quickly discovered that fact when they set out recently to research an objective study of the issue.

It was difficult to remain neutral, they conceded at the end of their article in the summer 1977 edition of the highly respected Transportation Journal, published by the American Society of Traffic and Transportation. The authors started out "strongly committed to advocating user charges prior to writing this article."

When they had the facts before them, however, they lost some of their conviction for ending a 200-year-old national policy.

"On balance, we still support the passage of user charges," wrote James C. Johnson, associate professor of marketing and transportation at St. Cloud, Minn., State University and formerly of the University of Tulsa, and Donald L. Berger, an M.B.A. candidate at the University of Tulsa. However, they concluded, "the gusto of our position has been diminished by additional understanding of the intricacies involved in this controversy."

These "intricacies" explain the necessity for moving slowly in the implementation of any waterway user charge program ending established toll-free waterways policy. H.R. 8309, which was passed overwhelmingly by the House last month, meets this test. Title II provides for a fuel tax starting at 4 cents per gallon and increasing to 6 cents per gallon—a tax which will add first 10 percent and then 15 percent to the cost of waterways fuel.

At this time, we do not know what the impact of this tax will be on farm incomes, interior regions, industrial employment, international trade, energy conservation, or general inflation in the economy. These and other effects will be monitored under title III of H.R. 8309, another reason why this is meritorious legislation.

I fear that many do not appreciate the complexity of the waterway user charge issue. The Transportation Journal article presents both sides of this question in a matter which is more balanced than much of the literature on the subject.

The Johnson-Berger paper provides the background commentary for a better understanding of some of the issues involved in the controversy over user charges. For that reason, I insert this article, "Waterway User Charges: An Economic and Political Dilemma," in the RECORD:

WATERWAY USER-CHARGES: AN ECONOMIC AND POLITICAL DILEMMA

(By James C. Johnson and Donald L. Berger)

INTRODUCTION

A transportation user-charge has been defined by the Department of Commerce as, ". . . any charge made to beneficiaries or users of services and facilities directly related to transportation and furnished in whole or in part by the Federal Government. Such charges must be paid for use of such service or facility to recover part or all of the capital, operating and maintenance cost of such service or facility." [1]

Eight successive United States Presidents from Herbert Hoover to Gerald Ford have favored inland waterway user-charges. Nevertheless, waterway carriers continue to use the federally built and maintained 25,000 mile waterway system toll free. The issue is not trivial, because it is estimated that greater than $10 billion has been expended by the federal government for construction, operation, and maintenance of the inland waterway system which has a minimum channel depth of 9 feet.[2] In the fiscal year 1977, the federal budget was $153 million for new construction of shallow-draft navigation canals and $351 million to operate and maintain the existing system.[3]

The absence of user-charges on the inland waterway system is a controversy which has spawned heated debates with impassioned arguments and pleas used by each protagonist. Those arguing in favor of the imposition of user-charges have stated:

A U.S. Senate special study group on transportation concluded "Waterway transport has served our Nation well since pre-Revolutionary days. If the test of a reasonable user charge should reveal that under modern transport conditions it is uneconomical in some areas, then it has no more right to continued preservation in those areas than the muzzle-loaded flintlock rifle, which won us our freedom, had the right to remain our infantryman's main weapon." [4]

A Harvard University transportation study group noted, "Water transportation, however, qualified as the enfant perpetual of the transportation industry since it is the oldest of the major transportation forms and has shown as yet little indication of ever assuming its full cost burden, particularly on inland waterway operations." [5]

Economist Ann F. Friedlaender has charged, "Water resource and navigational developments have traditionally been based as much (if not more) on political grounds as on economic grounds. Consequently, examples of uneconomic investments are legion." [6]

In June, 1976, Arthur Lewis, Chairman of the U.S. Railway Association, made the following observation regarding the Ford Administration's proposed waterway user charge, "We doubt seriously that public laws will continue to favor the railroads' competitors as they have in the past." [7]

Defenders of the present toll-free waterways have been equally vociferous supporting their positions:

The National Waterways Conference, a trade organization devoted to maintaining toll-free waterways, has argued, "Waterways confer benefits on the entire public—benefits which are widespread in scope and generally diffused in the economy. Indeed, there is no comparable Federal program which generates such an enormous magnitude of benefits in relation to its cost. It would be improvident in the extreme to jeopardize through user charges a program that has served the Nation so well." [8]

Congressman Hale Boggs of Louisiana has charged: "To upset a policy which has been in continuous effect since 1787 would have a profound impact on the American economy. Over-night, competitive balance would be upset. Agriculture would be affected, because waterborne grain influences the location of key poultry and cattle producing areas, but water-oriented industries would be hardest hit. In recent years many billions of dollars have been invested annually in waterfront sites. Any tax or toll on water transportation would bring economic hardship." [9]

William J. Hull, a vice-president of Ashland Oil, Inc., has observed: "Imposition of user charges would 'commercialize the waterways and thereby deprive the Congress of the ability to utilize water resource programs in pursuing broad objectives of public interest.' Then, only those programs with almost immediate, marketable benefits could pass the user-pay-all criterion. No longer would water resources project approval be geared either directly or indirectly to national interest implications. Willingness, or ability to pay would become the paramount consideration." [10]

Professor Marvin J. Barloon has argued, "Toll-free water transportation often serves to hold down general freight rates. . . . Many industries which never utilize water transportation save large amounts on their freight bills as a direct result of reduced 'water-compelled' rates. In general, such rates are not restricted to the river valleys, and they result in consumer savings, too. . . . Toll-free water transportation, therefore, is doing yeoman's duty in combating increases in the cost of living. The anti-inflationary aspect of low-cost water carriage is beneficial to all American consumers—not just those who live in river towns and cities." [11]

This article will succinctly examine the historical background of toll-free waterways, then the basic arguments pro and con waterway user-charges will be noted. It will conclude by noting the findings of an 800 person survey dealing with the imposition of waterway user-charges.

HISTORICAL BACKGROUND

Advocates of toll-free waterways note that the historical precedent for their position predates the American Revolution.[12] In 1764 the Treaty of Paris between England and France stated that the Mississippi River should be free and open from its source to the sea without any discrimination based on nationality. The treaty ending the Revolutionary War, signed in Paris in 1783, provided that navigation on the Mississippi River would be free forever to citizens of Great Britain and the United States.[13]

A landmark statement regarding waterways is contained in the Northwest Ordinance, passed by the Continental Congress in 1787. This legislation dealt with governing the Northwest Territory and Section 4 stated:

"The navigable waters leading into the Mississippi and St. Lawrence, and the carrying places between the same, shall be common highways and forever free, as well to the inhabitants of said territory as to citizens of the United States, and those of other States that may be admitted into the confederacy, wihout any tax, impost, or duty therefor." [14]

After the U.S. Constitution became operative, one of the first acts of Congress on August 7, 1789 was to adopt the 1787 Northwest Ordinance without change.[15]

Footnotes at end of article.

In 1824, Congress passed the first of a long series of combined "rivers and harbors" bills.[16] The Rivers and Harbors Act of 1882 is significant because it contained a specific statement by Congress prohibiting tolls on all federal waterways. It stated:

"That no tolls or operating charges whatsoever shall be levied or collected upon any vessels, boats, dredges, craft or other water craft passing through any canal or other work for the improvement of navigation belonging to the United States." [17]

Four years later, in 1886 the Supreme Court issued a basic decision regarding inland waterway policy. In *Huse* v. *Glover* [18] the high court interpreted the "forever free" clause of the Northwest Ordinance. The court noted that "unimproved" waterways must remain toll-free, but that if a state should improve a waterway, the state shall have the right to be reimbursed for the expense incurred. Although states could legally collect user-charges, and by implication so could the federal government, the United States Congress held steadfast to its toll-free policy. The 1909 Rivers and Harbors Act again reaffirmed that no tolls or operating charges shall be levied on the inland waterway system.[19]

Although at the present time Congress still has not enacted user-charges on the inland waterway system, there has been considerable agitation for this outcome. In 1968, Congress established a seven member study group, known as the National Water Commission (NWC). Its charge was to perform a comprehensive assessment of federal water resource programs and to recommend policy changes to Congress. The NWC study encompassed five years and an expenditure of $5 million. In June, 1973, the NWC findings were made public. It called for the imposition of waterway user-charges and lockage fees such that, "within the bound of administrative feasibility, the user-charges for individual waterways, or classes of waterways, reflect differences in the cost of operating or maintaining them." [20] The report favored user-charges which started at a "low-level" and gradually increased over time. This report has been bitterly controversial. Senator J. Bennett Johnston (D-La.) described the NWC Report as "outrageous" and "incredible." Representative Robert L. F Sikes (D-Fla.) referred to them as "silly." [21] A spokesman for the National Waterways Conference declared, "any low-level entering wedge would be widely and correctly understood by the shipping industries as merely the first step in a process of forthcoming escalation to eventual crushing levels." [22]

Former President Ford was an active supporter of waterway user-charges. In 1974 and 1975 his administration introduced bills calling for user-charges that varied depending on the amount of federal money used to construct, operate, and maintain the waterway segment involved. A high cost segment such as in the McClellan-Kerr Arkansas River System, between the Tulsa Port of Catoosa, Oklahoma and the Mississippi River, would increase transportation charges an average of $16.75 per ton.[23] In August, 1976, the U.S. Senate defeated the James C. Buckley Amendment to the pending Tax Reform Act. This amendment, which was defeated 71–17, called for the imposition of a 4 cents per gallon fuel tax used by inland water carriers. This vote was of historic importance, because it is the first time that either house of Congress directly voted on the user-charger issue. Nevertheless, the controversy is sure to continue, because 5 of the 10 senators on the project-authorizing Public Works Subcommittee voted in favor of the user-charges.[24]

The Ford Administration did not strongly support the Buckley Amendment, because it was still formulating its program. There were three viewpoints to be reconciled. The Office of Management and Budget supported a program to recover 50 per cent of the shallow-draft operation and maintenance costs. The user-charge would vary on each segment depending on the federal costs incurred on it. Another study group, the U.S. Water Resources Council, recommended collecting 10 per cent of all shallow and deep-draft navigation costs. It did not specify the type of user-charge mechanism. The Department of Transportation (DOT) advocated collection of 10 per cent of all inland, coastal and deep-draft federal costs by means of a fuel tax—6 cents per gallon on diesel fuel and $1 per barrel on residual fuel oil—and a tonnage fee on ocean freight. Former DOT Secretary William T. Coleman attempted a "trade" to hasten the acceptance of user-charges. He proposed that if the inland water carriers accept limited user-charges, the Ford Administration would support the construction of an improved lock and dam (Number 26) at Alton, Illinois. The water industry's reaction was negative.[25] It was generally conceded that the Ford Administration would develop a unified user-charge program during the fall, 1976, and then it would vigorously work for its enactment into law.

ARGUMENTS AGAINST USER-CHARGES

Upon distillation, there are six basic arguments against the imposition of inland waterway user-charges. The first is that it violates the historical precedent of toll-free waterways, which predates the American Revolution. Since this point has been previously discussed, it will not be reiterated here.

The second factor is the equity argument. It states that the imposition of user-charges at this time would be a breach-of-faith with those industries that in good faith located on waterways because of the low-cost transportation available. "It is small wonder that, during the entire history of the country countless water-dependent industries and communities have been built up along the navigable rivers in unquestioning confidence that the toll-free principle would not be violated . . . Waterway user charges would change the rules disastrously—very late in the game." [26]

Stability of the overall price level is the third argument against user-charges. It is noted that toll-free waterways allow America's basic industries—steel, aluminum, oil, coal, chemicals, and farm products—to operate at maximum efficiency because they heavily utilize low cost water transportation. The start of user-charges would therefore increase the transportation costs to these basic industries, and therefore the ultimate effect would be higher retail prices. In addition, low cost water rates force railroads to lower their charges to be competitive. These are known as "water-compelled" rates. With user-charges, the railroads would be able to increase significantly many of their water-compelled rates.

A corollary to the above argument is that the benefits of toll-free waterways are so diffused to the general public that the federal government ought to pay for them. The logic of this statement would be similar to national defense outlays, that is—everyone benefits from this function, therefore it is a legitimate federal governmental activity.

American consumers in almost every section of the land pay less for countless things they buy: electric power, generated from low-cost water-borne coal; automobiles and refrigerators, made from iron and steel transported by water; gasoline and fuel oil, which accounts for one-third of all waterway commerce; anti-freeze and tires, whose chemical components travel via barge; clothing and other fabrics, woven from synthetics produced from industrial chemicals; foodstuffs made from corn, wheat and other barged-in grains; building materials, including lumber, cement and gypsum; etc. The list is almost endless.[27]

A fifth argument states that the proposed user-charges would have a destructive impact on inland waterway carriers. One water carrier publication flatly declared, "Let's not forget that tolls at levels commonly proposed would kill off most waterway transportation and close large sections of the system." [28]

The final basic rationale against user-charges is that the federal government subsidizes other modes of transportation—so why shouldn't inland water carriers also have their "special" program? The air carrier industry has traditionally been "promoted" by federal governmental policy and many observers believe that the motor carrier industry does not pay its "fair-share" of highway construction and maintenance costs. The 1976 Rail Assistance Act provides for numerous federal assistance programs for the railroad industry. One estimate is that this act will cost the federal government $20 billion in the next decade.[29] Only the oil pipeline industry has received no recent federal subsidy programs. Therefore, an "even-handed" policy demands that the inland water carrier industry also receive some form of federal subsidy.

ARGUMENTS IN FAVOR OF USER-CHARGES

Reduced of rhetoric, four major arguments are put forth favoring inland waterway user-charges. The first states that without applicable user-charges, each mode's true economic costs-of-production are not reflected in its price structure to the shipping public. The result is that allocation function normally provided by the price structure is in disequilibrium. Those carriers that do not pay user charges are over utilized, because of their relative cost advantage vis-a-vis carriers whose price structure includes the full cost-of-production. Professor James C. Nelson has observed, "the transport pricing system is expected to perform its role of dividing traffic efficiently, but cannot do so because all real resource costs of producing transport have not been included in the final prices of some competitive modes having significant portions in the market." [30]

Another argument is that the users of governmentally provided transportation facilities should directly pay for these facilities. John L. Weller notes, "The principle that users of publicly-provided transportation facilities should pay charges fairly apportioned to their use and the costs they occasion is difficult to contest; in the light of demands on public budgets in the years to come, the principle probably will not escape the attention of the taxing authorities." [31] Charles Luna, President of the United Transportation Union, points out that the highway system in the United States has greater utilization by the general public relative to the waterway system, nevertheless only the former has a user charge—primarily a fuel tax.[32]

The third reason for user charges is that it helps to reduce waste in government—especially "pork barrel" projects. A Brookings Institution study group concluded:

"User taxes also reduce the amount of waste which occurs in the development of transport facilities, for the beneficiaries who urge the provision of transportation facilities know they must pay the bill, and they are therefore more prudent in the type and extent of the proposals they submit. For example, the uneconomic expansion of inland waterway facilities would not continue at the present rate if those who espoused them knew that they would be held responsible for their support." [33]

Footnotes at end of article.

The final argument notes that inland water carriers can generally afford to pay the proposed user charges without substantial disruption to their freight tonnage. The one exception involves petroleum products, which likely would switch to pipeline transportation. A Harvard University study team carefully analyzed the cost structures of the various transport modes and concluded that with the exception of petroleum products, "it seems highly probable that any reasonable schedule of water user tolls would have little effect on the optimal traffic allocation." [34]

THE RESPONDENTS "SPEAK-OUT"

Methodology

On March 25, 1976 eight hundred survey instruments with cover letters were sent to the respondents. One half of the sample was randomly selected from the 1975 membership roster of the National Council of Physical Distribution Management and from the 1975 membership roster of the American Society of Traffic Transportation. Only shipper executives were chosen from these lists and special care was taken to insure that no respondent received more than one survey instrument. The other 400 survey members were randomly selected from the 1975 membership roster of the American Marketing Association. Only marketing executives with the following types of titles were selected: manager of marketing services, vice president—marketing, director of corporate marketing planning, marketing manager, director of marketing operations, etc. The former group can be abbreviated as *transportation executives* (TE) and the latter as *marketing executives* (ME). Of the 800 survey instruments sent, 358 were returned in time to be included in the analysis of the data. This response rate of 44.8 per cent was extremely high and very gratifying to the authors. As would be expected, the TE's were more interested in the user-charge controversy, and therefore, their response rate was higher (53.8 per cent) than that of the ME's (35.8 per cent).

The nonnarrative information obtained from the returned survey instruments was analyzed by the Statistical Package For The Social Sciences, and the remainder of this article summarizes the findings of the study.

Characteristics of respondents

Of all the respondents, 81.9 per cent worked for manufacturing firms, 4.0 per cent were processing, 3.3 per cent were wholesaling, 2.4 per cent were retailing, and 8.3 per cent were "other." Regarding number of employees, 82.8 per cent worked for firms with 500 or more employees and 17.2 per cent had less than 500 employees. The majority of the respondents were employed by relatively large firms in terms of total sales. Approximately 80 per cent of the respondents worked for firms with $50 million or more in annual sales and the other 20 per cent had sales of less than $50 million.

FINDINGS OF THE STUDY

Each respondent was asked if he or she was aware of the controversy regarding the federal establishment of user-charges on the inland waterway system. As would be expected, transportation executives indicated that 87 per cent of their ranks were aware of the controversy, while only 32.8 per cent of marketing executives had similar knowledge. Following this question, a one page, single spaced description of both sides of the controversy was presented. The authors' carefully protested this description of the controversy with numerous persons aware of this quandary. Each was asked to comment on the fairness and objectivity in which each side of the controversy was presented. This description was re-written until it was unanimously held by the readers to be neutral in content. This situation was confirmed by the following test. After analyzing the data it was checked to see if there were any significant statistical differences in the answers to the survey instrument between those respondents who were previously aware of the controversy vis-a-vis those that were introduced to it via the survey instrument. No significant statistical differences were found.

The next question asked—should user-charges be collected on the inland waterway system? Both groups of executives were strongly in favor of the imposition of user-charges. ME's were 82.6 percent in favor and TE's voted 86 percent for the user-charges. The respondents were then asked—assuming user-charges are to be collected by the federal government, they should be equal to what costs? Three alternatives were available to be checked. The first was that the user-charges should generate only a portion of the annual maintenance and operating costs of the inland waterway system. This alternative, which is the one generally before Congress, was advocated by 38.3 percent of the ME's and 50.3 percent of the TE's. The second alternative called for the user-charges to equal the annual maintenance and operating costs. This alternative was less popular, with 32.5 per cent of ME's supporting it and 29.6 per cent of the TE's. The third choice was that the user-charge should be equal to the annual maintenance/operating costs and they should cover the annualized portion of the initial capital outlay required to complete the waterway project. This proposal was the least popular, with 29.2 per cent of ME's and 20.1 per cent of TE's supporting it.

Perception of the strongest advocates of user-charges was the subject of the next question. Each respondent could check as many of the following as applicable: the Interstate Commerce Commission, the Department of Transportation, the railroad industry, the motor carrier industry, the airline industry, and university transportation professors. The ME's perceived two groups to be the strongest advocates—the railroads (48.3 per cent checked this response) and the motor carriers (44.8 per cent). TE's unequivocally perceived the railroads as the strongest advocates, with 75.8 per cent of the respondents so noting. Second with 37.7 per cent was the motor carrier industry and a close third with 33.0 per cent was the Department of Transportation.

An intriguing question asked the respondents to rate the importance of the user-charge controversy according to one of three alternatives; a very important national issue, an issue of "medium" importance, and a national issue of minimal overall importance. As would be expected the first alternative was selected by 26.4 per cent of TE's and only 9.8 per cent of ME's. The second alternative—an issue of "medium" importance—was the most common response by both groups of executives. It was selected by 49.6 per cent of the ME's and 51.8 per cent of the TE's. Marketing executives were more inclined to view the controversy as being of minimal importance, with 40.7 per cent of the respondents so indictaing. Only 21.8 per cent of the TE's took a similar position.

The next question hypothesized, assuming that user-charges are established on the inland waterway system, they would have what effect on the consuming public? Three choices were possible: an adverse effect, a positive effect, and no effect. ME's were about evenly distributed between an adverse effect (43.6 percent) and no effect (41.00). Only 15.4 percent perceived a positive effect by the imposition of waterway user-fees. TE's held approximately the same position—40.2 percent said an adverse effect, 24.6 percent a positive effect, and 35.2 percent said it would have no impact on the public.

The final question asked if user-charges of some magnitude will exist by 1980. The authors' were surprised by the unannimity of the responses to this question. Eighty-one percent of the ME's and 83.2 percent of the TE's stated that user charges would be a fact-of-life in 1980. When asked to comment on why they took this position, believers in the inevitability of user-charges made the following typical comments:

Taking taxes to subsidize waterways is like giving drugs to an addict. If waterway transportation is economical, let them prove it in a free market situation. I resent the government taking our money to subsidize other transportation companies—some of whom may be used by our competitors.

I believe the railroad trend toward nationalization will continue, in the meantime huge additional subsidies will be required. It will be politically expedient to place additional costs on competing modes—this also includes motor carriers.

Electorate will continue to become more informed about large public expenditures that will affect their taxes. More monies will be required to support the maintenance and improvement of the inland waterway system and the taxpayers will insist that the carriers who benefit from it must support its upkeep.

It is inconsistent with current federal source to go untapped indefinitely—Besides I believe the Congress will recognize the competitive imbalance created by the current waterway exemption and move to correct it in the near future.

The present situation with respect to curbing federal budgetary expenditures will exert pressure on user-charges.

Government monies should no longer be used to give one form of transportation an advantage of economic value over other modes. We need a transportation policy that will engender progress and development in all modes on an equal basis.

Respondents who thought that user-charges would not exist in 1980 issued the following typical comments:

The political feeling is too strong against user-charges due partly to local governments seeking federal programs to improve inland waterways.

I believe the waterway lobby in Washington is too powerful to permit Congress to enact a law assessing user-charges. Further, the corn and grain interests (farmers) would and have fought tooth and nail over the years to prevent user-charges.

The same "clout" that got the canal to Catoosa (Oklahoma) will keep it "priced right."

I believe that the political power of the Congressmen and Senators in waterway States will provide enough clout in committees to keep effective legislation from being passed before 1980.

Believe this to be a political issue. User-charges would tend to decrease waterway usage and thus make it more difficult to justify improvement and expansion.

CONCLUSION

The waterway user-charge controversy is an incredibly complex issue. Persuasive arguments can be put forth for either side of this quandary. Frankly, the authors were strongly committed to advocating user-charges prior to writing this article. On balance, we still support the passage of user charges—but the gusto of our position has been diminished by additional understanding of the intricacies involved in this controversy.

NO CELEBRATION FOR SOVIET JEWRY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. EILBERG. Mr. Speaker, on November 7 the Government of the U.S.S.R. marked its 60th anniversary by celebrating Soviet National Day. This is a particularly appropriate time to remind the Soviet Union that the Congress of the United States remains deeply committed to the struggle for Soviet Jews who have been denied religious freedom and the right to emigrate.

Despite the fact that the Soviet Union has signed the Helsinki Accord, Mr. Speaker, that Government refuses to recognize the universal freedom to emigrate. To this day, Jews and other Soviet minorities face one obstacle after another when they dare to seek an exit visa.

Many of these activists are treated in an insulting and abusive manner. Countless numbers have lost their jobs, and face daily harassment at the hands of Soviet police; some languish in jail as "prisoners of conscience," when their only crime was to hope to live in freedom in Israel.

The most recent example is Anatoly Sharansky. He has been separated from his wife for 4 years now by a cruel and arbitrary Soviet policy which forced her to leave for Israel without Anatoly. Now, he is jailed, facing trumped-up charges of treason.

Mr. Speaker, just recently a group of Jewish activists in the Soviet Union issued a courageous appeal for freedom. They cited arrests, surveillance, disconnected telephones, house searches, blackmail, beatings, and scurrilous articles in the press as examples of the continuing harassment against Soviet Jews struggling for their right to freely emigrate to Israel.

I commend to the attention of my colleagues the final portion of the activists' plea, and hope that as the Soviet Government celebrates its 60th anniversary, we soon will be able to celebrate the freedom of these brave people who have been denied rights guaranteed to them by treaties recognized by both our governments:

ACTIVISTS' PLEAS

"At the very moment that we are finishing our appeal, we received more frightening news from Kiev. In a central Kiev newspaper 'Evening Kiev' an article appeared signed by an agent provocateur accusing another Jewish activist Vladimir Kislik of specially heavy crimes. The appearance of such accusations prior to the Belgrade Conference demonstrates to the world that Soviet authorities are not inclined to change their emigration policy."

Signed: Solomon Inditzky, Isabella Novikova, Mark Kovner, Vladimir Slepak, Alexander Lerner, Rima and Yevgenny Yakir, Dina and Yosef Beilin, Felix Kandel, Mark Novikov, Vladimir Shakhnovsky, Mark Belinkov, Leonid Mennes, Lev Ulanovsky, Ida Nudel, Irina Brailovsky, Grigory Goldstein, Isai Goldstein, Elizabeta Byekova, Shalva Krikhvelli, Solomon Ginsburg, Emanuel Kvaleadze, Arnold Kogan, Mark Lublensky, Alexander Gvinter, Semion Yantovsky, Zacher Tesker, Victor Elistratov, Boris Chernobilsky, Ilya Tsitovsky, Boris Faigan, Alexander Magedovich, Pavel Krivinos, Naum Kogan, Grigory Krasko, Yanna Goods, Lev Grainberg, Sergei Tuzhilin, Irina Gildenhorn, Chana Yellinson, Mark Glumel, Alexander German, Boris Briter, Valery Fairmark, Aron Gurevich, Valery Lifshitz, Larissa Vilenskaya, Oscar Mendilev, Abraham Nizhnikov, Yevgenny Kreston, Lev Ovsischer, Natalia and Grigory Rosenshtein, Yosef Ahs, Edward Nizhnikov, Alexander Astronov, Yuli Kosharovsky, Yevgenia Nesomnyaschaya, Anatoly Shvartsman, Mikhail Kremen, Sergei, Luzer, Valery Sorin, Yevgenny and Yosef Tsirlin, Victor Maximenko, Benjamin Bogomolny, Arkady Mai, Yevgenny Liberman, Yelena Seidel, Yakov Rakhlenko, Mark Spenser, Dmitri Shiglick, Boris Brodsky, and others.

OMNIBUS RIGHT TO PRIVACY ACT OF 1977

HON. RICHARDSON PREYER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. PREYER. Mr. Speaker, I am today introducing the Omnibus Right to Privacy Act of 1977. The bill is based on the recommendations of the Privacy Protection Study Commission. The Commission was established by the Privacy Act of 1974 to examine individual privacy rights and recordkeeping practices by institutions. Since the Commission made its report on July 12, 1977, Representatives KOCH and GOLDWATER, both members of the Commission, have introduced 12 separate bills implementing many of the Commission's recommendations. The Omnibus Right to Privacy Act of 1977 incorporates these 12 bills in a slightly revised format.

The bill covers these areas: First, creation of a Federal Information Practices Board; second, revision of the Privacy Act of 1974; third, Government access to records about individuals; fourth, confidentiality of social service records; fifth, confidentiality of medical records; sixth, amendments to the Fair Credit Reporting Act dealing with consumer credit, commercial credit, depository institutions, and insurance companies; seventh, amendments to the tax record confidentiality provisions of the Internal Revenue Code; and eighth, revision of the Family Educational Rights and Privacy Act.

Adoption of these recommendations would not only affect the Federal Government's recordkeeping practices, but States, schools, hospitals, banks, and insurance companies would also be subjected to new controls on the collection, use, and disclosure of information. It is apparent that Congress must proceed carefully and deliberately in considering legislation that would result in such extensive changes.

I am introducing this omnibus privacy bill to focus attention on the work of the Privacy Commission and to stimulate discussion about the need for increased privacy protections. I am not endorsing any or all of the Commission's recom-

mendations at this time. It is too early in the legislative process for final judgments. In the next session of Congress, my Subcommittee on Government Information and Individual Rights will begin detailed examination of this legislation. I hope that other committees with jurisdiction over privacy-related issues will follow our lead.

THE ARGO MERCHANT LEGACY

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. STUDDS. Mr. Speaker, on December 15, 1976, the Liberian tanker *Argo Merchant* came aground some 30 miles off the island of Nantucket, Mass. Several days later, the ship broke up and spilled 7,500,000 gallons of oil into the Atlantic, making it the largest oil pollution incident in the history of the United States.

We still do not know the extent of the environmental damage caused by that spill. The owners of the *Argo Merchant* have not been forced to pay for the consequences of having faulty equipment on board and an inadequate crew. We still do not have in place the comprehensive oil spill liability legislation or the oil tanker safety bill which would help us prevent similar incidents in the future.

Following are two excellent articles dealing with the legacy of the *Argo Merchant* spill. The first was written by the distinguished former Governor of Massachusetts, Frank Sargent, and the second appeared in the New Bedford Standard Times, a newspaper renowned for its balanced presentation of environmental and energy-related issues. I hope that these will be of interest to my colleagues:

[From the Boston Globe, Oct. 20, 1977]

THE "ARGO MERCHANT" LEGACY

(By Francis W. Sargent)

Remember the "Argo Merchant," the tanker that ran aground and broke up off Nantucket last December, dumping 28,000 tons of oil into the sea?

Well, this week, 10 months later, the first of what will be a series of court cases opened in New York. It provides a behind-the-scenes look at the world of the faceless oil promoters and greater reason for New England to be wary of the problems involved in tankers, refineries, and off-shore oil development.

And what problems they are.

The court case is all about whether the company that insured the $2 million cargo of oil can recover its loss from the owners of the ship. They turn out to be a group of American investors who cleverly arranged their affairs so that their only assets were the ship itself. When it sank, they say, so did the company they'd formed to run it; so don't ask them to compensate anybody for anything.

Banging on the courtroom door are both the Federal government and the states of Massachusetts and Rhode Island, also looking for damages resulting from the oil spill. And way down the line of aggrieved parties are area conservation and fishermen's groups. They, too, claim loss and demand satisfaction.

What's to be learned from just this single week of court claims and counter-claims, suits and cross-suits, charges and denials?

That the public is the loser when the name of the game is oil, whether it's an ancient rustbucket that falls apart and spills its cargo or a modern, up-to-date offshore oil rig that blows out on Georges Bank.

It's not just that nailing down liability is tough when businessmen use legal hiding places to evade financial responsibility. It's not just that the government gets there before you, pressing its claim for lost equipment and the cost of expensive manpower working on the cleanup or salvage.

It's that there is just no way to measure the public loss when something goes wrong in the oil business off our coast.

How do you put a dollar figure on the damage done to fishing grounds off Massachusetts and Rhode Island when 28,000 tons of oil are dumped into the sea?

What's the price tag on the recreational value of the shoreline and beaches that would be ruined if an ocean current shifted and the tide rolled in carrying millions of gallons of oil?

And, even if we could know our loss today, right this minute, how could we calculate the loss to the future, to the next generations who will lose the benefit of what's left unspoiled today?

All concerned also admit that our present technology can't cope with oil spills in waters as rough as those off our coast, and that the chances are one in eight that a spill off New England would inundate our shoreline with tons of oil.

We're dealing with an area that is the source of 20 percent of the world's fish protein. We're dealing with a recreation and tourist area second to none in the nation. And we're dealing with resources even more important to future generations than they are to our own.

The Argo Merchant trial in New York should remind us that, when we're dealing with Big Oil, we're playing against a stacked deck.

[From the New Bedford Standard Times]

GOOD OLD SAM CLUBS STEPS IN WHERE COD-FISH FEAR TO TREAD

Mobil Corporation is distributing an imaginative gimmick entitled "Incredible Energy Mysteries" and modeled after the long-gone pulp magazines of America. The company explains, "We have two motives in preparing our own pulp 'magazine.' Each article, which ran originally as a newspaper advertisement, is we hope, fun to read. But each also contains some dead-serious ideas."

"Case No. 5" in this booklet is entitled "The enigma of the missing disaster." In brief, a fictitious police chief (who would have had to be from this area), is explaining his problem to "Sam Clubs, private eye."

"A few months back, an oil tanker called the Argo Merchant fetched up on a reef east of here. Broke open and lost all her cargo," said the chief. "All of a sudden, the town looked like it was about to play host to the end of the world. Newspaper fellers came by the carload, and radio fellers, and television folks with the big fancy-painted trailer trucks full of electronic stuff . . .

"Then, quick as they came, all them strangers just packed up and left. Every day since then, big crowds of people like this come here to the beach just to wait for that oil to come in and ruin our fishing grounds, kill the birds, and spoil the summer business."

Sam Clubs replied, "You don't need me, Chief ('to get folks to stop comin'). Just show the people this." And Clubs produced a March 31 United Press-International story out of Washington, the lead of which said, "The 7.7 million gallons of oil spilled from the tanker *Argo Merchant* caused 'minimal' biological and esthetic damage, a government report said today." The news story attributed the report to the National Oceanic and Atmospheric Administration (NOAA).

So Sam Clubs, departing, "smiled a crooked smile" and commented to himself, "Kinda makes you wish the press could get as excited about the end of a big story as it dces about the beginning, doesn't it?"

Good old Sam Clubs should have stuck with the thing for a while:

June 29 (Ottaway News Service): "In testimony before the House Subcommittee on Environment and Atmosphere, John W. Farrington of the Woods Hole Oceanographic Institution said most of the data needed to assess the immediate environmental impact and fate of the (*Argo Merchant*) oil was not collected by either the Environmental Protection Agency or NOAA or other agencies. He blamed lack of funds, equipment and adequate assisting personnel for much of the chaos."

June 30 (Ottaway News Service): "Massachusetts Lieutenant Governor Thomas P. O'Neill III told a meeting of the Outer Continental Shelf Advisory Board on Offshore Oil Development there is evidence that *Argo Merchant* oil is being cycled through the Georges Bank-Nantucket Shoals ecosystem. He declared, 'Our Massachusetts environmental people feel there has been no detailed analytical report of findings as to what the long-term effects will be.' O'Neill said a misleading NOAA press release 'minimized the long-term effects.' "

July 4 (Associated Press): "The General Accounting Office said that any long-range damage may be impossible to quantify. Virtually none of the 7.5 million gallons of oil spilled has been recovered. Recent surveys indicate the possibility that 27,000 square miles of the Atlantic Ocean, including parts of the rich Georges Bank fishing grounds, may have been affected by the *Argo Merchant* spill."

It is also noteworthy that in May, Woods Hole Oceanographic Institution biologist Howard Sanders reported a "threefold" reduction in the number of bottom-dwelling animals near the spill site. "It would be irresponsible to predict a catastrophe," Dr. Sanders said, "but people without scientific data have said that the spill had no effect. I'm not happy with these bland self-assurances."

And as of July 27, animal pathologist Robert S. Brown, one of four University of Rhode Island scientists researching the spill, concluded, "Apparently the acute effects that we noticed (in February) have diminished, (but) there could be long-term effects that we might not see for years."

Kinda makes you wish that Sam Clubs wouldn't jump to conclusions, doesn't it? When the codfish confirm that early NOAA report, we'll begin to look for the "end of the big story."

COMMUNITY RENEWAL TEAM OF GREATER HARTFORD

HON. WILLIAM R. COTTER

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. COTTER. Mr. Speaker, the Community Renewal Team of Greater Hartford (CRT), Hartford, Conn., the Nation's oldest existing community action agency, will be celebrating its 15th anniversary this month. CRT will hold open house, at most of its city-wide facilities, during the week-long celebration

beginning Monday, November 28, climaxing with a banquet on Sunday, December 4, 1977.

CRT was organized in the summer of 1962 under the name "Task Force for Community Renewal." This was more than 2 years before President Lyndon B. Johnson made his famous war on poverty State of the Union message, setting the stage for the national birth of community action agencies. CRT was organized by Carleton Sharpe, Kenneth Meinke, Arthur Lumsden, Harold Conway, and Robert Satter, representing the five founding groups: The Hartford Court of Common Council, Hartford Board of Education, Greater Hartford Chamber of Commerce, Greater Hartford Community Council, and the Hartford Labor Council (AFL–CIO). On December 4, 1962, the organization adopted the name "Community Renewal Team of Greater Hartford."

James G. Harris, Jr., executive director of CRT and founding secretary states:

In 1962 I received the first operation funds for CRT, a check for thirty-five thousand dollars ($35,000) from the Hartford Court of Common Council. Due to trust, faith and hard work, by a lot of people, today we have a budget of over six-million dollars, employ over three hundred persons (300), and service over one hundred thousand (100,000) individuals who live within the twenty-nine (29) towns that make up the Greater Hartford area. The war on poverty is far from over. CRT is grateful to the community, the private business sector and government for allowing us to carry out our task as "People Helping People to Help People."

Mr. Speaker, I know my colleagues and the readers of this RECORD will join me in wishing continued success to CRT in the year ahead.

HEARTFELT TRIBUTE TO MR. AND MRS. IRV TERRY

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. CORMAN. Mr. Speaker, we are not often given the opportunity that I shall have on November 16, 1977, to share in the homage being paid to two cherished people, Mr. and Mrs. Irv Terry of Los Angeles, who have lived their lives as the most decent, honorable, and civilized of American citizens. Their uncommon goodness cannot be extolled by a single event, but it is a warm, heartfelt tribute to Esther and Irv Terry that they will be honored at the Guardians of Courage dinner on Wednesday evening, November 16, to be held at the Beverly Hilton in Los Angeles. And, it will be an uncommon and rare privilege for me to share this evening with them in the presence of their family, friends, and many of the city's notables.

Esther and Irv Terry did not need to be asked "what you can do for your country." The long years of community activities; their philanthropic work, national and local; their effective and productive interests in the political affiliation of their choice; the many charitable causes they sponsored—all were done with a nobility of spirit that is equated with President Kennedy's declaration of faith in the American people.

With the same pride and faith in their native land, the Terrys embraced the land that gave them their heritage—Israel. They have worked to make this once barren piece of earth flourish and prosper, and to keep peace in the land. They have been diligent in their efforts to improve the quality of life by volunteering limitless time and energy to improve education and health care services in Israel. Irv serves on the board of governors of Haifa University and is a member of the Board of American Friends of Tel Aviv University. He is also a patron of the University of Judaism and very active in the United Jewish Welfare Fund Statement Committee. These are only a few of their accomplishments for Israel.

It is so perfectly appropriate for Esther and Irv Terry to be honored with this year's Guardians of Courage Award. They exemplify everything that this organization works for—principally its boundless concern in actively aiding Israel's largest hosptital, the Chaim Sheba Medical Center, at Tel Hashomer, which serves all in need, soldier or civilian, tourist or resident, Arab or Jew.

In America or in Israel, Esther and Irv Terry have lived their lives for humanitarian causes. Their goodness and faith are infinite. They could live no differently, and those in our own country and in Israel as well whose lives they have touched have known a deep and abiding kindredship.

The Terrys are valued friends and my warm and endearing congratulations are theirs on this momentous occasion.

TRIBUTE TO BILL AND BEE LACKEY

HON. DAVE STOCKMAN

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. STOCKMAN. Mr. Speaker, I wish to bring to your attention two outstanding citizens in my congressional district who are being honored this next week for their dedication to the Republican Party as well as service to Van Buren County, Mich. I bring them to your attention because they deserve to be noted at a time when political participation continues to decline, and because they have faithfully performed tasks which to many others would be too mundane to be worth conscientious time and effort.

Bill Lackey has lived in Van Buren County all his life, and his wife, Bee, is originally from Cook County, Ill., where she got her start in Republican politics. Together they have served as active Republicans in Paw Paw, Mich., since 1964. Bill is currently chairman of the township planning board, and serves on the Region Four Planning Commission as well as other county positions. Bee is past chairman of the Republican Women's Club, past chairman of the county Republican Executive Committee, and has served on the Cancer Board, the Tri-County Board for Child and Family Services, and has been a 4–H leader. Bee often says she has worn out six pairs of tennis shoes and three telephones doing party work.

Healthy, two-party competition is essential to sound government, and I want to join the many friends who gather this next week to honor Bill and Bee Lackey for their consistent service to the Republican Party, particularly by their printing of the "White Elephant," the Van Buren County Republican Party paper, as well as most of the other printing services the party has required. They deserve special recognition for taking the responsibilities of citizenship seriously.

HOSTAGE RELIEF ACT—TO ALLOW ERA RESCISSIONS

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. HANSEN. Mr. Speaker, in the name of fairness and sound constitutional practices, I invite my colleagues to cosponsor my bill, H.R. 9812, the Hostage Relief Act of 1977.

This legislation is designed to release the hostages, those States who have and would reverse ratification of a constitutional amendment during the accumulation process and prior to the final approval of 38 States.

This is particularly important in the event of serious consideration of legislation to arbitrarily extend the time for approval of ERA as proposed by House Joint Resolution 638 introduced by Representative ELIZABETH HOLTZMAN.

Support for my bill will be a blow for liberty and against the doctrine of legislative entrapment. It simply provides that any State legislature which rescinds its ratification of a proposed amendment to the Constitution shall not be considered to have ratified the amendment.

The blatant attempt to rig the ratification of a constitutional amendment by arbitrary extensions of time and refusal to accept reversals of legislative action is shocking and reckless. This case is well made in the following article by columnist George F. Will in the November 14, 1977, issue of Newsweek:

STACKING THE DECK ON ERA

It is, perhaps, fitting that advocates of the Equal Rights Amendment want to rig the ratification process. The amendment itself radiates impatience with essential constitutional values, such as respect for the political process and representative institutions.

On March 22, 1972, Congress sent ERA to the states to be ratified or rejected by March 22, 1979. Many states ratified with unseemly speed. But opposition soon crystallized, and the campaign for ERA slowed, then stalled. Thirty-five states have voted for it, three short of the required three-fourths; and three of the 35 have voted to rescind ratifica-

tion; and there may be more states inclined to rescind than to ratify. Faced with failure, ERA supporters want to change the rules in the ninth inning. They want Congress to allow another seven years for ratification, and they want votes to rescind ratification declared void. This attempt to stack the deck is evidence that ERA lacks the kind of support the Constitution requires for amendments.

The Constitution places a substantial burden on those who would alter it, for the same reason it requires large majorities for treaty ratifications and impeachments; some important decisions should not rest on slender majorities. The essence of this nation's constitutional morality is that amendments should be proposed sparingly, and should succeed only if a predetermined period of deliberation produces a consensus that is (in the Supreme Court's words) "sufficiently contemporaneous" to reflect the will of three-fourths of the states "at relatively the same period." The Court has said Congress is responsible for seeing that the states vote an amendment up or down "within some reasonable time after the proposal." A reasonable span is long enough for ample debate but short enough that the states' decisions will be "contemporaneous."

FOURTEEN YEARS?

The first ten amendments were ratified in 27 months. The average time for subsequent amendments has been nineteen months. No ratification has taken even four years. The most recent amendment, lowering the voting age, took less than four months. Yet ERA advocates demand at least fourteen years.

When the Senate passed ERA its report said a seven-year limit (part of every amendment in the preceding 50 years) "assures that a ratification reflects the contemporaneous views of the people." It is not clear that Congress can now change the limit. Neither the text nor the history of Article V of the Constitution clarifies the proper extent of Congress's powers in the amending process. ERA advocates say Congress can suddenly revise the ratification rules under which states thought they were operating. But it is more plausible that Article V establishes a process wherein Congress is divested of all power over an amendment once it is submitted to the states. Surely Article V should be construed in the way that makes a "contemporaneous" set of state decisions necessary for amendments. So even if, in the silence of Article V, Congress can assert the unprecedented power to fiddle with ERA's deadline it would be wrong to do so.

If (and it is a big "if") the 95th Congress need not respect the traditional seven-year limit that the 92nd Congress affirmed, surely one session of a state's legislature should not bind all subsequent sessions from reflecting about and reconsidering ERA as time allows as long as the question is before the nation. ERA supporters dislike this idea because the longer ERA has been debated, the weaker support for it has become.

RUSH TO RATIFICATION

Many ratification votes were perfunctory, even irresponsible. ERA floated through the U.S. House (354–24) and Senate (84–8) with majorities of the sort that do not normally occur when complexities are considered. Most of the 22 states that rushed to ratify it in 1972 did so without any hearings. Hawaii passed it the day it left Congress. Nebraska, scrambling to be second, passed it the day after Hawaii, but did it wrong and had to pass it again six days later. Within three months twenty states had passed it, cavalierly (in several senses of that word). Idaho, Nebraska and Tennessee have rescinded ratification.

ERA advocates say all ratifications, however stale or slapdash, are irrevocable. They say any legislature should be able to reconsider rejection of ERA for thirteen straight years (Illinois and Florida have defeated ERA repeatedly), but no legislature should ever be able to reconsider ratification. Under that rule, a few late-ratifying legislatures could ram into the Constitution an amendment which, by then, at least three-fourths of the states might disapprove. That rule mocks the idea of "contemporaneous" consensus, which can only be guaranteed by permitting states to rescind.

Dragging out ratification over fourteen years, and dragging states into a "consensus" by disregarding their desire to rescind, produces a sham consensus.

Some, perhaps most, ERA supporters regard it as primarily a "symbol" of a vague national "commitment." Without dwelling on the inadvisability of cluttering the Constitution with symbols, it is important to note that ERA is a symbol of the poverty of "progressivism."

ERA says: "Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex."

COURTS VS. INSTITUTIONS

What would it do? That would depend on the judges construing it. Would women be subject to military conscription? Could they be restricted from combat? Could there be different treatment of the sexes to protect women with regard to alimony and other divorce matters? Could the sexes be treated differently in insurance and pension plans because of actuarial evidence about sex-related differences regarding health problems and life expectancy? No one can answer these or hundreds of similar questions in advance of the flood of litigation ERA is designed to trigger. ERA means either that *no* legal distinctions based on sex are constitutional, or that such distinctions must be justified by important reasons. If ERA means the former, it is absurd. (Women *must* be conscripted *equally?* They cannot have lower insurance premiums because of longer life expectancy?) Obviously it means the latter, and would confer upon the judiciary power to write a detailed code governing treatment of the sexes, removing from representative institutions the making of important judgments about society's values.

ERA is part of a pattern. Today "progressives" rely on litigation rather than legislation. They pursue goals (forced busing, abolition of capital punishment, abolition of restrictions on abortion and pornography, expanded rights for defendants in criminal trials) in courts, not in the political process. The attempt to rig the ratification of ERA, like ERA itself, is characteristic of a political movement that is anemic and impatient and reckless, too weak to win in representative institutions and unwilling to accept defeat.

Further complaint regarding the attempt to undermine our constitutional processes is effectively made in the following letter to a fellow Member of Congress by John Remington Graham, associate professor of law at Hamline University in St. Paul, Minn.

NOVEMBER 1, 1977.

DEAR CONGRESSMAN: I write concerning the proposed resolution, which, if passed by Congress, would extend the seven-year limit originally set for ratification of the Equal Rights Amendment by the several States. In the strongest terms, I urge you to vote against the measure.

Whatever one might think of the merits of the proposed amendment, the extraordinary method to secure adoption suggested by proponents is unfair and unconstitutional.

All learned authorities agree that a constitutional amendment must be passed within a reasonable time of proposal, or fail altogether by reason of staleness. A wise policy of Article V of the United States Constitution is that ratification by the requisite three fourths of the several States should reflect the will of the people across the country at approximately the same time.

An instance from our history will illustrate the point. In 1789, Congress proposed one amendment to regulate enumeration for direct taxes and representatives, and another amendment to regulate the compensation of federal legislators. Neither proposal passed. No informed constitutional scholar would maintain that they could be passed today, unless Congress should propose them anew. They have died from inaction.

Because of the difficulties of accurate measurement of what constitutes a reasonable time for ratification, Congress has adopted, on several occasions, the regular practice of prescribing a seven-year limit for ratification. The resolution of March 22, 1972, proposing the Equal Rights Amendment, is a part of that tradition.

It is, of course, no secret that the proposed amendment is highly controversial. Initially, most persons thought the language to be harmless. But now the debate is virulent and heated, as greater numbers of citizens have begun to appreciate what is at issue. Women are certainly more sharply divided than men. It is not healthy for a body politic to become embroiled in endless disputation when attention and energy is needed for other questions.

At the time the Equal Rights Amendment was proposed, those in favor acquired an ascertained, unconditioned, and, therefore, vested right to secure passage in seven years, while those against had a similar right, likewise vested, to defeat the measure within seven years. If, during the seven-year period, the time should be extended, the antagonists would be prejudiced, or, if the time were lessened, the proponents would suffer. It is not possible to help one side, by extension or diminution of the preestablished time, without hurting the other side. Moreover, since the proposed resolution gave both sides a then-present right, any subsequent change of terms would necessarily be *ex post facto*. The inescapable conclusion is that a resolution extending the time would retroactively deprive opponents of a vested right, the same as a resolution lessening the time would retroactively deprive proponents of a vested right. It is beyond dispute that a statute which takes away a vested right retroactively is unconstitutional.

Consider a panoramic, less-technical view of the controversy. When proposed, most people were told, and consequently believed, that the Equal Rights Amendment would simply mean equal pay for equal work and such like. One State after another ratified. Passage appeared certain. Then it was learned that the measure was actually radical and destructive, an attempted erasure of all sex distinctions in the law, even those necessary to human liberty and happiness. The common citizen began to rebel. The States began to rescind earlier ratifications. In double-think fashion, proponents answered that, while States could ratify after earlier rejections, they could not rescind earlier ratifications. After the last season of legislative sessions among the several States, the Equal Rights Amendment appeared to be in real trouble. Now proponents seek extra time by retroactive deprivation of vested rights. The record amply demonstrates that proponents of the Equal Rights Amendment, in the name of liberation, have sought to undermine even-handed fairness. I think

they have played politics with our constitutional processes long enough.

Respectfully yours,

JOHN REMINGTON GRAHAM,
Associate Professor.

There is great need for stopping any efforts for arbitrary extension of time for ratifying the ERA and for passage of my legislation which would end the political practice of holding States hostage to one-time action on ratification of a constitutional amendment.

My bill H.R. 9812 states:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any State legislature which rescinds its ratification of an amendment to the Constitution of the United States shall not be considered to have ratified the amendment, if the amendment has not, before the date of the enactment of this Act, been adopted as part of the Constitution, and if any period within which the ratification of the amendment by the legislatures of three-fourths of the several States is required by the Congress to be completed has not expired. Such rescission may be made before, on, or after the date of the enactment of this Act, but shall be valid for purposes of this Act only if made before the first date on which the amendment is ratified, without being rescinded, by the legislatures of three-fourths of the several States.

OFFSHORE DRILLING BILL IS IMPORTANT TO COASTAL REGIONS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. EILBERG. Mr. Speaker, I commend to the attention of my colleagues an editorial from the Philadelphia Evening Bulletin of October 31 which cites the failure of the House to consider this year the Outer Continental Shelf Lands Act of 1977.

As a ranking member of the committee which authored this bill, I am disappointed that we will not have an opportunity to vote on it before we adjourn, because the legislation would provide much-needed protection for the prompt, yet safe, exploitation of our offshore resources. Because the bill would lead to increased competition and safer operations in offshore drilling, it is an important piece of legislation for our Nation and its coastal regions.

I am hopeful that on our return in January, Congress will move promptly to enact the reforms contained in this bill.

The editorial follows:

[From the Philadelphia Bulletin, Oct. 31, 1977]

SETBACK FOR OUR REGION

Much to the surprise of state officials in our region, a bill controlling offshore oil and natural gas drilling in the Outer Continental Shelf off the New Jersey and Delaware coasts has been scuttled—at least for this year.

Intense lobbying by the oil industry may be the major reason why the House Rules Committee saw fit to put a roadblock in front of this key measure. Some industrial spokesmen had contended that the bill would place too many unnecessary and unacceptable restrictions on the development of our offshore energy resources.

So the result is that long-sought changes in the Federal Government's oil and natural gas leasing program will be delayed. And, if congressional sources are right, the revisions may not be seriously considered in Congress for some time.

For New Jersey, Delaware and other coastal states, that's a major cause for concern. The bill tried to deal with many of the legitimate objections the states had with the marine drilling program. But now, it appears that the states may be left without the kind of protection they had sought from the Federal Government.

It gave the coastal states a right to review and comment on all drilling plans in their region. That included the right to examine statements by drillers on where they plan to operate, how the oil will be transported and what facilities would be needed on-shore. That's especially important in our region, which is dependent to a large degree on its vulnerable tourist and fishing industries.

The bill didn't give states veto power over drilling projects that some local officials and environmentalists had sought. But it did give assurances that any objections the states may have to specific drilling plans will be carefully considered by the U.S. Department of the Interior before it leases oil and natural gas drilling rights to private concerns.

The bill was also important because it would have imposed penalties on oil companies for spills and authorized the Interior Department to cancel leases if drilling in a specified area posed harm to the environment.

Marine drilling, of course, is a necessity if we are to lessen our dependence on overseas suppliers. But offshore exploration requires prudence and vigilence because of the dangers that are involved. Proceeding without caution wouldn't serve the interests of people in our region.

A TRIBUTE TO FRANK VITALE

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. CORMAN. Mr. Speaker, on November 12, the State of Israel will bestow a most coveted award, the Sword of Haganah, on Frank Vitale for unselfish dedication and service to his community and fellowmen everywhere.

Frank Vitale is a successful family businessman. His dedication spans well beyond the realms of his own daily business interests. He has expended tireless energies to advance the community. He has served with distinction as Federal grand jury foreman, chairman of the advisory committee on the Bank of America, and chairman of the music advisory commission of the city of Los Angeles. His civic leadership has made a difference for business and the arts in Los Angeles.

His admirable qualities as a leader received national recognition when he served on the National Recovery Act Board under President Franklin Roosevelt and the people to people program of the U.S. Exposition in Moscow and the Russian Exposition in New York under President Dwight Eisenhower.

Never has Frank Vitale limited his devotion or commitment to a worthy cause. His compassion for his fellowmen transcend all faiths and heritages, and was given special recognition in 1975 by the National Conference of Christians and Jews.

Frank Vitale embraces and works diligently for those projects in which he believes. He fully understands the urgent need of Israel to bolster her economic development and has unselfishly donated not only time, but money to achieve this goal. His humanitarian gestures and generosity are matched by few, but will be saluted by many Saturday night at the ninth annual State of Israel tribute dinner in Los Angeles. This will be a unique tribute to Mr. Vitale, a Catholic, who will receive one of the highest awards given by the State of Israel. I wish to join in this salute and commend Frank for his distinguished and unrelenting devotion and service to his community and the State of Israel.

WHAT THE PEOPLE OF NEW YORK 26TH DISTRICT ARE THINKING ABOUT

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. GILMAN. Mr. Speaker, in the fall of 1976, I submitted by postal patron mailing to the homes in my 26th District of New York, my annual questionnaire. The results have been tabulated, and after reviewing the statistics, I would like to share them with my colleagues, my constituents, and the public.

More than 4,000 residents of Rockland, Orange, and Ulster Counties took the time and effort to complete these questionnaires and return them to my office.

I have attempted to boil down the results in a concise manner, and I include these results at this point in the RECORD. Because of the comprehensive nature of our questionnaire, I have not listed all the results here, but have selected a sampling of some of the major questions.

CONGRESSIONAL QUESTIONNAIRE RESULTS

THE ECONOMY

Do you think the government can improve the economy?

	Percent
Yes	91
No	9

To combat inflation the government should—

	Percent
Curb excessive spending	46
Apply wage/price controls	32
Balance the Federal Budget	22

WELFARE

Do you favor the transfer of all welfare programs to the federal government?

	Percent
Yes	62
No	38

Do you favor legislation requiring a more equitable distribution of federal welfare funding among heavier populated states?

	Percent
Yes	83
No	17

CRIME

Do you favor reinstatement of the death penalty for crimes of violence?

	Percent
Yes	84
No	16

EDUCATION

Do you support busing to achieve racial balance?

	Percent
Yes	15
No	85

Would you favor eliminating the real property tax as the prime source of school financing?

	Percent
Yes	79
No	21

Would you support tax relief for parochial school tuition?

	Percent
Yes	43
No	57

ENERGY

Which of the following energy sources should receive top priority by the U.S.?

	Percent
Development of new sources	44
Energy conservation	22
Nuclear	17
Greater use of coal	16

Should the government levy a tax on cars with poor gas mileage?

	Percent
Yes	53
No	47

Should conservation be encouraged through increased gasoline taxes?

	Percent
Yes	17
No	83

HEALTH

Do you favor a National Health Insurance Program?

	Percent
Yes	67
No	33

Should the U.S. give food to nations which do not control their population growth?

	Percent
Yes	27
No	73

Would you favor a constitutional amendment prohibiting abortions in all circumstances, except when the mother's health is in danger?

	Percent
Yes	32
No	68

VETERANS

Do you support legislation which would eliminate the 10-year limitation for vets to use their educational benefits?

	Percent
Yes	49
No	51

Should veterans pensions be affected if social security payments increase?

	Percent
Yes	29
No	71

INTERNATIONAL RELATIONS

Should the U.S. and Cuba—

	Percent
Resume trade relations	33
Begin Trade relations	20
Maintain the status quo	46

Should the U.S.-Panama Canal treaty be renegotiated with a view toward reducing U.S. control over the Canal?

	Percent
Yes	25
No	75

Should the U.S. withhold aid to those nations cooperating with terrorists?

	Percent
Yes	95
No	5

UNITED NATIONS

Do you think the United Nations is—

	Percent
Effective in maintaining world peace	9
Effective in non-political fields (health, technology, science)	32
Ineffective	58

MISSING IN ACTION

Should the United States provide economic assistance to Vietnam?

	Percent
Yes	10
No	90

Should we pursue negotiations with Vietnam to obtain a full accounting of our MIA's?

	Percent
Yes	89
No	11

DEFENSE

Defense spending should—

	Percent
Increase	28
Decrease	29
Maintained at current levels	43

Do you favor a reduction of U.S. troop strength in Korea?

	Percent
Yes	41
No	59

Do you support funding of the B–1 Bomber?

	Percent
Yes	54
No	46

Do you favor the all-volunteer army concept?

	Percent
Yes	70
No	30

GOVERNMENTAL REGULATIONS

Should federal employees be entitled the right to strike?

	Percent
Yes	30
No	70

Should federal employees be allowed an active role in politics?

	Percent
Yes	60
No	40

IN TRIBUTE TO EARL W. HONERLAH

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. RYAN. Mr. Speaker, an outstanding civic leader in my district, Mr. Earl W. Honerlah, recently passed away and I would like to take this opportunity to pay a small tribute to him.

As business agent for the San Mateo County Carpenters Union Local No. 162, and a lifelong resident of San Mateo, Calif., Earl Honerlah looked out for the welfare of thousands of fellow workers and their families and was dedicated to making the peninsula one of the Nation's finest places to live and work. His accomplishments and contributions are numerous. Thanks to his efforts many are now benefiting from the San Mateo County Boys Club and the San Mateo County Crippled Children's Easter Seal Society. In both cases he assisted not only with his skills but his enthusiasm to help make the community a better place for everyone.

Mr. Honerlah served as secretary-treasurer of the San Mateo County Building and Construction Trades Council from 1972 to 1975 and also vice president for many years of the State Building and Construction Trades Council of California. Through the years he was an active leader of the Scouts in San Mateo County and was a member of the Native Sons of the Golden West, Redwood City Parlor 66 and the Masonic Lodge No. 226.

As a leader in the protection and advancement of workers' rights, a leader in the community, and a friend to literally thousands, he will be greatly missed.

THE CHAOS IN CURRICULA

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. MAZZOLI. Mr. Speaker, I have long been concerned about the steady decline in scholastic aptitude of high school and college students.

This is a very dismal and foreboding trend and, in my judgment, it signals a need to return to the basics—reading, writing, arithmetic, and good old-fashioned discipline—in our Nation's educational institutions.

Along these lines, I commend to the attention of my colleagues the following article entitled "The Chaos of College Curricula," which appeared in the October 30 Washington Post:

THE CHAOS OF COLLEGE CURRICULA: DEGREE MUST REFLECT A CORE OF KNOWLEDGE

(By Ernest L. Boyer)

The safest thing one can say about a college diploma today is not that it signifies some commonly accepted educational achievement, but rather that its holder probably has been around the campus for about four years. Beyond that, everything is uncertain.

This is because on the vast majority of campuses, required courses have been dropped, and the ones which remain reveal a staggering incoherence of purpose, often expressed as "distribution requirements."

Under this system—if it can be called a system—a humanities requirement might be met by a course in film appreciation (12 nights of the Marx Brothers and the aesthetics of "Casablanca"), contemporary literature, modern dance or poetry reading. A social science requirement can be met by a course in Latin American history, by watching "The Adams Chronices" on television, or by making tape recordings of grandma flipping through the family photo album ("oral history"). At some colleges a natural science requirement may be met not only by traditional courses in physics, biology or chemistry, but also by doing work for a season in the Galapagos.

While the college curriculum in this country has properly become rich and varied, that is no justification for random course selection by students. Educational institutions are supposed to have some significant purposes of their own, some goals beyond creating catalogue listings that read like mental menus. The colleges' sense of purpose

was seriously shaken by the campus turmoil of the 1960s and early 1970s, and the problem has been compounded by financial fears on many campuses today. But unless educators are willing to tell the emerging generation that they have little idea about what matters anymore, colleges and universities must seek to redefine the threads of common experience that bind us together.

To do this, campuses would have to recreate some common core curriculum. This, it should be emphasized, does not mean that we need a national curriculum, and such a suggestion from the U.S. commissioner of education certainly is not intended to indicate that the federal government should legislate the contents of education. Colleges and universities themselves must make these decisions.

Some already have begun doing so. At Harvard, an investigation of undergraduate education has led to proposals for a new core curriculum. At Stanford, a committee that has spent several years looking at reform of undergraduate education recently recommended a course requirement in Western civilization. At Amherst, a faculty committee is recommending a new structure for the undergraduate curriculum. But most campuses have not begun this process of rediscovery.

THE CURRICULUM "CAFETERIA"

In the academic world, as elsewhere, beliefs tend to swing too sharply from one extreme to the other. In the early days of American higher education, Harvard College prescribed for all its fuzzy-cheeked, teenage students a tight, inflexible curriculum that was considered divinely ordained. Exceptions to the academic rules were rarely sought and even more infrequently granted.

As knowledge continued to expand, as college doors began swinging more widely open, and as we began to learn more about individual students' differences, notions about what should be taught also changed. More courses, more electives and more student independence were introduced to keep pace with the intellectual, social and economic ferment in our midst.

The idea of some sort of common core did, of course, persist. There were experiments at Columbia University, the University of Chicago and St. John's College, and Harvard produced a report on general education that served as a kind of bible for most colleges and universities after World War II. But the seemingly irreversible sweep was toward a free elective system, the kind of curriculum "cafeteria" which many students speak of today.

But a curriculum that suggests students have nothing in common is just as flawed as one that suggests students are all alike. We need a core curriculum not to protect the disciplines, not to worship a set of books, but because as individuals we also hold important things in common. What we need is to find a middle ground.

What are the common experiences that could become a new common core of liberal education? I would offer one of many possible sets of ideas.

First, we share a common heritage, and we need to focus on the traditions of the past. Colleges have a central obligation to help the human race remember, for better or worse, where it has been and how it got there.

Obviously, to talk about our heritage has a familiar ring. But a notion need not be rejected just because it is familiar, and if our schools and colleges do not help keep the past alive and help introduce students to the people and ideas and events that have contributed consequentially to human gains and losses, we will not only have lost our past, we will have lost our future, too.

The goal, of course, would not be a simple survey course, not a breathless rush through history. Nor do I propose some eclectic muddle. Rather, the goal should be to choose a few seminal events with care, to study them with intensity, and to understand how they have helped shape our world.

I would, however, inject a special word of caution: A chief danger of any study of the past is that we come to believe that our current view of things is the only accurate one and an improvement over past accounts. Thus, a component of the core curriculum's approach to our heritage should be concerned with change, with sets of events viewed from different vantage points.

One might study, for example, how the conventional wisdom about American involvement in Indochina changed from 1950 to 1975. One might compare versions of communism in the 1920s and 1970s. One might trace how the ideas of empire, colonization and "manifest destiny" were born, implemented and radically revalued. One might look at a particular historical moment from the perspective of black people or of women or of non-Western cultures.

But we not only share a common past; we also share the challenges of a common present. It has always seemed curious that most past experiments in general education (the Great Books, for example) have focused exclusively—almost compulsively—on the past and have been remarkably inattentive to the crucial common experiences in the contemporary world. A new core curriculum should also examine our existence here and focus on those circumstances that shape our lives.

We need a communications course, for instance. Language is what makes us a unique species, and all students should be required to master the written and spoken word. They also should understand how we use and misuse symbols, how we communicate not just with words but with mathematics and music and computers and dance.

Courses in communications should strive for "comprehensive literacy"—the ability to spot the hidden suppositions behind a message. Students should, for example, learn how to deal critically with advertising and propaganda. By looking at television news, they might elaborate a notion of "tube literacy". This emphasis on language is essential not only because it is the connecting tissue of our culture, but because it becomes the tool for other learning.

THE MEANING OF WORK

We also need a course on institutional literary. All of us are caught up in a world of social institutions. We are tied into schools and banks and towns and cities and clubs, into the entire structure of contemporary life. No education has done its job if it does not clarify for students how these structures came to be and where they fit into the broader social context.

The guiding logic here is to recognize our common membership in our social structures, to clarify their functions, and to understand how organizations can and should be changed in light of changing social needs. The core curriculum should convey key sectors of American life government and law, business, finance, the economy and the private non-profit realm. Case studies would be particularly useful adjuncts. If their angle of approach were determined by an insistent issue in the news—"ungovernability," human rights, national health insurance, balance of payments, the charitable deduction—so much the better.

We also need a course on the meaning of vocation. We all give purpose to our lives in large part through productive work. Our schools and colleges have been negligent in their failure to confront this essential fact.

We hear a lot of talk these days about "liberal versus vocational" education, and it is suggested that our collegiate traditions are demeaned if they lead directly to a job. Such a view not only distorts the present, but it denies the past. Education has always been a blend of inspiration and utility.

Last fall I was on sabbatical at Cambridge University in England. It is a bucolic spot, with gardens, ivy-covered walls and quiet academic courts, all far removed from the corridors of commerce and from the clang of industry—or so it seemed. Yet during my stay I read "The Masters" by C. P. Snow, a novel that probes academic politics by describing the process by which a Cambridge college selects a master.

In the appendix Snow talks about the history of Cambridge University. He tells how students came to study with their tutors 600 years ago. They slept in dirty lofts and went hungry many times. They faced poverty for months, and for one simple reason: Jobs lay ahead, "jobs in the royal administration, the courts, the church, jobs teaching in the schools." The training was in fact vocational, Snow declared, "and jobs lay at the end."

Harvard College was founded not only to defend the Christian faith but also to prepare young men for jobs: the ministry, law, medicine, teaching and professions pursued by the privileged.

In more recent years our arts and sciences majors—so far removed from charges of vocationalism—have been, in fact, quite practical in their thrust, with students going on to graduate school or specialized job training. The unspoken assumption has always been that our graduates would get productive jobs, and the greatest embarrassment for any academic department is to discover that its graduates cannot get "placed."

Schools and colleges must be honest enough to affirm that the realities of earning a living have always been part of the liberal arts tradition. It is true that some work is not vocation and that some jobs are not uplifting, but degrading. But the problem of relating work to higher education cannot be so easily dismissed. Many useful, challenging and crucial jobs have emerged in recent years, yet schools and colleges still confer prime legitimacy on those jobs that have been around the longest and that we like the best.

Because of tradition, lethargy, ignorance and snobbery, mindless distinctions are made between what is vocationally legitimate and illegitimate. Such distinctions have led to equally mindless choices about what can and cannot be offered at the arts and science colleges.

It is all right, some say, to prepare to be a doctor, but it is less all right to be a nurse. It is all right to be an engineer, but to be a computer programmer is off limits. Teaching college is just great, but teaching elementary school is something else again. To dig the ruins of the past is a respectable objective, but to work with ruined lives in an urban jungle—a much more demanding task—is not so worthy. To read what has been written in the past is fine, but to aspire to write about the present—as a journalist perhaps—is not quite legitimate at many arts and science colleges.

What logic is used by those who make distinctions such as these, by those who—through the curriculum they offer—determine for their students which work is honorable and which is not?

The relationship between quality education and the world of work will not be solved just by tacking some vocational courses onto the traditional curriculum. Rather, it is time for education to confront the subject of vocation as a profoundly serious course of study and to make the study of work itself a part of the curriculum. What have been the historical, philosophical, religious and social attitudes toward work around the world? How does work relate to the fundamental value choices that every student must confront?

Above all, schools and colleges should be places where students come to understand that, for most of us, work is an expression of who we are and where we fit. "I work, therefore, I am" may overstate the case, but it speaks to our current condition.

This is not to urge that colleges become vocational. Rather, it is to suggest that we simply begin to rediscover the true meaning of liberal education.

EXPLORING THE FUTURE

Finally, the core curriculum should respond not only to the past and present, but to the future as well. Robert Heilbroner observes in "The Human Prospect": "There is a question in the air, a question so disturbing that I would hesitate to ask it aloud did I not believe it existed unvoiced in the minds of many. The question is: 'Is there hope for man?' "

I do not propose a single, apocalyptic vision of the future. What I do propose is a core curriculum that looks at the heritage we share, reflects on fundamental common experiences of the present, and then focuses on those alternatives for the future that in a thousand separate and unsuspected ways are being shaped today.

Such a core course would spend some time looking at the "history of the future." In many ways societies are held together by their images of the future. It is important to consider the images that earlier cultures have possessed as well as to look more closely at utopian literature, science fiction, scripture, millenarian tracts and other sources of such images.

Who are the social prophets of our time? What images of the future does our society possess? What are its central dogmas and how do these compare with the forecasts offered by the emerging profession of futurology? How does the process of policy planning translate future alternatives into current choices?

We are at a pivotal time in human history, and educators must approach their responsibilities with a sense of confidence and of urgency. The human race continues to expand at a rate of 200,000 people a day, or 73 million more people every year. And every day more than 800 million people face gnawing hunger, living literally from hand to mouth. Tensions over resources grow more acute, and the quality of our environment is threatened. Where will we get our food, and how can it be appropriately distributed? What about our energy supply, and how can it be equitably shared? How can we reduce the poisons in the atmosphere? Can we have a proper balance between population and the life-support system of this planet. How can we live together, with civility, in a climate of constraint? These are a few of the transcendent issues that today's young people must begin to think about with great care.

Recently, at a seminar in the Persian city of Persepolis, John Gardner said: "Our planet is but a speck of dust in the universe, and our life on it is but an instant in the long stretch of astrophysical time. Still, it is the only planet we have, and our life on it holds great possibilities of beauty and dignity and meaning. Yet, if it were asked of us how we spend our time on our speck of dust, we would have to say, 'We spend a good deal of it fighting one another and laying waste our earth.' "

"Surely," Gardner went on to say, "all of us here believe that we can do better."

It just may be that, as we better educate ourselves and make the human spirit more sensitive, we will touch the life of every student and together make our common future more secure.

PHILADELPHIA EXPANDS PROGRAM TO CARE FOR BURN VICTIMS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. EILBERG. Mr. Speaker, it is with great pride that I am able to inform my colleagues that the city of Philadelphia has taken a major step forward in providing additional care for victims of severe burns in the Delaware Valley area.

Mayor Frank L. Rizzo has announced the establishment of a skin bank at St. Agnes Hospital's Burn Center, which will operate in cooperation with the medical examiner's office, Department of Public Health.

Mayor Rizzo stated that the establishment and operation of the Philadelphia Skin Bank during its first 3 years will be funded by a $262,929 grant from the Philadelphia General Hospital Research Fund. After this initial period, it is expected that the skin bank will become financially self-sufficient.

Mayor Rizzo said:

Philadelphia is extremely fortunate in having two excellent burn centers in our metropolitan area.

Both St. Agnes Hospital and the Crozier-Chester Medical Center have saved many lives which otherwise would have been lost without the knowledge and dedication of the professionals who staff these vital life-saving centers.

The centers are administered by the Burn Foundation of Greater Delaware Valley, which the city administration has supported since its inception in the early 1970s.

Fire Commissioner Joseph R. Rizzo is a trustee of the Burn Foundation and one of its most ardent supporters. The centers provide specialized treatment for severe burn cases, resulting in a 50 percent less than average stay in a regular hospital, better control of infection and greatly reduced mortality rates.

Deputy Health Commissioner Lawrence J. Devlin, who developed and established the mechanisms for the Philadelphia Skin Bank, stated that there are only 25 skin banks in the entire country.

"Physicians use skin grafts from the patient's own body to heal deep burn wounds, but there is usually not enough unburned skin in vicitims who have sustained severe injuries to cover their wounds," Devlin stated.

Over the past decade, scientists have developed methods of saving the skins from cadavers and preserving it by freezing in liquid nitrogen. These cadaver skin grafts—allografts—are used alone or in conjunction with the patient's own skin—autografts—to close burn wounds.

Dr. Frederick DeClement, director of the St. Agnes Hospital Burn Center, has been designated as the director of the Philadelphia Skin and Tissue Bank.

Dr. Marvin E. Aronson, the city's medical examiner and Dr. DeClement will seek skin donors by obtaining consent from the next-of-kin of cases seen in the medical examiner's office, as well as from the next-of-kin of individuals who have died in area hospitals.

The skin allografts will be available for first priority use by patients in these two Philadelphia burn centers. Excess supplies will be provided to other Philadelphia hospitals on request as a second priority; and finally, any hospital in the area or State, as supplies permit.

Medical burn treatment experts advise that deep burn wounds must be treated as fast as possible, usually within 24 hours of injury. The burned portions of the skin and muscle tissue are surgically removed, and the wound is then closed using autografts and allografts. Both types of skin grafts enable the body to heal the wound and grow new skin to eventually close the burn wounds.

W. O. WALKER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. STOKES. Mr. Speaker, recently Mr. W. O. Walker, the nationally renowned publisher of the Cleveland Call and Post newspaper, celebrated his 81st birthday. At the same time, the citizens of Cleveland received the startling news that the indefatigable journalist would be selling the Call and Post in the very near future.

Mr. Speaker, I have come before the House on many occasions to share with you and my colleagues many of the triumphs and highlights of Mr. Walker's career. I must admit that it is with considerable regret that I come before you today to announce the sale of this pioneering paper which is one of the leading black publications in the Nation. Nevertheless, I am heartened to add that the active octogenarian is not contemplating full retirement and will stay active in the management of the newspaper.

Mr. Speaker, to mark this occasion I would like to submit for the RECORD an article on Mr. Walker which appeared in the Cleveland Plain Dealer newspaper. Even though many of my colleagues are well versed on Mr. Walker's accomplishments, I am certain that they will find this account of his life to be both interesting and inspirational. May I also ask my colleagues to join me in recognition of Mr. Walker's outstanding service to his profession, his community, and his country. I, for one, will continue to seek his wisdom and advice for many years to come.

Therefore, Mr. Speaker, I respectfully submit to you the Cleveland Plain Dealer article entitled "Passing the Torch," which appeared in the Wednesday, September 14, edition:

PASSING THE TORCH—PUBLISHER TO SELL CALL AND POST SO HE CAN REST

(By Richard C. Widman)

One of Cleveland's longtime leaders and opinion makers is laying plans to ease his burdens.

William O. Walker, who will be 81 on Sept. 19, is negotiating with his top executives to sell them his business.

Walker is publisher and editor of the Cleveland Call and Post which, with its Columbus and Cincinnati editions, has a total circulation of 34,000. It thus ranks as one of Amer-

ica's most successful black newspapers, Walker said.

But the newspaper published in this city's poor black community has not made him a millionaire, Walker said.

It is not riches that have persuaded the octogenarian to cut back on his 70-hour work week.

The simple answer, as the publisher explained in an interview, is that Walker wants a rest.

Although he will continue to guide the newspaper's policy, Walker will be able to enjoy longer weekends in his relaxing role as a country squire—an unusual role for a black man.

Few urban blacks own country places.

Walker is neither black nor white, he says, but a Negro—a race like the Caucasian and the others, but different in the ways that only a Negro is different. He may or may not have the same tastes as a Caucasian.

Walker is a businessman and a journalist. Many businessmen and journalists have retreats.

Walker's is 28 acres near Chardon in Glauga County, purchased 16 years ago.

He and his second wife, the former Naomi Russell of Columbus, whom he married 22 years ago, spend nearly every weekend there during the warm months, closing it during the winter. The Chardon area is subject to heavy snowfall.

There is an attractive summer cottage furnished comfortably, stylishly, no obvious extravagance.

Walker was state director of industrial relations during a former term of Republican Gov. James A. Rhodes, the first black person to hold an Ohio cabinet post.

Many of Walker's friendships and certain attitudes stem from that experience. It might be said Walker has found his own kind in the Republican business types.

He is a strong believer in self-help.

There is a guest house. "For our city friends who like to rough it with us," Walker explained.

There is a building housing Walker's 12-horsepower garden tractor and gardening tools.

He is proud that he does all of the gardening himself and keeps the buildings freshly painted.

He grows sweet corn, beans, tomatoes, cabbage and collard greens.

Walker is a native of Selma, Ala., which, long after he left it, was the place where blacks seeking their rights marched behind the leadership of Dr. Martin Luther King Jr.

The cottage and guest house are in a clearing dominated by enormous locust, maple and willow trees, and one apple tree that bears in late August.

There also are a few grape vines and blackberry bushes. They did not bear this year, perhaps victims of last winter's severe weather.

Locust trees are not native to America. They were imported in the last century to furnish wood for fence posts.

Walker's locust, since it is so large, dates the farm. The tree must be one of the originals.

Walker mows every foot of the clearing himself, with an attachment on the tractor.

"I keep the lawn mowed and the garden planted," he said. "And I let the rest grow up in weeds for the rabbits, and the foxes and squirrels. I've got every rabbit in the county here!

"I think that if you're going to live out here, you should do the work yourself. I grew up in the city, but my mother loved gardens and flowers, so maybe that is where I get my desire to spend time out here. I don't play tennis, or golf, or anything like that, so this is my recreation."

Walker hastens to add, however:

"I'm perfectly comfortable in the city and I'm perfectly comfortable in the country. I like both.

"We take what is called a 'Quaker rest' out here. That means, 'Thee gets tired of one job, thee does another'. Of course, I work physically harder out here than I do at the newspaper."

Walker seems to enjoy the findings of a group of Kent State University students who studied the area and determined the Cuyahoga River begins on the Walker farm.

It is an ironic note that a black man from the South owns the sources of a river that nourishes the lowlands settled by a white easterner, Moses Cleaveland.

There is a pond in the clearing, adding to the feeling of tranquility.

The pond is perfectly managed. Walker said there is some algae in it from time to time—the death of ponds since it clogs the water and exhausts the oxygen—but not much.

The pond is prolific with aquatic life. Walker fishes for the largemouth bass and catfish, and serves them to guests.

His best bass is a four-pounder, a good fish. But the best catch, a trophy eight-pounder, was by a guest.

Walker may have legal title to the pond, but the real owner is a pesky beaver.

"We call him the troublemaker," the pretty, demure Mrs. Walker complained. "He keeps plugging up the drain, no matter how many times we clear it out. And he's flooding the lawn!"

But the Walkers are fortunate to have the beaver, a symbol of wildness, as such a close neighbor. The beaver was extinct in Northeast Ohio.

A row of lounge chairs is arranged on the lawn that slopes from the cottage to the pond. In the evening the Walkers and their guests "sit out" and watch the beaver at work plugging the pond as the sun sets and the flickers tap on the trees, searching for insects.

The Walkers drink very little but might graciously serve their guests a bloody Mary—the tomato juice from Walker's own garden.

Walker takes one of the chairs and reflects on his life as a journalist and businessman.

And as a Negro.

The identities are linked.

Walker might not have been a newspaper publisher had he been a white man. Had he been white, he might not have been able to carve a career serving a black audience.

But had he been white, and a newspaper publisher, his career might have been more financially profitable.

And his opinions and leadership might have carried more weight in Cleveland.

As it is, he is nationally known as a spokesman for black people and twice was selected as a presidential emissary to foreign lands.

"Last week I was in Washington with 30 other editors to meet with President Carter," he noted. "I represented the black press."

Walker's use of the word "black" is of the vintage of Rap Brown and Stokely Carmichael and other black rights activists, an accommodation, he said, to the "younger generation."

After "black" became fashionable, the Call and Post persisted in identifying its readers as Negroes.

There was more to it than a quarrel over nomenclature.

The young radicals claimed that Negro was a name given to black people by the whites, a leftover from the days of slavery.

And they contended the older blacks who called themselves Negroes, who argued for a rational approach to the civil rights question, were "Uncle Toms."

The older "Negroes" countered that the young radicals were wrong in thinking that they had all the answers, that radical tactics would only alienate those people they were trying to win their rights from. But their views were not fashionable and many were silent.

Those who accommodated but largely remained mute about the dispute may have won in the long run.

The Rap Browns and Stokely Carmichaels are gone. The William O. Walkers are still on the scene. As Walker said about his newspaper:

"I'm ready to share the responsibilities.

"I am proud of having made a contribution to black progress, to opening doors for black people.

"When I came to Cleveland in 1932, at the height of the Depression, the employment situation for blacks was bad. Consequently, I helped organize the Future Outlook League, which had as its theme, 'Don't spend your money where you can't work.' It was the forerunner of what Dr. King was to try later.

"We picketed Woolworth's, Ohio Bell and one of the banks.

"As a result, we opened up more than 1,000 jobs for blacks and set a pattern that has kept Cleveland in the forefront of black employment in the nation. John O. Holly, director of the Future Outlook League, even went to jail for the cause.

"The Call and Post was in the forefront of the battle to free the Scottsboro Boys, to open the then City Hospital to black nurses and doctors. Now all hospitals are open to blacks.

"We also fought to open the corporate offices, banks and other businesses to blacks.

"We were the first to fight, in 1941, to get the Cleveland Railway to hire black motormen."

But times have changed, the publisher-editor said.

"We at the Call and Post are as active as ever, but we're living in a different climate now, in those days we fought for any job. Now we fight for a better job.

"Part of our basic philosophy is to encourage blacks to rise to the heights of their abilities. We felt a black running for mayor would be an incentive for blacks to run for higher offices and that his candidacy would be a challenge to the black community to raise its sights and the white community to erase its racism."

Walker referred to the successful candidacy of former Mayor Carl Stokes whom the Call and Post backed with an unprecedented editorial campaign that has not been repeated for any other black candidate.

"Stokes' candidacy," Walker said, "was a shock to many blacks because they thought it was an impossibility to achieve it, that it was folly. Therefore, many blacks in the community were not behind Stokes' candidacy. We had a lot of trouble with them.

"We were Republican, but Stokes' candidacy transcended politics."

The southern boy who worked his way north and through a series of northern newspapers as reporter, editor and owner has seem significant changes in newspaper publishing, especially black newspapers.

Despite a comfortable home in Shaker Heights and a country estate, he insists publishing has not made him rich.

"I don't think anybody ever got rich publishing a black newspaper," Walker said.

Advertising is the life's blood of a newspaper.

"No newspaper can survive without advertising," Walker said. "When I started in this business 56 years ago black newspapers relied entirely on local ads for wholly black products, such as cosmetics and grooming aids. We didn't get national ads, or ads from the major local stores.

"But it all opened up to the black press in the last 15 years. Now we are getting ads from all the top department and chain stores in Cleveland, and plenty of national ads from the food companies and soap companies and car manufacturers."

Like most Clevelanders, but better informed than most because he benefits from

his newspaper's information sources, Walker has strong opinions about Cleveland's problems, where the fault lies and what should be done:

"There's nothing wrong with Cleveland that a revival of the liberal spirit will not cure.

"Cleveland is cosmopolitan, but the various minorities in the city have tended to be parochial. Neighborhoods have come to be enclaves that prevent the amalgamation of people into a cohesive unit resulting, for example, in the Polish people being opposed to the blacks.

"The politicians capitalize on the prejudices of the minorities. In the current mayoralty campaign they are even pitting the East Side against the West Side.

"If we can understand each other's cultural backgrounds and economic goals, and become united, the city will overcome the faults that have too often made the city the butt of jokes."

Walker also scores some of the people who are the recognized leaders of Cleveland.

"Cleveland has lacked strong leaders who could give the city an image," he said. "Since Newton Baker, the city hasn't had that kind of nationally known figure to give it an image. Pittsburgh had the Mellons, Detroit the Fords.

"What is there you can point to that Cyrus Eaton, for example has done for Cleveland? His Pugwash conferences were way up in Newfoundland. For that matter, what have the Boltons and their family done for Cleveland? And they've been here for generations."

Concerning Cleveland's loss of industry and jobs, Walker's opinions sum up those of many leaders here:

"The political leaders of the city are not as close as they should be to the industrial interests. If they had been closer, the problems could have been worked out to keep industries within the boundaries of the city.

"Our city politicians have been indifferent. Only Gov. Rhodes has spoken out to encourage the lessening of taxation and other inducements to bring more business into Ohio.

"The city should be developing the abundant vacant land inside the city for industrial sites, promising tax benefits and all the utilities needed, as well as police and fire protection. The city certainly has enough land to meet the needs if it would only adopt an industrial site development program."

A publisher and block community leader, Walker has long argued that jobs are the key to equal rights and prosperity for black people.

"Jobs are the only way black people are going to get off relief and other government subsidies," Walker said. "I greatly deplore appeals to people to get on relief, rather than work. That's why I'm behind President Carter's welfare reform program."

In the evening twilight, Walker reflects on his early days in journalism and what it has meant to him.

"We were all bohemians in the early days. Newspapers could not have survived in those days without tramp reporters and printers. I was in Pittsburgh, Norfolk, Washington and then Cleveland.

"I am sorry for a newsman who has worked on only one newspaper. To move around adds to a reporter's background, gives you another dimension on life.

"I was the only black reporter to interview the Scottsboro Boys in the Birmingham jail.

"One of my prize interviews, when I had my own paper in the mid-1920s, was with Clarence Darrow. He impressed me greatly. He was an informal person, who sat with his coat off while I interviewed him.

"I also interviewed Heywood Broun, the columnist and founder of the Newspaper Guild. He was very bulky, a nice fellow to talk to.

"My richness comes in my experience as a black publisher. It has offered me a life of associations with people and issues that is worth more to me than money.

"Newspapering is one of the most rewarding things that has ever happened to me. Where else could a black boy out of Selma, Ala., get to visit with the president and travel around the world."

For those who will some day follow in Walker's footsteps, he has this advice:

"The role of the black press should be militant. Any group of people that is down must fight to get up. We have not been able to throw off all the stigmas of slavery.

"So the black press must be the voice in the wilderness speaking out for more opportunities for black people."

REPRESENTATIVE PULLEN RECALLS FIRST SIGHT OF THE WALL

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. DERWINSKI. Mr. Speaker, Illinois State Representative Penny Pullen, in addition to being a responsible member of the State legislature, is an active participant in the Atlantic Alliance of Young Political Leaders.

Representative Pullen was one of 23 U.S. delegates who attended the conference of the Atlantic Alliance held in Brussels. In addition to visiting Brussels, she had the opportunity of traveling to West Germany where she saw the Berlin Wall.

She dramatically recalls the effect of first seeing the wall in an article carried in the Park Ridge, Ill., Herald of October 13. As I believe her observations are certainly worth noting, I wish to insert her remarks at this time:

THE BERLIN WALL—A SOBERING SCENE

(By Representative Penny Pullen)

(NOTE.—Representative Pullen returned last week from a 10-day trip to Europe where she attended the conference of the Atlantic Alliance of Young Political Leaders as one of America's 23 delegates. This column, which "wrote itself," she said, was done while on a home-bound jet.)

I have now seen The Wall, and I'll never be the same.

A peaceful wall built by peaceful soldiers to keep the happy citizens of East Berlin secure in their prosperous paradise. And beyond, a peaceful expanse of lush green grass, adorning a peaceful minefield.

It is chilling. It is shocking. It is inhuman.

The 23 laughing, sightseeing American tourists—all young politicians of varying experience and background—clamber off the bus and walk to a small platform, passing a little souvenir stand. They climb the 10 or 15 steps in a brisk wind. At the top, the chattering stops.

How stark. The Wall, so near—almost within reach. The grassy field known as no-man's land. The second wall hundreds of yards away, just at the edge of government buildings. The guardhouse 30 to 40 feet in the air. The guards can see us. They have no choice but to see tourists gawking at their deathwatch all day, every day. What are they thinking? Surely they know what we are thinking. Surely they are ashamed.

After a few moments of silence, the young guide points to a small rise in the green field. "That's where Hitler's chancellery was." But it's only a hillock now. The Wall is today.

We don't want to leave. We've not yet reached the depth of emotion we can sense is in us. It is as if our standing there looking and feeling can somehow help the people who must be over there somewhere. If that's all we can do, we want at least to stay and do that much.

But three more groups are waiting. And we lumber down the steps, a little hesitantly, drifting off in thought, then wanting to be together, looking around for each other, visiting the souvenir stand with thoughts of how crass was its existence and, arriving, realizing that here was not simply an array of Souvenir of Berlin keychains but an arsenal of truth: poignant posters of black and white photos taken at The Wall, books about it, post cards of it, items to help us tell others what cannot be adequately expressed.

We have now seen The Wall. And it will never be the same. For in speaking of it and living with its memory, we do more to help the people over there than simply standing and looking and feeling. Each of us 23 Americans will do our part to dismantle that wall, stone by stone.

ALLEGATIONS TRUE OR FALSE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. MICHEL. Mr. Speaker, on Friday, October 28, 1977, the front page of the Wall Street Journal carried a story concerning allegations that have been made against Congressman EDWARD DERWINSKI of Illinois. According to the Journal story, Congressman DERWINSKI "is suspected of having told the South Korean Government that a Korean Central Intelligence Agency agent stationed in New York was about to defect to the United States. Federal officials last month barely got to the defactor ahead of the Korean CIA and he is currently under Justice Department protection."

The Journal article then went on to state:

The government's evidence against Rep. Derwinski—and, in particular, the way it was collected—is a tightly held secret. But with President Carter's approval, Attorney General Griffin Bell has authorized the Public Integrity Section of the Justice Department to begin grand-jury proceedings aimed at Mr. Derwinski.

I am not going to address myself to the allegations made against my good friend and esteemed colleague. I believe, as he does, that justice will run its course and that his reputation for personal integrity will emerge from this incident without a blemish.

But a major question has been raised. How is it possible that the decision of the Carter Justice Department to bring grand jury proceedings against a U.S. Congressman appeared on the front page of a major newspaper even before the Congressman himself was aware of the decision? I do not question the motives of the newsmen involved—they showed commendable professional ability in getting the facts. But how did they get their facts in the first place? The question is not an idle one, because if we can find out just who leaked this infor-

mation to the press we might better understand just how and why the charges against Congressman DERWINSKI came to be made in the first place.

Did the information about possible grand jury proceedings come from the Justice Department? If so, a grave violation of Congressman DERWINSKI's rights has been made by the very department that is "aiming" a grand jury at him. He has become a victim of trial by headline. Does the Carter Justice Department have certain "tightly held secrets" that it leaks only when it is in the interest of the administration?

We all know that in the court of public opinion, a report of a grand jury investigation that has the personal approval of the President of the United States already damages the reputation of the target of that investigation. Could it be that there are reasons other than a search for justice that have led to this grand jury investigation?

I ask this question because in the same story the following statement appears:

Still, the special scrutiny the U.S. government is giving to Mr. Derwinski's role could change the political complexion of the Korean investigation. Until now, Democrats in Congress have absorbed nearly all the political punishment. The one indictment issued so far and those being contemplated by the Justice Department all involve former Democratic lawmakers. Hence, partisan Republicans seem sure to wonder whether the Carter administration is picking on a colleague to even the score a bit.

This speculation in the Journal story is what has prompted me to discuss this subject today. It is of interest that the Journal reminded its readers of the Democrat's "punishment" from the spreading Korean investigation. You do not have to be "partisan" to ask if there is some connection between the charges made by a Democrat administration against a Republican Congressman and the fact that the Democrats are being punished by media reports of the involvement of some Democrats in their Korean scandal.

The Wall Street Journal suggests that such a question is being raised. I think it is a legitimate question and deserves to be answered. And there are other questions as well:

If the leak to the press did not originate with the Justice Department, where did it come from? Could it possibly have come from a member or a staff aide of the House Subcommittee on International Organizations of which ED DERWINSKI is ranking minority member? Why has there not been an investigation, in both the Justice Department and the subcommittee to determine who leaked this story to the press?

When we see the President of the United States and his Attorney General and the public integrity section of the Justice Department demand a grand jury investigation, and when the name of the target of that investigation is leaked to the press, we can only ask the question that must always be asked in cases like this: Who stands to benefit by all this? Certainly the Democrat Party, which controls the White House, the Justice Department, and the congressional subcommittee, the same Democrat Party which has found itself embarrassed by disclosures having to do with the Koreagate scandal.

Who leaked this information to the press? Why was it leaked? I do not know. But I would certainly like to find out. I therefore put the following questions to Attorney General Griffin Bell and Subcommittee Chairman DON FRASER: Have either of you gentlemen investigated the leak to the press? Are you going to pursue this violation of ED DERWINSKI's rights? Or are you going to simply let this kind of thing go on unquestioned and unchallenged? Republicans have rights, too. I will leave to the process of justice the facts of the allegations made against my colleague. But in all conscience I must ask whether he is being made a victim of selective leaks for political purposes.

PRESIDENT CARTER AND THE TRILATERAL COMMISSION: ARTICLE V(A)

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. McDONALD. Mr. Speaker, in recent months, the policies, plans, and operations of the Trilateral Commission have become a subject for considerable public discussion and some controversy. The influence of organized special interest groups over Government is an issue of growing concern among American citizens. And it is heartening that the operations of this powerful, well-organized and internationally active special interest group of financiers, industrialists, academics, and politicians working to influence our Government's foreign and domestic policies to their own benefit are beginning to come under public scrutiny. The pioneering critical examination of the Trilateral Commission was written by a leading conservative political journalist, Gary Allen. Mr. Allen has reviewed the new wave of exposure being given to the Trilateral Commission's activities in the November 1977 issue of American Opinion. Mr. Allen has examined some of the new data on the Trilateral Commission which I commend to all of my colleagues as an aid in understanding the present administration's policies:

THEY ARE CATCHING ON

Remember the bad old days when practically nobody but John Birchers believed there could be such a thing as a political conspiracy? Remember what it was like when most Americans thought that C.F.R. stood for California Freight Rates? And when your uncle asked if Bilderbergers were an exotic sandwich? Remember how people used to laugh and point when you talked about a small group of powerful men which ran *both* major political parties? And remember how your "Liberal" neighbor would bait you at cocktail parties with snide remarks like, "Tell us again how those international bankers are plotting to take over Glendale"?

For those of us who recall how infuriating and frustrating all of that was, as Gabriel Heater used to declare: There's good news tonight! The good news is that Americans are catching on. Little lights are clicking on in the brains of "Liberals," Conservatives, Radicals, and Libertarians. Hallelujah, at last! And it means that we might just get out of this mess with what remains of American liberty.

Of course, it would be naïve to think that everyone who thinks seriously about political affairs is now going to see the Conspiracy and see it whole. We did not learn all we know about it in a day, and others won't either. As students of contemporary history begin to catch on to the Big Game, they will view it from the grandstand of their previous background, learning, ideology, and prejudices. For example, when a Marxist wakes up to the fact that the fix is in on international politics, he doesn't become an instant *laissez-faire* capitalist. While the virtuous will pray that he will soon become a disciple of Adam Smith, our awakening prospect will for a time continue to view the Conspiracy through the pink bifocals of Karl Marx.

The fact that the Conspiracy being run by our Establishment *Insiders* is daily more obvious to people of all sorts of ideological persuasions is a major breakthrough. And the straw which seems to have cracked the camel's clavical was the election of Jimmy Carter. The Rockefellers have manipulated the foreign policies of every American President since Franklin Roosevelt; but Mr. Carter has been so obviously a creature of David Rockefeller that many are no longer willing to deny that there is conspiracy involved.

Ironically, it may have been Watergate which caused the camel to notice the load in the first place. While readers of this magazine were made aware very early that Henry Kissinger was as much a Rockefeller entity as the Chase Manhattan Bank, most Americans were either ignorant of the fact or ignored it. When the *S.S Watergate* went down, sucking with it the entire Nixon Administration except for Henry Kissinger, a lot of people noticed. Following the Confirmation Hearings on the selection of Nelson Rockefeller to be Vice President, the connection between the gutteral, word-garbling German and the Standard Oil family began to be more widely mentioned in the media. When a new Administration from the "rival" party came down the main aisle, and it turned out that Mr. Carter was yet another confection from Standard Oil, stomachs began to turn.

Like the age of Aquarius, to aerate a simile, the dawning took a little time. Most of the mass media, being politically "Liberal," hoped that Jimmy Carter was the "Liberal" he hinted he was; many uninformed Conservatives, delighting in his antigovernment rhetoric, hoped Carter was the Conservative he also hinted he was. Your correspondent pointed out last year in a little pre-election book called *Jimmy Carter/Jimmy Carter* ('76 Press, $1.00) that this was one bandwagon that ran on Standard oil not peanut oil. But the public was not ready to listen. Soon after the election, however, as Carter began surrounding himself with Rockefeller Trilateralists, articles started to appear in a wide variety of publications on the theme you first read in these pages over a year ago.

Penthouse for September chased the story with a vengeance. The article, entitled "The Making of a President: How David Rockefeller Created Jimmy Carter," was by Robert Manning, and featured an illustration of David as the world's money pope placing a crown on the head of a kneeling, smiling

Jimmy Carter. As part of his chronological review of how Carter was moved from peanuts to President, Manning discussed David Rockefeller's founding of the Trilateral Commission, a coterie of the financial and political elite of North America, Europe, and Japan. Robert Manning tells us:

"George Franklin, North American secretary of the Trilateral Commission, told Penthouse in an interview that the Trilateral Commission 'was entirely David Rockefeller's idea originally. He was getting worried about deteriorating relations and growing competition between the U.S, Europe, and Japan.'

"Spring 1972: At the Bilderberg meeting (an exclusive semisecret group of Western corporate and political leaders that has met annually for twenty-five years to discuss global problems), Michael Blumenthal (then head of Bendix Corporation, now Secretary of the Treasury)—according to George Franklin—'thought things were in a very serious condition, and couldn't a private group bring together the industrialized countries?' According to Franklin, Blumenthal's repeating of Rockefeller's idea then drew an enthusiastic response from the next eight speakers."

Manning continues, telling us how King David chose Cartsheba. It was, he writes, "Autumn 1973: Carter and Florida Gov. Reubin Askew dine at the Tarrytown estate of David Rockefeller. Present at the dinner is Brzezinski. 'Zbig' (as he is known) later said that 'we were impressed with Carter.' Dr. Peter Bourne, Carter's deputy campaign manager, said that 'David [Rockefeller] and Zbig had both agreed that Carter was the ideal politician to build on.' "

Soon thereafter Zbigniew Brzezinski, running the Trilateral Commission for David Rockefeller, revealed the sort of Madison Avenue campaign which would be used to sell the next Rockefeller puppet to the gullible public. Thus, "October 1973: In a prophetic interview, Brzezinski said, 'The Democratic candidate in 1976 will have to emphasize work, the family, religion, and, increasingly, patriotism, if he has any desire to be elected.' "

Yes, "Carter was the ideal politician to build on." And he has acknowledged his debt to the Trilateral Commission. Manning reports, "Fall 1975: Carter's campaign autobiography, Why Not The Best?, is written. Of the Trilateral Commission, Carter wrote: 'Membership on this commission provided me with a splendid learning opportunity, and many of the other members have helped me in my study of foreign affairs.' " Ah yes. Then, "June 1976; Carter delivers his first major foreign-policy speech before the Foreign Policy Association. The speech begins: 'The time has come for us to seek a partnership between North America, Western Europe, and Japan . . . These countries already have a significant world impact, and they are prepared to play even larger global roles in shaping a new international order.' "

Noting that Jimmy Carter paid off for the Rockefeller Insiders like a slot-machine rigged to hit the jackpot, Manning of Penthouse lists seventeen top members of the Carter Administration who were moved directly into government from the elite, and very small, Trilateral Commission. The author then concludes, "Before Carter's election, his adviser Hamilton Jordan said: 'If, after the inauguration, you find Cy Vance as secretary of state and Zbigniew Brzezinski as head of national security, then I would say that we failed.' Well, perhaps Jordan feels that he's failed. But there can be no doubt today that David Rockefeller and his Trilateral Commission have succeeded in seizing control of America's foreign policy."

The Penthouse article is very straightforward and businesslike. Whether the author is a conspiratorialist of the Left or Right is not discernible from any shading of language, though the Penthouse publisher is often said to be a Libertarian. The important thing is that Penthouse has a circulation of nearly six million.

Attacking on the same theme, the September issue of Oui magazine, also with a circulation of more than a million, carried an article by Craig Karpel entitled "Who Runs Jimmy Carter?" The subtitle reads: "Imagine a Powerful International Study Group with Only the Most Limited Taste for Democracy and the Blessings and Backing of David Rockefeller."

Karpel begins his feature story quoting Jimmy Carter's acceptance speech at the Democratic National Convention, in which candidate Carter hypocritically and cynically denounced the "unholy, self-perpetuating alliances [that] have been formed between money and politics . . . a political and economic elite who have shaped decisions and never had to account for mistakes nor to suffer from injustice. When unemployment prevails, they never stand in line looking for a job. When deprivation results from a confused welfare system, they never do without food, or clothing, or a place to sleep. When the public schools are inferior or torn by strife, their children go to exclusive private schools. And when the bureaucracy is bloated and confused, the powerful always manage to discover and occupy niches of special influence and privilege."

Then Karpel points out that at the time Jimmy Carter gave that speech he was himself a member of David Rockefeller's elitist Trilateral Commission, made up of "the world's most influential and powerful bankers and businessmen." Though the delegates were ignorant of it, that was hardly the best-kept secret of the decade. In fact Craig Karpel reports: "A delegate to the Democratic National Convention attempted to deliver a speech revealing Carter's relationship to David Rockefeller, Zbigniew Brzezinski and the Trilateral Commission, but was cut off as he spoke."

Indeed he was. The speech was given by Alex Garnish of Pittsfield, Massachusetts, to nominate antibussing candidate Gary Benoit for Vice President. Your correspondent, covering the convention on assignment from American Opinion, had taken a few hours off to help Mr. Garnish write it. Which makes it very hard indeed to forget how the conventioneers jeered and hooted as Alex described in detail how the Rockefellers had all but created Jimmy Carter in order to capture the Democratic Party. Many of those same people would not hoot and jeer today.

Stopped in the middle of his carefully prepared speech and told that he must quit talking about the relationship between Carter and the Rockefellers, Alex Garnish stood embarrassed before millions of television viewers and an enormous hall full of delegates and national press. Craig Karpel comments:

If this speech had been delivered, it would have electrified the convention. It would have explained the Carter "phenomenon" to millions of voters and changed the course of a close election. For all the televised yawning about how totally orchestrated, how thoroughly predictable the Democratic Convention was, nobody could have anticipated Garnish's outpouring of disconcerting truth. But when the unexpected finally happened, when somebody actually started speaking lines that weren't in the script, the media assumed that Garnish must be a kook and a crank; they never bothered to find out what he had planned to tell his fellow delegates—let alone to determine whether his charges were true.

The major thrust of Mr. Karpel's piece strikes at a report, isued by the Trilateral Commission, which complains that many nations of the world (but especially the United States) are becoming too democratic. Conservatives, anxious that the Constitution remain preeminent in an American republic, see appeals to democracy as a means of using the mob to prepare the way for rule by the most ambitious and tyrannical crooks. What the Trilateral Commission is complaining about here, however, is that the Trilateralists are still limited in what they can do to us because of continuing widespread public support for the principles of the Constitution. Karpel informs his audience:

Jimmy Carter has presented himself to the American people as, variously, a populist, a conservative, a liberal, a born-again Christian and an aficionado of Bob Dylan. In reality, he was chosen to be President by the quasi secret coordinating council of the financial and corporate elite of the United States, Western Europe and Japan. Contrary to his public positions, Carter is expected by this council to preside over the implementation of its basic program: the reduction and limitation of democracy at home and accommodation with undemocratic [read: Communist] regimes abroad.

In 1974, the Trilateral Commission issued a report titled "The Crisis of Democracy." As quoted in Oui, this formal document begins by describing the "democratic surge of the Sixties" as follows:

"The predominant trends of that decade involved the challenging of the authority of established political, social and economic institutions, increased popular participation in and control over those institutions, a reaction against the concentration of power of Congress and of state and local government. . . . The democratic surge of the Sixties raised once again in dramatic fashion the issue of whether the pendulum had swung too far in one direction—i.e., in the direction of liberty and democracy."

The report of the Trilateral Commission concludes that the pendulum has indeed swung too far. "The vigor of democracy in the United States in the Sixties thus contributed to a democratic distemper, involving the expansion of Governmental activity on the one hand and the reduction of Governmental authority on the other hand."

Karpel notes that the Random House Dictionary defines "distemper" as: (a) . . . a specific infectious disease of young dogs . . . 2. a deranged condition of mind or body; a disorder or disease 3. disorder or disturbance, esp. of a political nature.

The Trilateralists are worried that their victims, in a "democratic distemper," might in their liberty choose to rebel against the dictatorship these Establishment Insiders are seeking to impose. The report continues:

"Finally, a government which lacks authority and which is committed to substantial domestic programs will have little ability, short of a cataclysmic crisis, to impose on its people the sacrifices which may be necessary to deal with foreign-policy problems and defense. . . .

"The implications of these potential consequences of the democratic distemper extend far beyond the United States. For a quarter century, the United States was the hegemonic power in a system of world order. The manifestations of the democratic distemper, however, have already stimulated uncertainty among allies and could well stimulate adventurism among enemies. If American citizens don't trust their Government, why should friendly foreigners? If American citizens challenge the authority of American Government, why shouldn't unfriendly governments? . . . A decline in

the governability of democracy at home means a decline in the influence of democracy abroad."

The would-be dictators are laying it out pretty straight, aren't they? Now comes the section which Craig Karpel calls "the most ominous paragraph of all," continuing:

"Al Smith once remarked," the report continues in sober Roman type, which is italicized here, *"that the only cure for the evils of democracy is more democracy.' Our analysis suggests that applying that cure at the present time could well be adding fuel to the flames. Instead some of the problems of governance in the United States today stem from an 'excess of democracy.' . . .*

". . . democracy is only one way of constituting authority, and it is not necessarily a universally applicable one. In many situations, the claims of expertise, seniority, experience and special talents may override the claims of democracy as a way of constituting authority. . . . The arenas where democratic procedures are appropriate are, in short, limited."

If the Conservative reader will substitute the term "democratic republic" for "democracy" he will understand what the Trilateral Commission is concerned about here. What concerns the money barons who put Jimmy Carter in the Oval Office is the possible limitation and reversal of the power of government over the people. And the battle is being fought chiefly in the United States, where the Commission believes growing popular resistance to federal power is likely to "undermine its authority." According to the elitist Rockefeller Insiders: "Democracy is more of a threat to itself in the United States than it is in either Europe or Japan, where there still exist residual inheritances of traditional and aristocratic [read: dictatorial and authoritarian] values. . . . In the United States, the strength of democracy poses a problem for the governability of democracy in a way which is not the case elsewhere."

The Trilateral Commission ends its report, received with enthusiasm by Trilateralist Jimmy Carter, with several recommendations of ways "to restore a more equitable relationship between governmental authority and popular control," including:

Centralized economic and social planning

Centralization of power within Congress . . .

A program . . . to lower the job expectations of those who receive a college education

Such limitations on freedom of the press as "prior restraint" of what newspapers may publish in unspecified "unusual circumstances," the assurance "to the government [of] the right and the ability to withhold information at the source," "moving promptly to reinstate the law of libel as a necessary and appropriate check upon the abuses of power by the press," and press councils enforcing "standards of professionalism," the "alternate [to which] could well be regulation by the government."

Doubtless neither Hitler nor Stalin could have proposed dictatorship in such genteel and cultured terms. And Karpel thinks the Trilats, as they call themselves, are too futuristic to be compared to old-time tyrants. He quotes an observer at the Commission's meeting in Japan in 1975 as saying: "It looked like one of those meetings of S.M.E.R.S.H. they always have in Ian Fleming movies. You know—the one where they carve up the world and say 'James Bond must die!' "

The Oui article makes no bones about the fact that David Rockefeller runs this show, and that David wants a New World Order "with the anti-Communism dropped." Craig Karpel says "Rockefeller subscribed to the view expressed by U.S. industrialist John Diebold in the fall 1973 issue of Foreign Policy in an article titled 'Multinational Corporations: Why Be Scared Of Them?' " There Diebold maintained that "the logical and eventual development [of the multinational corporations] . . . would be the end of nationality and national governments as we know them." Karpel reports: "David Rockefeller considers himself to be a citizen of the world. His bank's and his family's business interests are worldwide. . . . He does not spend any time futzing around in Albany or Washington like Nelson. To David Rockefeller, the national interests of the United States are parochial and particularistic, the sentimental pre-occupation of smaller minds than his. . . ."

Karpel theorizes that Rockefeller intends Brzezinski, first head of the Trilateral Commission and now Jimmy Carter's National Security Advisor, to be the man to institute the New World Order. Carter was picked to become the visible President so that Brzezinski could run foreign policy.

Why the unknown peanut merchant from roasting Plains? Karpel explains: "Rockefeller and Brzezinski's most important consideration was the need to induct a Presidential candidate into the foreign-policy establishment who, if elected, would be beholden to no other constituency. This ruled out such men who were considered Presidential contenders in 1973 as: Senator Edward Kennedy, . . . Senator Hubert H. Humphrey, . . . Senator Henry Jackson. . . . Carter, by contrast, had no such powerful constituency to satisfy—or to rely on. He had no backlog of political debts to pay or to collect should he be elected President. The deal was simple: All Carter had to do was promise to appoint Brzezinski to high office and give him the shot of free rein that Nixon had given Kissinger, and the entire resources of David Rockefeller's pyramid of influence would be at his disposal both in the following three years—during which it would do all in its power to get him nominated and elected—and in the ensuing eight years, during which it would help him govern. . . ."

Sounds downright Faustian, doesn't it? It is. As Craig Karpel concludes: "The first President in America's history to promise not to lie has told a whopper. Speaking on all three television networks at once, he vilified a nameless political and economic elite and castigated unholy, self-perpetuating alliances between money and politics. One is, presumably, permitted to infer that the speaker had not himself been recruited into such an elite and was not himself a member of such an alliance. Jimmy Carter's service on and sponsorship by the Trilateral Commission means that these statements are lies so bold, so shameless, so outrageous, that they shame the Presidency."

ANNUAL PUBLIC OPINION POLL RESULTS

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. ASHBROOK. Mr. Speaker, the results of my annual public opinion poll have been tabulated. Thousands of returns were received. As in past years the poll had space for two members of each household to answer the questions.

The questionnaire covered the full range of the issues facing our Nation. These included domestic policy, defense issues, and foreign policy.

In regard to the question of what is the biggest economic problem facing America today, 75 percent of those responding thought inflation is, while 19 percent thought unemployment is. To lower unemployment residents of the 17th Congressional District supported permanent tax cuts to stimulate job creation in private business (75 percent) while 35 percent favored leaving the economy alone and 9 percent were for creating more Government jobs.

Among the choices offered as answers to our energy problems, the choices of greater use of coal reserves, development of nuclear energy, solar energy development, and tax incentives for fuel-efficient cars received the strongest support.

In defense areas several questions were asked. Five percent thought the present American defense effort is too much and should be reduced; 54 percent thought it is too little and should be increased; 31 percent thought our present defense efforts are sufficient for our needs. On the issue of reinstituting the military draft there was a closer division of opinion; 49 percent favored a return to the military draft and 40 percent opposed it with 11 percent undecided or having no opinion.

Forty-three percent believe the United Nations should have no role in U.S. foreign policy while less than half as many feel it should have a more important role, 21 percent. Twenty-five percent favor the same role as during the last administration.

The move for so-called normalization of relations with Communist China at the expense of the free Chinese on Taiwan gets little support. Only 2 percent of those responding think that the United States should recognize Communist China and cut ties with the Republic of China. A large majority—63 percent—think the United States should have diplomatic relations with both Chinas while a significant minority—27 percent—do not believe the United States should grant recognition to Communist China at all.

Eighty-six percent responding opposed relinquishing control of the Panama Canal. Eighty-five percent oppose an amnesty-type program for illegal aliens.

As I have stated before, the poll is an additional good way to get constituent views in addition to meeting, letters, phone calls, and all the other means of getting people's views.

At this point I include the results of the 1977 questionnaire. The results are both interesting and informative:

1977 PUBLIC OPINION POLL OF THE 17TH DISTRICT

[Results in percent]

	Yes	No	No opinion
1. What is the biggest economic problem facing America today?			
(a) Inflation	75		
(b) Unemployment	19		6
2. To lower unemployment President Carter has urged the creation of more government jobs with tax funds. In your opinion, what is the best way for the government to fight unemployment? (Check 1.)			
(a) Create more government jobs	9		
(b) Provide permanent tax cuts to stimulate job creation in private business	45		
(c) Leave the economy alone	34		12
3. What is your opinion on the merit of each of these proposals to help solve our energy crisis?			
(a) Higher fuel taxes	8	74	18
(b) Greater use of coal reserves	86	3	11
(c) Decontrol of oil and gas	47	35	18
(d) Development of nuclear energy	76	13	11
(e) Tax incentives for manufacture of fuel-efficient cars	59	25	16
(f) Taxes on large cars	31	53	16
(g) Solar energy development	85	3	12
(h) Set aside strict environmental restrictions on coal	54	30	16
4. There are several proposals in Congress about reforming the welfare system. Which one of the following most closely parallels your views?			
(a) We should retain the present system whereby State and local governments administer the program with the Federal Government paying a large share of the cost and setting guidelines	10		
(b) We should reduce the Federal role, gradually returning the responsibilities to the State and local governments	69		
(c) We should centralize the welfare system at the national level to provide a guaranteed annual income for every family financed and administered by Federal revenues	9		12
5. In dealing with world famine and hunger, which of these policies more closely represents your opinion:			
(a) Increase American food gifts to needy nations and people	7		
(b) Establish an international money fund to which all nations can contribute for purchase of food for needy nations and people	51		
(c) When Arabs give away oil, we should give away food	32		10
6. Do you agree with President Carter's granting of a blanket pardon to all draft evaders?	13	81	6
7. Do you believe that the present American defense effort is:			
(a) Too much, should be reduced	5		
(b) Too little, should be increased	54		
(c) Sufficient for our needs	31		10
8. There has been criticism of the Volunteer Army. Do you support a return to the military draft?	49	40	11
9. The Soviet Union has implemented an intense civil defense training program for all citizens, spending some $1,000,000,000 annually. Do you think:			
(a) The U.S. must implement a comparable citizen protection program	44		
(b) Existing U.S. civil defense is adequate	28		
(c) Measures similar to the U.S.S.R.'s would be too costly for us	13		15
10. Do you believe unions should be allowed to represent members of the Armed Forces?	3	92	5
11. Should control of the Postal Service and the postal rate structure be returned to the Congress?	57	30	13
12. Do you favor the use of Federal tax dollars to help finance campaigns for the U.S. House of Representatives and the U.S. Senate?	16	77	7
13. With Andrew Young as U.S. Ambassador to the United Nations, President Carter appears to be giving the United Nations a larger role in American foreign policy. What role do you think the U.N. should have? (Check 1.)			
(a) Same role as during the last administration	25		
(b) More important role	21		
(c) No role	43		11
14. Secretary of Agriculture Bergland supports increased government target prices for agriculture. Do you think government target prices should be increased?	20	58	22
15. The Hatch Act restricts partisan political activities by Federal employees. President Carter supports legislation to allow Federal employees more participation in partisan politics. Do you favor such a change?	21	67	12
16. Do you favor a Federal land use law which would allow greater Federal control over State, local, and private land use?	5	87	8
17. Should the CIA be prohibited from conducting undercover activities in foreign countries?	9	82	9
18. What policy should the United States follow regarding China?			
(a) Recognize Communist China and cut ties with the Republic of China	2		
(b) Grant diplomatic recognition to both Chinas	63		
(c) Refuse recognition of Communist China	27		8
19. President Carter's proposals for upgrading servicemen's discharges could mean deserters would be eligible for veterans' benefits. Do you think they should be eligible to receive the same benefits as those who received honorable discharges?	2	94	4
20. An estimated 7 to 10,000,000 illegal aliens are presently in the United States. The Carter administration is considering an amnesty-type program to legalize their status. Do you agree?	8	85	7
21. The Carter administration is conducting negotiations with Panama which will probably result in relinquishing American control over the Canal. Do you think we should agree to such a treaty?	9	86	5
22. Now that Jimmy Carter has been elected President, which one of the following statements do you feel best describes the future?			
(a) Things will be better than before	19		
(b) Things will probably get worse	38		
(c) It really doesn't make much difference	30		13

IN PHILADELPHIA, PEOPLE WANT TO WORK

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. EILBERG. Mr. Speaker, just recently in Philadelphia, nearly 100 people waited all night in the rain so that they could have first chance at some 25 job openings advertised by a local company.

They demonstrated that when you look beyond the endless, faceless unemployment statistics, Mr. Speaker, the fact remains that Americans want to work.

As the following stories from the October 28 editions of the Philadelphia Daily News and the Philadelphia Bulletin indicate, a person who cannot find work goes through a traumatic experience. The costs to us as a society—and I mean social and emotional costs as well as economic costs—are dear.

They are costs we simply cannot afford, and that is why I continue to maintain that our first priority in Congress must be to find a way to put Americans to work.

ONE HUNDRED WAIT IN RAIN SEEKING 25 JOBS

(By Karen Scanlon)

Sometime yesterday word filtered out of the Keebler Co. plant, G St. and Hunting Park Ave., that applications would be taken today to fill 25 jobs.

At 10:30 last night the first of more than 100 persons began showing up at the gate leading to Keebler's personnel office. More were expected, but they'll probably have missed out if the firm does its hiring on a first-come first-employed basis.

At first the applicants leaned against the cyclone fence with its black-on-yellow sign that said, "Employee applications are being accepted at this time," which was apparently the only advertisement of the jobs.

Accepted, yes, Hired, maybe.

But even the slimmest chance of employment was something not to be overlooked by the job-eager persons who came equipped for an all-night stay.

Bertha Orawsky, 49, of 9218 N. Delaware Ave., was the first in line. She's been out of work since Dec. 24, 1975. Used to do everything from cut rubber to driving a truck, but the Uniroyal plant where she worked closed its doors and moved south.

Ms. Orawsky said she's now on welfare but wants to get off. She'd heard about the job openings from her son. She was sitting in a yellow deck chair with a shawl over her shoulders. (She and others heard the pay was about $4 an hour.)

"I need to go back to work," Bertha said. "I think everybody needs to work."

Bruce Magum, 22, of North Philadelphia, was No. 26 in line, which put him just past the cutoff point if only 25 persons were hired. Until Oct. 16 he was driving a Good Humor truck, but you don't sell much ice cream in the winter and he's back pounding the bricks.

"I got a note on my car and a young daughter to support," Magum said.

He said he arrived at the plant at 1:30 a.m. after hearing about the job from his grandfather who works there as a maintenance man.

"I'm on unemployment," Magum said. "I don't want to stay home. I want to work."

Earlier a security guard gave the persons already in line a break, and admitted them inside the gates but not in the plant. The others were told they'd have to take their chances. Some left, but the majority stayed, hoping against hope they'd be able to come away with some assurance of a job.

From inside the plant workers on the overnight shift looked out on the applicants who by now were drenched in the drizzle that fell throughout the humid night.

In a gesture completely understood by one hourly worker for another, they emptied machines inside the plant for sandwiches and coffee for those waiting for the personnel office to open.

Nos. 12 and 13 in the line were sisters, Clara Lozano, 50, of 4618 C St., and Louise Esposito, 52, of 6848 Woolston Ave. Both are old hands at looking for work, but feel they're discriminated against because of their age. Both were soaked to the skin but determined to get inside and get their names on paper.

"There's no jobs around," Louise said. "We all need work. They can't go by color or age anymore. I been outta work four years in March."

Louise said she used to work for Philco Ford but "my plant moved to Brazil. I was there from 1942 to 1974."

Clara interrupted. "See, they figure you're a little past 50, they don't hire you. They don't say it they just don't hire you."

Louise said she'd waited a month on her last job application. It was for work in a factory." I think they hired by age," Louise said.

"They showed me all around the plant when they interviewed me and I could tell, there were all young girls working there.

"I can't get work because of my age. They think you're not fast, but when you work on a conveyor belt, you're fast. I did everything (at Philco)."

Clara said she had a job as a sorter in the Roxborough store of the Salvation Army and cleared $73 a week after taxes. "I need more money," she said. "I got a $152 a month mortgage, gas and electric bills. Louise called me about this job and I came right over. If they hire me I'll be in my glory. This is like waiting for a concert ticket."

No. 10 in the line, Vincent Campbell, 20, of Penndel, Langhorn, Bucks County, answered her: "Yeah except they only got 25 tickets for sale."

Campbell has been out of work for the past three months. He had worked at the Keystone Lighting Co. in Bristol, but had been laid off.

"I graduated from the Bucks County Technical school," Campbell said, "and tried to get into the Oil Burners Trade Union. They told me they had no vacancies and I had no experience. How you gonna get experience if you can't get in the union that covers the jobs?"

Campbell said his sister Barbara, 18, told him about the jobs, and she was sleeping in the car. He was holding the No. 11 spot in the line for her.

All of them seemed to know they were bucking the odds when it came to being one of the lucky 25 hired, but all were determined to give it their best shot.

FIFTY WAIT ALL NIGHT FOR JOBS

(By Michael E. Ruane)

The sweet lure of work in a cookie factory drew more than 50 job-hungry people to a rainy night-long vigil at the gates of the Keebler Co. bakery.

"I'm freezing and I'm soaked, but jobs are hard to get," said Bertha Orawsky, 49, who was sitting at the head of a line of job seekers.

"A lot of people told me to get here early," said Mrs. Orawsky, so she arrived at 10:30 last night to await the opening of the personnel office at 8 this morning.

An esprit de corps quickly sprung up as the crowd, huddled just inside the company gates at G st. and Hunting Park ave., began to swell. The word that applications would be taken for 25 job openings had been spread by Keebler workers after a notice was posted at the company.

Mrs. Orawsky, of the 9000 block of Delaware ave., heard of the openings from her son, who works at the plant. She had been without work for 18 months and arrived at Keebler with a folding chair, a thermos of coffee and a determination to sit through the night.

Bonnie Kyle, 19, arrived an hour after Mrs. Orawsky and won sixth place in line. The mother of a 3-year-old boy, Ms. Kyle said she had been interviewed for more than 20 jobs without success. She sat on a soiled blanket, soaked to the skin, cold and determined.

"It's not right to depend on my parents, they can't afford me and my baby," she said.

Ms. Kyle said she once saw a newspaper ad for a "go-go dancer and model," but was shocked at what she found when she applied.

"It sounded fantastic, but I should have known." She said, "$500 is not enough to make me take my clothes off for anybody".

She sat reading want ads from the newspaper to while away the time.

Clara Lozano, 50, had an easy explanation for her determination to sit in the rain for nine hours in pursuit of a job.

"Look at that bill," she said, pulling her $23 gas bill from her purse. "It was only $9 during the summer."

Mrs. Lozano and her 14-year-old son have been cutting corners to save money since she was laid off about a year ago.

"We only watch TV for two hours, sometimes less, so the electric bill isn't so high," she explained.

She looked down the long line, shook her head and sighed.

"I just hope we get hired."

IN TRIBUTE TO AL KOCHMAN

HON. LEO J. RYAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. RYAN. Mr. Speaker, the head of the San Mateo County Democratic Party for the last 7 years, Mr. Al Kochman, recently passed away and I would like to take this time to say a few words about him.

Known well for his outspoken party leadership and concern for human rights, Mr. Kochman headed the San Mateo Democratic Central Committee from 1970 to 1976 as its chairman and had worked diligently for party unity through the years. He was respected by those who knew him for his integrity and unselfish contributions to making our political process one that works in the public interest.

A native of Germany, Al Kochman had lived in the San Mateo area for the past 19 years. He will be missed by many.

CONGRESSMAN WILLIAM D. FORD OF MICHIGAN SAYS VA EDUCATION PROGRAM IS A MESS. IS IT?

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. TEAGUE. Mr. Speaker, when H.R. 8701, the GI Bill Improvement Act of 1977, was being considered on the floor of the House November 3, Congressman WILLIAM D. FORD of Michigan made some remarks that I consider the first shot of a campaign to discredit GI education for veterans. I ask veterans and officials of veterans' organizations to consider his words:

> . . . (this bill) is going to be perceived by the veterans who are the age of my son as an "anti-Vietnam-era veterans" bill, and I think they are right.

The distinguished gentleman from Michigan also remarked that the Subcommittee on Postsecondary Education, of which he is chairman, is being continually asked to "clean up the mess"—meaning the education program—of the Veterans' Affairs Committee.

Vietnam-era veterans spoke eloquently for themselves when they told the Veterans' Affairs Committee they needed a 6.6 percent increase in their educational assistance allowances to meet the rise in the cost of living. That is what the bill contained. I do not know how Mr. Ford and his son arrived at their "anti-Vietnam-era veteran" conclusion. Mr. Al Poteet, Assistant Director of the Veterans of Foreign Wars Legislative Service volunteered this testimony while appearing before our committee in favor of H.R. 8701:

> I can guarantee you, Mr. Chairman, that as a Vietnam veteran who has and who is still utilizing the GI Bill, that this VA educational program is reasonable and affords veterans a golden opportunity to attain their educational objectives whatever they may be.

The American Legion with 700,000 Vietnam-era veterans in their membership supported the bill. The Veterans of Foreign Wars with 500,000 Vietnam-era veterans supported the bill as did the Disabled American Veterans with 170,000 Vietnam-era veterans. The administration of President Carter supported the bill.

I would remind the distinguished gentleman that the Committee on Veterans' Affairs has exclusive legislative jurisdiction over veterans' readjustment benefits, including educational benefits. Mr. FORD's Subcommittee on Postsecondary Education has no authority to clean up "messes" in the veterans' education program even if he were able to smell them out. However, Mr. FORD can be assured of our full attention if he has positive ideas that would benefit the VA education program. We wait to hear from him.

His nose for inept education programs is suspect, however, if he is unable to scent the one in his own quarters. The scandal-ridden, hodge-podge, jerry-built structure called "aid to higher education" that has been put together by the Department of Health, Education, and Welfare with the beneficent assistance of Mr. FORD's subcommittee, certainly smells to high heaven.

The many recent newspaper stories about the enormous rate of unpaiid student loans have been too widely circulated to require further comment from me. An article in the New York Times noted that although outlays of Federal funds in the billions are made each year to colleges and universities, "there is no unifying policy on higher education in the United States nor is there any central coordination." Eighteen medical schools, for example, have become so incensed at the Government's enchoarchments on their academic freedom that they say they will no longer accept all these funds.

Under the blessing of the Subcommittee on Postsecondary Education, the Federal Government now touches almost every aspect of acaedmic life from hirings and firings to student aid, changes in curriculum, architecture, research, and extracurricular activities. And Mr. FORD calls the GI bill education program a mess. Coming from the chairman of the Subcommittee on Postsecondary Education, that is a laugh.

It must be a laugh, Mr. Speaker, because surely the gentleman is not serious. Perhaps with too light a heart he has listened to associations that represent institutions of higher learning. They seek control of the VA education program just as others covet the VA hospital system and the VA home loan program for the

same reasons. The fact that, on balance, this cleanly administered program does its job of helping veterans get their education day-in and day-out without tumult and turmoil is a thorn in the side of those who preside over the dismal swamp and thicket they call "aid to higher education." Their purpose in talking of the veterans' program "mess," in my opinion, is to divert public attention from their own incredible ineptitude.

I trust all those who have the best interest of veterans at heart will look behind these seemingly casual remarks by Mr. FORD that slander the GI bill education program. If it were true that this is an "anti-Vietnam-era veterans' bill" as he says, it is most unusual that the organizations representing these veterans would support it. Mr. FORD alone in his condemnation of the bill.

LATE HUBERT F. LEE

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. LEVITAS. Mr. Speaker, it is a sad day for Georgia and for the Nation when Hubert F. Lee passed away. He was the editor and publisher of Dixie Business magazine, a publication which published the upbeat, encouraging news of our region.

Hubert Lee dwelled not on the catastrophes or disasters, but on that part of the human spirit which continues to build and improve. I wish to include in the RECORD today the editorial from the Atlanta Constitution in honor of Mr. Lee. We extend our condolences to the family of Hubert Lee.

The article follows:

EDITOR HUBERT LEE

The death of Hubert Floyd Lee, for 48 years the publisher of Dixie Business Magazine, is a sad occasion for his many friends in this state and region.

Lee, who was a reporter for The Constitution before beginning his magazine, became well-known through his magazine's selection and recongition of "Man of the Year" and "Man of the South," distinguished achievers from Georgia and the Southeast.

For his many friends, Lee himself was always a man of the year and of the South during his long career as an editor and publisher. His passing will be mourned.

ARMS TRANSFERS TO NORTH YEMEN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues correspondence I have had with the Secretary of State on what appears to be an expanding U.S. military relationship with the Yemen Arab Republic North Yemen. The United States has just consented to the transfer of four F–5B trainer aircraft from Saudi Arabia to Yemen and is considering a request by Yemen for the purchase of 12 F–5E aircraft.

While there may be good and valid reasons for eventually consenting to the sale of a limited number of F–5 aircraft to the Yemen Arab Republic I would hope that we do not embark on the sale of aircraft until our present, initial program to help the army has demonstrated that our military equipment sold to the Yemen and paid for by Saudi Arabia is being effectively and appropriately used and absorbed.

My correspondence with the State Department follows:

OCTOBER 27, 1977.

Hon. CYRUS R. VANCE,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: Thank you for your letter of October 20th in reply to my inquiry regarding the proposed transfer of four F–5B trainer aircraft from Saudi Arabia to the Yemen Arab Republic.

My primary concern on this issue is the apparent quickly escalating tempo of our military relationship with Yemen at a time of considerable political uncertainty throughout the Southern Red Sea, Horn of Africa region and in Yemen itself. We have only recently embarked on the first phase of a military modernization program in Yemen involving a delicate trilateral relationship between Saudi Arabia, Yemen and the United States. Most of the equipment involved in the first phase is undelivered. Yet, we are now starting a second phase involving aircraft.

The start of this new phase prior to the development or even testing of the first program seems to be rushing matters. There may be compelling political reasons for this earlier-than-expected move into an F–5 program with Yemen, but I would rather see economic and diplomatic levers used to show the needed immediate political support rather than once again relying on arms sales for an apparent quick fix.

I appreciate your asking for my views on this matter. For the moment, I wish to reserve final judgment on the possible future sale of 12 F–5 aircraft to Yemen even though I see some good arguments in favor to a modest effort to help the Yemeni air force.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., October 20, 1977.

The Honorable LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to your letter of September 26 concerning the proposed transfer of four F–5B trainer aircraft from Saudi Arabia to the Yemen Arab Republic (YAR).

As you know, our Saudi-funded military supply relationship with the YAR has, until now, concentrated on the reorganization and re-equipment of the army. The Saudis originally planned to re-equip the air force sometime after the army program was well under way because, in their view, the air force was the service most heavily influenced by the Soviets. However, from the beginning it was anticipated that Western equipment and aircraft would eventually be purchased by the YAR Air Force. The current request by Saudi Arabia to transfer the F–5B aircraft is thus consistent with the planning for the overall modernization program.

Recently the Soviet Union, in an apparent bid to regain its faltering position in the YAR, offered to supply MIG–21 aircraft. While the YAR leadership resisted the offer, the absence of up-to-date aircraft in the current YAR inventory (the YAR Air Force currently has some MIG–15s and MIG–17s) and the potential morale problems implicit in continued neglect of the air force, prompted the YAR to press the Saudis for alternative aircraft. To continue to withhold replacement aircraft could make it difficult for the current government in Sana to sustain its pro-Western orientation and force it back into its former reliance on the Soviets. Given these factors, the Saudis have shortened the timetable somewhat.

While the transfer will mark an expansion of our military supply relationship with the YAR, we believe the program serves our interests by promoting cooperation among countries opposed to an expansion of Soviet presence and Soviet influence in the region. The recent assassination of YAR President al-Hamdi has not led to a change in the pro-Western orientation of the government. Lt. Col. al-Ghashmi, the new Chairman of the Command Council and himself reportedly strongly pro-Western, has publicly stated he intends to carry on with the policies of his predecessor.

Although no commitment has yet been made, we recognize that implicit in our consent to the transfer of the F–5B is eventual favorable consideration of the sale of the F–5E. The Saudis have told us they plan to finance the purchase of 12 F–5E aircraft for the YAR. The aircraft proposed for Yemen would not have the extra capabilities the Saudi F–5E possesses (e.g., Maverick or LGB capability). Maintenance, support and funding for training would, as presently planned, be provided by Saudi Arabia.

Sale of these aircraft would be consistent with the Administration's arms transfer policy since no new or advanced systems would be introduced into the region.

The Department would appreciate your reaction to our longer term thinking. If you have any further questions, I would be happy to arrange a discussion with a knowledgeable Department official.

Sincerely,

DOUGLAS J. BENNETT, Jr.,
Assistant Secretary for Congressional Relations.

SEPTEMBER 26, 1977.

The Honorable CYRUS R. VANCE,
Secretary of State, Department of State, Washington, D.C

DEAR MR. SECRETARY: On September 20, 1977 pursuant to the provisions of Section 3 of the Arms Export Control Act you informed Congress of your intention to consent to the transfer of 4 F–5B aircraft from Saudi Arabia to the Yemen Arab Republic.

I would like to know your justification for this transfer and whether the provision of trainers means, in any way, that favorable consideration will be given to the sale of aircraft later on, and if not, why these trainers are being provided? While we have important and improving relations with Yemen and we have started a trilateral military supply relationship with Yemen to be financed by Saudi Arabia, the provision of fixed-wing aircraft and the F–5 plane, if only trainers, appears to raise significantly the threshold of our military relationship with the Yemen Arab Republic.

I appreciate your consideration of this inquiry.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., September 20, 1977.
The Honorable THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives.

DEAR MR. SPEAKER: Pursuant to the provisions of Section 3 of the Arms Export Control Act, I wish to notify you that the Department of State intends to consent to a request by the Government of Saudi Arabia for permission to transfer four F–5B aircraft to the Yemen Arab Republic (YAR).

These are two seat trainer versions of the F–5A aircraft which were produced in the United States in 1971–72 and sold to Saudi Arabia for approximately $1.4 million each under Foreign Military Sales procedures.

We have reviewed this request in light of our policy concerning the provision of U.S. defense articles, related training and other defense services to the YAR and have concluded that the United States would itself transfer these aircraft to that country. The proposed transfer is consistent with U.S. law and policy. We will obtain re-transfer assurances before granting final approval to the transfer which will occur immediately thereafter.

Sincerely,
DOUGLAS J. BENNETT, Jr.,
Assistant Secretary for Congressional Relations.

CONGRESS SHOULD BE INVOLVED IN THE ISSUE OF THE CROWN OF ST. STEPHEN

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. ASHBROOK. Mr. Speaker, on November 4 the New York Times ran a front-page story concerning the intention of this administration to return the Crown of St. Stephen to the present Communist regime in Hungary. This is not the first time that this issue has been raised and Members of Congress and private interested peoples have protested its return. Legislation was introduced in earlier Congresses as in the case of the present Congress in which legislation has again been submitted and cosponsored by a number of Members.

It would seem that the present attempt by the State Department to send back the crown sought to exclude Congress as the news of the intended move became known as Congress was about to recess for several weeks. During the year inquiries to the State Department were met with statements that there was no intention of returning the crown at this time. No sooner had Congress begun preparations to recess than the administration's intentions became known.

Plainly, full-scale hearings are in order in both the House and the Senate on this matter. Past experience has shown that this issue is controversial and that Congress should be involved.

This is not an issue which involves Hungarians alone. At the hearing before a House International Relations Subcommittee this past Wednesday testimony was presented by Mr. Stephen Koczak which gave some idea of the wide-scope interest in the crown. Mr. Koczak, a former American Foreign Service officer who was expelled from Hungary just before the trial of Cardinal Mindszenty, is well versed in the history of the crown. His testimony follows:

STATEMENT OF STEPHEN A. KOCZAK

At the outset, in appearing before this Subcommittee, I wish to endorse fully the views which other members of this Panel have expressed in opposition to the return of the Holy Crown of St. Stephen to Hungary at this time.

I should like, however, to concentrate my testimony today on other considerations which affect all Americans and the conduct of U.S. foreign policy. These comments would apply even if all Hungarian-Americans were silent today and even if there were no Hungarians left in Hungary itself.

When the evidence behind these considerations is weighed, it will be manifest that the return of the Holy Crown to Hungary now, under the conditions announced by the White House, will result in great harm to U.S. global interests, no matter what the alleged or presumed or imputed "improved U.S.-Hungarian relations."

Because of the brevity of time, I can only summarize the multiple reasons for this general global harm. As an introduction to the summary, however, I should like to ask permission to insert into the record fourteen communications which I have received—none from Hungarians—asking me to call to your attention the disastrous impact on U.S. foreign policy of this proposed action, not only in Eastern Europe but as far as the borders of India and China. They include secular and religious leaders. Among these communications from religious and secular groups are the following nationalities and religions:

NATIONALITIES

1. Bulgarian.
2. Byelorussian.
3. Cossack.
4. Croatian.
5. Georgian.
6. Polish.
7. Russian.
8. Slovak.
9. Slovenian.
10. Indian.

RELIGIONS

1. Roman Catholic.
2. Orthodox (autocephalic churches).
3. Hindu.
4. Jewish.
5. Moslem.
6. Sikh.
7. Buddhist.

Mrigendra Singh, Raja of Patiala, in his communication to me, summarized the distress of these many faiths and nations when he wrote as follows:

"The fate of the Crown is not only of grave concern to my Christian religious colleagues, especially Catholics and Orthodox of high rank, but the idea of putting a Christian spiritual relic such as the Crown of St. Stephen into non-spiritual hands has Universal ecumenical implications and ramifications to Sikhism, Islam, Judaism, Buddhism and Hinduism as well as to Christianity. For example, I feel confident that even His Holiness the Dalai Lama and the Chogyal of Sikkim would probably be saddened at the spiritual implications of such a transfer."

I should also like to insert into the record a copy of a letter, dated May 6, 1977, from Jon Speller and published in the New York Times on May 20, 1977. In that letter, Mr. Speller wrote as follows:

"It should be noted that, historically speaking, the Holy Crown of St. Stephen synthesizes elements from both Rome and Constantinople. As a religious relic of ecumenical significance to both the Latin and Greek branches of Christianity, it would seem fitting that the decision of when to return the crown to Hungary should take into consideration the views of the world's entire Roman Catholic and Eastern Orthodox Episcopates, gathered in proper ecclesiastical convocation. Toward that end it would seem to be desirable to first elicit the formal spiritual views on the question of the Holy Crown of St. Stephen of both Pope Paul VI and Ecumenical Patriarch Demetrios of Constantinople."

Finally, I should like permission to submit separately for the record a more complete statement in which I hope to shed light on the profound significance of this Holy Crown to these many different nations and many religions spread throughout the world. To them, the Holy Crown is not only a historic international symbol of national independence and of constitutional guarantees of human rights but, quintessentially, it is a relic attesting to a direct relationship between mankind and divinity.

For these reasons, for those you have heard from other witnesses on this Panel, and for the considerations cited in the messages appended to my statement, I urgently beseech you to enact H.R. 7983 in the interest of the American people and of all the nations which look to the United States for high moral values and ethical leadership.

ATTACHMENT TO STATEMENT OF STEPHEN A. KOCZAK ON H.R. 7983

There follows a list of communications from nationalities and religious groups to be placed into the record of Hearings on H.R. 7983, "Hungarian Crown of Saint Stephen Protection Act.":

1. Rt. Reverend Bishop Simeon, Bulgarian Patriarchate, American Bulgarian Eastern Orthodox Diocese of Akron, Ohio, USA, Canada and Australia.
2. Mrigendra Singh, Raja of Patiala, Old Moti Bagh Palace, Annex, Patiala, India.
3. Professor Herbert Druks, Author on Jewish and Zionist Affairs, including "Failure to Rescue", documentation of failure of Western democracies to rescue European Jews from annihilation by Nazi regime.
4. Dr. Roger Horoshko, Publisher, Byelorussian Times.
5. Konstanty Hanff, Executive Director, Free Poland Woina Polska.
6. Jerzy Mroczkowski, Editor, Polish Times Political Weekly, Winnipeg, Canada.
7. Dr. Oton Ambroz, Yugoslav Exile Group, Liberal International, London, England.
8. Tomas J. Veteska, Free Slovakia.
9. W. G. Glaskow, National Chairman, Cossack-American Citizens Committee.
10. Ante R. K. Jeric, Dalmatian Federation in the USA.
11. Nikolai Jetenov, Chairman of Organization of Russian Dissidents from the Soviet Union in the USA.
12. Gergoire Abudadze, Secretary, Georgia National Association in the USA.
13. Cathryn Dorney, Executive Director, American Education Association, New York, New York.
14. Jon Speller, Letter published on Editorial Page of New York Times, May 20, 1977.

Curriculum Vitae also appended.

STEPHEN A. KOCZAK

Born: Trenton, New Jersey, November 13, 1917.

Education: Graduate A.B. Degree, Harvard College, 1942; Certificate, Graduate Institute of International Relations, Geneva, Switzerland (1946).

Military Service: 1942–1946; 1942, drafted into Army; commissioned in Adjutant General School, Ft. Washington, Md. 1943; in

Military Intelligence and Censorship Control—German, Russian, French, Hungarian languages. Served on staff of General Eisenhower at SHAEF and with military government in Finance Division at OMGUS (Berlin) under General Clay.

1946–1966: Commissioned as Foreign Service Officer, Department of State, November 13, 1946. Political and diplomatic posts in U.S. Missions, Legations and Embassies; in Berlin, Germany on staff of Ambassador Robert Murphy (1946–1947); American Legation, Budapest (1947–1949), with Minister Seldin Chapin, where declared personna non grata by Stalinist Hungarian government allegedly for seeking overthrow of Communist State in connection with Cardinal Joseph Mindzenty trial; Bonn, Germany with High Commissioners John J. McCloy and James B. Conant (1949–1954); at American Embassy, Tel Avis, Israel (1954–1956), during first Sinai War and Hungarian Revolution; in Berlin, Germany with U.S. Mission (1959–1961) as head of East German Political Affairs Department during Berlin Crisis and erection of Berlin Wall; assignments in Department of State were with Bureau of Intelligence (1956–1957) and with Historical Office (1962–1966) working on European problems and political and strategic issues of nuclear warfare, missiles and outer space.

1966 to present: Director of Research, American Federation of Government Employees, AFL–CIO, the largest union of Federal employees representing 725,000 in exclusive recognition bargaining units. Alternate member, five-member Federal Employees Pay Council, which advises the President's Agent, under the Federal Pay Comparability Act of 1970, on setting Federal pay rates for approximately 1.5 million white collar employees and 2.5 million uniformed military personnel.

HELP FOR THE STEEL INDUSTRY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for November 9, 1977, into the CONGRESSIONAL RECORD:

HELP FOR THE STEEL INDUSTRY

What should the government do to help the steel industry? That question has forced itself onto the agenda of the Congress in the closing days of this session because steel, one of the nation's basic industries, has plunged into its worst crisis in 25 years.

Steel plants have cut back employment, steel profits have plummeted, some steel companies are sinking into the red, many steel mills are idle, and a malaise has spread throughout the industry. The basic reasons for the problems of the industry are a slack in world-wide demand for steel, an enormous surplus capacity, an influx into this country of low-priced imports, and aging and relatively inefficient plants and equipment.

Everyone agrees that there is no quick relief in sight. Japanese production costs are 15–20 percent below those of the American industry and the Japanese can sell an average mix of products in the United States at costs that are about 5 percent below those of an American producer. About one ton in five of American steel is produced in obsolete open-hearth furnaces, a process now abandoned entirely in Japan. The productivity rise in the steel industry has been lagging behind the rise in other manufacturing industries. Steel prices are up 79 percent since 1972 as against only 24 percent for other industrial prices in the same period.

The U.S. steel industry, however, is not on the edge of oblivion. Much of the industry remains competitive, especially in the Midwest where most of the new plants have been built and where demand for industrial steel remains high.

To correct its problems, the steel industry is pushing hard for several changes. It wants a more generous and quicker tax write-off for its investment in government mandated pollution and safety equipment, and shortened depreciation on its basic steel-making equipment. These changes would allow a steel company to deduct its investment immediately as a business expense.

In return for vigorous prosecution by the government of the anti-dumping laws, the steel industry has recently dropped its push for import quotas. Import quotas might bring temporary relief to the steel industry but in the long run at a high cost to everyone. Quotas might increase the quantities of steel produced in the domestic market, but they would tend to remove competition and push prices up. Import quotas would also signal that the American commitment to open trade is half-hearted, and might encourage other nations to retaliate.

The steel industry wants and the President and Congress agree that the anti-dumping laws need to be better enforced. Dumping occurs when a country sells a product more cheaply abroad than at home. In a simple case, if a shoe factory sells a pair of shoes at home for $20 and the same pair in the United States for $10, that woud be a clear case of dumping. Under present law the United States could impose a $10 anti-dumping duty on the pair of shoes. The appeal of the anti-dumping approach is undeniable, but the real question is whether it will be effective. Filing dumping complaints is a time-consuming and painstaking way to combat imports. They do, however, increase the pressure on foreign steelmakers. With tough enforcement of the anti-dumping laws, a bruising battle over steel import quotas and tough negotiations with trading partners around the world can be avoided, but it is extremely doubtful that the problems of the steel industry can be resolved by anti-dumping actions alone. Even if such action is effective in stopping imports, inflation will accelerate because lower-priced steel will be shut out from our markets and a sizeable trade collision could be brought about. In short, although anti-dumping measures may be helpful in the short term, they also raise some problems and they are not going to make the steel industry problems vanish miraculously.

I believe the government should act to give the steel industry tax incentives to allow the capital formation it needs and should begin to strongly enforce the anti-dumping laws. Because steel is so basic to America's economy, I do not rule out other types of aid for the industry, including so-called orderly marketing agreements limiting steel imports, or even changes in the anti-trust laws. Since no single factor can be identified as being responsible for the industry's difficulties, no single action by government, the steel industry or steelworkers can solve them. Whatever we do, however, should be done with care.

Clearly the time has come to abandon the traditional adversary relationship that has existed between Washington and the steel industry. The steel industry is often caught in a crossfire of policies emanating from the Environmental Protection Agency, the Labor Department and the Justice Department. Planned coordination of government policies would be a welcomed first step in any program to rescue a sagging industry.

GROWTH OF EUROCOMMUNIST PARTIES IN WESTERN EUROPE

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, November 11, 1977

Mr. DERWINSKI. Mr. Speaker, with the growth of so-called Eurocommunist parties in Western Europe, there has been a growing assumption in some quarters that the nature of communism in those nations is different. Although evidence countering such an assumption has frequently arisen, it has yet to be fully comprehended by many officials of the administration. Robert Moss, editor of the Economist's Foreign Report and author of "The Collapse of Bureaucracy" provides a much needed clarification of the nature of Eurocommunism in the summer issue of Policy Review, a publication of the The Heritage Foundation of Washington, D.C.

"Is 'Eurocommunism' different in kind from Soviet communism or merely an electoral charade played by shrewd tacticians who know that their chances of winning votes will be lessened if they are identified with the repression of Soviet dissidents or the invasion of Czechoslovakia?" To provide answers for this question, Mr. Moss examines major assertions made by those who believe that the West can coexist with Eurocommunism.

The claim that Eurocommunist parties are independent from Moscow, proves indefensible when countered by evidence that despite the repeated attacks by Moscow on the Communists of France, Italy, and Spain; and despite the anti-Soviet tone of the Western Communists' proclamations of independence, there is nonetheless a close bond between Moscow and the Communists of the West. Mr. Moss notes that the only example of polycentrism within Communist countries is China which is big enough to assert its own will—a position far from that of the Communist parties of Western Europe. Also, it is doubtful that the strong pro-Soviet fractions within the Western Communist parties will allow any serious deviation from Soviet policy.

The second claim Mr. Moss effectively counters is that NATO could live with Eurocommunism assuming Eurocommunism is independent from Moscow. By citing direct quotations from Communist leaders in Europe such as Lombardo Radice of Italy, Mr. Moss shows that if war broke out between the Soviet Union and the West, the Eurocommunists would likely take the side of the Soviets. In spite of such evidence, Secretary Vance has adopted an attitude of official ambivalence toward the advent of Eurocommunism.

Mr. Moss' points are very well taken, and are especially appropriate at this

time. Therefore, I wish to insert the following excerpt from his article. "The Specter of Eurocommunism," at this time:

THE SPECTER OF EUROCOMMUNISM

(By Robert Moss)

The visit of Chancellor Helmut Schmidt to the White House on July 13 and 14 and that of Prime Minister Giulio Andreotti on July 26 and 27 will include a "hidden agenda" according to *The New York Times* of July 12, 1977.

"At the highest level of the Carter Administration," wrote *Times* reporter Bernard Gwertzman, "officials are expressing deep concern over what they see as a political and economic deterioration in many Western countries."

The "hidden agenda" to be discussed privately includes primarily "the swing toward the left" and "the trend known as Eurocommunism", which, says *The New York Times*, has "created mixed feelings" in Washington.

There can be little doubt, that from a European standpoint (and ultimately for the interests of the West as a whole) the "trend toward Eurocommunism" is indeed serious. Let us begin with Spain which recently transformed itself into a democracy.

The results of the Spanish elections on June 15th were less than a triumph for the Communist Party (which gained only 20 seats out of 350 in the Cortes) but the Communist Party leader, Santiago Carrillo, could put a braver face on it than the leaders of the traditional right which fared even worse. The Communist Party emerged as the third largest party in a situation where party allegiances are still very fluid.

Superficially, the election results seemed to have opened the way for a two-party system in Spain, with a center-right party of government clustered around the prime minister, Adolfo Suarez, and a socialist party of opposition (the PSOE) led by Felipe Gonzalez. Could it be that, despite the Communist Party's role in Spain as the focus for secret opposition to Franco and its *avant-garde* role, since 1968, in developing a "Eurocommunist" image of independence from Moscow and tolerance towards other parties, it will now be condemned to the sidelines?

Such a conclusion would be rash. First of all, it is worth recalling that the Spanish Communist Party polled only 191,000 votes in the first legislative elections of the Spanish Republic in June, 1931—not enough to capture a single seat in parliament—and only slightly more in the elections in 1933. The Communist Party's lack of a significant electoral following did not, however, make it a negligible force when the Republic fell victim to its internal conflicts.

Second, the PSOE is a Marxist, not a social democrat, party, and has attracted the votes of many of the people who might well have voted for the CP in Italy or France. The Soviets—as well as West European Socialist parties—gave considerable encouragement to the PSOE in the run up to the elections. This was no doubt related to their distrust of Carillo's "Euro-communist" pretensions, but also to the calculation that the PSOE was the most worthwhile cause—in an electoral sense—since its foreign policy completely coincides with Soviet interests, while it has already earned the approval of Socialist governments in Europe.

Finally, the Communist Party's organized membership (it claims 150,000 members) and trade union support, steeled by the long years of underground resistance, will be a force to be reckoned with in any future political crisis: while its mastery of conspiratorial techniques is evident from the way that the party has rapidly moved to assume dominant influence over the major news magazines—and even the recently-legalized girlie magazines.

So, while it may be concluded that the net result of Spain's elections was to expose the limited popular support for the Communist Party, it does not follow that the Communist Party has suffered some irreversible setback. It can count on mobilizing union discontent in a deepening economic recession in Spain, and of continuing to try to build a broad "popular front" combining the Communist, Socialist and left-wing Christian Democrat forces. Meanwhile, the specter of Euro-communism is more immediate to the north and east: in Italy, where the Communist Party gained 34.4 percent of the votes in the elections of June 1976 and controls all the major urban centers; and in France, where recent opinion polls suggest that the Communist Party-Socialist alliance (the Union of the Left) has a chance of winning next year's legislative elections.

One of the most striking features of the advance of Communism in Southern Europe is the widespread assumption that the nature of Communism has somehow changed. The postwar leader of the French Communist Party, Maurice Thorez, coined the celebrated phrase that his party was *"pas comme les autres."* Yet when the pollsters recently asked (in a poll that appeared in *Paris-Match*) whether people thought that the Communist Party had become "a party like the others," an astonishing 43 per cent of those interviewed said yes. Only 35 per cent continued to believe that the French Communist Party was different from other parties. The rest were undecided.

Even more striking, perhaps, was the response to another question, "Would the Communist Party be favorable to press freedom?" Of those interviewed, 35 per cent thought the Communist Party would respect press freedom; only 32 per cent thought that it would not.

Has the nature of Communism changed in Western Europe? Is "Eurocommunism" different in kind from Soviet Communism or merely an electoral charade played by shrewd tacticians who know that their chances of winning votes will be lessened if they are identified with the repression of Soviet dissidents or the invasion of Czechoslovakia?

A NEW WORD IS COINED

It should not be forgotten that the word "Eurocommunism" only came into circulation in 1975, and has only started to be used by Communist Party leaders—after much initial hesitation—over the past year or so. (Carrillo recently published a book with "Eurocommunism" in the title.) One Soviet critic of "Eurocommunism," V.V. Zagladin, has suggested that the term was invented by Zbigniew Brzezinski. More probably, it is the invention of journalists: a convenient, but misleading, bit of shorthand used to describe some tendencies that seem to be common to several CPs in Western Europe, rather than a description that they initially applied to themselves.

The "Eurocommunist" parties have set out to demonstrate the following points:

1. That a Communist victory in a West European country would not mean domination from Moscow.

2. That Western Communist Parties are not responsible for the crimes of Stalinism and the contemporary treatment of dissidents within the Soviet bloc; and are capable of taking a critical attitude toward what their Soviet patrons do.

3. That Communism is compatible with political liberty and the survival of parliamentary institutions.

In pursuit of (1), the Eurocommunists have dropped one of the key phrases in the Marxist-Leninist lexicon: "proletarian internationalism," a euphemism for Soviet control of the world Communist movement.

In pursuit of (2), some Western Communist Parties make regular—but highly selective—criticisms of the Stalinist past and the Soviet present, usually on occasions when there are no Russians present.

In pursuit of (3), some Western Communist Parties have abandoned one of the key phrases from Marx, the "dictatorship of the proletariat," in the effort to imply that "socialist" revolution can be brought about by peaceful democratic means in conditions of political pluralism. It is not always observed that when Marx wrote of the "dictatorship of the proletariat," he was not discussing a political strategy, but setting out what he conceived as an historical inevitability—a stage of social and political evolution that would have to be undergone during the transition from capitalism to socialism. The house style-sheets for *L'Humanite* and *L'Unita* (the organs of the French and Italian Communist Parties) may be revised, but no genuine Marxist can abandon the underlying conception of history.

The three major Communist Parties that it is now customary to group together as "Eurocommunist" are those of Italy, France and Spain. Each is pursuing a strategy of tactical alliance with other parties, whose success will partly depend on convicting evidence of "de-Stalinization" within the Communist Party. It is equally important to note that each of these parties is also responding to recent historical events in other parts of the world which are interpreted as particularly relevant to the success or failure of Communism in these three countries. Thus it was in September–October, 1973, after the fall of Allende in Chile, that the Italian Communist Party leader, Enrico Berlinguer, mapped out his plan for a "historic compromise" between the Communist Party and the Christian Democrats. He had clearly drawn the lesson from Chile's coup that Communist Party success in Italy would hinge on drawing together a broader coalition of political forces than Allende was able to bring about.

While the Communist-Socialist alliance in France came about in 1972, it was after the defeat of Portugal's Communist Party in the fall of 1975 that Georges Marchais, the French Communist Party leader (and until then a staunch defender of the hardline Stalinist approach of Alvaro Cunhal) apparently drew the conclusion that he must take steps to avoid the possibility that his party could be similarly isolated and identified as an anti-democratic force. From that time, the French Communist Party joined the Eurocommunist chorus. The decisive event for Carrillo came earlier—in 1968, when Soviet tanks ended the "Prague spring."

The French, Italian and Spanish Communist Parties are the strongest in Western Europe. But beyond their ranks, "Eurocommunism" has not proved notably infectious.

The degree of agreement and co-ordination between Berlinguer, Marchais and Carrillo themselves should not be exaggerated. Their meetings have been bilateral, rather than trilateral, with the Italian Communist Party taking the lead—by inviting Carillo to Livorno in July, 1975 and to Rome in September, 1976, and by inviting Marchais to Rome in November, 1975 and May, 1977. The only "Eurocommunist summit" that has taken place was the meeting in Madrid on March 2–3 this year, and it was notable that Berlinguer was extremely reluctant to attend and that the conference ended with a relatively anodyne statement.

MYTHS OF EUROCOMMUNISM

Those who argue that Eurocommunism is a qualitatively new form of Communism,

shorn of some of the Leninist terrors, rather than a mere tactic for acquiring power via the ballot-box in advanced industrial democracies, derive most of their ammunition from the statements that are put out for public consumption by the Communist Party leaders themselves. Those who maintain that, whether or not Communism in Southern Europe is likely to prove different in kind from Communism elsewhere in the world, it will pose major problems for the Russians, also cite the statements of Soviet bloc leaders who attack "revisionism" and "anti-Sovietism" in the Western parties. Let us single out the major assertions that are made by those who believe that the West can live with Eurocommunism, and see whether any of them stand up:

1. "Eurocommunist parties are independent from Moscow."

Marchais declared early this year that "there cannot be, it is totally impossible that the Communist movement could again be directed from any center, whether it is an international center or a regional center." (L'Humanite, February 14, 1977). The theme is constant in recent statements from Communist Party leaders in France, Italy and Spain.

It was during the run up to the conference of European Communist Parties in East Berlin in June 1976 that the Russians began to engage in direct criticism of the Eurocommunist parties. Spanish Communist leaders like Carrillo and Manuel Azcarate had, of course, long been targets for Soviet propaganda attacks; the Russians had actually tried to cut the ground from under Carillo's feet by sponsoring rival Communist parties.

But Soviet attacks on Eurocommunism in general in late 1975 and early 1976 seemed to have been largely inspired by the new line of the French Communist Party. The Russians evidently found this harder to swallow than the attitude adopted by the Italian Communists long before. The reason may be that the Russians had always understood that the Italian Communist Party had its own path to tread. Unlike the French Communist Party, the Italian Communists began in the 1920's with the backing of a majority of the socialist movement in Italy, and the decay of the Italian of the Italian Socialist Party since 1945 has left the Italian Communist Party in the singular position where it can plausibly claim to represent the Left as a whole—in the absence of a serious Socialist rival. While the Russians have always been sensitive to criticism of their behavior towards dissidents at home, such attacks seemed to sting them more when they started to be made—however hypocritically and erratically—by Marchais and his supporters than when they came from Berlinguer.

In any event, in the months before the Berlin summit, a series of heavyweight attacks on "anti-Sovietism" (meaning any and all criticism of Soviet policy) and on "revisionist" tendencies in the Western Communist Parties appeared in the Soviet press. One such attack was that of A. Viktorov (*Pravda*, March 1, 1977). Viktorov took up an earlier critique of the concept of "arithmetic democracy"—in other words, the idea that political decisions should be taken on the basis of one man, one vote. According to Viktorov "experience has shown that it is impossible to achieve socialism in the framework of a bourgeois state, of bourgeois democracy. History offers numerous examples, the latest of them being Chile."

Russian displeasure has also been expressed indirectly—and frequently in more abusive language—by the leaders of satellite states in Eastern Europe and by hardline pro-Soviet Communists from the Third World and Portugal. Thus the Bulgarian leader, Todor Zhivkov, has been a bitter critic of Eurocommunism, while a member of the Central Committee of the Czech Communist Party wrote in *Rude Pravo* last month that Eurocommunism represents an oblique attack on genuine socialism.

Similarly, hardliners like Alvaro Cunhal from Portugal or Luis Corvalan, the Chilean Communist leader who was released from detention in exchange for Vladimir Bukovsky, have been wheeled out to criticize the errors of Eurocommunist parties.

How are we to interpret these Soviet outbursts? Are such criticisms merely a smokescreen, intended to increase the credibility of claims by Western Communist Party leaders that they are genuinely independent from Moscow?

French and Italian Communist Party leaders continue to attend closed meetings with the Soviet leaders in Moscow, although Marchais goes less frequently than before. Their tone tends to be far more moderate when they are speaking in the presence of senior Soviet officials than when they are speaking for internal consumption, while the party newspapers in both France and Italy regularly censor statements—including those of their own party secretaries—which are deemed too critical of the Soviets. Furthermore, there has been a noticeable retreat towards a more cautious position in the first half of 1977. This was evident at the Madrid meeting in March. In speeches in Budapest and Milan in January, Berlinguer praised the revolution of October, 1917, the "superiority" of the Soviet system over the West, and the "irreversibility" of socialism in the East. He also lauded the principle of "democratic centralism." On April 5th, the Italian Communist Party spokesman, Asor Rosa, declared that democratic centralism and the leading role of the Communist Party of the Soviet Union remained the bases of international communism.

But there are three simple reasons for doubting whether a Communist Party in government in Western Europe would be able to pursue policies that conflicted with basic Soviet interests. The first, quite simply, is that the debate between Moscow and the Eurocommunist parties has been, so to speak, a discussion within the church. Criticisms of the Soviet Union from Western Communist Parties involve only the internal life of the world Communist movement, and do not affect broader Soviet interests. Thus Western Communist Parties have automatically adopted the Soviet line on international crises such as the Middle East, Angola and Southern Africa. The world view of the Western Communist Parties is a manichean view of a global conflict between "socialism" and "imperialism."

Second, the only genuine example of what Togliatti was describing back in the mid-1950s as "polycentrism" is China, which is big enough and powerful enough to sustain its own version of Communism in the face of Soviet pressures.

Third, the ultra-orthodox pro-Soviet factions inside Western Communist Parties remain very strong, and unregenerate Stalinists are frequently found to have their hands on the levers of power.

Thus, even if it were possible to believe that a leader like Marchais is sincere in what he now says, it remains very doubtful whether the structures of his own party—and the existence of clandestine networks of Soviet agents responsible to the International Department of the Central Committee of the Communist Party of the Soviet Union—would allow him to do anything that ran seriously counter to Soviet policy.*

The fact that the Chinese are publicly skeptical about the credentials of Eurocommunist parties is revealing, since leading figures in the Italian Communist Party have called for a detente between Russia and China. However, the Chinese have not failed to notice that leading advocates of this approach—such as Alberto Jacoviello—have had their wings clipped by the Party. Their primary concern appears to be that the victory of Western Communist Parties would undermine NATO's defenses, and so strengthen the Soviet Union in its conflict with China.

2. "If Eurocommunism is independent from Moscow, NATO could live with it."

It is often argued, by those who maintain that there is some real difference of kind between Western and Soviet Communism, that the election of a Communist Party to government in Paris or Rome could create more headaches for the Russians than for the West. The argument is that this would have a contagious effect on Eastern Europe, encouraging new attempts to produce "socialism with a human face."

Secretary of State Cyrus Vance has employed this argument in what must be taken as the definitive attitude of the Carter administration (at least to date) on Eurocommunism. Speaking recently in the rambling prose style—interspersed with the calculated naivete which seems to be the mark of the new American government—Mr. Vance thought out loud using the following phrases from the *U.S. State Department Stock Phrase Book* (Washington, D.C. 1977).

"We have said that in dealing with our Western allies on vital issues we would prefer to be dealing with countries who have the same fundamental values, the same democratic concerns that we have, and if the Communists were to take a dominant role in those governments, that could present serious problems insofar as we are concerned. We have gone on to say that we think the question, the political question of whether or not Communists should or should not play a part in the government of a particular country is a political issue to be decided by the people of that country and one in which we should not interfere. However, at the same time I say again that does not mean we are indifferent to the fact that they may."

He added that it "is a possibility" that Communists in NATO governments would lead to new problems for the Soviets, possibly outweighing any difficulties endured by the West. He concluded in *Il Tempo*, incisively with the sentence: "I think it depends on how Eurocommunism develops."

---

*A newly-published essay for the London-based Foreign Affairs Research Institute by Mr. Ronald Waring is skeptical indeed (and with reasons) of a "change-of-heart" on the part of Europe's Communists. Mr. Waring in his article, entitled "Eurocommunism and Italy," notes that: "It is inconceivable that Moscow could permit a new form of Communist heresy which would be so immensely attractive to the peoples of the Eastern European countries such as Rumania, Hungary and Poland, not to mention to the Russian people themselves. Both Russian imperialism and international Communism themselves would be in mortal danger. Moscow has already attacked Carrillo for splitting Communism by supporting the concept of Eurocommunism, but this condemnation is a tactic to give greater credence to the acceptable "independence" of Eurocomunism and it is worth noting that La Passionara—a creature of the Soviets if ever there was one—voted for Carrillo. The Soviet Union would have the military force to crush such a dangerous situation should it arise, and could easily be called in by a hard core within the Party, after the overthrow of Berlinguer and his adherents, to restore order in the interests of "proletarian internationalism" and the upholding of the Brezhnev Doctrine."

This possibility should not be hastily ruled out. However, it is equally true that the more attractive and independent Communism in one Western country is made to appear, the more likely it is to take root somewhere else. The domino effect of a Communist electoral victory in Paris would be felt in Rome more quickly than in Prague or Warsaw.

The key question for NATO remains: which side would the Eurocommunists take if war broke out between the Soviet Union and the West? The question was put to Lucio Lombardo Radice in a revealing interview in *Encounter*, published in its May, 1977 issue. In the original tape-recorded version of the interview, Radice said "we would choose the Soviet side, of course, and we would do so on grounds of principle. . . ." In the edited version of the interview, the passage was altered at Radice's request to read as follows: "It depends. If there is an imperialist aggression with the avowed objective of rolling back socialism, we would feel entirely absolved of any obligation of loyalty to the defensive character of NATO and take the side of the Soviet Union." Whichever version is deemed more authentic, it is plain that in a war between "socialists" and "imperialists," the Italian Communist Party would find it hard to stand with the "imperialists."

3. "Eurocommunists will respect the rules of the Democratic game."

Assurances from Western Communist Parties that their brand of Communism has become compatible with political liberty would be more plausible if they did not totally subscribe to the doctrine of democratic centralism—which means that all key decisions are taken at the top, and that as soon as the background discussion has taken place, no differences of opinion will be tolerated. In short, while Western Communist Parties attack the historical errors of Stalinism in Russia, they continue to practice Stalinism within their own parties.

The supposedly "liberal" Italian Communist Party, for instance, gave an assurance at its conference in Bologna in February, 1969, that it would tolerate internal differences of opinion. Later that year, after a Stalinist-style show trial, it exiled the supporters of *Il Manifesto*, a magazine of New Left tendencies, for exceeding the "tolerable" limits of dissent. If Eurocommunist parties cannot tolerate differences of opinion within their own ranks, how is it possible to believe that they will allow political freedom for rival parties if they manage to take power?

The typical reply from Eurocommunist leaders to the question—would they be prepared to bow out peacefully if they lost their popular support?—is that such a situation is impossible to imagine. Thus Lombardo Radice said: "once the working class has acquired hegemony . . . it would be difficult to envisage anyone wanting a regression from a better state of society to a worse state." In the same interview, he allowed that "it is in the logic of our policy" that the Italian Communist Party should give up power if it suffered a defeat under the democratic system.

However, his comments on the Soviet intervention in Budapest in 1956 do not encourage confidence that this would happen, and raise the specter of the ultimate instrument that a Communist government in Western Europe could employ to maintain itself in power: the Red Army. Radice admitted that he was in favor of Soviet action in Hungary because "Socialism in Hungary was a weak plant, only some seven years old, and there was danger of a regression to capitalism . . . socialism was as yet without roots, therefore the roots had to be protected." Is it impossible to conceive of a Communist Government in Rome several years hence appealing to the Russians to defend it against the dangers of "a regression to capitalism"?

So how should we interpret statements like Marchias' declaration last year that the "there is no democracy and liberty if there is no pluralism of political parties, if there is no freedom of speech"? (He added that "we have a disagreement with the Communist Party of the Soviet Union about this problem.")

A helpful guide is Lenin, who wrote, in a notorious letter to Chicherin, that "to tell the truth is a bourgeois prejudice. On the other hand a lie is often justified by our ends." There is further evidence for thinking that pluralism would not last long under a Communist government in Paris or Rome. Look at the way the French and Italian Communist Parties deal with the press.

The Italian Communists have been trying to silence a television station that is outspoken in its criticism of them, Tele-Monte-Carlo, under Clause 40 of the recent law on Italian broadcasting, which seeks to restrict material transmitted to Italy from abroad. Tele-Monte-Carlo broadcasts an Italian service with a special news program produced by Indro Montanelli, the distinguished conservative journalist and cofounder of *Il Giornale Nuovo*, the Milan newspaper which has systematically exposed the inside workings of the Italian Communist Party. (Montanelli was shot in the legs by terrorists of the "Red Brigades" on June 2nd.) In their communique, they denounced him as "a servant of the bourgeois State and the multi-national companies."

Tele-Monte-Carlo has been a tremendous popular success in Northern Italy, as an alternative to the increasing left-wing bias of the State television network inside the country. So it is no real surprise that the Communist Party, which noticed no illegality about broadcasts from Yugoslavia and Switzerland to Italy, should now be seeking a pretext to gag a formidable critic.

In the case of the French Communist Party, it is even clear that its attitude to press freedom will be based on its ancient philosophy that the truth is what it is expedient to say. When Costa-Gavras' film about the Prague show trials, *L'Aveu*, was first screened, it was attacked by *L'Humanite* as the "exploitation of a bad cause." The film touched a sensitive nerve, not least because it was not forgotten that the French Communist Party forwarded material on members of the International Brigade who had fought in the Spanish Civil War to Prague, to help in preparing the case against Slansky and others.

When *L'Aveu* was screened on French television last December, Jean Panapa, one of the most pro-Soviet figures in the party leadership, joined a panel to discuss it. He tried to absolve the French Communist Party from the charge that it had tried to cover up the crime of Stalinism by pleading ignorance. "If we had only known," he said, "we would have shouted our indignation."

Within a few days, however, Kanapa's argument of ignorance was demolished by the appearance of a two-part article in *Le Monde* by a Communist Party historian, Jean Ellenstein. He revealed that the French delegation at the 20th Congress of the CPSU, when Khruschev gave his celebrated "secret speech" denouncing Stalin, had been shown the text of the speech the morning after—but decided not to make public what it contained: Communist Party spokesmen, including Kanapa, had always denied that this had happened.

A *gauchiste* weekly, *Politique Hebdo*, followed up by publishing the personal reminiscences of an ex-member of the Communist Party's Central Committee, Jean Pronteau, who had traveled to Warsaw shortly after the 20th Congress. He was also shown a copy of the Khruschev speech. On his return he went to see Maurice Thorez, the leader of the French Party. Pronteau promptly opened his briefcase and began to read from the text he had brought back from Warsaw. Thorez's response was a classic, "Alright then. You've got it. You could have said so right from the beginning. But remember one thing, this secret speech does not exist."

If the French Communist Party goes to such lengths to conceal the past, would it really be prepared to allow frank discussion of the present if it gained a position of power?

But there is a still broader reason for believing that "Eurocommunism"—like any brand of Marxism-Leninism—is incompatible with the survival of political liberties. The radical changes in economic and social structures that the Communists propose to bring about are not only designed to be irreversible, but are incompatible with political pluralism.

A final cautionary note is that, for every reassurance that a Western Communist Party leader makes about guarantees for political pluralism under a future popular front, it is possible to dredge up a dozen or more from the recent past that say precisely the opposite. One example will have to suffice. It is from George Marchais, in *L'Humanite* on December 23, 1970: "We do not believe that the struggle for socialism should be inspired by the system of alternative government (*politique d'alternance*) that, as in England, allows the Conservatives and the Socialists to take turns in power to inflict the worst possible injuries on the workers."

HOUSE OF REPRESENTATIVES—*Tuesday, November 15, 1977*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Set your troubled hearts at rest. Trust in God always.—John 14: 1 (N.E.B.).

O God, our Father, in the quiet of this moment we turn to Thee praying for ourselves, for our loved ones, for our country, and for all Thy children. Comfort those who mourn. heal the sick, help the needy, encourage the discouraged. Give light to those who sit in darkness, love to those whose hearts are bitter, and life to those who have missed the way. To us give wisdom, courage, and strength and above all a consciousness of Thy presence that as we live this day we may have the feeling that Thou art with us. In the spirit of Him who is the way, the truth, and the life we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

DISPENSING WITH CALL OF PRIVATE CALENDAR TODAY

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the call of the Private Calendar today may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

CONFERENCE REPORT ON H.R. 7, ELEMENTARY AND SECONDARY CAREER EDUCATION ACT OF 1977

Mr. PERKINS submitted the following conference report and statement on the bill (H.R. 7) to authorize a career education program for elementary and secondary schools, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95-816)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7) to authorize a career education program for elementary and secondary schools, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

That this Act may be cited as the "Career Education Incentive Act".

DECLARATIONS

SEC. 2. The Congress declares that—

(1) a major purpose of education is to prepare every individual for a career suitable to that individual's preference,

(2) career education should be an integral part of the Nation's educational process which serves as preparation for work,

(3) career education holds promise of improving the quality of education and opening career opportunities for all students by relating education to their life aspirations, and

(4) educational agencies and institutions (including agencies and institutions of elementary and secondary education, higher education, adult education, employment training and retraining, and vocational education) should make every effort to fulfill that purpose.

PURPOSE

SEC. 3. In recognition of the prime importance of work in our society and in recognition of the role that the schools play in the lives of all Americans, it is the purpose of this Act to assist States and local educational agencies and institutions of postsecondary education, including collaborative arrangements with the appropriate agencies and organizations, in making education as preparation for work, and as a means of relating work values to other life roles and choices (such as family life), a major goal of all who teach and all who learn by increasing the emphasis they place on career awareness, exploration, decisionmaking, and planning, and to do so in a manner which will promote equal opportunity in making career choices through the elimination of bias and stereotyping in such activities, including bias and stereotyping on account of race, sex, age, economic status, or handicap.

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. (a) Subject to the provisions of subsections (b) and (c), there are authorized to be appropriated $50,000,000 for fiscal year 1979, $100,000,000 for fiscal year 1980, $100,000,000 for fiscal year 1981, $50,000,000 for fiscal year 1982, and $25,000,000 for fiscal year 1983 to carry out the provisions of this Act, other than section 11 of this Act.

(b) No funds are authorized to be appropriated pursuant to subsection (a) for any fiscal year beginning after September 30, 1979, unless an appropriation was made for the immediately preceding fiscal year.

(c) No funds are authorized to be appropriated pursuant to subsection (a) for any fiscal year beginning after September 30, 1979, unless such funds are appropriated in the fiscal year prior to the fiscal year in which such funds will be obligated, and unless such funds are made available for expenditure to the States prior to the beginning of such fiscal year.

ALLOTMENTS

SEC. 5. (a) (1) From the funds appropriated pursuant to section 4 for each fiscal year which are not reserved under paragraph (2) of this subsection, the Commissioner shall allot to each State an amount which bears the same ratio to such funds as such State's population aged five to eighteen, inclusive, bears to the total population, aged five to eighteen, inclusive, of all the States, except that no State shall be allotted from such funds for each fiscal year an amount less than $125,000.

(2) From the remainder of the funds appropriated pursuant to section 4 for each fiscal year, the Commissioner may reserve—

(A) an amount not to exceed 5 per centum each year for the administration of this Act and for making model program grants pursuant to section 10,

(B) an amount not to exceed 1 per centum each year for the purpose of carrying out the information program pursuant to section 12 of this Act,

(C) an amount not to exceed one-half of one per centum each year for the purpose of carrying out a national evaluation of the effectiveness of programs assisted under this Act in carrying out the purposes of this Act, and

(D) an amount equal to 1 per centum for the purpose of making payments to the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands in furtherance of the purposes of this Act.

(b) (1) Any funds allotted to a State under paragraph (1) of subsection (a) for which a State has not applied or for which a State application has not been approved shall be reallotted by ratably increasing the allocations of each of the States which have approved applications.

(2) If the sums appropriated for any fiscal year are not sufficient to make the allotments of the minimum amounts specified in paragraph (1) of subsection (a), such minimum amounts shall be ratably reduced. If additional sums become available during a fiscal year for which such allotments were reduced such allotments shall be increased on the same basis as they were reduced.

(c) Notwithstanding any other provision of this Act, any State which receives, in any fiscal year, the minimum allotment prescribed under paragraph (1) of subsection (a) of this section does not have to comply with the provisions of section 6(6) relating to staff employed at the State level.

APPLICATIONS

SEC. 6. Every State desiring to receive funds appropriated under section 4 for fiscal year 1979 shall submit to the Commissioner an application containing assurances that—

(1) the State educational agency will be the agency responsible for planning the use, and administering the expenditure, of funds received under this Act, other than funds made available under sections 10, 11, and 12;

(2) the State legislature and the Governor have been notified of the State's application for such funds;

(3) (A) the State will expend, from its own sources, for any fiscal year for which funds are received under this Act, an amount equal to or exceeding the amount which such State expended for career education during the fiscal year preceding the fiscal year for which the determination is made;

(B) the State will pay from non-Federal sources the non-Federal share of the costs of carrying out the State plan for fiscal year 1980 and for each of the three succeeding fiscal years;

(4) the State will make every possible effort to integrate career education into the regular education programs offered in elementary and secondary schools in the State;

(5) (A) the State educational agency will require that programs of career education assisted under this Act will be administered by State and local educational agencies in such a manner as to affect all instructional programs in elementary and secondary education, and will not be administered solely as a part of the vocational education program;

(B) the State educational agency will require that programs of career education will be coordinated by an individual having prior experience in the field of career education (who shall be designated as a State coordinator of career education);

(6) such agency will employ such staff as are necessary to provide for the administration of this Act and programs of career education funded under this Act, including a person or persons experienced with respect to problems of discrimination in the labor market and stereotyping affecting career education, including bias and stereotyping on account of race, sex, age, economic status, or handicap, and including at least one professional trained in guidance and counseling who shall work jointly in the office of the principal staff person responsible for such administration and coordination and in the office of the State educational agency responsible for guidance and counseling, if any such office exists;

(7) such agency will continuously review the plan submitted under section 7 and will submit such amendments thereto as may be deemed appropriate in response to such agency's experience with the program;

(8) the State educational agency will comply with the provisions of section 9(b) with respect to the distribution of funds to local educational agencies within the State;

(9) the State educational agency will not allocate payments under this Act among local educational agencies within the State on the basis of per capita enrollment or through matching of local expenditures on a uniform percentage basis, or deny funds to any local educational agency if the applicable jurisdiction in which such agency is located is making a reasonable tax effort solely because such agency is unable to pay the non-Federal share of the costs of programs assisted under this Act;

(10) not less than 15 per centum of that portion of a State's grant for any fiscal year which is not reserved pursuant to section 9 (b) will be used for programs described in section 8(a) (3) (B); and

(11) the funds received under this Act will be used in accordance with the provisions of section 8.

STATE PLANS

SEC. 7. Every State desiring to receive funds appropriated pursuant to section 4 shall submit to the Commissioner by July 1, 1979, a State plan which shall—

(1) set out explicitly the objectives the State will seek to achieve by the end of each of the fiscal years for which funds are made available under this Act in implementing the goal of providing career education for students in elementary and secondary schools within the State, with special emphasis on overcoming sex bias and stereotyping, and set out the methods by which the State will seek each year to achieve such objectives with all resources available;

(2) describe the methods by which the funds received under this Act will be used, in accordance with section 8, to implement the overall objectives in each of the fiscal years for which funds are made available under this Act;

(3) set forth policies and procedures which the State will follow to assure equal access of all students (including the handicapped and members of both sexes) to career education programs carried out under the State plan;

(4) provide adequate assurance that the requirements of section 6 will be met in each fiscal year after fiscal year 1979; and

(5) provide proposed criteria to the Commissioner for the evaluation of the extent to which the State will achieve the objectives set out in the State plan.

USE OF FUNDS

SEC. 8. (a) Subject to the provisions of sections 9(b) and 10, funds received under this Act may be used only to pay the Federal share of the total costs of—

(1) employing such additional State educational agency personnel as may be required for the administration and coordination of programs assisted under this Act;

(2) providing State leadership for career education, either directly or through arrangements with public agencies and private organizations (including institutions of higher education), in—

(A) conducting inservice institutes for educational personnel;

(B) training local career education coordinators;

(C) collecting, evaluating, and disseminating career education materials on an intrastate and interstate basis with special emphasis on overcoming sex bias and stereotyping;

(D) conducting statewide needs assessment and evaluation studies;

(E) conducting statewide career education leadership conferences;

(F) engaging in collaborative relationships with other agencies of State government and with public agencies and private organizations representing business, labor, industry and the professions and organizations representing the handicapped, minority groups, women, and older Americans; and

(G) promoting the adaptation of teacher-training curricula to the concept of career education by institutions of higher education located in the State;

(3) making payments to local educational agencies for comprehensive programs including—

(A) instilling career education concepts and approaches in the classroom;

(B) developing and implementing comprehensive career guidance, counseling, placement, and followup services utilizing counselors, teachers, parents, and community resource personnel;

(C) developing and implementing collaborative relationships with organizations representing the handicapped, minority groups, and women and with all other elements of the community, including the use of personnel from such organizations and the community as resource persons in schools and for student field trips into that community;

(D) developing and implementing work experiences for students whose primary purpose is career exploration, if such work experiences are related to existing or potential career opportunities and do not displace other workers who perform such work;

(E) employing coordinators of career education in local educational agencies or in combinations of such agencies (but not the individual school building level);

(F) training of local career education coordinators;

(G) providing inservice education for educational personnel, especially teachers, counselors, and school administrators, designed to help such personnel to understand career education, to acquire competencies in the field of career education and to acquaint such personnel with the changing work patterns of men and women, ways of overcoming sex stereotyping in career education, and ways of assisting women and men to broaden their career horizons;

(H) conducting institutes for members of boards of local educational agencies, community leaders, and parents concerning the nature and goals of career education;

(I) purchasing instructional materials and supplies for career educational activities;

(J) establishing and operating community career education councils;

(K) establishing and operating career education resource centers serving both students and the general public;

(L) adopting, reviewing, and revising local plans for coordinating the implementation of the comprehensive program; and

(M) conducting needs assessments and evaluations; and

(4) reviewing and revising the State plan.

(b) The State shall make payments to local educational agencies for the purposes described in paragraph (3) of subsection (a) from funds received under this Act upon applications approved by the State educational agency. Such payments shall, to the extent practicable, be made on an equitable basis in accordance with criteria established by the State educational agency, consistent with section 6(9), having due regard for the special needs of local educational agencies serving areas of high incidence and prevalence of youth and adult unemployment, serving sparsely populated areas or serving relatively few students.

(c)(1) To the extent consistent with the number of children enrolled in private nonprofit elementary and secondary schools within the State, with respect to services described under paragraph (2) of subsection (a), and within the school district, with respect to payments made to a local educational agency for the purposes described in paragraph (3) of such subsection, after consultation with appropriate private school officials, provision shall be made for the effective participation on an equitable basis of such children and the teachers of such children in such services and in programs assisted with such payments.

(2)(A) The control of funds provided under this Act and title to materials and equipment therewith shall be in a public agency for the uses and purposes provided in this Act, and a public agency shall administer such funds and property.

(B) The provisions of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, an association, agency, or corporation who or which in the provision of such services is independent of such private school and of any religious organization, and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this Act to accommodate students and teachers in nonprofit public schools shall not be commingled with State or local funds.

PAYMENTS

SEC. 9. (a)(1) The Commissioner, upon receipt of an application of assurances for fiscal year 1979 which the Commissioner finds to be in compliance with section 6, and upon finding the State to be in compliance with sections 7 and 8 for fiscal years 1980 and 1981, shall pay to the State the amount which it is entitled to receive for each such year under this Act.

(2) The Commissioner, upon finding the State to be in compliance with sections 7 and 8 for fiscal years 1982 and 1983 by reviewing the report required to be submitted by the State under section 14 for fiscal years 1980 and 1981, respectively, shall pay to the State the amount which it is entitled to receive for each of the fiscal years 1982 and 1983 under this Act reduced in proportion to the extent to which the Commissioner determines that such State has substantially failed to achieve the objectives for fiscal years 1980 and 1981 set forth in its State plan.

(b) Any State receiving funds appropriated under section 4 of this Act may reserve (1) not more than 10 per centum of such funds for State leadership purposes described in paragraph (2) of section 8(a), and (2) not more than 10 per centum of such funds appropriated for the fiscal year 1979, and not more than 5 per centum of the funds appropriated for succeeding fiscal years, for the purposes described in paragraphs (1) and (4) of section 8(a). The remainder of such funds shall be distributed by the State to local educational agencies within that State for the purposes described in paragraph (3) of section 8(a).

(c)(1) For the purposes of paying the cost of employing State career education coordinators and staff described in paragraph (1) of section 8(a), the Federal share of the payments made under this Act from a State's allotment shall be not more than 100 per centum for the fiscal year 1979, not more than 75 per centum for the fiscal year 1980 and not more than 50 per centum for the fiscal years 1981, 1982, and 1983.

(2) For the purposes described in paragraphs (2) and (3) of section 8(a), the Federal share of the payments made under this Act from a State's allotment shall be not more than 100 per centum for the fiscal years 1979 and 1980, not more than 75 per centum for the fiscal year 1981, not more than 50 per centum for the fiscal year 1982, and not more than 25 per centum for the fiscal year 1983.

(d)(1) If a State is prohibited by law from providing for the participation in programs of children enrolled in private nonprofit elementary and secondary schools, as required by section 8(c), the Commissioner may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of that section.

(2) If the Commissioner determines that a State or a local educational agency has substantially failed to provide for the participation on an equitable basis of children enrolled in private nonprofit elementary and secondary schools as required by section 8(c), the Commissioner may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of that section.

MODEL PROGRAMS

SEC. 10. (a) From funds reserved under section 5(a)(2)(A) of this Act, the Commissioner is authorized to make grants directly

to State and local educational agencies, institutions of postsecondary education, and other nonprofit agencies and organizations to support projects, including projects of proven effectiveness, to demonstrate the most effective methods and techniques in career education and to develop exemplary career education models particularly projects designed to eliminate bias and stereotyping on account of race, sex, age, economic status, or handicap.

(b) Notwithstanding any other provision of law, no funds may be made available under the provisions of section 406(f)(1) of the Education Amendments of 1974 for grants or contracts with local educational agencies for any fiscal year in which funds are appropriated under this Act and reserved for the purposes of this section under section 5(a)(2)(A).

POSTSECONDARY EDUCATIONAL DEMONSTRATION PROJECTS

SEC. 11. (a) The Commissioner is authorized to arrange by way of grant, contract, or other arrangement with institutions of higher education, public agencies and nonprofit private organizations for the conduct of postsecondary educational career demonstration projects which—

(1) may have national significance or be of special value in promoting the field of career education in postsecondary educational programs,

(2) have unusual promise of promoting postsecondary career guidance and counseling programs, particularly postsecondary guidance and counseling programs designed to overcome bias and stereotyping on account of race, sex, age, economic status, or handicap, or

(3) show promise of strengthening career guidance, counseling, placement, and follow-up services.

(b) The Commissioner shall approve arrangements under subsection (a) of this section if he finds—

(1) that the funds for which assistance is sought will be used for one of the purposes set forth in subsection (a) of this section, and

(2) that effective procedures, including objective measurements, will be adopted for evaluating at least annually the effectiveness of the project.

(c) For the purpose of carrying out the provisions of this section there is authorized to be appropriated $15,000,000 for the fiscal year 1979 and for each fiscal year ending prior to October 1, 1983.

(d) Notwithstanding any other provision of law, no funds may be made available under the provisions of section 406(f)(1) of the Education Amendments of 1974 for grants or contracts with institutions of higher education for any fiscal year in which funds are appropriated pursuant to subsection (c) of this section.

CAREER EDUCATION INFORMATION

SEC. 12. (a) In consultation with members of the National Occupational Information Coordinating Committee, the Commissioner shall examine the occupational information needs of individuals and organizations eligible for participation in programs assisted by this Act. The examination shall consider the present activities of the National Occupational Information Coordinating Committee, the State Occupational Information Coordinating Committees, and other occupational information activities of the Office of Education, the National Institute of Education, the Bureau of Labor Statistics, the Employment and Training Administration, and such other Federal agencies as the Commissioner deems appropriate. Upon the conclusion of the examination, the Commissioner shall, either directly or by way of grant, contract or other arrangement, furnish information to interested parties on Federal programs which gather, analyze and disseminate occupational and career information.

(b) The Commissioner shall, either directly or by way of grant, contract or other arrangement, disseminate information to interested parties on exemplary career education programs, including but not limited to programs assisted under this Act.

ADMINISTRATION

SEC. 13. (a)(1) The Office of Career Education created pursuant to section 406 of the Education Amendments of 1974 shall be the administering agency within the Office of Education for the review of the State plans, applications, and reports submitted pursuant to this Act. In addition, the Office of Career Education shall perform a national leadership role in furthering the purposes of this Act.

(2) The Office of Career Education shall, upon request, provide technical assistance to all participating State educational agencies and to Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

(b) The National Advisory Council on Career Education created pursuant to section 406 of the Education Amendments of 1974 shall perform the same functions with respect to the programs authorized under this Act as the Council is authorized to perform with respect to the programs authorized under that section.

(c) Nothing in this Act shall be construed to prohibit the National Institute of Education from continuing to carry out its functions in the field of career education. The Assistant Secretary of Health, Education, and Welfare for Education shall assure such cooperation as the Assistant Secretary deems appropriate between the Office of Education and the Institute to identify research and development priorities and, either directly or through arrangements with public agencies and private organizations (including institutions of higher education), to disseminate the results of the research and development undertaken by the Institute.

(d) The Office of Education shall provide the Office of Career Education and the National Advisory Council on Career Education with sufficient staff and resources required to carry out their responsibilities under this Act and under section 406 of the Education Amendments of 1974.

(e) Section 406(g)(1)(B) of the Education Amendments of 1974 is amended to read as follows:

"(B) not less than fifteen public members broadly representative of the fields of education, guidance, and counseling, the arts, the humanities, the sciences, community services, business and industry, and the general public, including (i) members of organizations of handicapped persons, minority groups knowledgeable with respect to discrimination in employment and stereotyping affecting career choices, and women who are knowledgeable with respect to sex discrimination and stereotyping, and (ii) not less than two members who shall be representative of labor and of business, respectively.".

REPORTS

SEC. 14. (a) Unless the Commissioner finds the requirements of this subsection unnecessary, not later than December 31 of each fiscal year each State receiving funds under this Act shall submit to the Commissioner a report evaluating the programs assisted with funds provided under this Act for the preceding fiscal year. Such report shall include—

(1) an analysis of the extent to which the objectives set out in the State plan submitted pursuant to section 6 have been fulfilled during that preceding fiscal year;

(2) a description of the extent to which the State and local educational agencies within the State are using State and local resources to implement these objectives and a description of the extent to which funds received under this Act have been used to achieve these objectives; and

(3) a description of the exemplary programs funded within the State, including an analysis of the reasons for their success, and a description of the programs which were not successful within the State, including an analysis of the reasons for their failure.

(b) The Commissioner, through the Office of Career Education, shall analyze each one of the State reports submitted pursuant to subsection (a) and shall provide to the State not later than three months after the date of such submission an analysis of the report and recommendations for improvement in the operation and administration of programs being provided by the State with funds made available under this Act.

(c) The Commissioner shall conduct a comprehensive review of a random sample of the State programs funded under this Act and shall submit a report on such review to the Committee on Education and Labor of the House of Representatives and the Committee on Human Resources of the Senate by no later than September 30, 1982.

DEFINITIONS

SEC. 15. For purposes of this Act the term—

(1)(A) "career education", for the purposes of this Act, except for paragraphs (2) and (3) of section 8(a), and sections 8(b), 8(c), 9, 10, and 11, means the totality of experiences, which are designed to be free of bias and stereotyping (including bias or stereotyping on account of race, sex, age, economic status, or handicap), through which one learns about, and prepares to engage in, work as part of his or her way of living, and through which he or she relates work values to other life roles and choices (such as family life);

(B) "career education", for purposes of paragraphs (2) and (3) of section 8(a), and sections 8(b), 8(c), 9, 10, and 11, shall be limited to activities involving career awareness, exploration, decisionmaking, and planning, which activities are free of or are designed to eliminate bias and stereotyping (including bias or stereotyping on account of race, sex, age, economic status, or handicap), and shall not include any activities carried out by such agencies involving specific job skill training;

(2) "Commissioner" means the Commissioner of Education;

(3) "handicapped" means mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, orthopedically impaired, or other health impaired persons, or persons with specific learning disabilities who by reason thereof require special education and related services;

(4) "local educational agency" has the meaning given such term by section 801(f) of the Elementary and Secondary Education Act of 1965;

(5) "State" means the several States, the District of Columbia, and the Commonwealth of Puerto Rico; and

(6) "State educational agency" has the meaning given such term by section 801(k) of the Elementary and Secondary Education Act of 1965.

AMENDMENT TO THE EDUCATION AMENDMENTS OF 1976

SEC. 16. Section 332 of the Education Amendments of 1976 is amended—

(1) in subsection (b)(2), by striking out "3 per centum" and inserting in lieu thereof "1 per centum", and by striking out "the Commonwealth of Puerto Rico,"; and

(2) in subsection (b)(3)(B) by striking out "and the District of Columbia" and inserting in lieu thereof ", the District of Columbia and the Commonwealth of Puerto Rico".

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENTS OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7) to authorize a career education program for elementary and secondary schools, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

1. SHORT TITLE

The House bill provides that the bill may be cited as the "Elementary and Secondary Career Education Act of 1977."

The Senate amendment provides that the bill may be cited as the "Career Education Incentive Act."

The House recedes.

2. DECLARATIONS

The Senate amendment includes a statement of declarations which says that a major purpose of career education is to prepare every individual for a suitable career, that career education should be an integral part of the Nation's educational process, that career education promises to relate education to students' life aspirations, and that educational agencies and institutions of all sorts, including elementary and secondary, postsecondary, adult, employment training and retraining and vocational, should make every effort to fulfill that purpose.

The House bill contains no similar declaration.

The House recedes.

3. STATEMENT OF PURPOSE

A. The House bill states that the purpose of the Act is to assist States and local educational agencies in making education as preparation for work and as a means of relating work values to other life roles and choices a major goal of elementary and secondary education.

The Senate amendment includes institutions of postsecondary education as eligible to receive assistance under the Act and contains no language regarding the relating of work values to other life roles and choices.

The conference substitute provides that the purpose of the Act is to assist States, local education agencies, and institutions of postsecondary education in making education as preparation for work and as a means of relating work values to other life roles and choices a major goal of education.

B. The House bill states that one of the purposes of the Act is to eliminate bias and stereotyping on account of race, sex, or handicap.

The Senate amendment adds age and economic status as areas of bias and stereotyping to be eliminated.

The House recedes.

4. AUTHORIZATIONS

A. The House bill authorizes funds for 5 fiscal years, without specifying a particular year as the first funded fiscal year.

The Senate amendment also authorizes funds for 5 fiscal years, beginning in fiscal year 1979.

The House recedes.

B. The House bill provides that no funds may be appropriated for the second, third, fourth, or fifth fiscal years, unless appropriations were made for all the preceding fiscal years.

The Senate amendment contains no similar provision.

The Senate recedes.

C. The House bill authorizes a total of $275 million over 5 fiscal years to carry out all the provisions of the Act.

The Senate amendment authorizes a total of $325 million over 5 fiscal years to carry out all the provisions of the Act except for the grants for postsecondary career education which are separately authorized under section 12 of the Senate amendment.

The authorization levels for each of the 5 fiscal years under the bill compare as follows:

House bill and Senate amendment

First fiscal year (FY 1979)—$25 million; $50 million.

Second fiscal year (FY 1980)—$100 million; $100 million.

Third fiscal year (FY 1981)—$75 million; $100 million.

Fourth fiscal year (FY 1982)—$50 million; $50 million.

Fifth fiscal year (FY 1983)—$25 million; $25 million.

The House recedes.

D. The House bill makes each year's authorization of appropriations contingent upon the appropriations for that year being provided in the previous fiscal year.

The Senate amendment contains no similar provision.

The conference substitute provides that each year's authorization is contingent upon appropriations being provided in the previous year except for the appropriation authorized for fiscal year 1979.

5. POSTSECONDARY CAREER EDUCATION DEMONSTRATION PROJECTS

The House bill prohibits local educational agencies from receiving any funds appropriated for career education demonstration projects under section 406(f) of the Education Amendments of 1974, if appropriations are provided for this bill. In essence this provision restricts these section 406(f) funds to postsecondary career education demonstration projects.

The Senate amendment authorizes $15 million for each of the 5 fiscal years of the Act for the conduct of postsecondary career education demonstration projects of national significance or special value and makes no reference to section 406(f).

The conference substitute authorizes $15 million for each of the 5 fiscal years of the Act for the conduct of postsecondary career education demonstration projects of national significance. The conference substitute also provides that no funds may be authorized to be appropriated under section 406(f) of the Education Amendments of 1974 for postsecondary education projects in any year in which this provision is funded.

6. MINIMUM ALLOTMENT

The House bill provides that funds be distributed among States on the basis of the population aged 5 through 18 with a $100,000 minimum allotment for each State.

The Senate amendment provides that funds be distributed among States on the basis of the population aged 5 through 18 with a $125,000 minimum allotment.

The House recedes.

7. COMMISSIONER'S FUNDS

The Senate amendment reserves up to 5 percent of the funds appropriated under the Act for Federal administration and for the Commissioner to make model program grants pursuant to section 10 of the Senate amendment. The Senate amendment also reserves up to 1 percent of the funds for the Commissioner to carry out the career education information program pursuant to section 11 of the Senate amendment. Finally, the Senate amendment reserves up to 1 percent of the funds appropriated for the Commissioner to carry out the evaluation program pursuant to section 12 of the Senate amendment.

The House bill contains no comparable provisions.

The conference substitute provides that up to 5 percent of the funds appropriated under the Act may be reserved for Federal administration and for model programs, that up to 1 percent may be reserved for a career education information program, and that up to one-half of 1 percent may be reserved for evaluation.

It is the intention of the conferees that the results of the evaluation of these programs should be submitted to the Congress in one report instead of in annual reports.

8. OUTLYING AREAS

The House bill requires the Commissioner to reserve 1 percent of the appropriation for grants to local educational agencies in Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands in furtherance of the purposes of the Act.

The Senate amendment authorizes reservation of an amount not to exceed 1 percent for payments to such areas for their respective needs in career education.

The Senate recedes.

9. WAIVER OF REQUIREMENTS FOR STATES RECEIVING MINIMUM ALLOTMENTS

The Senate amendment waives the provisions reserving funds for State level activities, the provisions regarding within-State distribution of funds between the State educational agency and the local educational agencies, and the provisions requiring employment of certain State level staff for States receiving the minimum allotment.

The House bill contains no similar provision.

The conference substitute waives only those provisions regarding employment of State level staff for States receiving the minimum allotment.

10. APPLICATION

The House bill requires each State desiring funds to submit an application for the first year of the program.

The Senate amendment requires the submission of an annual application for each year of the program.

The Senate recedes.

11. ADMINISTRATION

The House bill requires the State educational agencies to plan and administer the programs under the Act.

The Senate amendment only requires the submission of the States' applications for funds under this Act to be through the State educational agency.

The Senate recedes.

12. NOTIFICATION OF THE GOVERNOR AND STATE LEGISLATURE

The House bill provides that the State legislature and the Governor be notified of the States' application.

The Senate amendment provides that the chief executive of the State be notified of the application.

The Senate recedes.

13. MAINTENANCE OF EFFORT AND NON-FEDERAL SHARE

The House bill requires that a State expend from its own sources an amount equal to or exceeding the amount it expended in the preceding fiscal year.

The Senate amendment contains this requirement and also requires that the State application include assurances that the State will pay its non-Federal share from non-Federal sources.

The House recedes.

14. CONTENT OF CAREER EDUCATION PROGRAMS

The House bill requires the State educational agency to provide satisfactory assurances that career education programs will be administered in such a manner as to impact on all instructional programs, and not be administered solely as a part of the vocational education program.

The Senate amendment provides that the State educational agency will require local educational agencies to carry out career education programs in such a manner as will affect all instructional programs.

The conference substitute requires both State and local educational agencies to carry out career education in such a manner as to affect all instructional programs and not solely as part of the vocational education program.

15. STATE-LEVEL STAFF

The House bill requires programs funded under the Act to be coordinated by a person with prior experience in career education, to be designated the State coordinator of career education. The House bill also requires the State educational agency to employ such staff as are necessary to administer the Act, including a person experienced in the problems of discrimination on account of race, sex, or handicap, and a professional trained in guidance and counseling.

The Senate amendment requires the State educational agency to employ such staff as are necessary, including a State coordinator with prior experience in career education, a person experienced in problems of discrimination (adding age and economic status to the areas of discrimination listed in the House bill), and a professional in guidance and counseling, which, unlike the House bill, is required only where feasible.

The Senate recedes.

The conferees wish to make clear that the States may fulfill their requirements for hiring certain people at the State level by employing people part-time for these positions or by using already employed staff part of the time for these duties and paying for part of their salaries from these funds.

16. STATE PLAN REVIEW

The House bill requires the State educational agency to conduct a continuous review of the State plan and submit amendments as deemed appropriate with regard to its experience under the program.

The Senate amendment requires an annual review of the State plan, and submission of necessary amendments.

The Senate recedes.

17. SET ASIDE FOR GUIDANCE AND COUNSELING

The House bill requires that the State assure that not less than 15 percent of the funds not reserved for State level activities be used for programs at the local level in guidance and counseling.

The Senate bill contains no comparable provision.

The Senate recedes.

The conferees wish to make clear that this requirement regarding a minimal expenditure for guidance and counseling activities is a requirement applicable to the State's allocation and is not a requirement which each local school district receiving funds must follow.

18. IDENTIFICATION OF LOCAL EDUCATIONAL AGENCIES

The Senate amendment requires assurances on the State application that the State educational agency will identify all local educational agencies which desire to develop or expand their career education programs and will develop a plan in accordance with the State planning provisions.

The House bill has no comparable provision.

The Senate recedes.

19. DISTRIBUTION OF FUNDS

The Senate amendment requires the State application to contain assurances that the State will comply with provisions regarding State set asides and participation of private schoolchildren.

The House bill has no comparable provision.

The House recedes.

20. WITHIN STATE DISTRIBUTION

The Senate amendment prohibits States from allocating funds to local educational agencies on the basis of per capita enrollments or through matching of local expenditures on a uniform percentage basis or from denying funds to local educational agencies making reasonable tax efforts because they cannot pay the non-Federal share.

The House bill contains no similar provisions.

The House recedes.

21. STATE PLANS

A. The House bill requires States to submit State plans by July 1st of the first funded fiscal year.

The Senate amendment requires States to submit State plans at the time of submission of their first annual application for fiscal year 1980.

The conference substitute requires States to submit State plans by July 1, 1979.

B. The House bill requires the State plan to set forth the objectives the State will seek to achieve during the 5 fiscal years and how it will achieve them.

The Senate amendment includes the same requirement, but adds that the State must place a special emphasis on overcoming bias and stereotyping.

The House recedes.

C. The House bill requires the State plan to include adequate assurance that the application requirements will be met in each funded fiscal year after the first.

The Senate amendment contains no such provision.

The Senate recedes.

D. The Senate amendment requires the State plan to provide proposed criteria for evaluation of the extent to which the State will achieve its yearly objectives.

The House bill does not contain a similar provision.

The House recedes.

22. USE OF FUNDS

The House bill authorizes use of Federal funds for a listed set of career education activities.

The Senate amendment authorizes the use of Federal funds to pay the Federal share of the costs of such activities.

The House recedes.

23. STATE LEADERSHIP

The House bill provides for State leadership, either directly or through arrangements with private and public agencies and organizations.

The Senate amendment provides for such leadership, either directly or through public agencies and private organizations.

The House recedes.

24. CAREER EDUCATION MATERIALS

The Senate amendment specifies that career education materials funded under the Act must have special emphasis on overcoming sex bias and stereotyping.

The House bill contains no similar provision.

The House recedes.

25. COLLABORATION WITH ORGANIZATIONS

The House bill provides for collaboration with State agencies and organizations representing business, labor, industry, the professions, handicapped, minority groups, and women.

The Senate amendment permits collaboration with any public agencies and private organizations representing the same groups, adding older Americans.

The House recedes.

26. COMMUNITY ORGANIZATIONS (LOCAL LEVEL)

The House bill enables local educational agencies to collaborate with organizations representing the handicapped, women, minority groups, and the business-labor-industry-professional-government community, and permits use of these personnel in schools and for student field trips.

The Senate amendment permits collaborative arrangements with organizations representing handicapped, minority groups, women, and all other elements of the community, and permits the use of these personnel without specifying that personnel may be used as resource people and without mention of field trips.

The conference substitute permits local educational agencies to collaborate with organizations representing handicapped, minority groups, women and all other elements of the community and permits use of personnel from such organizations in schools and for student field trips.

27. LOCAL COORDINATORS

The House bill permits funds to be used for employing local coordinators of career education, but not at the school building level.

The Senate amendment permits using funds for local coordinators, but does not prohibit hiring at the individual school building level.

The Senate recedes.

28. INSERVICE TRAINING

The House bill allows use of funds for inservice education of education personnel, to help them understand career education and to acquire competencies essential for carrying out their roles.

The Senate amendment allows use of such funds to help education personnel acquire competencies in the field of career education and includes ways of overcoming sex stereotyping in career education and ways of assisting women and men in broadening their career horizons.

The House recedes.

29. LOCAL COUNCILS AND PLANS

The House bill permits funds to be used for establishing and operating local community career education councils and for activities relating to local plans.

The Senate amendment includes no similar provisions.

The Senate recedes.

30. LOCAL DISTRIBUTION

The House bill requires States to make grants to local educational agencies on the basis of applications submitted by the LEA and approved by the SEA, in accordance with equitable distribution criteria having due regard for the needs of LEA's serving sparsely populated areas or relatively few students.

The Senate amendment adds areas of high incidence of youth and adult unemployment to the list of areas whose needs must be duly regarded.

The House recedes.

31. NONPROFIT PRIVATE SCHOOLS

The House bill requires States to provide for equitable participation of private schoolchildren. The control of funds and titles to materials, equipment, and property shall lie with the public agency.

The Senate amendment contains similar provisions, except that property is not mentioned.

The House recedes.

32. PAYMENTS

The House bill provides that the Commissioner, after finding a State in compliance with the application provisions for the first funded fiscal year and in compliance with the provisions regarding State plans and uses of funds for the second and third fiscal years, shall pay each State the amount to which it is entitled. The House bill requires the Commissioner to determine whether a State is in compliance with the provisions regarding State plans and uses of funds by reviewing State evaluation reports pursuant to section 10, before a State can be granted its funds for the fourth and fifth funded fiscal years. The House bill permits the Commissioner to reduce a State's grant in proportion to the extent to which it substantially failed to achieve the objectives set forth in the State plan.

The Senate amendment has similar requirements regarding payments, except that it does not specify compliance with the provisions regarding uses of funds as a necessary condition for funding and does not permit the Commissioner to reduce a State's grant in proportion to the extent to which it failed to achieve its objectives.

The Senate recedes.

33. STATE LEVEL PROGRAMS

The House bill permits States to reserve up to 10 percent of the funds for State leadership activities and up to 5 percent of the funds for employing State level personnel and reviewing and revising the State plan for each fiscal year funded.

The Senate amendment permits States to reserve up to 25 percent of the funds for State leadership, employing State personnel and reviewing and revising the State plan. for fiscal year 1979. For fiscal year 1980 and thereafter, States may reserve up to 15 percent for these purposes.

The conference substitute permits States to reserve up to 10 percent of the funds for State leadership activities and up to 10 percent for employing State level personnel and reviewing and revising the State plan for fiscal year 1979. For fiscal year 1980 and thereafter, States may reserve up to 10 percent for State leadership and up to 5 percent for employing State level personnel and State planning activities.

34. STATE MATCHING REQUIREMENTS

A. The House bill sets separate matching requirements for employing State level staff. Federal funds can be used for 100 percent of these costs for the first year, 75 percent for the second, and 50 percent for the third through fifth fiscal years.

The Senate amendment includes State level personnel in the regular matching requirements which are listed below.

The Senate recedes.

B. The House bill and the Senate amendment set different percentages for the Federal share of the costs of carrying out the Act. These percentages in the House bill pertain to all activities except the employing of State level staff. The percentages in the Senate amendment pertain to all activities funded under the Act. The Federal share for each fiscal year are as follows:

House bill and Senate amendment

First fiscal year (FY 1979)—100%; 100%.
Second fiscal year (FY 1980)—100%; 75%.
Third fiscal year (FY 1981)—75%; 75%.
Fourth fiscal year (FY 1982)—50%; 50%.
Fifth fiscal year (FY 1983)—25%; 25%.

The Senate recedes.

35. PRIVATE SCHOOL BYPASS

The House bill provides that the Commissioner may waive requirements regarding participation of private schoolchildren and arrange for services for these children when a State is prohibited by law from providing for their participation or has substantially failed to do so.

The Senate amendment contains no such provision.

The Senate recedes.

36. FEDERAL ADMINISTRATION

The House bill provides that the Office of Career Education shall provide technical assistance to States needing improvement and, upon request, to States and outlying areas.

The Senate amendment requires the Office of Career Education to provide technical assistance to all State educational agencies and outlying areas.

The conference substitute requires the Office of Career Education to provide technical assistance to all State educational agencies and outlying areas requesting assistance.

37. NATIONAL LEADERSHIP

The House bill requires the Office of Career Education to assert a national leadership role in career education by encouraging a national dialogue, providing policy statement, fostering career education as a goal of other USOE programs, and other specific ways.

The Senate amendment charges the Office of Career Education with performing a national leadership role, but does not specify any activities toward this end.

The House recedes.

38. NATIONAL INSTITUTE OF EDUCATION

The House bill charges the National Institute of Education with continuing its complementary efforts in career education and with devoting special attention to developing instruments to measure the effectiveness of career education. The Office of Education shall cooperate with the National Institute of Education in identifying research priorities and disseminating NIE's findings.

The Senate amendment also states that nothing in the Act should prohibit NIE from continuing its functions in career education, and charges the Assistant Secretary for Education with assuring cooperation between the Office of Education and NIE as they seek to identify research priorities and disseminate NIE's findings. The Senate amendment contains no language requiring NIE to develop measuring instruments.

The House recedes.

39. NATIONAL ADVISORY COUNCIL

The House bill amends the legislation regarding the National Advisory Council on Career Education to include not less than 12 public members, including persons representing the handicapped, minority groups and women, and not less than two members representing business and labor. The House bill also continues present law which specifies that a majority of the members be in education or education related professions.

The Senate amendment amends the National Advisory Council legislation to include not less than 15 public members, including persons representing the same groups as specified in the House bill. A person representing guidance is added, but the provision that at least a majority of the members be in education or in education related professions is deleted from present law.

The House recedes.

40. REPORTS

A. The House bill requires each State to submit to the Commissioner a report evaluating the programs assisted with funds provided under this Act for the preceding year. The Commissioner must analyze each report and provide the State with an analysis and recommendations for improving their programs within 3 months after submitted.

The Senate amendment contains no comparable provision.

The conference substitute requires each State to submit this evaluation report to the Commissioner annually unless the Commissioner determines that such annual submission is unnecessary.

B. The House bill requires the National Advisory Council on Career Education to submit a report to the Congress by April 30 of each year evaluating the effectiveness of the programs funded under the Act.

The Senate amendment contains no comparable provision.

The House recedes.

41. NATIONAL EVALUATIONS

The House bill requires the Commissioner to conduct a comprehensive review of a random sample of State programs and report on his or her findings to the Congress no later than September 30th of the fourth funded fiscal year.

The Senate amendment authorizes the Commissioner to conduct a national evaluation of the effectiveness of career education and transmit as part of the annual report the results of this evaluation.

The Senate recedes.

42. DEFINITION OF CAREER EDUCATION

The House bill defines career education as experiences free of bias and stereotyping on account of race, sex, or handicap through which one learns about work and experience relating work to other life values. The House bill further limits the definition of career education to activities carried out by State and local educational agencies and excludes activities involving specific job skill training.

The Senate amendment defines career education as programs conducted by educational agencies and institutions and education personnel to improve the ability and awareness of students in the area of career opportunities. The Senate bill includes age and economic status as areas to be free of bias and stereotyping.

The conference substitute defines career education as experiences free from bias through which one learns about work and experiences relating work to other life values. The conference substitute also contains a second definition of career education limited to activities carried out under this Act

by specifically excluding activities involving job skill training.

43. "COMMISSIONER"

The Senate amendment defines "Commissioner" as the Commissioner of Education.

The House bill does not define "Commissioner."

The House recedes.

44. "STATE BOARD"

The House bill defines "State board of education" to mean the governing board responsible for the administration of elementary and secondary education.

The Senate amendment contains no definition of "State board."

The House recedes.

45. "WORK"

The House bill defines "work" as efforts producing benefits for oneself or others.

The Senate amendment does not define "work."

The House recedes.

46. "STATE EDUCATIONAL AGENCY"

The Senate amendment defines "State educational agency" as defined in section 801 (k) of the Elementary and Secondary Education Act of 1965.

The House bill does not define "State educational agency."

The House recedes.

47. AMENDMENT TO EDUCATION AMENDMENTS OF 1976

The House bill amends section 332 of the Education Amendments of 1976, which enables States to plan for the development of career education, by making Puerto Rico a State for the purposes of that section, and reduces the sums available for the outlying territories from 3 percent to 1 percent.

The Senate bill contains no similar provision.

The Senate recedes.

48. MODEL PROGRAMS

The Senate amendment authorizes the Commissioner to make grants to support projects to demonstrate the most effective methods and techniques in career education and to develop exemplary career education models, including these designed to eliminate bias and stereotyping.

The House bill does not contain any similar provision.

The conference substitute authorizes the Commissioner to make grants for model career education programs and bars appropriations under the authority of section 406(f) of the Education Amendments of 1974 for these types of programs in any year in which this provision is funded.

49. CAREER EDUCATION INFORMATION

The Senate amendment requires the Commissioner to examine the occupational needs of participating individuals and organizations and to furnish information to these parties on Federal programs involved in career information and on exemplary programs.

The House bill has no similar provision.

The House recedes.

A POINT OF VIEW ON TRADE

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, the October 2, 1977, Sunday edition of the New York Times carried a very thoughtful and interesting article by Mr. Nathaniel Samuels, chairman of Kuhn Loeb & Co.'s board of advisory directors, chairman of the Louis Dreyfus Holding Co., and formerly Deputy Under Secretary of State for Economic Affairs. The article, entitled "Time for a Tactical Retreat?" discusses ways in which we might better deal with our current worldwide difficulties in international trade.

We, along with other nations, have begun to apply a number of orderly marketing agreements and other import relief devices. I am particularly concerned, however, that we have no guarantees that the industries temporarily aided by these actions are indeed using the time provided to adjust to the conditions of international competition, either through modernization or diversification into areas in which they can be more competitive. I would hope that as time permits next year, the Ways and Means Subcommittee on Trade, which I have the honor of chairing, could conduct inquiries into the types of adjustments that the shoe, television, and specialty steel industries are actually taking as a result of the import relief provided in recent years.

Mr. Samuels' very thoughtful article follows:

TIME FOR A TACTICAL RETREAT?

(By Nathaniel Samuels)

It is increasingly unlikely that the current multilateral trade negotiations will result in a significant liberalization of international trade. In the aftermath of the oil price explosion and a worldwide recession, protectionism in one form or another has again taken on a degree of political respectability.

To compensate for weak demand at home, to pay their rising oil bills and to meet their heavy debt-servicing obligations, countries everywhere are resorting to an ever more ingenious array of export subsidies and incentives.

On the import side, nations are increasingly erecting nontariff barriers against incoming goods. And adding to the growing disruption is the disarray in the international monetary system as countries manipulate the exchange rates of their currencies to serve their trade objectives.

In short, a kind of guerrilla warfare has erupted in world trade. Given this state of affairs, governments in general have thus far shown a surprising degree of restraint in refusing to abandon a general policy of adherence to trade liberalization. But the vital question is: How long can the line be held? It may be that, if the current moves toward protectionism are an inevitable fact of life, we shall have to undertake a tactical retreat in trade policy in the short run—in order to be able to regroup for the long-run advance of liberalization. This may be the best we can do under the circumstances.

I am proposing that we codify, under the auspices of the General Agreement on Tariffs and Trade, the various orderly marketing agreements and voluntary export restraints that have cropped up in recent years, as in steel and fibers and footwear, and that we surround these arrangements with multilateral rules governing their justification and their functioning.

Essential to such a system would be simultaneous commitments by governments—and by industries seeking import relief—to take steps to strengthen their international competitiveness or to phase out no-longer viable sectors altogether.

Even to utter these views is, of course, highly unpalatable to those for whom liberal trade is both a matter of intellectual conviction and of faith. Moreover, we must face the fact squarely that any deviation from a liberalization trend risks encouraging more calls for protectionism from a variety of sources. Thus, whatever we do must be designed to turn a current trend toward fragmentation in the international trade system into a coherent multilateral effort.

In using the term "tactical retreat," I have in mind turning the devices of voluntary export restraints and orderly marketing agreements into components of adjustment processes. They would be applied only in those cases where imports can be objectively and truly substantiated as a major contributor to domestic economic disruption. An essential aim would be to correlate the rates of growth of imports with the rates of growth of domestic consumption of the products covered; imports would not be allowed to take up the entire rate of consumption growth and certainly not to overtake it.

Indeed, we already have a number of examples of bilateral and multilateral arrangements. One example: the restraints undertaken by Japanese and European steel producers, negotiated with the State Department, relating to their exports to the United States. Others: the steel agreement between Japan and the European Economic Community: the multifiber agreement and the orderly marketing agreements regarding footwear recently negotiated by the United States with South Korea and with Taiwan.

Orderly marketing agreements should be limited only to a few industries that are of exceptional significance to the countries seeking to resort to them. Internationally agreed criteria should be applied to determine the role of imports as a contributor to their difficulties. And the duration of the agreements should be fixed (perhaps three to five years at most) with automatic self-destruct provisions included along with procedures for multilateral monitoring and surveillance of their workings and observance.

Governments seeking such agreements must make a commitment to see that the necessary capital investments to modernize production and increase productivity will be available to industry, either from the private sector or from official sources. Certain companies within an industry covered under the agreements may be partially or even wholly phased out because their prospects of becoming competitive are remote or nil. In those instances governments may perhaps have to engage in acquiring (and disposing of) assets from the owners and in assisting labor in the transition to new employment opportunities. Nothing could be more unproductive than keeping nonviable companies and industries in business indefinitely or drawing young labor into companies or sectors which have little or no future.

The role of labor in the success of an industrial adjustment process is obvious, but the sophisticated understanding of

an interdependent world economy that is necessary for success of such a program should not be underestimated. There is a social cost to maintaining an open system both domestically and internationally that society must pay somehow, whether in orderly adjustment or in welfare. The former would seem to be infinitely superior to the latter.

Instead of an uncoordinated proliferation of orderly market agreements, a code governing their applications should be formulated and brought under the aegis of GATT. Article 14 of GATT contains the so-called "safeguard" provisions whereby trade imbalances (to use the elegant phrases of the diplomatic practitioners) are dealt with. In general, when a member country wishes to deal with a trade imbalance by restriction, it must provide trade compensation uniformly in return. Many loyal adherents of the GATT system believe this to be adequate if properly applied, but there is some disposition to use extra-GATT arrangements such as orderly marketing agreements with selected countries and thereby introduce selectivity rather than uniformity in dealing with particular trade problems.

Obviously, negotiating a framework for orderly marketing agreements with domestic industrial adjustment processes would be a formidable and time-consuming task even if there were broad agreement among the members of GATT to do so. There is not such a consensus at present. An industrialized country whose exports are doing well clearly hesitates to see any rein put on it, however limited. Developing countries that are avid for access to the markets of industrialized countries may find innumerable objections to such arrangements.

The authority granted under the United States Trade Act to negotiate a new multilateral agreement expires in January 1980. The complexity of the issues and the hard problems of the world economy make the remaining two years or so a short time indeed. The moment has come to decide what is the true nature of our problems and to separate what is essential in the negotiations from what would be ideal. The task of those who carry political authority is not necessarily to demonstrate the validity of this or that ideology but to make an acceptable society work through the reconciling of diverse aims and interests.

THE RISE OF NEO-NAZISM—OUR SACRED OBLIGATION TO SPEAK OUT

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. MATTOX) is recognized for 5 minutes.

Mr. MATTOX. Mr. Speaker, a long-unpublished essay by George Orwell, "The Freedom of the Press," recently came to light in 1972. It makes a hauntingly relevant point for our own time with its theme that the most important issues are all too often absent from the public dialog—not because of official censorship—but simply because people do not want to talk about them.

"At any given moment," Orwell said, "there is an orthodoxy, a body of ideas which it is assumed all right-thinking people will accept without question." Even more significantly, he observed that "others who do not actually hold this view assent to it from sheer cowardice." The essay has been called intemperate, but it carries a strong message.

We who spend most of our time working within the orderly structure of American democracy often avoid speaking out when we should. Oppressive groups seem to thrive on confrontation so more reasonable people are naturally reluctant to become involved. When it seems that tolerance and kindness are a poor match against the tactics of hatred and lawlessness, we need to remind ourselves that there is a great equalizer in democracy when we speak up to decry injustice. We have the freedom to expose the fallacies and designs of oppression before it becomes too late.

We are entering a critical period in our national history. We have enjoyed many years of continuing economic growth and progress. Most of the current generation of Americans are unaccustomed to anything else. And yet we are facing drastic changes. The concepts of energy, population, and technology are placing ominous qualifications on all our lives. While there are great new challenges to be met, there are enormous frustrations to be dealt with. Government instability and political extremism often accompany economic difficulties when public frustrations run high. Hitler, it should not be forgotten, was a product of such frustration.

When we grow tired of dealing with the burdens of democracy, there is a tendency to look elsewhere, to someone or something that offers quick and easy solutions. Never has there been a scarcity of ready demagogues to offer unfulfillable promises at incredible prices—usually the prices are to be paid in human suffering, though it may start out as the suffering of some for the advantage of others. Hitler, it should not be forgotten, was voted into power.

The words "Hitler" and "Nazi" are not frequently used in our political dialog because they have become the awesome, almost unspeakable, codewords for the most hideous wholesale derailment of civilization in modern times. It seems inconceivable that in our supposedly enlightened age anyone would adopt either of these words as a useful description for anything political.

Inconceivable, but:

The fastest growing political party in Britain today is the National Front whose platform calls for expelling all nonwhites and which embraces violent tactics identical to those used by Adolf Hitler. The Front's leader has termed himself a Hitler admirer and makes no attempt to hide the organization's strong anti-Semitic theme. Other rightwing organizations have lined up behind this group in a drive to increase their own power.

Hitlerism is a box-office hit in West Germany today, helping to create an alarming change in public attitudes. Millions of Germans are going to see the new Hitler wave films and are coming away with a near-admiration of the Fuehrer's power and cunning.

The tyrannical madman of Uganda, Idi Amin, at one time initiated plans to erect a public statue of Adolph Hitler. Aside from any such formal tribute to his political mentor, Amin has made a monumental display of Hitlerian terror throughout his country, reaching, on one notorious occasion, all the way to Israel to pull in racial victims, with the help of Palestinian terrorists, among others.

The American Nazi movement in recent years has experienced a frightening surge in activity. Nazi party members have openly run for public office in five States and have gathered as much as 16 percent of the vote in a major election.

There is active Nazi recruitment on many high school and college campuses, particularly where racial tensions exist.

Brown-shirted "storm troopers" have been responsible for repeated instances of violence throughout major cities across the country.

Even a former member of the U.S. Army's elite Presidential Guard was recently found to be a member of the American Nazi party, as a result of his conviction for beating a black off-duty Washington, D.C., police officer, with the help of no less than 35 fellow Nazis wearing uniforms and armed with riot gear and billy clubs.

The American Nazi movement has a mailing list estimated to be over 200,000 and an annual income of around $100,000. These resources attract increasing amounts of support for Nazi candidates running for public office.

There is a strong likelihood that American Nazi groups have received substantial financial assistance from the Middle East or Europe and from wealthy rightwing organizations in the United States. The operator of the fastest growing anti-Semitic propaganda mill in the Nation, George Dietz, is a former member of the John Birch Society. The IRS has two suits pending which seek to review the financial records of the major Nazi group in Chicago.

While we can conceive of these circumstances, because they have actually occurred, we attribute the bulk of it, of course, to the periodic restlessness of the lunatic fringe, sincerely hoping this will always be the case.

I have collected this information primarily because it has a significant bearing on the whole of American politics. What troubles me much more than the swastika-wearing Nazis, are those who wear the same mental uniform but call themselves something else. If the Nazi doctrine can receive this much open support after what we have seen in Nazi Germany, how much more hatred must there be under the surface? The fabric of society unravels too easily when it receives a sustained hard pull from either the right or the left. Those who pander to the fears and frustrations of the racial right—as can easily be done, judging from the mountains of emotion that neo-Nazis have already uncovered—must bear responsibility for the increase in violence and hatred taking place in the world today.

This ultra-rightwing assault has at least three common characteristics: First, a strong racial dogma, primarily directed toward blacks and Jews; second, an odious presence of fear and hatred, frequently spilling over into incidents of violence and terror, either as a motivation for retaliation, or a means of advancing political ends; and third, an obsessive emphasis on police training and police strength.

A recent personal experience involving such police training hit very close to home. On November 7 I was utterly surprised and shocked to learn that 24 members of Idi Amin's armed police force were receiving helicopter training

in a neighboring community to my own in Texas.

Americans have not forgotten the incident at Entebbe Airport where Amin's support for the PLO's kidnaping, segregation and threatened execution of Jews, and murder of a British-Israeli grandmother, heralded a new wave of hijacking and terrorist activities. If the French pilot and crew in that case had enough moral courage not to cooperate in that Nazi-like segregation of Jews—risking their own lives to stay with their Jewish passengers—how can we have less by actually allowing Amin's police pilots to be trained in our country?

I have long been concerned that there is an unfortunate coincidence in the number of police from oppressive regimes who receive training in the United States. Without detailing here the numerous actions that have been initiated to correct this situation, I can simply say I have done everything possible to see that Amin's police are immediately expelled. One of the results of this outcry has been the adoption of new State Department policies to prevent such occurrences in the future.

There is great danger if the public reaction to such outrages ever drifts into indifference and tacit acceptance. If we lose our capacity to be shocked, we will have also lost a part of our humanity. In the case of Uganda the mass atrocities are known around the world. There is an inescapable obligation to speak out.

If a more conspicuous violator of human rights can be found, it would not inconceivably be among the Palestinian terrorists where a savage, racially motivated hatred has been notoriously blatant for so long. I am hopeful that we may finally be nearing an end to this period of turmoil in the Middle East. Through the long years of airline hijackings, airport terrorism, border clashes and reprisals, the underlying character of the radical Palestinian groups has been determined by a reliance on Hitlerian tactics of violence and terror against innocent civilians. It seems not to matter whether the advantage was to be gained by machine-gunning Olympic athletes or small schoolchildren. Clearly, in these cases, the ultimate expedient was the ultimate corruption.

We must be certain that our Government does not take actions which allow terrorist groups to receive a political advantage from the use of Nazi-like tactics. In the case of the PLO, we simply cannot give respectable status to a racist group whose primary motivation has been the destruction of Israel.

American opinion has played a crucial role in the Middle East through these tense years. Recent expressions of outrage over diplomatic actions which could have strengthened the position of terrorist groups will help steer our national policies in the right direction.

"Tolerance and decency are deeply rooted in our society," said Orwell in his last-published essay, "but they are not indestructible, and have to be kept alive by conscious effort."

I have always felt that the often morally indignant Orwell developed a profoundly deep understanding of the pressures of a society at risk. He did his part as one member of the human race to decry the evils he saw in oppressive governments. The intuitive compassion of his "1984" would make it easy to ascribe the following to a passage from that novel:

> Violence, less and less embarrassed by the limits imposed by centuries of lawfulness, is brazenly and victoriously striding across the whole world. The world is being inundated by the brazen conviction that power can do anything, justice nothing.

To my great sadness those were not merely the words of literary compassion, but the anguished voice of one who experienced what Orwell sought to prevent; Aleksandr Solzhenitsyn, from his undelivered Nobel prize lecture. As he expressed the anxiety of human longing everywhere, that hatred and oppression might not gain another foothold, may we share those heartaches enough to somehow make a difference.

STATUS OF THE CONGRESSIONAL BUDGET FOR FISCAL YEAR 1978

The SPEAKER. Under a previous order of the House, the gentleman from Connecticut (Mr. GIAIMO) is recognized for 5 minutes.

Mr. GIAIMO. Mr. Speaker, as called for in the Congressional Budget Act, the House Budget Committee has notified the Speaker of the House on the status of the fiscal year 1978 congressional budget. A copy of my letter to the Speaker and the committee's report are attached at the end of these remarks. I would like to inform my colleagues of the House how the Congress stands with regard to the budget resolution it adopted on September 15.

Since my previous report to the House on October 19, the Congress has enacted several items which alter the current level of spending and revenues. The original continuing appropriation expired at the end of last month, and in its place the Congress has enacted House Joint Resolution 643, further continuing appropriations for the Departments of Labor and HEW, the District of Columbia and the Small Business Administration disaster loan fund. In addition, the Congress has acted on eight measures which have the net effect of reducing the current level estimate of revenues by $24 million. The attached table summarizes these and other changes to the current level since my last report to the House. It can be seen that a margin of $16.2 billion remains for budget authority and $457 million remains for outlays when measured against the spending limits of the second budget resolution. The current level for revenues is $1.1 billion above the revenue floor of the resolution.

Over the next few weeks the Budget Committee will be reviewing reestimates submitted by the administration for fiscal year 1978. These reestimates will take into consideration the most recent information available on the performance of the economy as it affects the spending rate of Federal programs, and, where necessary, adjustments will be made to the current level.

CHANGES TO THE CURRENT LEVEL SINCE OCT. 13, 1977

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level, as of Oct. 13, 1977	474,356	452,233	398,100
1. H.R. 7797—			
Foreign assistance appropriations	6,773	2,842	
Removal of continuing resolution portion	−360	−310	
2. H.R. 9090—Increased disaster payments for certain crops		29	
3. H.R. 3387—Entitlement authorization for child care services	200	200	−8
4. Net effect of the following revenue measures: H.R. 2849—Suspension of duty on latex mattress blanks; H.R. 2850—Suspension of duty on latex sheets; H.R. 2982—Suspension of duty on tantalum/columbian concentrate; H.R. 3093—Duty-free treatment of shoe lasts; H.R. 3259—Continue suspension of duty on certain horses; H.R. 3373—Continue suspension of duty on certain silks; H.R. 4458—Change excise taxes on distilled spirits; H.R. 422—Exemption of duty on certain aircraft engines			−24
5. H.R. 1139—Child Nutrition Amendments	28	25	
6. Reestimate of permanent appropriation for Federal Crop Insurance Corporation		57	
7. H.J. Res. 626—Continuing appropriations (Expiration of continuing resolution on Oct. 31, 1977)	−21,793	−12,797	
8. H.R. 9019—3d budget rescission bill, fiscal year 1977		−10	
9. H.R. 9704—Federal Crop Insurance Corporation		22	
10. H.R. 7345—Veterans' pension benefits increases	76	114	
11. H.R. 7074—Oregon Forest system	−2	−2	
12. H.R. 8701—Veterans' educational benefits	606	606	
13. H.J. Res. 643—Further Continuing Appropriations:			
Labor-HEW (conference agreement)	60,017	43,432

Under floor			1,068

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., November 8, 1977.

Hon. ROBERT N. GIAIMO,
Chairman, Committee on the Budget, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 308(b) and in aid of section 311(b) of the Congressional Budget Act, this letter and supporting detail provide an up-to-date tabulation of the current levels of new budget authority, estimated outlays and estimated revenues in comparison with the appropriate levels for these items contained in the most recently agreed to concurrent resolution on the 1978 budget. The current level estimates are as of close of business November 4, 1977.

Since my last report the Congress has cleared for the President H.J. Res. 643, a resolution continuing appropriations for fiscal year 1978 for the Departments of Labor, and Health, Education, and Welfare, the District of Columbia, and the Small Business Admin-

istration disaster loan fund; H.R. 7074, affecting the Oregon Forest System; H.R. 8701, increasing veterans education benefits, and H.R. 422, a tariff bill.

[In millions of dollars]

	Budget authority	Outlays	Revenues
1. Enacted	426,531	415,828	398,100
2. Entitlement authority and other mandatory items requiring further appropriation action	5,150	5,212	
3. Continuing resolution authority	52,183	36,736	
4. Conference agreements ratified by both Houses	−2	17	−32
Current level	483,862	457,793	398,068
2d concurrent resolution	500,100	458,250	397,000
Amount remaining:			
Under ceiling	16,238	457	
Over floor			1,068

Sincerely,

ALICE M. RIVLIN,
Director.

PARLIAMENTARIAN STATUS REPORT—SUPPORTING DETAIL, FISCAL YEAR 1978, AS OF CLOSE OF BUSINESS NOV. 4, 1977

[In millions]

	Budget authority	Outlays
I. ENACTED		
Permanent appropriations and trust funds	234,738	218,201
Outlays from balances of prior-year authority associated with appropriation bills not yet included in the enacted category of the Parliamentarian Report:		
District of Columbia		51
Labor-HEW		26,279
Offsetting receipts (including amounts generated by current appropriation action)	−52,525	−52,525
Enacted this session:		
Agriculture (Public Law 95-97)	12,749	13,520
Interior (Public Law 95-74)	10,026	8,888
Legislative (Public Law 95-94)	990	1,054
Military Construction (Public Law 95-101)	2,978	3,613
Public Works (Public Law 95-95, 95-96)	10,294	9,436
State-Justice (Public Law 95-86)	7,709	10,942
Treasury (Public Law 95-81)	7,478	7,600
Transportation (Public Law 95-85)	6,197	14,940
Defense (Public Law 95-111)	109,753	101,910
HUD-Independent Agencies (Public Law 95-119)	69,371	45,312
Foreign Assistance (Public Law 95-148)	6,773	5,573
Other spending legislation:		
Emergency Unemployment Benefits Extension (Public Law 95-19)		215
Food and Agriculture Act of 1977 (Public Law 95-113)		850
Deny veterans benefits to certain individuals with upgraded discharges (Public Law 95-126)		−31
Total, enacted	426,531	415,828
II. Entitlement authority and other mandatory items requiring further appropriation action		
Function 050:		
Retired pay (anticipated supplemental)	93	93
Department of Defense, civilian and military pay (anticipated supplemental)	2,673	2,593
Function 350:		
Federal Crop Insurance Corporation authority (H.R. 9704) (anticipated supplemental)		22
Function 500:		
Child care services (H.R. 3387) (anticipated supplemental)	200	200
Function 600:		
Child nutrition (H.R. 1139) (anticipated supplemental)	28	25
Function 700:		
Readjustment benefits (anticipated supplemental)	113	
Veterans Disability and Survivor Benefits Act (Public Law 95-117) (anticipated supplemental)	229	335
Veterans pension benefits increase (H.R. 7345) (anticipated supplemental)	76	114
Function 700; Continued:		
Veterans education benefits (H.R. 8701) (anticipated supplemental)	606	606
Function 800:		
Payment to civil service retirement and disability trust fund (anticipated supplemental)	319	319
Offsetting receipts	−319	−319
Function 930:		
Civilian agency pay raise (anticipated supplemental)	1,131	1,224
Total, entitlement authority	5,150	5,212
III. CONTINUING RESOLUTION AUTHORITY		
Continuing resolution (H.J. Res. 643):		
Labor, HEW appropriations; conference agreement on H.R. 7555	60,017	43,432
Offsetting receipts	−8,205	−8,205
District of Columbia	371	351
Small Business Administration, disaster loan fund; level in Senate passed (H.R. 9375)		1,159
Total continuing resolution authority	52,183	36,736
IV. CONFERENCE AGREEMENTS RATIFIED BY BOTH HOUSES		
3d budget rescission bill, fiscal year 1977 (H.R. 9019)		−10
Increased disaster payments for certain crops (H.R. 9090)		29
Oregon Forest system (H.R. 7074)	−2	−2
Total	−2	17
Total current level, as of Nov. 4, 1977	483,862	457,793
Current resolution of Sept. 15, 1977	500,100—	458,250
Amount remaining:		
Over ceiling

INTRODUCTION OF ELEPHANT PROTECTION ACT

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. BEILENSON) is recognized for 5 minutes.

Mr. BEILENSON. Mr. Speaker, I am introducing a bill today to protect the world's largest living land mammals. Elephants, after surviving as a species for over 300,000 years, are now severely threatened with extinction. More than 100,000 elephants are slaughtered annually in developing African nations to cater to the frivolous desires of people in wealthier nations for ivory jewelry, ivory carvings, ivory chess pieces, and ivory to stockpile in bank vaults as a hedge against inflation. Were it not for this thoughtless indulgence, the African nations would not be induced to destroy their great elephant herds.

This bill would ban all U.S. trade in elephant ivory and other elephant products. Additionally, the bill would require the President to formally propose an international suspension of trade in all elephant products to the Convention on International Trade in Endangered Species (CITES). Many of the 38 member nations of CITES are also ivory importers.

The rapid decline in African elephants follows the near extinction of the Asian elephant. Asian elephants have been given protection as an endangered species by CITES. India banned the export of elephant ivory last year, and the United States then prohibited the import of Asian elephant products. Now Africa is the sole source of elephant ivory, and the number of elephants killed leaped to over 100,000 in 1976. In fact, Dr. Iain Douglas-Hamilton (an international authority on elephants and the author of "Among the Elephants") reported to the World Wilderness Congress in October that possibly as many as 400,000 African elephants were gunned down by ivory hunters, culled out by wildlife managers, or died from natural causes in 1976. With an estimated population of 1 million African elephants remaining, the giant of all land species may be relegated to zoos and a few protected parks within a decade.

Drought, deforestation, urbanization, and competition with the rapidly increasing human population for habitat have also contributed to the fast decline in elephant populations, to be sure, but the deliberate slaughter of elephants for their valuable ivory tusks is the greatest present threat to Africa's remaining elephant herds. The population of elephants in Kenya has been cut in half in the last 7 years with as many as 15,000 elephants a year dropping before the poachers' weapons. In Uganda, in 1976, the elephant population was reportedly cut in half in less than 1 year.

While accurate figures are difficult to obtain, the data on world trade in ivory confirm the dire reports from Uganda, Tanzania, Chad, the Sudan, Kenya, and other nations.

Hong Kong, one of the major centers for ivory carving and trade, imported 710 tons of ivory, taken from 71,000 elephants, in 1976. The decreasing size of the tusks being exported from Africa is an early warning sign that the species is diminishing faster than it can sustain itself. While the tusks of a large bull elephant may weigh 50 pounds, the average weight of tusks now being sold is less than 20 pounds, which indicates that most of the larger and older elephants have already been eliminated.

Although hundreds of thousands of tusks are exported legally and illegally from Africa each year, the demand for exotic luxury items made from the "hard creamy-white modified denture" of elephants' tusks which dealers find "luscious to the touch" is expanding. One ivory importer, dismayed at the passage of my California bill banning the importation of elephant ivory to California last year, informed me that he had predicted ivory would be a hot fashion item in 1977 and had previously ordered a huge shipment of carved ivory jewelry.

We cannot expect the overexploitation of elephants to cease when a poacher can make the equivalent of a year's wages on the sale of one set of tusks. The United States promotes this senseless slaughter by contributing heavily to the world's demand for ivory; we received over one-quarter of the carved and uncarved ivory exported from Hong Kong in 1976.

Only a total ban on trade in elephant products will stop the imports and alert customers to the wanton waste of a magnificent species they cause in order to satisfy their fancy. Partial prohibitions on trade have been ineffective against sophisticated smugglers and forged exportation documents certifying that the ivory came from elephants killed legally. Hence, the bill I am proposing today would prohibit all import and export of

elephant ivory, as well as all commercial trade across State lines. Ivory dealers would be allowed to continue to sell their current inventories of elephant ivory only within the State where the ivory is located at the time the bill becomes law.

I am not opposed to wildlife management programs required in conjunction with planned economic development, but the African nations need not make the same mistake we made by sacrificing their wildlife in haste to make a quick profit. Much land unsuitable for human settlement can be saved for wildlife habitat, and large and healthy elepant populations can be reestablished and become biologically stable without impeding economic growth. When the elephants are gone, the trinkets and curios made from their tusks may increase in value, but only the wealthy few will share in the economic benefits of the exchange of rare ivory objects. On the other hand, as long as the elephant herds flourish, tourists, for whom the elephant herds are a prime attraction, will continue to supply a substantial flow of foreign currency to the developing African nations where the benefits may be felt more widely by the poor as well as the rich.

To quote Henry David Thoreau:

Can he who has discovered some of the values of whalebone and whale oil be said to have discovered the true sense of the whale? Can he who slays the elephant for his ivory be said to have seen the elephant? These are petty and accidental uses; just as if a stronger race were to kill us in order to make buttons and flageolets of our bones.

The text of my bill follows:

H.R. 10083

A bill to prohibit the importation or exportation and certain other transactions involving elephant products, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Elephant Protection Act of 1977."

CONGRESSIONAL DECLARATION OF PURPOSE AND POLICY

SEC. 2. (a) DECLARATION OF PURPOSE.—The purpose of this Act is to ensure the continued existance of large and healthy populations of all species of elephants and, to this end to

(1) eliminate the role of the United States in creating the world demand for elephant products, including but not limited to ivory, and

(2) encourage other nations to join in a ban on trade in such products.

(b) CONGRESSIONAL FINDINGS AND POLICY.—The Congress finds and declares that a drastic decline in populations of elephants has occurred in East Africa, and a gradual but steady decline is taking place throughout most of the other African countries which elephants inhabit, and that the main cause of this decline is the widespread killing of elephants for the commercial value of their ivory tusks. Accordingly, it is the policy of the United States to—

(1) pursue actively through international initiatives the establishment of effective controls on the killing of elephants;

(2) pursue actively a ban on the international trade in elephant products; and

(3) provide all appropriate forms of aid to nations wishing to prevent the destruction of elephant habitat and the overexploitation of elephant populations.

UNITED STATES INITIATIVES FOR INTERNATIONAL PROTECTION OF ELEPHANTS

SEC. 3. In pursuance of the policies set forth in this Act, the President or his delegate shall propose, as soon as possible, to the Convention on International Trade in Endangered Species that all trade in elephant products by member nations be suspended until accurate data demonstrate that large and healthy elephant populations have been re-established and are biologically stable over large geographic areas.

PROHIBITED ACTS

SEC. 4. It is unlawful for any person subject to the jurisdiction of the United States to—

(1) import into the United States or export from the United States any item which such person knows, or in the exercise of due care should know, is an elephant product, if such importation or such exportation occurs after the date of the enactment of this Act;

(2) possess, deliver, receive, carry, transport, ship, or sell or offer for sale, by any means whatsoever, any item which such person knows, or in the exercise of due care should know, is, or is composed in whole or in part of, an elephant product imported in violation of the provisions of this Act;

(3) sell or offer for sale in interstate or foreign commerce any item which such person knows, or in the exercise of due care should know, is an elephant product; or

(4) make any false record or render a false account of the contents of any shipment transported in interstate commerce and received by such person, if such shipment contains any item which such person knows, or in the exercise of due care should know, is, or is composed in whole or in part of, an elephant product imported in violation of the provisions of this Act.

ADMINISTRATIVE PROVISIONS

SEC. 5. (a) ADMINISTRATION BY SECRETARY OF THE INTERIOR.—Except as otherwise provided in subsections (e) and (f) of section 6, the Secretary of the Interior (hereinafter in this Act referred to as the "Secretary"), in consultation with the Department of the Treasury and the Department in which the Coast Guard is operating, shall administer the provisions of this Act. The Secretary may issue such regulations as are necessary to carry out the provisions of this Act.

(b) PERMITS.—

(1) The Secretary may permit, under such terms and conditions as he may prescribe, any act otherwise prohibited by this Act for scientific purposes or to enhance the propagation or survival of any species of elephant.

(2) The Secretary shall publish notice in the Federal Register of each application for a permit which is made under this subsection. Each notice shall invite the submission from interested parties, within 30 days after the date of the notice, written data, views, or arguments with respect to the application. Information received by the Secretary as a part of any application shall be available to the public as a matter of public record at every stage of the proceeding.

(3) The Secretary may grant any permit under paragraph (1) only if he determines to his satisfaction that such permit—

(A) was applied for in good faith,

(B) if granted and exercised, will not operate to the disadvantage of any species of elephant, and

(C) will be consistent with the purpose and policy set forth in section 2.

PENALTIES AND ENFORCEMENT

SEC. 6. (a) CIVIL PENALTIES.—

(1) Any person who knowingly violates, or who knowingly commits an act in the course of a commercial activity which violates, any provision of this Act, or any provision of any permit issued under section 5(b), or of any regulation issued under this Act, may be assessed a civil penalty by the Secretary of not more than $10,000 for each violation. Any person who otherwise violates any provision of this Act, or any permit or regulation issued under this Act, may be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation. No penalty may be assessed under this subsection unless such person is given notice and opportunity for a hearing with respect to such violation. Each violation shall be a separate offense. Any such civil penalty may be remitted or mitigated by the Secretary. Upon any failure to pay a penalty assessed under this subsection, the Secretary may request the Attorney General to institute a civil action in a district court of the United States for any district in which such person is found, resides, or transacts business to collect the penalty and such court shall have jurisdiction to hear and decide any such action. The court shall hear such action on the record made before the Secretary and shall sustain his action if it is supported by substantial evidence on the record considered as a whole.

(2) Hearings held during proceedings for the assessment of civil penalties authorized by paragraph (1) of this subsection shall be conducted in accordance with section 554 of title 5, United States Code. The Secretary may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, and documents, and administer oaths. Witnesses summoned shall be paid the same fees and mileage that are paid to witnesses in the courts of the United States. In case of contumacy or refusal to obey a subpoena served upon any person pursuant to this paragraph, the district court of the United States for any district in which such person is found or resides or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the Secretary or to appear and produce documents before the Secretary, or both, and any failure to obey such order of the court may be punished by such court as contempt.

(b) CRIMINAL VIOLATIONS.—Any person who willfully commits an act which violates any provision of this Act or of any permit issued under section 5(b) shall, upon conviction, be fined not less than $5,000 and not more than $20,000 or imprisoned for not more than one year, or both.

(c) DISTRICT COURT JURISDICTION.—The several district courts of the United States, including the courts enumerated in section 460 of title 28, United States Code, shall have jurisdiction over any actions arising under this Act. For purposes of this Act, American Samoa shall be included within the judicial district of the District Court of the United States for the District of Hawaii.

(d) REWARDS.—Upon the recommendation of the Secretary, the Secretary of the Treasury may pay an amount equal to one-half of the civil penalty or fine paid, but not to exceed $2,500, to any person who furnishes information which leads to a finding of civil violation or a conviction of a criminal violation of any provision of this Act or any regulation or permit issued under this Act. Any officer or employee of the United States or of any State or local government who furnishes information or renders service in the performance of his official duties shall not be eligible for payment under this section.

(e) ENFORCEMENT.—

(1) The provisions of this Act and any regulation or permit issued under to this Act shall be enforced by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, or all such Secretaries. Each such Secretary may utilize by agreement, with or without reimbursement, the person-

nel, services, and facilities of any other Federal agency or any State agency for purposes of enforcing any provision of this Act.

(2) The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued under this Act.

(3) Any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating, to enforce any provision of this Act may detain for inspection and inspect any package, crate, or other container, including its contents, and all accompanying documents, upon importation or exportation. Such person may make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may execute and serve any arrest warrant, search warrant, or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of any provision of this Act. Such person so authorized may search and seize, with a warrant in such manner and to such extent as is legal under the Constitution. Any item so seized shall be held by any person authorized by the Secretary, the Secretary of the Treasury, or the Secretary of the Department in which the Coast Guard is operating pending disposition of civil or criminal proceedings, or the institution of an action in rem for forfeiture of such item pursuant to paragraph (4) of this subsection, except that such Secretary may, in lieu of holding such item, permit the owner or consignee to post a bond or other surety satisfactory to such Secretary, but upon forfeiture of any such property to the United States, or the abandonment or waiver of any claim to any such property, it shall be disposed of (other than by sale to the general public) by such Secretary in such a manner, consistent with the purposes of this Act, as such Secretary shall by regulation prescribe.

(4)(A) Any item possessed, sold, purchased, offered for sale, transported, delivered, received, carried, shipped, exported, or imported contrary to the provisions of this Act or any permit or regulation issued under this Act shall be subject to forfeiture to the United States.

(B) Any vessel, vehicle, aircraft, or other means of transportation used to aid the possessing, selling, purchasing, offering for sale or purchase, transporting, delivering, receiving, carrying, shipping, exporting, or importing of any item in violation of this Act or any permit or regulation issued under this Act shall be subject to forfeiture to the United States upon conviction of a criminal violation pursuant to subsection (b) of this section.

(5) All provisions of law relating to the seizure, forfeiture, and condemnation of a vessel for violation of the customs laws, the disposition of such vessel or the proceeds from the sale thereof, and the remission or mitigation of such forfeiture, shall apply to the seizures and forfeitures incurred, or alleged to have been incurred, under the provisions of this Act, to the extent that such provisions of law are applicable and not inconsistent with the provisions of this Act, except that all powers, rights, and duties conferred or imposed by the customs laws upon any officer or employee of the Department of the Treasury shall, for purposes of this Act, be exercised or performed by the Secretary or by such persons as he may designate.

(f) REGULATIONS.—The Secretary, the Secretary of the Treasury, and the Secretary of the Department in which the Coast Guard is operating, are authorized to promulgate such regulations as may be appropriate to enforce the provisions of this Act and charge reasonable fees for expenses to the Government connected with permits or certificates issued pursuant to this Act, including processing applications and reasonable inspections, and with the transfer, board, handling or storage of items seized and forfeited under this Act. All such fees collected pursuant to this subsection shall be deposited in the Treasury to the credit of the appropriation which is current and chargeable for the cost of furnishing the services. Appropriate funds may be expended pending reimbursement from parties in interest.

(g) CITIZEN SUITS.—

(1) Except as provided in paragraph (2) of this subsection any person may commence a civil action on his own behalf—

(A) to enjoin any person alleged to be in violation of any provision of this Act or regulation issued under the authority of this Act; or

(B) to compel the Secretary, Secretary of the Treasury, or Secretary of the Department in which the Coast Guard is operating to apply the prohibitions set forth in or authorized by this Act.

The district courts shall have jurisdiction, without regard to the amount in controversy or the citizenship of the parties, to enforce any such provision or regulation, as the case may be. In any civil suit commenced under subparagraph (B) the district court shall compel the Secretary, or Secretaries, to apply the prohibition sought if the court finds that the allegation is supported by substantial evidence.

(2)(A) Any action under this subsection may be brought in the judicial district in which the violation occurs.

(B) In any such action under this subsection in which the United States is not a party, the Attorney General, at the request of the Secretary, may intervene on behalf of the United States as a matter of right.

(3) The court, in issuing any final order in any action brought pursuant to paragraph (1) of this subsection, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate.

(4) Any injunctive relief granted pursuant to this subsection shall not restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any standard or limitation or to seek any other relief.

(h) COORDINATION WITH OTHER LAWS.—Nothing in this Act shall be construed as superseding or limiting in any manner the functions and responsibilities of the Secretary under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.) or of the Secretary of the Treasury under section 527 of the Tariff Act of 1930 (19 U.S.C. 1527) or under any other section of such Act.

PREEMPTION

SEC. 7. Any State law or regulation which applies with respect to the importation or exportation of elephant products or interstate or foreign commerce involving elephant products is void to the extent that it may effectively—

(1) permit what is prohibited by this Act or by any regulation issued under this Act, or

(2) prohibit what is authorized pursuant to any permit or any regulation issued under this Act.

DEFINITIONS

SEC. 8. For purposes of this Act—

(1) The term "elephant" means any animal of the species *Loxodonta africana* or *Elephas maximus*.

(2) The term "elephant product" means any part of an elephant or any product composed in whole or in part of any part of an elephant.

(3) The term "import" means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

(4) The term "interstate or foreign commerce" means any transaction—

(A) between any person in any State and any person outside of such State,

(B) between persons in any State if the item involved is moving in any place outside of such State,

(C) between persons within one foreign country,

(D) between persons in two or more foreign countries, or

(E) between persons within the United States if the item involved is moving in any place outside of the United States.

(5) The term "commercial activity" means any activity of industry or trade, including the buying or selling of commodities and any activity conducted for the purpose of facilitating such buying or selling. Such term does not include exhibition of commodities by museums or similar cultural or historical organizations.

(6) The term "person" means any individual, corporation, partnership, trust, association, or any other private entity or any officer, employee, agent, department, or instrumentality of the Federal Government, of any State or political subdivision thereof, or of any foreign government.

(7) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

(8) The term "United States", when used in a geographical context, includes all States.

THE APPALACHIAN TRAIL

(Mr. MOORHEAD of Pennsylvania asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, last month the House approved H.R. 8803, amendments to the Scenic Trails Act to provide permanent protection to the Appalachian Trail. The vote was a resounding 419 to 12 in favor of the legislation.

A similar bill is now pending before the Senate Energy and Natural Resources Committee, where hearings were held November 1. I am convinced of the need for this legislation.

The following article from the New York Times graphically illustrates why increased Federal assistance is essential to the future existence and enjoyment of "the trail."

[From the New York Times, Nov. 10, 1977]

SPRAWLING DEVELOPMENT IS TREADING UPON THE APPALACHIAN TRAIL

(By Philip Shabecoff)

HARPERS FERRY, W. VA.—The hikers trudging the Appalachian Trail as it snaked along the top of the Blue Ridge paused a few minutes for a look at the long valley spreading far beneath them. Bathed in the late morning sunlight, the treetops glowed warmly in red, yellow and russet tints as far as the eye could see.

Steven Golden, the National Park Service's project assistant for the Appalahcian Trail, had a sly look in his eye as he gestured toward the shimmering mass of color. "People don't realize," he said, "What a lot of

work that takes. Volunteers had to paint every one of those leaves by hand."

It was a fine day for hiking "The Trail," as those familiar with the path call it. The sky was clear blue after several days of rain and the air was mild but bracing. Leaves crunched underfoot and the wet earth gave off a fragrant smell. As the group walked through the columns of oaks, hickories and maples, it was easy to imagine being in a wilderness instead of on the heavily used footpath only an hour away from the nation's capital.

DEVELOPMENT AROUND THE EDGES

But as the path curved sharply, the illusion was quickly dispelled. There, crowding right up to the edge of the trail, was a clearing filled with an unpainted house, ramshackle trailers, a rusting old stove, and piles of used rubber tires. A German shepherd snarled and strained at its chain as the hikers passed by.

The Appalachian Trail is in trouble.

For much of the 2,030-mile length of the Maine-Georgia route, particularly in the crowded mid-Atlantic and New England states, developers, road builders and industry are lapping around the edges.

Already, 181 miles of the trail require walking along roads instead of through woods. Housing developments are springing up along the trail's right-of-way. Second-home builders are snapping up private lands through which the trail passes.

"It's not much of a hiking experience when you can see into people's backyards and swimming pools as you go," said Henry W. Lautz, executive director of the Appalachian Trail Conference, which coordinates the volunteer efforts to maintain the trail.

The pressures for the land have continued to build along the crowded Eastern Seaboard. "If we don't do something soon," said Mr. Lautz, "we won't have an Appalachian Trail."

Last month, the House of Representatives passed amendments to the National Trails Systems Act that would permit the Federal Government to condemn and buy up to 125 acres for every mile of trail. The House also voted to make $90 million available for land acquisition.

With this authority, the Government would be able to create a buffer zone of 500 feet on each side of the trail, enough to preserve the natural character of the route.

Currently, the Government is authorized, with $5 million, to acquire only 25 acres for each mile of trail, which could provide a protective strip of just 50 feet on each side of the path.

The new legislation passed the House by a vote of 409 to 12. The Senate is considering similar amendments and is likely to adopt them.

"As a political issue, the Appalachian Trail is like apple pie," Mr. Lautz said. "Nobody is against it." He added: "This is as good a chance as we've ever had. If this goes through, it will be enough to preserve the trail and the hiking experience it can give indefinitely."

A TOUGH HURDLE

But funding measures for the land acquisition, even after the legislation was passed by both houses, would still have to go through the appropriation process on Capitol Hill, and Congress has repeatedly demonstrated that that can be a tough hurdle.

Some four to five million people hike the trail each year, not counting the millions more who come just to walk for a mile or two during the day in some accessible areas. About 300 people a year hike the entire Maine-to-Georgia route, taking three months or more to do so.

The trail is considered one of the most valuable outdoor recreation areas in the East, all the more so as 70 percent of the available recreation land is in the Western part of the country while 60 percent of the population is in the East.

In part because of its proximity to major urban centers, including New York and Washington, the trail has been increasingly subjected to uses for which it was not intended.

MOTOR BIKES AND BEER CANS

Motor-bikers illegally disturb the tranquility that the long path was meant to offer. A pile of beer cans and other garbage at a shelter near Harpers Ferry gave testimony of a party by nonhikers. Graffiti scrawled on the shelter noted that it had been used for an "Elvis Presley memorial party."

The trail, a hodgepodge of Federal, state and private ownership, is maintained largely by an army of volunteers, some of whom have been at it since the trail opened more than 50 years ago. In the South, much of the trail runs through national or state parkland and needs no buffer zones to insulate it.

But more than 650 miles of the footpath, which Mr. Lautz says is the world's longest marked trail, is without any legal protection.

Unless the Government acquires the land soon, Mr. Lautz warned, the trail could vanish before the pressures of soaring land values and sprawling development.

DR. BOURNE ON SMOKING AND HEALTH

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PERKINS. Mr. Speaker, I commend for the attention of my colleagues the remarks of Dr. Peter Bourne, Special Assistant to the President for Health Issues, before the Ad Hoc Committee on Tobacco and Smoking Research on November 10.

For all who are concerned about the issue of smoking and health, Dr. Bourne's remarks are "must" reading.

The remarks follow:

REMARKS OF DR. PETER BOURNE

The issue of tobacco related health problems continues to be one touching the lives of almost everyone in the country. Yet it is a problem which the government alone cannot solve. President Carter is very concerned about tobacco use and the health hazards associated with it. However, he set forth during his Presidential campaign his belief that, "the American people have been adequately warned". He also said that if through research we discover, "that smoking cigarettes is more dangerous than we thought, I would be very eager to see the government present that information to the public in a most forceful way". A commitment we intend to keep. Yet, despite the warnings, not enough Americans are heeding them. Cigarette consumption in the United States is up from 511 billion a year in 1964 to more than 600 billion today.

The strategy which the federal government adopts must above all be one that works, but also one that deals realistically with the industry and social fabric which over the years has built up around cigarette use. No matter how much we may favor prohibition of tobacco products, we are 300 years too late.

This is one area where we need to concentrate our research efforts on a number of various issues associated with tobacco use and the responsibility of the federal government to come up with a policy that minimizes the health hazards of our citizens, while still being responsive to our 600,000 farm families that derive their income from tobacco. On October 12, 1976 then-candidate Carter said "I personally see no need to do away with a program that costs the government next to nothing, while enabling so many hard working families to earn a living". To date, no one has been able to say why or which social and personality factors predispose and lead people to acquire the smoking habit or what behavorial differences there are between smokers and non-smokers. We need to continue extensive studies to find the solutions to these and other problems that smoking may cause. Regarding the relative importance of our research efforts, I believe that the development, if possible, of a safer cigarette should have a high priority. It may well be that this will not prove a fruitful course to pursue.

Many people who honestly do not want to smoke cigarettes cannot stop. To them smoking is a relaxing tranquil experience which gives them pleasure and relief at times of stress. It is the two-fold responsibility of the government to reduce the risks associated with their habits as much as is feasible and to see to it that they receive notification of those risks.

As a part of our effort, research should center upon the identification and analysis of tobacco components.

There should be no automatic assumptions in such research that there are no beneficial effects of tobacco use. It may be products of tobacco have beneficial or mixed effects. The safer cigarettes should not be assumed to be one of low tar *and* low nicotine. It may be that the components of "tar" causes lung cancer and other side effects and that nicotine does not. Thus, if it is true that the lowered nicotine in cigarettes actually increases the number of cigarettes smoked, low nicotine ones may increase the hazards of tobacco smoke rather than reduce them.

While it is true that this and allied research could lead to the development of blocking agents, the failure of those who treat alcoholism and drug abuse to find a means of preventing relapses after the use of existing blocking agents, leads me to believe that the bulk of our research dollars should be expended on the acquisition of basic knowledge rather than in search of an effective "cure". President Carter, in a message to Congress on August 2, directed Secretary Califano to study the feasibility of making the Addiction Research Center responsible for coordinated research on a variety of drugs including opiates, alcohol, and tobacco. He also said that, "a sustained effort must be made to identify the reason that people turn to drugs including alcohol and cigarettes". This is an area where we have much to learn.

Research in the area of high risk occupational exposure should not be centered solely on tobacco. It should also include all factors of the occupational environment. For example, take a high risk industry such as asbestos. The components of asbestos itself may constitute a greater environmental health hazard than do cigarettes alone. The same is true of other industrial pollutants. Research regarding the effects of smoking in confined areas should not automatically begin with the answer that smoking should be prohibited. It is essential that the strategy be one that will work and is acceptable to the American people. Better ventilation may provide a better and easier answer in some instances.

We must also expand our research to include joint studies between cigarettes and other products and educate the public to these findings. Recently, a study was completed on women who take oral contraceptives and smoke. It was shown that these two things in combination increased the risks of oral contraceptives. It is mandatory that more studies are done that show relationships between smoking and other products so that a person deciding whether or not to smoke or whether or not to take birth control pills will be able to make an educated decision based on all of the known factors involved.

Addiction is a curious phenomenon. Twenty years ago we thought we were able to identify certain groups of people who would be prone to addiction and to gear our prevention material to them. We thought only black males between 18–25 would become heroin addicts, only jazz musicians would smoke marijuana, only bored nervous housewives would grow dependent on valium, only southern gentlemen would become alcoholics, etc. However, these stereotypes proved to be false and now addictions are seen as a cross-cultural, age and race phenomenon. We need to understand why smokers smoke and how we can diminish any harm their tobacco use may cause them.

Additionally, our experience with other addictions suggests that federally funded "I Quit" programs may be too costly and the diversion of already too scarce federal research funds may cost us lives as well as dollars. These programs may best be left up to private citizen groups.

Our experience with drug abuse education and prevention has taught us that changing behavior in this manner is fraught with problems, and it is by no means as simple an issue as it appears on the surface.

I am not sure that we can yet demonstrate that programs designed to scare young people out of smoking are cost-effective. Federal anti-narcotics educational efforts have led to the creation of vested interest prohibition bureaucracy which competes for grants, but has little overall impact on drug problems.

While some anti-smoking educational efforts with highly educated groups such as physicians have been successful, other anti-educational efforts, especially those which seek to scare people away from harmful substances, have led to more rather than less drug abuse.

We must be aware of certain facts. While the majority of the public does not smoke and is annoyed by cigarette smoke (and a majority of smokers want to quit), an overwhelming majority wants a minimum of government interference in their private lives. Thus the anti-public smoking campaign must be one in which the potential for reducing cigarette smoking and especially the health hazards exceeds the potential for antagonizing a significant segment of the population.

Because of the political, social, and economic ramifications, it is unrealistic for us to suggest a tobacco prohibition as a feasible short-term goal, and that campaign would bring into question our own credibility. It is there that we are on our weakest ground. While prohibiting use of cigarettes in public places would please non-smokers, it would not necessarily reduce overall cigarette consumption or reduce the health consequences. We have done little research on the health hazards, if any, of other people's cigarettes. We are attempting to issue orders to a large, if annoying, segment of the population. The social disruption and discord engendered by this struggle exacerbates tensions and problems. For example, if our behavioral research shows that a high percentage of cigarette smokers began the habit in a rejection of authority then we must be sure that the imposition of government authority will not do more to increase their dependence rather than encourage them to quit. The reaction of those who compulsively overeat, overdrink, or overwork may be precisely the opposite of what we intended. Obligatory measures to reduce cigarette use should clearly be pursued cautiously, being sure that we know what the impact is that we are having.

I believe that we should perhaps stick to our best known and most valid arguments. By turning to compulsion and by seeking to affect smoking habits by indirection and inconvenience we may present the public with our most selfish and, therefore, our least valid virtue: our own annoyance at the odor of cigarette smoke.

The number of non-smokers whose health is adversely affected by the cigarette smoke of others may be very small. Even as to them, there has been inadequate research as yet regarding the effects, if any, of sidestream or ambient smoke. It should be a high priority for us to pursue this area of research, because should we find some direct effect on other people's health, it would dramatically bolster the rationale for more stringent measures against smokers.

There are active anti-cigarette lobbies which are against people smoking in public places. They have been instrumental in restrictions on seating in airplanes and banning smoking in elevators, etc. We must, however, be cautious in jeopardizing our credibility in a struggle which involves the competing rights of others. There is a small minority of people who have a hypersensitivity to smoke; we cannot write the laws to protect this small group, overlooking a much larger group who are entitled to the same basic rights, but rather they must take special care of themselves and we will do what we can to help them. To protect and to alleviate the annoyance to nonsmokers of cigarette smoking, notice requirements posted at public places would eliminate the problem. Private proprietors could simply be required to notify the public of their policy regarding smoking, no smoking, and private sections.

In short, regarding that problem, I believe that we should rely primarily upon the democracy of the market place. If the proprietors of stores and restaurants are required to prominently post smoking policy notices on the outside of their establishments and in the entrance way so smokers and non-smokers will be put on notice. Then they can vote their preferences with their pocket books.

I believe that research remains the key to effective public policy in this area. Adequate scientific information would strengthen our hand enormously in taking some of the more decisive steps we need to take and in reducing much of the political controversy that surrounds this issue. Rather than creating an adversary relationship, I feel we should try to work more closely with those who would be most threatened by a dramatic change in use patterns. Within the tobacco industry itself, there must be some who would help and seek help from us.

The research of that industry would be of great value to us, and eventually, we must seek out from within that industry more progressive forces which must exist.

The two alternatives are to do nothing or to prohibit the product.

Efforts to make outcasts of smokers are similar to the worst appeals of existing drug abuse programs. Those of us in the health fields should have learned that one of our greatest problems in the treatment of alcohol and drug abuse is the social opprobrium attached to alcoholics and drug abusers. Psychiatrists know that decades of outcasting the mentally ill worked against the development of sound treatment programs.

Those of us who deal with disease must face up to this problem. For we risk hurting rather than helping the very people we are trying to help.

Presently, as one of my other areas of responsibility, I am studying the issue of world hunger. We have asked the private sector—those who have the greatest influence on the supply and demand of food, to contribute to our discussions. Even though their interest may differ from ours, we have found them to be most helpful and they are an excellent source of invaluable information. They are delighted to be involved. This may be true of at least the more progressive elements of the tobacco industry. Their advertising expenditures for the promotion of low-tar and low-nicotine cigarettes indicates that at least some of them would be willing to cooperate in the development of a safe product.

To me the soundest programs will aim at the problems of the smoking rather than the non-smoking population; at problems presented by an existing 300-year old agriculturally based domestic industry; at the reduction of cancer and other health problems rather than at punishment.

This Administration is strongly committed to addressing this problem. Secretary Califano has taken a deep personal interest in this issue and is giving it the kind of priority that is essential if we are to significantly reduce the depressng toll that cancer takes on the American people every year. However, if we are to accomplish this goal, it cannot be done by the Federal Government alone. The role of your organization is crucial for in the final analysis, education of the public is the only real solution to the problem.

EXECUTIVE ORDER KEEPS VETERANS IN SCHOOL

(Mr. MILLER of Ohio asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MILLER of Ohio. Mr. Speaker, I am pleased to report that President Carter has signed an Executive order which permits the payment of educational benefits to veterans and their dependents when schools are temporarily closed to conserve energy.

Because many schools and colleges have extended their traditional winter break to conserve energy, thousands of veterans faced a cutoff of their GI bill benefits this year.

Under previous VA regulations, if the period between quarters or semesters exceeds 30 days, veterans educational payments can only be made under emergency situations or by Executive order of the President. Planned school energy conservation programs are not considered of an emergency nature even though the President has referred to the energy crisis as the moral equivalent of war.

On September 27 I introduced H.R. 9338 with 15 cosponsors, to extend the payment period from 30 to 45 days when a school closes as a result of an energy conservation program or fuel curtailment. With so little time remaining in this session to act on the bill, we sought to achieve the intent of the bill through administrative action. The Executive order will do the job at least for this year.

I wish to thank my friend from Ohio (Mr. SEIBERLING) for all of his enthusiastic support and work on this change. Our other colleague from Ohio (Mr. MOTTL) who serves on the Veterans' Affairs Committee also rendered invaluable assistance. The responsiveness and cooperation we received from the White House and the Veterans' Administration was most encouraging.

What this Executive order means is that thousands of veterans and eligible dependents who depend on the GI bill for their schooling as well as subsistence, and who would otherwise have been unfairly penalized by energy conservation programs undertaken by our colleagues will be able to continue their education without hardship.

Following is the text of the Executive order:

EXECUTIVE ORDER—PAYMENT OF EDUCATIONAL BENEFITS TO VETERANS AND DEPENDENTS WHEN SCHOOLS ARE TEMPORARILY CLOSED TO CONSERVE ENERGY

By virtue of the authority vested in me by clause (A) of Section 1780(a) of Title 38 of the United States Code, and as President of the United States of America, in order to establish a national policy in regard to payment of educational benefits to veterans and their dependents during periods in which schools are closed to conserve energy, it is hereby ordered as follows:

SECTION 1. Whenever an educational institution submits evidence which satisfies the Administrator of Veterans' Affairs that energy consumption will be abnormally high during the winter months or that available energy supplies will be inadequate to meet the needs of the school, and that, in the interest of energy conservation, the institution plans to close between semesters or terms for a period not to exceed 45 days, the Administrator may continue to pay monthly educational assistance benefits to veterans and eligible persons enrolled in such schools. Such authority may be exercised only once during any 12-month period with respect to any educational institution.

SEC. 2. The Administrator shall advise veterans and other eligible persons of the effect of accepting educational assistance benefits under the provisions of Section 1 of this Order on their period of entitlement.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BAUMAN) to revise and extend their remarks and include extraneous matter:)

Mr. MARKS, for 5 minutes, today.

(The following Members (at the request of Mr. KILDEE) to revise and extend their remarks and include extraneous matter:)

Mr. VANIK, for 5 minutes, today.
Mr. MATTOX, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. GIAIMO, for 5 minutes, today.
Mr. BRADEMAS, for 10 minutes, today.
Mr. BEILENSON, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BAUMAN) and to include extraneous matter:)

Mr. QUIE.
Mr. HAGEDORN.
Mr. ANDERSON of Illinois.
Mr. STEERS.
Mr. KEMP.
Mr. MARKS.
Mr. SYMMS in two instances.
Mr. ASHBROOK in three instances.
Mr. CORCORAN of Illinois.
Mr. ROUSSELOT.
Mr. WHALEN.
Mr. DERWINSKI in two instances.
Mr. DUNCAN of Tennessee.

(The following Members (at the request of Mr. KILDEE) and to include extraneous matter:)

Mr. PEPPER.
Mr. JONES of Oklahoma.
Mr. VANIK in two instances.
Mr. MINISH.
Mr. VENTO in two instances.
Mr. ANDERSON of California in three instances.
Mr. GONZALEZ in three instances.
Mr. WALGREN.
Mr. WOLFF in two instances.
Mrs. KEYS.
Mr. MAZZOLI.
Mr. DODD.
Mr. MINETA.
Mr. LLOYD of California.
Mr. VAN DEERLIN.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and a joint resolution of the Senate of the following titles:

S. 1750. An act to require studies concerning carcinogenic and other toxic substances in food, the regulation of such food, the impurities in and toxicity of saccharin, and the health benefits, if any, resulting from the use of nonnutritive sweeteners; to prohibit for eighteen months the Secretary of Health, Education, and Welfare from taking certain action restricting the continued use of saccharin as a food, drug, and cosmetic; to require certain labels and notices for foods containing saccharin; and for other purposes; and

S.J. Res. 81. Joint resolution to express the sense of the Congress that, in the light of history, the third Thursday in December 1977, would be a most appropriate day for designation as the "National Day of Prayer for the Year of 1977," and respectively to request that the President, under the provisions of Public Law 82-324, issue a proclamation designating such date as a "National Day of Prayer for the Year 1977."

ENROLLED BILLS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 422. An act to amend the Tariff Schedules of the United States to provide duty-free treatment of any aircraft engine used as a temporary replacement for an aircraft engine being overhauled within the United States if duty was paid on such replacement engine during a previous importation.

H.R. 2661. An act for the relief of Patricia R. Tully.

H.R. 4049. An act to amend the Regional Rail Reorganization Act of 1973 to authorize additional appropriations for the United States Railway Association, and for other purposes.

H.R. 7074. An act to provide improved authority for the administration of certain National Forest System lands in Oregon.

H.R. 8175. An act to amend the Veterans' Administration Physican and Dentist Pay Comparability Act of 1975, as amended, in order to extend the authority to enter into special-pay agreements with physicians and dentists; to amend title 38 of the United States Code to modify certain provisions relating to special-pay agreements; and for other purposes.

H.R. 8701. An act to amend title 38, United States Code, to increase the rates of vocational rehabilitation, educational assistance, and special training allowance paid to eligible veterans and persons, to make improvements in the educational assistance programs, and for other purposes.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and joint resolutions of the House of the following title:

On November 4, 1977:

H.R. 2501. To eliminate a conflict between the official cadastral survey and a private survey of the so-called World Tract within the Medicine Bow National Forest, State of Wyoming;

H.R. 7278. To amend section 10 of the Merchant Marine Act, 1936;

H.R. 8346. To amend the Urban Mass Transportation Act of 1964 to revise the program of Federal operating assistance provided under section 17 of such act;

H.R. 8499. To amend the Alaska Native Claims Settlement Act;

H.R. 8992. To amend title 3 of the United States Code to change the name of the Executive Protective Service;

H.R. 9019. To rescind certain budget authority contained in the message of the President of July 19, 1977 (H. Doc. 95-188), transmitted pursuant to the Impoundment Control Act of 1974;

H.R. 9512. To amend the Higher Education Act of 1965 to include the Trust Territory of the Pacific Islands in the definition of the term "State" for the purpose of participation in programs authorized by that act;

H.R. 9704. To amend the Federal Crop Insurance Act, and for other purposes;

H.R. 9710. To extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, to promote the accountability of the Federal Reserve System, and for other purposes;

H.R. 9836. To authorize the Architect of the Capitol to furnish chilled water to the Folger Shakespeare Library;

H.J. Res. 611. To extend the authority of the Federal Reserve banks to buy and sell certain obligations; and

H.J. Res. 621. Approving the Presidential decision on an Alaska natural gas transportation system, and for other purposes.

On November 8, 1977:

H.R. 2770. To amend 142 of title 28, United States Code, relating to the furnishing of accommodations to judges of the courts of appeals of the United States;

H.R. 6348. To convey to the Ely Indian Colony the beneficial interest in certain Federal land;

H.R. 8777. To amend the Appalachian Regional Development Act of 1965 to permit an extension of the period of assistance for child development programs while a study is conducted on methods of phasing out Federal assistance to these programs; and

H.J. Res. 643. Making further continuing appropriations for the fiscal year 1978, and for other purposes.

ADJOURNMENT

Mr. KILDEE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 6 minutes p.m.), under its previous order, the House adjourned until Friday, November 18, 1977, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2687. A letter from the Secretary of Agriculture, transmitting the initial revision to the regulations governing operations under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended, pursuant to section 408(d)(3) of the act; to the Committee on Agriculture.

2688. A letter from the General Counsel, U.S. General Accounting Office, transmitting a report on the release of certain budget authority, the deferral of which was proposed by the President and disapproved by the House or Senate; to the Committee on Appropriations.

2689. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the selected acquisition reports and SAR summary tables for the quarter ended September 30, 1977, pursuant to section 811(a) of Public Law 94–106; to the Committee on Armed Services.

2690. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of a construction project proposed to be undertaken by the Air Force Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2691. A letter from the Attorney General, transmitting a draft of proposed legislation to restrict the possession and carrying of pistols, other firearms, and other dangerous weapons by members of the District of Columbia Department of Corrections to periods of time when they are on duty and authorized by the Director of the District of Columbia Department of Corrections; to the Committee on the District of Columbia.

2692. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–96, "To establish a property tax exemption for single-family residential and cooperatively-owned property in the District of Columbia, and to provide additional circuit breaker relief to homeowners and renters in the District of Columbia who are over 62 years of age, blind or disabled," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2693. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–98, "To establish the real property and the personal property tax rates for tax year 1978," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

2694. A letter from the Assistant Secretary of Agriculture for Food and Consumer Services, transmitting the Department's recommendations for evaluating the nutrition and health benefits of the special supplemental food program for women, infants and children, pursuant to section 18 of the National School Lunch Act, as amended (89 Stat. 526); to the Committee on Education and Labor.

2695. A letter from the Acting Director, Office of Management and Budget, Executive Office of the President, transmitting a report on actions taken in response to the recommendations of the Board of Visitors to the U.S. Naval Academy, dated May 3 and 4, 1976, pursuant to section 6(b) of the Federal Advisory Committee Act; to the Committee on Government Operations

2696. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of a new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2697. A letter from the Secretary of the Interior, transmitting a report of studies of new areas with potential for inclusion in the National Park System, together with a list of 13 most important such areas; reports on threatened areas which are included on the Registry of Natural Landmarks; and reports on threatened areas of national significance listed on the National Register of Historic Places; pursuant to section 8 of Public Law 91–383, as amended (90 Stat. 1940) (H. Doc. No. 95–264); to the Committee on Interior and Insular Affairs and ordered to be printed.

2698. A letter from the Under Secretary of the Interior, transmitting a proposed plan for the use and distribution of Three Affiliated Tribes judgment funds in dockets 350–C and D before the Indian Claims Commission, pursuant to sections 2 and 4 of Public Law 93–134; to the Committee on Interior and Insular Affairs.

2699. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by Ambassadors-designate Thomas J. Corcoran and David T. Schneider, and by members of their families, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

2700. A letter from the Acting Comptroller General of the United States, transmitting a report on improvements needed in the Air Force's internal auditing (FGMSD–78–4, November 11, 1977); jointly, to the Committees on Government Operations, and Armed Services.

2701. A letter from the Acting Comptroller General of the United States, transmitting a report on improvements needed in the Navy's internal auditing (FGMSD–78–5, November 11, 1977); jointly, to the Committees on Government Operations, and Armed Services.

2702. A letter from the Acting Comptroller General of the United States, transmitting a report on the Office of Minority Business Enterprise's management assistance program (CED–77–136, November 10, 1977); jointly, to the Committees on Government Operations, and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee of Conference. Conference Report on H.R. 7 (Rept. No. 95–816). Ordered to be printed.

Mr. NIX: Committee on Post Office and Civil Service. Report on allocation of budget authority and outlays (Rept. No. 95–817). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDERSON of Illinois:

H.R. 10082. A bill providing for the erection of a monument in the National Cemetery at Arlington, Va., to members of the Armed Forces who served in Southeast Asia during the Vietnam era and who are missing in action; to the Committee on Veterans' Affairs.

By Mr. BEILENSON:

H.R. 10083. A bill to prohibit the importation or exportation and certain other transactions involving elephant products, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. JACOBS:

H.R. 10084. A bill to provide for the garnishment of the wages of Federal employees; to the Committee on Post Office and Civil Service.

By Mrs. KEYS (for herself and Mr. JACOBS):

H.R. 10085. A bill to amend titles II and XVI of the Social Security Act to liberalize the definition of disability and extend the trial work period under both the old-age, survivors, and disability insurance program and the supplemental security income program, and to further amend title XVI of such act to permit an individual to have certain additional income and assets and still qualify for supplemental security income benefits; to the Committee on Ways and Means.

By Mr. LLOYD of California:

H.R. 10086. A bill to strengthen Federal programs and policies for combating international and domestic terrorism; jointly, to the Committees on International Relations, the Judiciary, and Public Works and Transportation.

By Mr. MURPHY of New York:

H.R. 10087. A bill to provide for an updating of the Report of the Atlantic-Pacific Interoceanic Canal Study Commission; to the Committee on Merchant Marine and Fisheries.

By Mr. PEPPER:

H.R. 10088. A bill to amend the Domestic Volunteer Service Act of 1973 to provide that volunteers serving in the Service Corps of Retired Executives may provide services to certain home health agencies; to the Committee on Education and Labor.

By Mr. RANGEL (for himself, Mr. ADDABBO, Mr. BEDELL, Mr. CARR, Ms. CHISHOLM, Mr. CONYERS, Mr. DELLUMS, Mr. DIGGS, Mr. DRINAN, Mr. EDWARDS of California, Mr. EILBERG, Mr. FAUNTROY, Mr. HARRINGTON, Mr. MCHUGH, Mr. METCALFE, Mr. MITCHELL of Maryland, Mr. PEASE, Mr. PRICE, and Mr. WEISS):

H.R. 10089. A bill to amend the Foreign Assistance Act of 1961 to prohibit the assignment of international security assistance management teams, defense attachés, or other U.S. Armed Forces personnel to the Republic of South Africa; to the Committee on International Relations.

By Mr. RANGEL (for himself, Mr. ADDABBO, Mr. BEDELL, Mr. CARR, Ms. CHISHOLM, Mr. CONYERS, Mr. DELLUMS, Mr. DIGGS, Mr. DRINAN, Mr. EDWARDS of California, Mr. EILBERG, Mr. FAUNTROY, Mr. HARRINGTON, Mr. MCHUGH, Mr. METCALFE, Mr. MITCHELL of Maryland, Mr. PEASE, Mr. PRICE, Mr. SEIBERLING, and Mr. WEISS):

H.R. 10090. A bill to prohibit exports to the Republic of South Africa under the Arms Export Control Act of defense articles or services, to prohibit exports to the Republic of South Africa under the Export Administration Act of 1969 of items which might be used for military, law enforcement, or internal security purposes, and to prohibit exports to the Republic of South Africa under the Atomic Energy Act of 1954 of nuclear materials, facilities, and technology; to the Committee on International Relations.

By Mr. RANGEL (for himself, Mr. ADDABBO; Mr. CARR, Ms. CHISHOLM, Mr. CONYERS, Mr. DELLUMS, Mr. DIGGS, Mr. DRINAN, Mr. EILBERG, Mr. FAUNTROY, Mr. HARRINGTON, Mr. METCALFE, Mr. MITCHELL of Maryland, Mr. PEASE, Mr. PRICE, and Mr. WEISS):

H.R. 10091. A bill to amend the Tariff Schedules of the United States to prohibit the importation of coal and of certain articles of uranium, if the product of the Union of South Africa; to the Committee on Ways and Means.

By Mr. ROE:

H.R. 10092. A bill to require that the Hungarian Crown of Saint Stephen and other

relics of the Hungarian royalty remain in the custody of the U.S. Government and that they not be transported out of the United States, unless the Congress provides otherwise by legislation; to the Committee on International Relations.

By Mr. THOMPSON:

H.R. 10093. A bill to amend the National Labor Relations Act to insure proper recognition of professional nurses, to fulfill the intent of Congress in the enactment of Public Law 93-380 relating to the supervisory status of professional nurses, and to end the ongoing disruption of established bargaining units of professional nurses; to the Committee on Education and Labor.

By Mr. VANDER JAGT:

H.R. 10094. A bill to amend the Internal Revenue Code of 1954 to allow certain individuals whose employers make contributions to pension plans a deduction for their contributions to certain individual retirement savings plans; to the Committee on Ways and Means.

By Mr. WYDLER:

H.R. 10095. A bill to provide for permanent tax reductions for individuals and businesses; to the Committee on Ways and Means.

By Mr. YATRON:

H.R. 10096. A bill to direct the President to seek certain revisions of the Social Progress Trust Fund Agreement and to establish an Inter-American Fund for Educational Development; jointly, to the Committees on Banking, Finance and Urban Affairs, and International Relations.

By Mr. VANDER JAGT:

H.R. 10097. A bill for the relief of Reverend Harold A. Kirchenbauer; to the Committee on the Judiciary.

By Mr. WHALEN:

H.R. 10098. A bill for the relief of Daniel Eylon; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

334. By the SPEAKER: Petition of the National Association of State Departments of Agriculture, Washington, D.C.; relative to policy statements; to the Committee on Agriculture.

335. Also, petition of the National Convention, Women for Constitutional Government, Greenville, S.C., relative to the Panama Canal and Rhodesia; to the Committee on International Relations.

336. Also, petition of the City Council, Sharon, Pa., relative to a national steel policy; to the Committee on Ways and Means.

337. Also, petition of the Board of Directors, Texas and Southwestern Cattle Raisers Association, Fort Worth, Tex., relative to private water rights; jointly, to the Committee on Agriculture, and Interior and Insular Affairs.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

REGULATION OF LOBBYING ACT

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following registrations were submitted for the third calendar quarter 1978:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1977:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e.g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter
12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor* ("*Period*" from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures
9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year
11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Bruce Adams, 2030 M Street NW., Washington, D.C. 20036.
B. Common Cause, 2030 M Street NW., Washington, D.C. 20036.
D. (6) $5,849.47.

A. John J. Adams, Suite 1060, 1730 Pennsylvania Avenue NW., Washington, D.C. 20006.
B. Ethyl Corp., 330 South Fourth Street, Richmond, Va.
D. (6) $280.

A. John J. Adams, Suite 1060, 1730 Pennsylvania Avenue NW., Washington, D.C. 20006.
B. VEPCO, Seventh and Franklin Streets, Richmond, Va.
D. (6) $525.

A. William P. Adams, 1600 I Street NW., Washington, D.C. 20006.
B. Motion Picture Association of America, Inc., 1600 I Street NW., Washington, D.C. 20006.

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the second calendar quarter 1977:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES;

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report;

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

SENATE—*Tuesday, November 15, 1977*

The Senate met at 10 a.m. on the expiration of the recess, and was called to order by the Honorable DALE BUMPERS, a Senator from the State of Arkansas.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Holy Father, who of old hast led Thy children, we reverently pause before Thee to renew our vows. We thank Thee for changing seasons, for summer and winter, for night and day, for work and rest, for times in session and times in preparation. Show us that whatever the season or schedule Thou art with us and we are with Thee.

In this temple of democracy, we pray for strength for our burdens, wisdom for our problems, insight for our times, and vision which keeps our eyes on far horizons. Above all, undergird our faith with the assurance that—

"Under the shadow of Thy throne, still may we dwell secure,
Sufficient is Thine arm alone, and our defense is sure."

We ask it in that name which is above every name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., November 15, 1977.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DALE BUMPERS, a Senator from the State of Arkansas, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. BUMPERS thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Tuesday, November 8, 1977, and Friday, November 11, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the two nominations under "Department of Justice."

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPARTMENT OF JUSTICE

The second assistant legislative clerk read the nomination of Gerald D. Fines, of Illinois, to be U.S. attorney for the southern district of Illinois for the term of 4 years.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Audrey A. Kaslow, of California, to be a commissioner of the U.S. Parole Commission for the term of 6 years.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the votes by which the nominations were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I so move.

Mr. HANSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess for 2 minutes.

The ACTING PRESIDENT pro tempore. Will the Senator withhold his request so that the Chair can make an announcement?

Mr. ROBERT C. BYRD. Yes.

APPOINTMENT BY THE VICE PRESIDENT

The ACTING PRESIDENT pro tempore (Mr. BUMPERS). The Chair, on behalf of the Vice President, appoints the Senator from Kansas (Mr. DOLE) to attend the United Nations World Food Conference, to be held in Rome, Italy, November 12 to December 1, 1977.

AUTHORIZATION FOR RELEASE OF CERTAIN PAPERS AND INFORMATION IN THE CASE OF COMMON CAUSE AGAINST BAILAR

Mr. ROBERT C. BYRD. Mr. President, at the request of Mr. METCALF, I send to the desk a Senate resolution and I ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The clerk will report.

The legislative clerk proceeded to read the resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the resolution be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, pursuant to actions taken on November 4 with respect to Common Cause against Bailar by the Senate Democratic and Republican Conferences and leadership, this resolution authorizes submissions of specified materials to the court.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution (S. Res. 325) together with its preamble, is as follows:

S. RES. 325

Whereas, in the case of Common Cause, et al. against Benjamin Bailar, et al. (Civil Action Numbered 1887–73), pending in the United States District Court for the District of Columbia, subpoenas have been issued and served upon employees of the Senate, including employees serving in the offices of Senators, directing them to appear and give testimony and produce documents, papers, or records;

Whereas, in response to matters not previously disposed of by resolution of the Senate, arising in connection with said subpoenas, which were pending as of 4 April 1977, the counsel for the subpoenaed Senate employees was authorized by S. Res. 136, considered and agreed to by the Senate on 29 April 1977, to furnish information or affidavits specified therein for *in camera* inspection by such court;

Whereas, after *in camera* inspection, the court has concluded that the materials furnished for such inspection by counsel for the subpoenaed Senate employees are needed to resolve the issues in this case; and

Whereas the dissemination of information by a Senator to his constituency concerning legislation proposed or enacted by the Congress, the administration of such legislation by the executive branch and the review of such matters by the courts is a part of the official business of a Senator under the Constitution of the United States:

Now therefore, be it

Resolved, That by the privileges of the Senate and by Rule XXX of the Standing Rules of the Senate, no officer or employee of the Senate is authorized to produce documents, papers, or records of the Senate but by order of the Senate, and information secured by officers and employees of the Senate pursuant to their official duties may not be revealed without the consent of the Senate.

SEC. 2. When it appears that testimony of employees of the Senate is needful for use in any court for the promotion of justice and, further, that such testimony may involve documents, papers, or records under the control of or in the possession of such employees in the course of their official duties, and communications, conversations, and matters related thereto, the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate.

SEC. 3. Therefore, the counsel for the subpoenaed Senate employees is authorized to furnish the following material previously

supplied for *in camera* inspection only under authority of S. Res. 136, for use in this proceeding without such restriction but subject to the protective provisions in the stipulation previously approved in this matter:

(1) Information on volume of mail for the year 1972 with the identity of the Senators coded, set out in the same fashion as the information previously authorized to be submitted to the court and to the plaintiffs for 1973, 1974, and 1975;

(2) Those copies of what are known as computer code counts, identifying the categories of codes maintained in the Senate computer by each Senate office and the number of names in each category, which were retained by the Computer Center in 1975, and the computer code count made near the close of 1976 for the Senate offices not included in the 1975 group, in each case with the identity of the Senators coded; and

(3) Each administrative assistant is authorized to submit by such counsel in a form that the identity of the Senator is coded consistent with the manner in which earlier information was submitted in this case, the meaning assigned to such codes to the extent that he may have that information in his possession, as well as such general or specific instructions which he has in his possession with respect to the use of the code categories maintained by that office, again with the identity of the Senator coded.

SEC. 4. The Senate also authorizes the counsel for subpenaed Senate employees to file the appropriate motions for leave to intervene on behalf of the Senate in order to protect and defend the duties, responsibilities, rights, and privileges of the Senate under article I of the Constitution.

SEC. 5. The Secretary of the Senate shall transmit a copy of this resolution to the United States District Court for the District of Columbia.

AUTHORIZATION FOR CERTAIN ACTIONS TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Senators may have until 3 p.m. today to insert statements in the RECORD, introduce bills and resolutions, petitions and memorials, and that committees may have until 5 p.m. today to file reports.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT RECEIVED DURING RECESS

Under authority of the order of the Senate, messages from the President of the United States submitting sundry nominations were received on November 8, 11, and 14, 1977, during the recess of the Senate and were referred to the appropriate committees.

On November 14, 1977, a message was received withdrawing the nomination of Robert H. Mendelsohn, of California, to be an Assistant Secretary of the Interior.

PRESIDENTIAL MESSAGE RECEIVED DURING RECESS—REPORT ON FOUR DEFERRALS—PM 131

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was referred jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations; the Budget; Armed Services; Energy and Natural Resources; Human Resources; Foreign Relations; Commerce, Science, and Transportation; Environment and Public Works; and Finance:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four new deferrals totaling $908.6 million in budget authority. The deferrals affect the Departments of Defense and Energy, the National Science Foundation, and the Emergency refugee and migration assistance fund.

In addition, I am reporting revisions to five deferrals previously transmitted. Three of these revisions change the agency name and related identifiers of the deferrals from the abolished Energy Research and Development Administration to the new Department of Energy. The amount deferred for the Department of Energy's Plenum Fill experiment has also been increased by $0.8 million. In addition, two supplementary reports for deferrals in the Office of the Secretary of the Treasury report an increase of $26.3 million in the amount deferred.

The details of each deferral are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, *November 10, 1977.*

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which referred as indicated:

EC–2265. A letter from the Attorney General of the United States transmitting a draft of proposed legislation to amend Chapter 2, title 18, United States Code, and sections 101 and 902 of the Federal Aviation Act of 1958, to implement the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes (with accompanying papers).

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that EC–2265, a communication relative to the Montreal Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, be referred jointly to the Committees on Commerce, Science, and Transportation, and the Judiciary.

The PRESIDING OFFICER. Without objection, it is so ordered.

EC–2266. A letter from the Secretary of Labor transmitting, pursuant to law, the 1976 report of on the administration of the Employee Retirement Income Security Act of 1974 covering the period through December 31, 1976 (with an accompanying report).

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that EC–2266, a communication relative to the administration of the Employee Retirement Income Security Act of 1974, be referred jointly to the Committees on Finance and Human Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

EC–2267. A letter from the Acting Director of the Office of Management and Budget, Executive Office of the President transmitting, pursuant to law, the cumulative report on rescissions and deferrals for November 1977 (with an accompanying report); jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations; the Budget; Armed Services; the Judiciary; Governmental Affairs; Agriculture, Nutrition, and Forestry; Commerce, Science, and Transportation; Energy and Natural Resources; Finance; Environment and Public Works; and Human Resources, and ordered to be printed.

EC–2268. A letter from the Administrator of the Rural Electrification Administration transmitting, pursuant to law, a commitment to guarantee a non-REA loan in the amount of $722,000,000 to the Hoosier Energy Division, Indiana State-wide Rural Electric Cooperative, Inc., of Bloomington, Indiana (with accompanying papers); to the Committee on Appropriations.

EC–2269. A letter from the Acting Administrator of the Rural Electrification Administration transmitting, pursuant to law, the approval of an REA insured loan in the amount of $10,000,000 and a commitment to guarantee a non-REA loan in the amount of $10,225,000 to Minnkota Power Cooperative, Inc., of Grand Forks, North Dakota (with accompanying papers); to the Committee on Appropriations.

EC–2270. A letter from the Assistant Secretary of Defense transmitting, pursuant to law, a report of the value of property, supplies, and Commodities provided by the Berlin Magistrate, and under the German Offset Agreement, for the quarter July 1, 1977 through September 30, 1977; to the Committee on Appropriations.

EC–2271. A letter from the Administrator of the General Services Administration transmitting, pursuant to law, the Stockpile report to the Congress for October 1976 through March 1977 (with an accompanying report); to the Committee on Armed Services.

EC–2272. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a supplemental submission to the consolidated Defense Related Employment Report for fiscal year 1976 (with an accompanying report); to the Committee on Armed Services.

EC–2273. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of 25 construction projects to be undertaken by the Army National Guard (with accompanying papers); to the Committee on Armed Services.

EC–2274. A letter from the Acting Comptroller General of the United States transmitting a secret communication concerning the Air Force's program to build a test facility entitled TRESTLE (with an accompanying report) (PSAD–77–159); to the Committee on Armed Services.

EC–2275. A letter from the Secretary of Housing and Urban Development transmitting, pursuant to law, the first annual report on the Urban Homesteading Program evaluating the Urban Homesteading Demonstration Program (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–2276. A letter from the President of the Export-Import Bank of the United States transmitting, pursuant to law, a report on loan, guarantee and insurance transactions supported by Eximbank during September 1977 to Communist countries as defined in section 620(f) of the Foreign Assistance Act of 1961 (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–2277. A letter from the Secretary of Housing and Urban Development transmitting, pursuant to law, a report on the determination that operation of the Flood Insurance Act of 1968 would be assisted mate-

rially by the Federal Government's assumption, in whole or in part, of the operational responsibility for flood insurance (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC–2278. A letter from the Acting General Counsel of the Department of Energy transmitting, pursuant to law, notice of two meetings related to the International Energy Program (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–2279. A letter from the Deputy Secretary of the Interior transmitting, pursuant to law, a copy of the report on consumptive uses and losses in the Colorado River system for the period 1971–1975 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–2280. A letter from the Deputy Assistant Secretary of the Interior transmitting, pursuant to law, a copy of a proposed contract with Unidynamics/St. Louis, Inc., St. Louis, Missouri, for a research project entitled "Evaluation of the Construction of Fire Doors, Air Doors, and Bulkheads for Noncoal Mines" (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–2281. A letter from the Secretary of the Interior transmitting, pursuant to law, a report of areas whose resources exhibit qualities of national significance and which may have potential for inclusion in the National Park System (with accompanying papers); to the Committee on Energy and Natural Resources.

EC–2282. A letter from the Assistant Secretary for Land and Water Resources transmitting, for the information of the Senate, information supporting the previous authorization request for appropriations for the Bureau of Land Management for fiscal years 1979 through 1982 (with an accompanying report); to the Committee on Energy and Natural Resources.

EC–2283. A letter from the Secretary of Health, Education, and Welfare transmitting a draft of proposed legislation to authorize an appropriation to reimburse certain expenditures for social services provided by the States prior to October 1, 1975, under titles I, IV, VI, X, XIV, and XVI of the Social Security Act (with accompanying papers); to the Committee on Finance.

EC–2284. A letter from the Assistant Secretary for Congressional Relations transmitting, for the information of the Senate, that the President will submit his report concerning the extent to which the Republic of Korea is cooperating with the investigation of the Department of Justice with respect to allegations of improper activities in the United States by agents of the Republic of Korea; on November 4, 1977; to the Committee on Foreign Relations.

EC–2285. A letter from the Assistant Legal Adviser for Treaty Affairs of the Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC–2286. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–99, an Act to order the closing of a public alley abutting on Lots 63, 64, and 65 in Square 1192, bounded by 29th, K, 30th, and M Streets, N.W. (with accompanying papers); to the Committee on Government Affairs.

EC–2287. A letter from the Secretary of the Treasury transmitting, for the information of the Senate, a report of the latest experimental undertaking in applying accrual accounting to government (with an accompanying report); to the Committees on Governmental Affairs.

EC–2288. A letter from the Acting Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a follow-up report on the recommendations of the President's Council on Physical Fitness and Sports (with an accompanying report); to the Committee on Governmental Affairs.

EC–2289. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Challenge of Meeting Shelter Needs in Less Developed Countries" (ID–77–39, November 4, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC–2290. A letter from the Assistant Secretary of Agriculture transmitting, pursuant to law, notice of the existence of a certain system of records (with accompanying papers); to the Committee on Governmental Affairs.

EC–2291. A letter from the Secretary of Transportation transmitting, pursuant to law, a report of contracts negotiated under 10 U.S.C. 2304(a)(11) during the period April 1, 1977, through September 30, 1977 (with an accompanying report); to the Committee on Governmental Affairs.

EC–2292. A letter from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of Council Act 2–100, an Act to establish a certificate of need program for health care facilities and services in the District of Columbia (with accompanying papers); to the Committee on Governmental Affairs.

EC–2293. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "New Methods Needed for Checking Payments Made by Computers" (FGMSD–76–82, November 7, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC–2294. A letter from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "National Aeronautics and Space Administration Should Provide the Congress With More Information on the Pioneer Venus Project" (PSAD–77–65, November 7, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC–2295. A letter from the Attorney General of the United States transmitting a draft of proposed legislation to provide explicit authority for the arrest of material witnesses (with accompanying papers); to the Committee on Governmental Affairs.

EC–2296. A letter from the Attorney General of the United States transmitting a draft of proposed legislation to restrict the possession and carrying of pistols, other firearms, and other dangerous weapons by members of the District of Columbia Department of Corrections for periods of time when they are on duty and authorized by the Director of the District of Columbia Department of Corrections (with accompanying papers); to the Committee on Governmental Affairs.

EC–2297. A letter from the District of Columbia Auditor transmitting, pursuant to law, a copy of a report entitled "Recoupment of Improperly Billed Medicaid Payments" and a report entitled "Mayor's Order 77–141a transferring CETA Public Service Employment Program from the Office of Budget and Management Systems to the Department of Manpower" (with accompanying reports); to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Without amendment:

S. 2152. A bill to amend the Bretton Woods Agreements Act to authorize the United States to participate in the supplementary financing facility of the International Monetary Fund (Rept. No. 95–603). Referred to the Committee on Banking, Housing, and Urban Affairs.

By Mr. KENNEDY, from the Committee on the Judiciary:

With an amendment:

S. 1566. A bill to amend title 18, United States Code, to authorize applications for a court order approving the use of electronic surveillance to obtain foreign intelligence information (together with minority views) (Rept. No. 95–604). Referred to the Select Committee on Intelligence.

By Mr. KENNEDY (for Mr. MCCLELLAN), from the Committee on the Judiciary:

With amendments:

S. 1437. A bill to codify, revise, and reform title 18 of the United States Code; and for other purposes (Rept. No. 95–605).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROBERT C. BYRD, from the Committee on the Judiciary:

Joseph N. Novotny, of Indiana, to be U.S. marshal for the northern district of Indiana.

By Mr. MAGNUSON. Committee on Commerce, Science, and Transportation.

Mortimer L. Downey III, of Virginia, to be an Assistant Secretary of Transportation.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. DOMENICI:

S. 2313, A bill for the relief of Michael Curran, his wife, Jennifer Curran, and their daughters, Caroline and Samantha; to the Committee on the Judiciary.

By Mr. KENNEDY:

S. 2314. A bill to repeal certain sections of title III of the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. EAGLETON:

S. 2315. A bill for the relief of Savita Nandini; to the Committee on the Judiciary.

S. 2316. A bill to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits; to the Committee on Governmental Affairs.

By Mr. HEINZ (for himself, Mr. RANDOLPH, Mr. BAYH, Mr. GLENN, Mr. METZENBAUM, Mr. ANDERSON, Mr. STEVENSON, Mr. MOYNIHAN, Mr. PERCY, Mr. DECONCINI, Mr. SCHWEIKER, Mr. HATCH, and Mr. ALLEN):

S. 2317. A bill to amend the Antidumping Act of 1921, the Trade Act of 1974 and the Tariff Act of 1930 to improve procedures relating to the determination of certain unfair foreign trade practices; to the Committee on Finance.

By Mr. BAYH (for himself, Mr. HEINZ, Mr. RANDOLPH, Mr. ANDERSON, Mr. DECONCINI, Mr. SCHWEIKER, Mr. HATCH, and Mr. ALLEN):

S. 2318. A bill to amend title III of the Act of March 3, 1933, known as the Buy American Act, to require the heads of Federal agencies to issue certain regulations respecting the purchase of material made in the United States, to permit the States to give preference to such materials, to require that certain State purchases made with Federal funds be subject to the Buy American Act, and for other purposes; to the Committee on Governmental Affairs.

By Mr. BUMPERS:

S. 2319. A bill to amend the Internal Revenue Code of 1954, as amended; to the Committee on Finance.

STATEMENTS ON BILLS AND JOINT RESOLUTIONS

By Mr. DOMENICI:

S. 2313. A bill for the relief of Michael Curran, his wife, Jennifer Curran, and their daughters, Caroline and Samantha; to the Committee on the Judiciary.

Mr. DOMENICI. Mr. President, the private bill for Michael Curran, his wife, Jennifer, and their two daughters, Caroline and Samantha, which I introduce today is for their relief from immigration proceedings.

Mr. Curran's father became a U.S. citizen on August 20, 1974, in the Federal court in Albuquerque, N. Mex. Michael and his family came to this country in February 1974, and applied for permanent residence in September of 1974. Since that time, Michael has established himself in the community as a businessman and even participates as a reserve officer in the Bernalillo County sheriff's reserves.

However, today he and his family are to be excluded from this country because the term "child" as used in titles I and II of the Immigration and Naturalization Act as defined in section 101(b)(1) of the act applies only to unmarried persons under 21 years of age. Hence, Michael is not the son of an American citizen because he was married and 23 years of age when he made application for permanent residence. Michael's father is an American citizen—of that there is no controversy. The bill I introduce is meant to certify Michael as the "son" of an American citizen, his father. And in view of the language of the Immigration Act, this legislation is necessary to do so.

By Mr. KENNEDY:

S. 2314. A bill to repeal certain sections of title III of the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

Mr. KENNEDY. Mr. President, I am introducing today a bill to repeal or amend certain nationality and citizenship provisions in title III of the Immigration and Nationality Act, as amended.

The bill accomplishes three objectives. First, it helps to update and clarify the meaning and intent of our basic law on nationality and citizenship by repealing certain provisions which are no longer invoked or have been declared unconstitutional by the courts. Second, the bill remedies the onerous requirements of present law for the transmission of American nationality and citizenship to certain children born outside of the United States. And third, the bill removes the discriminatory treatment against these children in the retention of their American nationality and citizenship.

In the context of the need for a general reform of the basic immigration and nationality statute, these objectives are very modest. But for the thousands of people affected, the bill I am introducing today is of vital importance—especially for those who truly value their democratic heritage and their status as citizens of the United States.

The repeal of certain inoperable provisions on nationality and citizenship should be enacted, if only to remove some confusion and to update the law. Section 1 of the bill accomplishes this objective.

Section 2 of the bill remedies the onerous requirements concerning the transmission of American nationality and citizenship to certain children born outside of the United States, one of whose parents is an alien and the other a citizen of the United States. For the purpose of transmitting American nationality, current law requires that, prior to the birth of a child overseas, the citizen parent must have been "physicially present" in the United States for periods totaling "not less than 10 years, at least 5 of which were after attaining the age of 14 years."

When put in the context of other provisions relating to the transmission of American nationality and citizenship, this provision seems especially harsh. And over the years it has undoubtedly brought undue hardship to many families and needlessly denied American nationality to certain children born overseas. The time is past due to ease the requirements of current law and bring them more in line with related provisions in the basic statute. The bill I am introducing today accomplishes this objective, by reducing the "physically present" requirement for a citizen parent to a simple 2 years prior to the birth of a child overseas.

As to the retention of American nationality and citizenship by such children born overseas, current law states that a child shall lose his or her nationality and citizenship, unless the child is "continuously physically present" in the United States for at least 2 years between the ages of 14 and 28, or unless the alien parent is naturalized and "the child begins to reside permanently in the United States while under the age of 18 years."

Mr. President, these requirements have been causing some needless hardships to a growing number of American children born overseas, with only one citizen parent. Moreover, such requirements are discriminatory—even within a child's family. They do not apply, for example, to the child's brothers or sisters born within the United States, but living with the family overseas. Nor do such requirements apply to any other category of American citizen children born outside of the United States.

We must remove the discrimination against American children born overseas of mixed parentage. We must take some meaningful action in their behalf, so that their longtime rights to American nationality and citizenship are not placed in jeopardy by arbitrary decisions of outmoded law.

The bill I am introducing today accomplishes this third objective, by a simple repeal of the national retention requirements in section 301(b) of current law.

Mr. President, there is a great deal to be done in humanizing the basic immigration and nationality statute, the act of June 27, 1952. But pending the overall reform of this act, Congress should do what it can to bring legislative and administrative classifications to problem areas of immediate concern to many Americans.

The bill I am introducing today, and a similar but not identical bill recently introduced in the other body, contribute to this end.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsections (b), (c), and (d) of section 301; paragraphs (5), (8), and (10) of section 349; and sections 350, 352, 353, 354, 355 of the Immigration and Nationality Act, are hereby repealed.

SEC. 2. Section 301 of the Immigration and Nationality Act is amended—

(1) by striking out "(a)" after "SEC. 301.".

(2) by amending paragraph (7) to read as follows:

"(7) a person born outside of the United States and its outlying possessions of parents one of whom is an alien, and the other a citizen of the United States who, prior to the birth of such person, has had a residence in the United States or its outlying possessions and has been physically present in the United States or its outlying possessions for a continuous period of two years."

SEC. 3. Section 349 of the Immigration and Nationality Act is amended by inserting "(a)" after "Sec. 349.", and by renumbering paragraphs (6), (7), and (9) as paragraphs (5), (6), and (7), respectively.

By Mr. EAGLETON:

S. 2316. A bill to establish an actuarially sound basis for financing retirement benefits for policemen, firemen, teachers, and judges of the District of Columbia and to make certain changes in such benefits; to the Committee on Governmental Affairs.

Mr. EAGLETON. Mr. President, the Senate gave its final approval to home rule for the District of Columbia almost 4 years ago. While this step was long

overdue, it was not complete. After a century of Federal control—and, I hasten to add, neglect—this city was left a legacy of financial disarray that it is unable to overcome on its own.

One manifestation of this malaise is chaotic bookkeeping and a weak financial management system. In the last Congress, we passed legislation requiring the District to have an annual audit by an independent certified public accountant, and in partnership with the District provided the funds to get the books and records into an acceptable form. I am pleased to say that this project is moving along well. A number of substantive improvements have already been made in the District's accounting methods, and many of these are apparent in its most recent financial reports.

An equally serious problem, though one less susceptible to easy solution, is the poorly designed retirement system for employees of the District of Columbia. Here, too, we have a problem largely attributable to Federal action or inaction long predating home rule. And here, too, the solutions I am proposing call for a joint effort by the District and the Federal Government, permitting the fullest exercise of local self-government while safeguarding the continuing Federal interest in the viability of our Nation's Capital.

Mr. President, I am introducing today a bill to reform the retirement system for the policemen, firemen, teachers, and judges of the District of Columbia. Briefly, this bill will establish an actuarially sound basis for funding the pension system, provide Federal assistance in amortizing the current unfunded liabilities of these systems, and correct abuses in the current law by improved enforcement and technical improvements. This bill does not diminish any benefits already earned by any District employee or retiree, and it leaves the question of any change in benefits for new employees to the District government and the employees to negotiate among themselves. Even so, it will reduce pension costs in the future by up to 25 percent.

The important features of this bill are as follows:

Funding.—The method of funding is to be changed, gradually over a period of years, from the current pay-as-you-go system to a system based on advanced funding. The annual contributions to the fund established by this legislation will be sufficient to pay for all benefits earned after the date of enactment. This amount will be calculated as a fixed percentage of active duty payroll; the exact amount depends on what changes the District decides to make in the programs. The District will contribute, in addition, the annual interest (about $40 million) on its share of the existing unfunded liability. Although this advanced funding method does not eliminate the unfunded liability and thus causes somewhat higher costs in the future, it nevertheless is preferable to full funding be cause of current budgetary limitations and a number of technical factors.

Amortization of unfunded liability.—I have proposed that the Federal Government accept responsibility for paying the future benefits of all policemen, firemen, teachers, and judges who retired before the effective date of home rule (January 2, 1975). These benefits, to be paid out over the next 50 years or so, would require a fund of about $940 million in today's dollars. Rather than appropriating the amount in a single lump sum, the bill calls for 25 annual payments of $73.5 million (principal plus interest). The District would assume responsibility for everyone who retired since home rule and into the future. As mentioned before, this would consist of full funding after this bill is enacted plus interest on the District's share ($660 million) of the unfunded liability. These amounts include the cost savings which will flow from this bill, but are subject to further refinement as we get more data from our actuaries.

Disability retirement for policemen and firemen.—As in the House bill, my proposal: First, eliminates as a basis for disability retirement the aggravation of an off-duty injury: second, bases all disability retirements on a percentage of impairment; and third, provides for a reduction in annuities based on outside income earned. This benefit reduction, however, is calculated in a different manner to provide a positive incentive to return to limited employment where that is physically possible. For every dollar that the total of annuity plus earned income exceeds 70 percent of the current salary of the last position held, a retiree's annuity is reduced by 50 cents, and for every dollar in excess of 100 percent of the current salary equivalent, the annuity is cut another 20 cents. Thus the effective "tax rate" is reduced from 75 percent (in the House bill) to 50 percent or, in some cases, 70 percent. These changes apply to any policeman or fireman who is not already retired and to all new hires.

Other disability retirement changes.—All members retiring on disability (policemen, firemen, and teachers) and all those currently reitred on disability will be required to submit annual notarized statements of earned income, and to undergo an annual physical examination. These requirements will be waived in cases in which the disability is clearly of a permanent nature or when the retiree reaches age 50. While the benefits for current retirees are not being changed, the existing provisions of law are going to be enforced. For policemen and firemen, current law provides for a termination of disability benefits when the retiree's earning capacity has been substantially restored, as evidenced by outside income in excess of 80 percent of the current pay in the last position held. For teachers, the law will be amended to conform with Federal civil service provisions on disability retirement.

Cost-of-living adjustments.—Currently, retired policemen and firemen receive benefit increases equal in percentage terms to the pay increases granted to active employees in the position last held. Teachers and judges receive increases based on the Consumer Price Index, plus 1 percent. Henceforth, all cost of-living increases will be based strictly on the Consumer Price Index. This applies also to future cost-of-living adjustments for current retirees.

At this point, I would like to sketch the problems of the current system and mention some of the solutions which have been proposed. It should then become clear why the approach embodied in this bill is the preferable one.

THE PROBLEM

The retirement systems for policemen, firemen, teachers, and judges are funded on a "pay-as-you-go" basis. Although employees earn the right to larger pensions for each year they work, the city makes no provision for paying these moneys until the year they are due. This may postpone the day of reckoning, but, because of the compounding of interest on this unfunded liability, the amounts payable in the future add up higher and higher each year and become a staggering, if not impossible burden. The unfunded liability for these retirement system is estimated at $1.9 billion, which, by the turn of the century, will make the annual cost of pensions more than the salaries of those actively on duty in police and fire stations and in the classrooms.

Unfunded liabilities are a form of debt that eventually must be paid. This enormous outstanding obligation will, unless action is taken, make it increasingly difficult for the District to meet other legitimate needs and maintain adequate levels of public service in the future. It will make the sale of municipal bonds more costly. It will impose a back-breaking burden on the taxpayers of the city. And this burden, if not acted on with foresight and prudence now, could eventually fall totally on the Federal Government to finance a massive rescue mission in the future. This is not a matter of choice for the city; it is the law, a law passed by the U.S. Congress, and it is with Congress that responsibility lies to devise a reasonable and workable pension system.

THE SOLUTIONS

The defects of the present pay-as-you-go system have long been recognized. As long as 20 years ago, my predecessor as chairman of the Senate body with jurisdiction over the District of Columbia, Senator Alan Bible, expressed concern over the District's retirement systems and initiated a thorough study of them.

Five years ago, the Nelsen commission criticized the retirement plans and made suggestions for improvements. These suggestions were acted upon by then-Congressman Thomas M. Rees, who introduced reform legislation in 1974. As a consequence of Congressman Rees' diligence, a bill providing for major improvements finally passed the House of

Representatives earlier this year. During this period, the District government has also been working on reforms of the retirement systems.

This House bill, H.R. 6536, is now before the Subcommittee on Government Efficiency and the District of Columbia, as is an identical bill introduced in the Senate by my long-time colleague in these matters, Senator MATHIAS, of Maryland. These bills address virtually every detail of the pension programs from overall cost down to the minutest calculations of benefits under almost any conceivable set of circumstances. This is a commendable approach; I favor virtually all of these provisions in these bills and I hope that they are eventually put into place. But I do not think it is up to Congress to specify benefits and procedures in such myriad and microscopic detail.

I think my bill not only will be more effective in safeguarding the Federal interest, but is also more consistent with home rule and provides the District government with the flexibility it needs to achieve even greater savings in the future. My bill makes no changes in years of service, benefit calculations for normal retirement, or vesting even for persons not yet hired. The District is under a mandate to develop an independent personnel system for all of its employees by January 2, 1980. The precise form of retirement benefits should be worked out in negotiations between the District and its employees, and not preempted or imposed by Congress. Since they will eventually shoulder the full and continuing cost of the program, local taxpayers should participate through their now elected representatives on the scope and benefit of the retirement plans.

My bill, therefore, concentrates principally on Congress rightful interest, the Federal participation. It sets the bounds on what can be done, while leaving the internal structure to the District and its elected government. My bill authorizes Federal funds for the Federal share of the unfunded liability as of the date of home rule (January 2, 1975) and requires sound funding on a current basis of all benefits earned henceforth. We are saying to the District, we will atone for the Congress share of mistakes over the years in failing to put pensions on a sound footing, but we are going to try to keep you from repeating those mistakes in the future. Under this bill, any increase in benefits—even if not payable for 20 or 30 years—would have to be salted away in a trust fund beginning immediately. This will put a premium on sound financial management and could induce the District not to affect the benefits of present employees, which are among the highest in the Nation, but to scale them down for future employees.

In one area though, there is such widespread agreement on the need for improvement that the bill does address the details of the problem, and that is the disability retirement provisions. At present, more than 4 out of 5 retired policemen and firemen are retired on full disability and drawing up to 70 percent of the salaries they would be receiving today had they stayed on the force, and these benefits are tax free. The disability retirement for teachers is less generous and less abused, but still subject to improvement. My bill rationalizes the disability retirement provisions which will save millions of dollars annually, while not cutting any benefits for the retiree who is truly disabled.

Finally, the bill addresses a problem not anticipated when the current pension legislation was enacted: Runaway inflation. Under existing law, pensions have increased more rapidly than prices generally. My bill puts all future cost-of-living increases on a straight Consumer Price Index basis.

To reemphasize, my bill contains many of the same provisions as the House bill and Senator MATHIAS' bill on establishment and control of the retirement boards and retirement funds. As with these other bills, my bill provides for trust funds to manage and disburse the moneys for future pensions. Although my adoption of the House provisions indicates that I am generally in accord, I nevertheless intend to examine them closely in hearings to be held on these bills.

By Mr. HEINZ (for himself, Mr. RANDOLPH, Mr. BAYH, Mr. PERCY, Mr. GLENN, Mr. METZENBAUM, Mr. ANDERSON, Mr. STEVENSON, Mr. MOYNIHAN, Mr. DECONCINI, Mr. SCHWEIKER, Mr. HATCH, and Mr. ALLEN):

S. 2317. A bill to amend the Antidumping Act of 1921, the Trade Act of 1974, and the Tariff Act of 1930 to improve procedures relating to the determination of certain unfair foreign trade practices; to the Committee on Finance.

Mr. HEINZ. Mr. President, on September 28, 17 Senators convened in the Capitol at the invitation of Senators RANDOLPH, GLENN, METZENBAUM, and myself to form the Senate steel caucus. Our motivation at the time was the unprecedented crisis in the steel industry which was causing massive layoffs (over 20,000 to date), large losses and plant shutdowns. At that time, we resolved to take action to deal with the serious problems confronting the industry and to make sure they were brought to the President's attention.

We have clearly had results with respect to the latter, as the President met first with the organizers of the House and Senate caucuses, along with industry and labor leaders, and subsequently with a larger group of Senators and Congressmen, to learn about steel problems and discuss solutions. The President has appointed Treasury Under Secretary Soloman head of a task force to develop a plan for the steel industry, and I am confident that it will propose some useful initiatives when it makes its recommendations at the end of the month.

At the same time, however, we cannot simply sit and wait for the administration to act, as it has been demonstrably slow to do so in the past. Therefore, the caucus leadership has continued working together to develop legislative proposals. Today we are introducing the first two bills, and we anticipate more will follow.

My colleague, the Senator from Indiana (Mr. BAYH) has explained in his remarks today details of both the Buy American Act amendments which he is introducing along with Senators HEINZ, RANDOLPH, ANDERSON, DECONCINI, SCHWEIKER, HATCH and ALLEN; and the Trade Procedures Reform Act, which I am introducing along with Senators RANDOLPH, BAYH, GLENN, METZENBAUM, ANDERSON, STEVENSON, MOYNIHAN, DECONCINI, SCHWEIKER, HATCH, ALLEN, and PERCY.

The purpose of these bills is to deal in part with two of the industry's three critical problem areas. The latter bill, the Trade Procedures Reform Act, is intended to help us cope with trade and import problems by streamlining investigatory procedures and making the imposition of penalties swifter and surer. The bill does not expand the scope of existing trade statutes; if anything it simplifies those laws and strengthens them to make sure they, in fact, have the originally intended impact.

The second bill, the Buy American Act amendments, will help increase steel demand, the industry's second major problem. By extending the act and making some current practices statutory rather than administrative, the Government will have a stronger mandate to buy American, and thus will lead the way in increasing steel purchases. In introducing this bill we recognize that it is an imperfect product. We are convinced, however, that the Buy American Act amendments needs a careful examination and overhaul, and we regard this bill as a vehicle to help achieve that purpose. The bill will be referred to the Governmental Affairs Subcommittee on Federal Spending Practices, of which I am ranking minority member, and I have already obtained a commitment from the chairman, the Senator from Florida (Mr. CHILES), to hold hearings on the bill. As a result, my staff on the subcommittee will be looking at the Buy American Act in detail in preparation for those hearings, and I am hopeful we can develop a bill in subcommittee that will fully meet our objectives.

The third problem area we have not thus far dealt with is modernization. Suffice it to say at this point that caucus work in this area is continuing, and that we are looking at a variety of alternatives—tax incentives, rapid amortization, loans, loan guarantees, industrial development bonds, et cetera—as possible legislation. One basic principle we intend to adhere to, however, is to tie such assistance to existing sites and facilities. The Council on Wage and Price Stability study on steel showed clearly the bad economics of building "green-

field" plants, and we have no intention of assisting the industry in a way that will enable it to abandon the workers and communities who have stuck with it during the crisis.

These two bills obviously do not represent a total package. That will come. But they do represent a start, a responsible restrained beginning that will help to put the industry back on its feet. I am pleased at the support generated for these bills thus far, and I am hopeful for their quick consideration.

Mr. President, I ask that summaries of the two bills and the text of the Trade Procedures Reform Act be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2317

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Trade Procedures Reform Act".

SEC. 2. AMENDMENT OF ANTIDUMPING ACT OF 1921.

(a) Conditional Payment of Special Antidumping Duty.—Section 208 of the Antidumping Act, 1921 (19 U.S.C. 167) is amended to read as follows:

"CONDITIONAL PAYMENT OF ANTIDUMPING DUTY ON ENTRY

"(a) In the case of all imported merchandise, whether dutiable or free of duty, of a class or kind as to which the Secretary of the Treasury has made public an initial determination as provided in section 201, and delivery of which has not been made by the appropriate customs officer before such initial determination has been so made public, unless the person by whom or for whose account such merchandise is imported makes oath before such customs officer, under regulations prescribed by the Secretary, that he is not an exporter, or unless such person declares under oath at the time of entry, under regulations prescribed by the Secretary, the exporter's sales price of such merchandise, it shall be unlawful for such customs officer to deliver the merchandise until such person has paid to such customs officer the full amount of estimated special duty, if any, which would be imposed under this title upon such merchandise if such initial determination were, upon final determination, to be upheld, and has made oath before such customs officer, under regulations prescribed by the Secretary, that the merchandise has not been sold or agreed to be sold by such person that—

"(1) he will report to such customs officer the exporter's sales price of the merchandise within 30 days after such merchandise has been sold or agreed to be sold in the United States, and

"(2) he will furnish to such customs officer such information as may be in his possession and may be necessary for the ascertainment of such duty, and will keep such records as to the sale of such merchandise as the Secretary may by regulation prescribe.

"(b) If, upon final determination, the finding is not upheld, the amount of special dumping duty paid under subsection (a) shall be returned to such person with interest, from the date on which the duty was paid, allowed and paid at the annual rate established under section 6621 of the Internal Revenue Code of 1954 in effect on the date on which such duty was paid.".

(b) Appraisal on an Across-the-board Basis.—Section 209 of such Act (19 U.S.C. 168) is amended by adding at the end thereof the following new sentence: "The foreign market value, the constructed value, the purchase price, and the exporter's sales price, may be ascertained, estimated, and appraised on an across-the-board basis, taking into account all shipments of the same products, in any appropriate case, as determined by such officer.".

(c) Initial Assessment Data.—Section 202 of such Act (19 U.S.C. 161) is amended by adding at the end thereof the following new subsection:

"(d) In determining the amount of the special dumping duty which may be levied under subsection (a), the Secretary may use figures, amounts, and other data developed by the investigation under section 201 if such figures, amounts, and other relevant data are revised not less frequently than annually.".

(e) Elimination of Interim Injury Referral.—Subsection (c) of section 201 of such Act (19 U.S.C. 160(c)) is amended by striking out "(c)(1)" and inserting in lieu thereof "(c)" and by striking out paragraph (2).

(f) Simultaneous Investigation by Secretary and International Trade Commission.—Section 201 of such Act (19 U.S.C. 160) is amended—

(1) by striking out "determines" in subsection (a) and inserting in lieu thereof "makes an initial determination",

(2) by striking out "determine" in subsection (b)(1)(A) and inserting in lieu thereof "make an initial determination as to",

(3) by striking out "determination" in subparagraphs (B) and (C) of subsection (b)(1) and in paragraph (2) of subsection (b) and inserting in lieu thereof "initial determination", and

(4) by striking out "a determination" in subsection (b)(3) and inserting in lieu thereof "an initial determination".

(g) Annual Report.—Title II of such Act (19 U.S.C. 160 et seq.) is amended by redesignating section 213 as 214, and by inserting after section 212 the following new section:

"ANNUAL REPORT

"SEC. 213. The Secretary of the Treasury shall report to the Congress annually with respect to enforcement actions undertaken under the provisions of this title for the preceding year, including, but not limited to, the amount of special dumping duties collected and not refunded, the average length of time required for an investigation, the number of cases considered, the disposition of cases considered, the number of follow-up investigations conducted, and the status of such investigations.".

SEC. 3. CONGRESSIONAL REVIEW OF IMPORT RELIEF REDUCTION OR TERMINATION DECISIONS.

Paragraph (4) of section 203(h) of the Trade Act of 1974 (19 U.S.C. 2253(h)(4)) is amended to read as follows:

"(4) The President may reduce or terminate any import relief provided pursuant to this section if—

"(A) the President determines, after taking into account the advice received from the Commission under subsection (i)(2) and after seeking advice of the Secretary of Commerce and the Secretary of Labor, that such reduction or termination is in the national interest;

"(B) within 30 days after the receipt of all of the advice specified in subparagraph (A), the President transmits to the Congress a document setting forth his intention to reduce or terminate such import relief and the reasons for such proposed action, as well as the advice received from the Commission, the Secretary of Commerce, and the Secretary of Labor, and

"(C) both Houses of Congress (within the 30-day period following the date on which the document referred to in subparagraph (B) is transmitted to the Congress) have not adopted, by an affirmative vote of a majority of the Members of each House present and voting, a concurrent resolution disapproving the action proposed by the President in such document.

The President may not request a review of a particular section 201 decision more than once during any twelve month period.".

SEC. 4. CONGRESSIONAL PROCEDURES.

(a) Disapproval Resolutions.—Paragraph (2) of section 152(a) of the Trade Act of 1974 (19 U.S.C. 2192(a)(2)) is amended—

(1) by striking out "and" in subparagraph (A);

(2) by redesignating subparagraph (B) as subparagraph (C); and

(3) by inserting after subparagraph (A) the following new subparagraph:

"(B) in the case of a resolution referred to in section 203(h)(4), with the phrase "the action proposed by the President under section 203(h)(4) of the Trade Act of 1974; and".

(b) Special Rules.—Section 154 of the Trade Act of 1974 (19 U.S.C. 2194) is amended—

(1) by inserting "203(h)(4)(B)," after "203(b)," in subsection (a); and

(2) by inserting "203(h)(4)(C)," after "203(c)," in subsection (b).

SEC. 5. REVIEW OF CERTAIN ALLEGATIONS.

(a) Procedure and Schedule.—Paragraph (2) of section 301(d) of the Trade Act of 1974 (19 U.S.C. 2411) is amended to read as follows:

"(2)(A) Within 45 days after a complaint is filed by any interested party with the Special Representative for Trade Negotiations, the Special Representative shall begin a review of the alleged restriction, act, policy, or practice, and, at the request of the complainant, shall conduct public hearings thereon. The Special Representative shall have a copy of each such complaint published in the Federal Register.

"(B) Within six months after the initiation of the review of an alleged restriction, policy, or practice under subparagraph (A), the Special Representative shall conclude any such review and transmit its determination to the President along with recommendations, if any, for action under subsection (a).

"(C) The Special Representative shall issue regulations concerning the filing of complaints and the conduct of reviews and hearings under this paragraph, and shall submit a report to the House of Representatives and the Senate semi-annually summarizing the reviews and hearings conducted by it under this paragraph during the preceding 6-month period.

(b) Hearings.—Paragraph (2) of section 301(e) of such Act (19 U.S.C. 241(e)(2)) is amended to read as follows:

"(2) Upon request by any interested person, he shall provide for appropriate hearings with respect to the taking of action with respect to such product or service within 45 days after his receipt of determination under subsection (d).

SEC. 6. TIME LIMITS FOR INITIATING INVESTIGATION OF CERTAIN TARIFF ACT VIOLATIONS.

Paragraph (3) of section 303(a) of the Tariff Act of 1930 (19 U.S.C. 1303) is amended to read as follows:

"(3) In the case of any imported article or merchandise as to which the Secretary of the Treasury (hereafter in this section re-

ferred to as the 'Secretary') has not determined whether or not any bounty or grant is being paid or bestowed—

"(A) within 30 days after the filing of a petition by any person setting forth his belief that a bounty or grant is being paid or bestowed, or

"(B) within 30 days after the receipt of information presented to the Secretary or to any person to whom authority under this section has been delegated which warrants a formal investigation into the question of whether a bounty or grant is being paid or bestowed,

the Secretary shall initiate a formal investigation to determine whether or not any bounty or grant is being paid or bestowed and shall publish in the Federal Register notice of the initiation of such investigation.".

SEC. 7. TIME LIMIT FOR INITIATING CERTAIN INTERNATIONAL TRADE COMMISSION INVESTIGATIONS.

The first sentence of paragraph (1) of section 337(b) of the Tariff Act of 1930 (19 U.S.C. 1337) is amended—

(1) by striking out "shall investigate" and inserting in lieu thereof "shall commence an investigation", and

(2) by striking out "on" and inserting in lieu thereof "within 30 days after the receipt of a".

SUMMARY OF TRADE PROCEDURES REFORM ACT

In general, the purpose of the bill is to streamline the processes by which certain trade complaints are considered and to amend the Antidumping Act of 1921 to improve the timetables for both investigations and imposition of duties.

A. AMENDMENTS TO TRADE ACTS

(1) Although section 201 of the Trade Act of 1974 (escape clause section) provides for a two-House Congressional override of a Presidential decision, section 203, which permits the President to revise or revoke his earlier decision, has no override provision. This amendment creates such a procedure similar to that in section 201, and in addition (a) permits the President to make such a redetermination only once every twelve months, and (b) provides that the Presidential determination must be made within 30 days of receiving the required advice from the International Trade Commission (ITC) and Departments of Labor and Commerce.

This amendment is particularly relevant to the pending specialty steel case.

(2) Section 301 of the Trade Act of 1974, dealing with trade discrimination cases, currently contains no time limits. This amendment would give the Special Trade Representative 45 days to begin an investigation of a complaint, 6 months to finish it, and 45 days to begin hearings reviewing the STR determination. This amendment imposes no time limit on Presidential action pursuant to any STR determination.

(3) Section 303 of the Tariff Act of 1930, relating to countervailing duties, is amended by requiring that a Treasury investigation must begin within 30 days of receipt of a complaint or petition.

(4) Section 337 of the Tariff Act of 1930, relating to unfair methods of competition, is amended by requiring that any investigation begin within 30 days of receipt of a complaint.

B. AMENDMENTS TO THE ANTIDUMPING ACT OF 1921

(1) The Act is amended to require that after a tentative finding of dumping, instead of requiring a bond to cover prospective duties, the full amount of estimated dumping duties will be held in escrow pending a final determination. This will significantly increase the financial burden on the foreign manufacturer.

(2) The Act is amended to require that after a final determination of dumping, an across-the-board assessment of duties based on the fair value data compiled during the dumping investigation be conducted rather than the current system of case-by-case assessment based on new figures.

(3) This amendment changes the Act to speed up the investigatory process by making Treasury's 3 month final determination process and the ITC's 3 month injury investigation concurrent rather than consecutive. This would cut 3 months off the current 13 month investigatory process.

(4) The Act is amended to eliminate the possibility of interim referral to the ITC during the 6 month Treasury investigatory process (section 321(c)(2)).

(5) The Act is amended to require an annual Treasury Department report of its actions to enforce the Act and the results of those actions.

BUY AMERICAN ACT OF AMENDMENTS OF 1977

SUMMARY

This Bill will:

(1) Amend the 1933 "Buy America Act" to extend it to an contract, more than one-half of which is financed by appropriations, subsidies, loans or grants from, or loans insured or guaranteed by the United States or any agency or instrumentality thereof.

(2) Define an article, material or supply to have been mined, produced or manufactured in the United States if the costs of the components, mined, produced or manufactured in the United States exceeds 75 percentum of the cost of all components.

(3) Statutorily establish a preference floor of 15 per centum and a ceiling of 50 per centum of the value of the contract for articles, materials or supplies mined, produced or manufactured in the United States.

This provision of the bill will not be limited to the steel industry.

IMPACT

The importance of extending preferences to domestic materials in state and local procurements is highlighted by the partial listing of public works projects which receive substantial federal funding, but, because the procurements are handled by state and local public bodies, no preference for domestic goods is required:

PARTIAL LISTING OF PUBLIC WORKS PROJECTS

ENABLING STATUTE	FISCAL YEAR 1977 APPROPRIATIONS	PROJECTS
Public Works Development Act of 1976	$2.5 billion	Municipal office buildings, court houses, libraries, detention facilities, health centers, waste water treatment, and similar public facilities to be owned by state and local public bodies
Federal aid to highways	$6.6 billion	Interstate and state highway construction
Urban Mass Transportation Fund	$1.5 billion	Mass transit
Federal Housing Acts of 1949 and 1950	Over $1 billion	Urban renewal projects and housing for the elderly and disadvantaged
Housing and Urban Development Act of 1965	Over $350 million	Water and sewage facilities
Demonstration Cities and Metropolitan Development Act of 1966	Over $575 million	Model cities/urban renewal construction

Mr. GLENN. Mr. President, I join my colleagues, Senators RANDOLPH, BAYH, METZENBAUM, and HEINZ, in introducing the Trade Procedures Reform Act. The purpose of this act is to render our trade procedures consistent with the intent of our trade laws, and to make them responsive to the pressing problems of U.S. industry in the face of unfair foreign competition. This problem is particularly acute in the steel industry, and the bill, if enacted, would provide some relief for workers whose jobs are threatened by imports. The bill consists of procedural reforms that streamline the processes whereby certain trade complaints are considered, and provides for more effective penalties when violations are found.

The bill introduces badly needed reforms that will strengthen Federal procedures governing the investigation and prosecution of trade violations. It preserves the President's powers to negotiate complex international trade problems and strengthens congressional overview of the enforcement of our trade statutes. It clarifies and, where possible, reduces the time guidelines for the initiation, administration, and conclusion of trade procedures. In addition to providing for more responsive and vigorous enforcement of existing legislation, this bill changes the timing and amount of penalties applied to trade violations to enhance the effectiveness of these penalties as deterrents to unfair foreign competition.

In the course of our deliberations on this bill we consulted with representatives of the administration and with professional and legal representatives of industry. We found widespread agreement that our trade procedures are in need of reform and that a more aggressive approach to unfair trade practices is in order. Let me briefly outline my reasons for supporting the changes in existing trade procedures that are contained in this bill.

The Trade Procedures Reform Act amends the Anti-Dumping Act of 1921 to require that after a tentative finding of dumping, the full amount of estimated dumping duties will be held in escrow pending final determination. This requirement differs from existing procedures whereby a tentative finding of dumping requires the posting of a bond to cover prospective duties. This change in procedures establishes a deterrent to dumping that is more effective than that posed by current procedures.

This bill also insures that our anti-

dumping procedures operate in a timely fashion. Under current practices the full amount of dumping duties is not collected until after: First, the conclusion of Treasury's final determination of dumping; second, ITC's determination of injury to American industry as a consequence of dumping; and third, the Customs Service's calculation of duties to be assessed. The latter procedure requires an analysis of all import transactions involving the goods in question on a current price comparison basis. Thus, following the investigations and determinations by Treasury and the ITC, the Customs Service must gather new figures that take into account variations and/or changes in the costs of merchandising, advertising, and other factors of production that have arisen since the Treasury's tentative determination that dumping has occurred. These item-by-item price comparisons and adjustments slow down the duties assessment process and frequently result in the lowering or dissolution of dumping margins.

The Trade Procedures Reform Act addresses the problems of the timeliness and accuracy of our current procedures by requiring that the assessment of duties be based on the "fair value" data compiled during the tentative determination of dumping, and that these duties be applied across the board to all the import goods in question. It further accelerates the administration of anti-dumping procedures by requiring that the International Trade Commission and the U.S. Treasury Department conduct their investigations of alleged trade act violations and their injury to American manufacturers concurrently rather than consecutively.

The bill also renders our trade procedures more responsive to legislative intent by authorizing congressional override of Presidential decisions to lift or alter import quotas—section 203 of the Trade Act of 1974. This is consistent with the existing authority Congress has to override certain Presidential decisions relating to the imposition of those quotas in the first instance. The theory underlying this portion of the bill is that if Congress has power to act with regard to the initial imposition of quotas, it should also have power to act with respect to subsequent modifications of them. The bill also requires the various agencies dealing with trade matters to report to Congress their actions in the enforcement of our trade laws.

The bill streamlines other trade complaint procedures by establishing statutory time guidelines for the initiation of investigations relating to countervailing duties (section 303 of the Tariff Act of 1930) and unfair methods of competition (section 337 of the Tariff Act of 1930). The institution of such guidelines accords with the President's mandate that the various agencies handling trade complaints do so in an expedient manner. Moreover, it responds to the needs of American manufacturers for quick and fair relief from unfair trade practices.

In addition, the bill establishes time guidelines for the administration of trade complaints by the President's Special Trade Representative. Our amendments to the procedures administered by the Special Trade Representative recognize the special needs of this office. As a negotiating agency involved in sensitive international trade negotiations, the Special Trade Representative needs flexibility with regard to time guidelines and external pressures. We do not believe that this need is incompatible with the imposition of time guidelines on its investigations. Our proposed legislation leaves intact the President's and the Special Trade Representative's latitude for actions, and their timing, after any determination of unfair trade practices by the Special Trade Representative. It does prevent the Special Trade Representative from "burying" complaints and requires the Office of the Special Trade Representative to conclude its investigations within 6 months after their initiation. This insures that all valid complaints will receive a fair hearing and that such hearings will be concluded within a reasonable period of time.

Mr. President, the peaceful realization of the world's material ambitions demands the establishment and timely enforcement of rules of fair dealing. This bill brings us closer to the realization of that goal.

By Mr. BAYH (for himself, Mr. HEINZ, Mr. RANDOLPH, Mr. ANDERSON, Mr. DECONCINI, Mr. SCHWEIKER, Mr. HATCH, and Mr. ALLEN):

S. 2318. A bill to amend title III of the act of March 3, 1933, known as the "Buy American Act," to require the heads of Federal agencies to issue certain regulations respecting the purchase of material made in the United States, to permit the States to give preference to such materials, to require that certain State purchases made with Federal funds be subject to the Buy American Act, and for other purposes; to the Committee on Governmental Affairs.

TRADE PROCEDURES REFORM ACT AND THE BUY AMERICAN ACT AMENDMENTS

Mr. BAYH. Mr. President, today we are introducing legislation which I believe will ease the crisis now facing the steel industry. For Indiana, the problems of the steel industry are especially serious because my State is the second largest steel producer in the country. Some 70,000 Hoosiers are employed by the steel industry, and it is no secret to them that the steel industry in America is in trouble.

Nationwide, during this year alone some 90,000 steelworkers are reported to have lost their jobs. A number of factors have contributed to this situation and predatory pricing practices rank high among them. For this reason one of the bills being introduced today by my able colleague from Pennsylvania, Mr. HEINZ, is designed to streamline the processes by which certain trade complaints are considered and to amend the Anti-dumping Act of 1921 to improve the timetables for both investigations and imposition of duties.

The Trade Procedures Reform Act will make changes in the Trade Act of 1974, the Tariff Act of 1930 and the Anti-dumping Act of 1921 which, I believe, will provide more effective remedies for unfair trade practices of foreign competitors. Such improvements will encourage greater utilization by domestic firms of these remedies and enhance protection against illegal and unfair pricing policies by foreign competitors in a consistent and timely manner.

In addition to improving the effectiveness of remedies available to domestic industry, I also believe it would be helpful to take a careful look at the demand aspect of the steel problem since capacity underutilization is mentioned prominently as a factor in the present situation. The Buy American Act Amendments of 1977 which I am introducing concurrently with the Trade Procedures Reform Act will expand the present statute to State and local government agencies receiving in excess of 50 percent of Federal funding for their operations. In addition, this bill will set a statutory definition for a domestically manufactured product. It will also establish a preference differential of not less than 15 and not more than 50 percent regulating the use of public purchases involving Federal funds. These amendments will constitute a useful vehicle to determine the extent to which the Federal Government can assist the steel industry by making sure public funds do not go to purchase foreign products sold at less than fair market value prices.

The legislation we are introducing is an important part of the overall national commitment to get our steel industry back on its feet. The adjustments we must make will not be easy because of the nature of the world economy and the nature of the steel industry, itself. However, we have an obligation to the American steel producing community and consumers of the product to make positive recommendations and act as a full partner with the administration in the formulation of a comprehensive and comprehensible industrial policy which the American people can understand and support. While other issues such as capital formation necessary for plant modernization must also be addressed, we believe the initiatives taken today represent steps in the right direction toward an effective solution to the present crisis.

Mr. President, at this point I ask unanimous consent that the bill, a factsheet on the northwest Indiana Steel industry, summaries of the Trade Procedures Reform Act as well as the Buy American Act Amendments, and that copies of letters which I have written to Secretary of the Treasury Blumenthal and a letter to the General Accounting Office be inserted in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

Factsheet northwestern Indiana steel industry

State	Net tons	Percent
Pennsylvania	26,696,000	20.9
Ohio	22,419,000	17.5
Indiana	*22,178,000	17.3
Illinois	11,030,000	8.6
Michigan	10,382,000	8.1
All other States	35,295,000	27.6
Total	128,000,000	100.0

*The recent cutback of steel production in Ohio by Youngstown will make Indiana the Nation's No. 2 steel producing State.

The above figures represent only raw steel production. There are many steel companies in Indiana that produce and ship only finished steel products. For example, Midwest Steel in Portage shipped 1,300,000 tons of finished steel products in 1976.

EMPLOYMENT OF FIVE MAJOR STEEL PRODUCERS IN NORTHWEST INDIANA

U.S. Steel	23,570
Inland	22,700
Youngstown	9,000
Bethlehem	7,800
Midwest	1,850
Total	64,920

The combined annual payrolls of those five firms in 1976 totaled $1,157,000,000.

SUMMARY OF TRADE PROCEDURES REFORM ACT

In general, the purpose of the bill is to streamline the processes by which certain trade complaints are considered and to amend the Antidumping Act of 1921 to improve the timetables for both investigations and imposition of duties.

A. Amendments to Trade Acts.

(1) Although section 201 of the Trade Act of 1974 (escape clause section) provides for a two-House Congressional override of a Presidential decision, section 203, which permits the President to revise or revoke his earlier decision, has no override provision. This amendment creates such a procedure similar to that in section 201, and in addition (a) permits the President to make such a redetermination only once every twelve months, and (b) provides that the Presidential determination must be made within 30 days of receiving the required advice from the International Trade Commission (ITC) and Departments of Labor and Commerce.

This amendment is particularly relevant to the pending specialty steel case.

(2) Section 301 of the Trade Act of 1974, dealing with trade discrimination cases, currently contains no time limits. This amendment would give the Special Trade Representative 45 days to begin an investigation of a complaint, 6 months to finish it, and 45 days to begin hearings reviewing the STR determination. This amendment imposes no time limit on Presidential action pursuant to any STR determination.

(3) Section 303 of the Tariff Act of 1930, relating to countervailing duties, is amended by requiring that a Treasury investigation must begin within 30 days of receipt of a complaint or petition.

(4) Section 337 of the Tariff Act of 1930, relating to unfair methods of competition, is amended by requiring that any investigation begin within 30 days of receipt of a complaint.

B. Amendments to the Antidumping Act of 1921.

(1) The Act is amended to require that after a tentative finding of dumping, instead of requiring a bond to cover prospective duties, the full amount of estimated dumping duties will be held in escrow pending a final determination. This will significantly increase the financial burden on the foreign manufacturer.

(2) The Act is amended to require that after a final determination of dumping, an across-the-board assessment of duties based on the fair value data compiled during the dumping investigation be conducted rather than the current system of case-by-case assessment based on new figures.

(3) This amendment changes the Act to speed up the investigatory process by making Treasury's 3 month final determination process and the ITC's 3 month injury investigation concurrent rather than consecutive. This would cut 3 months off the current 13 month investigatory process.

(4) The Act is amended to eliminate the possibility of interim referral to the ITC during the 6 month Treasury investigatory process (section 321(c)(2)).

(5) The Act is amended to require an annual Treasury Department report of its actions to enforce the Act and the results of those actions.

BUY AMERICAN ACT AMENDMENTS OF 1977

SUMMARY

This Bill will:

(1) Amend the 1933 "Buy America Act" to extend it to any contract, more than one-half of which is financed by appropriations, subsidies, loans or grants from, or loans insured or guaranteed by the United States or any agency or instrumentality thereof.

(2) Define an article, material or supply to have been mined, produced or manufactured in the United States if the costs of the components, mined, produced or manufactured in the United States if the costs of the components, mined, produced or manufactured in the United States exceeds 75 per centum of the cost of all components.

(3) Statutorily establish a preference floor of 15 percentum and a ceiling of 50 per centum of the value of the contract for articles, materials or supplies mined, produced or manufactured in the United States.

This provision of the bill will not be limited to the steel industry.

IMPACT

The importance of extending preferences to domestic materials in state and local procurements is highlighted by the partial listing of public works projects which receive substantial federal funding, but, because the procurements are handled by state and local public bodies, no preference for domestic goods is required:

Enabling Statute	*FY 1977 Appropriations*	*Projects*
Public Works Development Act of 1976	$2.5 billion	Municipal office buildings, court houses, libraries, detention facilities, health centers, waste water treatment, and similar public facilities to be owned by state and local public bodies
Federal aid to highways	$6.6 billion	Interstate and state highway construction
Urban Mass Transportation Fund		Mass transit
Federal Housing Acts of 1949 and 1950	Over $1 billion	Urban renewal projects and housing for the elderly and disadvantaged
Housing and Urban Development Act of 1965	Over $350 million	Water and sewage facilities
Demonstration Cities and Metropolitan Development Act of 1966	Over $575 million	Model cities/urban renewal construction

---

Guam, the Northern Mariana Islands, or any States;

S. 2318

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Buy American Act Amendments of 1977".

SEC. 2. Sections 1 and 2 of title III of the Act of March 3, 1933 (41 U.S.C. 10c and 10a), hereinafter in this Act referred to as the "Buy American Act", are amended to read as follows:

"SECTION 1. For purposes of this title—

"(1) the term 'State' means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Canal Zone, the Virgin Islands, other territory or possession of the United

"(2) the term 'material of domestic origin' means any material which has been mined, produced, or manufactured in any State unless the cost of the foreign products (if any) used in mining, producing, or manufacturing such material constitutes more than 25 per centum of the cost of all the products used in such material;

"(3) the term 'material' includes any article or supply; and

"(4) the term 'department or independent establishment' means any executive agency (as defined in section 105 of title 5, United States Code) or any military department (as defined in section 102 of such title).

"SEC. 2. (a) Notwithstanding any other provision of law, and unless the head of the department or independent establishment concerned shall determine it to be inconsistent with the public interest or the cost to be unreasonable, only materials of domestic origin shall be acquired for public use.

"(b)(1) The head of each department or independent establishment shall issue regulations which provide that, for purposes of subsection (a) of this section, the bid or offered price of any material of domestic origin shall not be deemed to be unreasonable if such bid or offered price does not exceed the sum of (A) the bid or offered price of like materials of foreign origin (including any applicable duty) and (B) the differential defined in paragraph (2) of this paragraph.

"(2) The differential referred to in paragraph (1) of this subsection is an amount (as determined by the head of the department or independent establishment) which is not less than 15 per centum and not more than 50 per centum of the bid or offered price of such materials of foreign origin (including any applicable duty).

"(c) This section shall not apply with respect to materials for use outside the United States or if materials of domestic origin of the class or kind to be used are not of a satisfactory quality or are not commercially available in sufficient quantities.".

SEC. 3. Section 3(a) of the Buy American Act (41 U.S.C. 10b(a)) is amended—

(1) by inserting "(1)" after "(a)";

(2) by striking out "in the United States" where it first appears and inserting in lieu thereof "in any State";

(3) by striking out ", shall use only such unmanufactured articles" and all that follows in such section and inserting in lieu thereof: "shall use only materials of domestic origin. However, if the head of the department or independent establishment making the contract finds that in respect to some particular material such requirement would unreasonably increase the cost, or if such person finds that materials of domestic origin of the class or kind to be used are not of a satisfactory quality or are not commercially available in sufficient quantities, an exception shall be noted in the specifications as to that particular material, and a public record made of the findings which justified the exception."; and

(4) by adding after paragraph (1), as so redesignated, the following new paragraph:

"(2) In determining whether the requirement described in paragraph (1) of this subsection would unreasonably increase the cost of the project, the head of the department or independent establishment shall apply the same standards as such person applies in determining for purposes of section 2 of this Act whether the bid or offered price of any material of domestic origin is unreasonable.".

SEC. 4. The Buy American Act is amended by redesignating sections 4 and 5 as sections 6 and 7, respectively, and by inserting after section 3 the following new sections:

"SEC. 4. (a)(1) Sections 2 and 3 of this title shall apply to the acquisition of materials for public use by any State or political subdivision thereof and to every contract entered into by any State or political subdivision thereof for the construction, alteration, or repair of any public building or public work if more than 50 per centum of the financing for such material, building, or work comes from any Federal financial assistance received after the date of the enactment of this section.

"(2) If paragraph (1) of this subsection makes section 2 or 3 of this title applicable to the acquisition by any State or political subdivision thereof of materials for public use or to any contract entered into by any State or political subdivision thereof for the construction, alteration, or repair of any public building or public work, the State or political subdivision concerned shall be responsible for making the determinations required under sections 2 and 3 of this title. Any such determination shall be made in accordance with the applicable regulations of the department or independent establishment which provides the largest share of Federal financial assistance for the particular material, building, or work. If any requirement imposed by the State (or by any political subdivision thereof) making such determinations provides for a greater preference for materials of domestic origin than is required by the regulations of such department or independent establishment, such requirement shall be applicable in lieu of such regulations.

"(b) The head of each department and independent establishment shall take such actions as may be necessary to notify each State and political subdivision thereof which receives Federal financial assistance of the provisions of this section.

"(c) Any State or political subdivision thereof which fails to comply with the requirements of subsection (a) of this section shall be liable to the United States for the repayment of any money spent in violation of such requirements. Any determination that any State or political subdivision thereof failed to comply with such requirements shall be made on the record by the department or independent establishment which provided such money to such entity after such department or independent establishment has provided such entity with an opportunity for a hearing.

"SEC. 5. The provisions of this Act shall not supersede the provisions of any treaty entered into by the Government of the United States on or before the date of the enactment of this section.".

COMMITTEE ON GOVERNMENTAL AFFAIRS, SUBCOMMITTEE ON FEDERAL SPENDING PRACTICES AND OPEN GOVERNMENT,
Washington, D.C., November 4, 1977.

Hon. ELMER B. STAATS,
Comptroller General of the United States General Accounting Office, Washington, D.C.

DEAR MR. STAATS: We are writing to ask the General Accounting Office to undertake a thorough review of the Antidumping Act of 1921, as amended, and the Treasury Department's administration of it.

Though we are interested in your evaluation of the entire Act and Treasury's performance in enforcing it, we particularly call your attention to:

(1) the length of time of dumping investigations and the number of occasions they have exceeded statutory limits;

(2) the bonding requirement pursuant to a tentative or permanent finding of dumping, whether the amounts required are sufficiently high, and whether the amounts of the bonds are consistent from case to case;

(3) problems associated with assessing dumping duties, particularly the time lag involved in the assessment process;

(4) the effect on retail or wholesale prices of merchandise which has been a) subject to a bond pursuant to a finding of dumping, or b) subject to dumping duties;

(5) the degree of cooperation from foreign governments in obtaining the data necessary to conclude a dumping investigation; and

(6) the frequency of revocation of dumping findings, if any.

As you will note, these questions concern both the adequacy of the statute and Treasury's administration of it. Although our concern is prompted by the crisis in the steel industry, we do not wish you to limit the scope of your inquiry only to those cases involving steel. However, the seriousness of the problems in that industry makes time an important issue, and we hope you can complete this task quickly.

Sincerely,

BIRCH BAYH,
JOHN GLENN,
H. JOHN HEINZ III,
HOWARD M. METZENBAUM,
JENNINGS RANDOLPH,
U.S. Senators.

By Mr. BUMPERS:

S. 2319. A bill to amend the Internal Revenue Code of 1954, as amended; to the Committee on Finance.

Mr. BUMPERS. Mr. President, I am today introducing a bill designed to eliminate an inconsistency in the Internal Revenue Code's treatment of pollution control facilities. The construction of pollution control facilities is encouraged primarily by section 103 and section 169 of the code. Under section 169, taxpayers who construct or acquire "certified pollution control facilities," as defined in the code, are entitled to rapid amortization and one-half of the investment credit. Under section 103, the interest from industrial development bonds is exempt from income taxes if the proceeds of the bonds are used to construct "air or water pollution control facilities."

The term "air or water pollution control facilities" is not further defined in section 103, but the Internal Revenue Service in its regulations—Treasury Regulations section 1.103-8(g)(2))—adopted a definition that is consistent with the definition of "certified pollution control facilities" as it existed prior to the passage of the Tax Reform Act of 1976. That act expanded the definition of "certified pollution control facilities" in section 169, so that, for example, a facility that prevents the creation or emission of pollutants is eligible for favored tax treatment. Unfortunately, the conference report states:

The conference agreement also provides that the broader definition of a pollution control facility which is eligible for the amortization election does not apply in determining whether a facility is a pollution control facility eligible for tax-exempt industrial development bond financing.

The effect of this language will be to restrict the availability of the tax exemption for pollution control facilities built with the proceeds of industrial development bonds. This is, it seems to me, a highly undesirable result. By any reasonable calculation, expenditures for pollution control are going to consume much of our available capital for the next decade and beyond. Special tax treatment for such expenditures is a proven method of reducing their burden on the economy. The 94th Congress, by reinstating and liberalizing the rapid writeoff provisions of section 169, and expanding its definition of eligible facilities, recognized this fact. The restriction on eligibility of facilities under section 103 is inconsistent with the broader vision otherwise apparent in the conference report's treatment of pollution control facilities. My bill would simply make clear that "pollution control facilities" are not to be defined more restrictively under section 103 than under section 169.

Mr. President, I make no claim that passage of my bill will have a sweeping impact on the construction of pollution control facilities; legislation of broader scope may very well be required. My bill would, however, eliminate an anomaly in the tax code and reaffirm Congress commitment to reversing the degradation of our environment.

ADDITIONAL COSPONSORS

S. 237 AND S. 239

At the request of Mr. BARTLETT, the Senator from Wyoming (Mr. HANSEN) was added as a cosponsor of S. 237 to amend the tariff schedules of the United States; and S. 239, to amend Public Law 88-482.

S. 242

At the request of Mr. CHURCH, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 242, a bill to provide for consideration of the comparative productive potential of irrigable lands in determining nonexcess acreages under Federal reclamation laws.

S. 551

At the request of Mr. HUMPHREY, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 551, the Victims of Crime Act.

S. 1243

At the request of Mr. CHURCH, the Senator from North Dakota (Mr. BURDICK) and the Senator from Maine (Mr.

HATHAWAY) were added as cosponsors of S. 1243, a bill to amend title II of the Social Security Act to revise the provisions relating to automatic cost-of-living increases in benefits, and for other purposes.

S. 1726

At the request of Mr. NELSON, the Senator from New Hampshire (Mr. MCINTYRE) was added as a cosponsor of S. 1726, the Small Business Economic Policy and Advocacy Reorganization Act of 1977.

S. 1821

At the request of Mr. HUMPHREY, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1821, the Athletic Opportunities Assistance Act.

S. 1974 AND AMENDMENT NO. 849

At the request of Mr. NELSON, the Senator from Pennsylvania (Mr. HEINZ), the Senator from Ohio (Mr. GLENN), and the Senator from South Dakota (Mr. MCGOVERN) were added as cosponsors of S. 1974, the Regulatory Flexibility Act, and amendment No. 849 to S. 1974.

S. 2090

At the request of Mr. NELSON, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 2090, the Economic Opportunity Amendments of 1977.

S. 2278

At the request of Mr. HUMPHREY, the Senator from Massachusetts (Mr. BROOKE) was added as a cosponsor of S. 2278, the International Emergency Food Reserve Act.

SENATE RESOLUTION 323

At the request of Mr. DOLE, the Senator from Wisconsin (Mr. PROXMIRE) and the Senator from Utah (Mr. HATCH) were added as cosponsors of Senate Resolution 323, a resolution, expressing the sense of the Senate with respect to the atrocities taking place in Cambodia.

SENATE RESOLUTION 300

At the request of Mr. DOLE, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of Senate Resolution 300, a concurrent resolution expressing the sense of the Senate with respect to international cooperation in reducing the instance of airline hijackings.

SENATE RESOLUTION 326—SUBMISSION OF A RESOLUTION TO AMEND THE SENATE RULES

(Referred to the Committee on Rules and Administration.)

Mr. KENNEDY submitted the following resolution:

S. RES 326

Resolved, That rule XXVI of the Standing Rules of the Senate is amended by adding at the end thereof the following new paragraph:

"4. (a) Whenever the Committee on Finance reports a bill or joint resolution which, as reported, contains or extends one or more tax expenditure provisions, or whenever an amendment which contains or extends one or more tax expenditure provisions is proposed by floor amendment on behalf of, at the direction of or with the approval of the Committee on Finance, such bill or joint resolution or such amendment shall be referred to—

(1) the Committee on Appropriations, for consideration of the tax expenditure provisions contained or extended in such bill or joint resolution or such amendment; and

(2) each other committee of the Senate which has legislative jurisdiction over the subject matter of any tax expenditure provision contained or extended in such bill or joint resolution or such amendment, for consideration of such tax expenditure provision.

"(b) Each committee to which a bill or joint resolution or an amendment is referred under subparagraph (a), shall report it to the Senate, together with its recommendations, within 14 calendar days (or such lesser number of days as the Senate may order) after the day on which such bill or joint resolution or such amendment is referred to it. In the event that any such committee fails to report such bill or joint resolution or such amendment within the specified period, it shall automatically be discharged from further consideration of such bill or joint resolution or such amendment.

"(c) For purposes of this paragraph, the term 'tax expenditure provision' means any provision of the Internal Revenue Code of 1954, or of any other law, which allows a special exclusion, exemption, or deduction in determining liability for any tax or which provides a special credit against any tax, a preferential rate of tax, or a deferral of tax liability.".

TO COORDINATE SENATE COMMITTEE JURISDICTION OVER FEDERAL TAX SUBSIDIES

Mr. KENNEDY. Mr. President, I send to the desk a resolution to provide for more effective coordination of Senate committee jurisdiction over Federal spending through the tax laws, and I ask that the resolution may be appropriately referred.

The resolution requires that legislation recommending new tax spending programs or the extension of existing tax spending programs must be referred for a period of 2 weeks to both the Senate Appropriations Committee and the Senate authorizing committee that would were a direct expenditure instead of a tax expenditure.

In this way, before the Senate acts on new tax spending programs, we will have the views not only of the Finance Committee, but also of the other Senate committees which have long-standing expertise in the area for which the new Federal tax subsidy is being proposed.

The Internal Revenue Code contains a large number of so-called tax expenditures—more than 80 as recently defined by the Congressional Budget Office. Altogether, they will cost the Treasury $124 billion in the current fiscal year.

These tax subsidies have very little to do with the proper functions of the Internal Revenue Code. They are Federal spending programs, carried out through the tax laws and designed to encourage various social and economic goals of the Government.

Among the best known and most costly tax subsidies are those designed to encourage home ownership, better health care, gifts to charities, business investment, and production of oil and gas and have jurisdiction over the subsidy if it other natural resources. Many other worthwhile Federal goals are also subsidized through the tax laws.

But these goals are not tax goals of the Federal Government. They are spending goals, involving the expenditure of billions of dollars a year in Federal subsidies.

The dollars Congress is spending through the tax programs recommended by the Finance Committee are not "funny" dollars. They are as real as any other Federal dollars being spent in the spending programs recommended by other committees of the Senate.

Obviously, these Finance Committee spending programs in areas like energy, housing, investment and education directly overlap the jurisdiction of other committees, such as the Energy Committee, the Banking Committee, the Commerce Committee, and the Human Resources Committee. And they also overlap the jurisdiction of the Appropriations Committee, which has the responsibility for funding the spending programs recommended by the various authorizing committees.

Yet there is virtually no coordination in Congress between the spending programs recommended by the Finance Committee and the spending programs recommended by the authorizing committees and funded by the Appropriations Committee.

Most of us were surprised to find that the biggest of all the bills in the President's energy program was a Finance Committee bill. Earlier this year, at the beginning of the current session of Congress, we spent several weeks enacting a Senate resolution designed to improve the committee system by consolidating and coordinating the splintered and overlapping jurisdictions of our various committees. Although the resolution left much to be desired, the most important step we thought we had taken was the creation of a new Energy Committee with comprehensive jurisdiction in the area of energy. Now, we find that we didn't achieve that goal at all. The Finance Committee was essentially untouched by the resolution, and it is still the Senate's biggest energy committee.

In recent years, because of the growing impact of the Budget Reform Act, direct spending programs have come under significant restraint in the Congress. The free-wheeling days of direct Federal spending are over. Every dollar of direct spending now comes under the microscopic scrutiny of an authorizing committee, the Appropriations Committee and the Budget Committee.

But as the recent Energy Tax Act makes clear, the tax spending programs are still riding high in the Senate. As passed by the Senate, the bill created dozens of new and lucrative but ill-considered tax spending programs. As sent to the conference with the House, the bill will cost the Treasury $46 billion by 1985, and it has prompted the Secretary of the Treasury to label it as "less an energy plan than a simple raid on the Federal Treasury."

The resolution I am introducing today is an effort to fill the existing void. The

issue involved is not a new one. It has been brewing for many years, because of the obvious numerous overlaps between the Finance Committee and the other standing committees of the Senate.

The jurisdictional issue surfaced in its most visible form so far in the recent debate on the Senate floor in connection with the Energy Tax Act.

The issue arose on this measure because the act as recommended by the Finance Committee, contained a large number of so-called "refundable"* tax credits for both individuals and corporations, costing several billion dollars and ranging from tax credits for home insulation to tax credits for industrial coal-fired boilers.

Previously, the Senate had considered refundable tax credits on only rare occasions, involving isolated proposals of less far-reaching budget impact. There is only one refundable tax credit in existing law—the "earned income credit," which was enacted in 1975 on the recommendation of the Finance Committee and which provides a tax credit of up to $400 for low-income workers. If that credit had not been made refundable, most workers could not have received its benefits, since they would have had no tax liability to be reduced by the credit.

Although the earned income credit was called an income tax "refund," it was not actually a refund, since the intended beneficiaries were not paying taxes that could be offset by a refund. In effect, the credit was a new Federal spending program, appropriating funds for low-income workers. Ordinarily, such funds would have been authorized by the Human Resources Committee and approved by the Appropriations Committee.

During the debate on the Energy Tax Act, the Appropriations Committee asserted—and prevailed—on its claim of jurisdiction over the refundable tax credits proposed by the Finance Committee in the bill as reported to the Senate.

The precedent established was an unusual and dramatic one. On October 28, while the bill was on the Senate floor, the jurisdiction of the Finance Committee over the refundable portion of the tax credits was directly challenged by the Appropriations Committee, on the grounds that the "refund" is a tax fiction and that such credits are in fact appropriations of Federal dollars beyond the jurisdiction of the Finance Committee.

By voice vote, demonstrating the overwhelming support in the Senate for the precedent, the Finance Committee bill was referred to the Appropriations Committee. Although the bill was returned instantaneously to the Senate floor for further action, the parliamentary precedent was clearly established giving the Appropriations Committee jurisdiction over the refundable portion of the tax credits.

But if the Appropriations Committee has jurisdiction over the refundable part of such tax credits, it is illogical to deny jurisdiction to the Appropriations Committee over the nonrefundable part of such credits, since both parts are actually Federal spending programs in which the Appropriations Committee has a legitimate interest. It is also illogical to deny jurisdiction to the relevant authorizing committees over both parts of such credits. Yet this divided jurisdiction is the inconsistent "split-the-baby" position in which the Senate now finds itself as a result of its archaic and incoherent jurisdictional rules.

We could solve this jurisdictional dilemma in either of two ways:

First, following the logical of the precedent established in the energy tax debate, we could realine Senate committee jurisdictions so that the various authorizing committees, not the Finance Committee, would consider tax subsidies as parts of their jurisdiction. Under this solution, the Finance Committee would retain its jurisdiction over the so-called normal or structural parts of the tax laws—the tax rates, the rules for defining income, the administration of the income tax system, and other related aspects of the tax laws. But jurisdiction over tax subsidies—the special credits, deductions, and other tax incentives enacted to encourage particular economic or social activities would be shifted to the various authorizing committees.

In fact, that is where tax subsidies belong under a rational system of Senate jurisdiction. All other types of Federal subsidies, such as grants, loans, and loan guarantees, are already within the jurisdiction of the authorizing committee. It makes little sense for a separate Senate committee, the Finance Committee, to have jurisdiction over certain subsidies in these areas simply because the subsidies happen to take the form of tax incentives. It makes even less sense for the Finance Committee to have jurisdiction over the nonrefundable part of a tax credit while the Appropriations Committee has jurisdiction over the refundable part.

Second, we could take the less comprehensive, but still substantial, step of requiring that, before tax subsidies proposed by the Finance Committee are considered by the full Senate, they must be scrutinized by the other committees with expertise in the subject matter—the respective authorizing committees and the Appropriations Committee.

Under this approach, for example, the numerous energy tax credits and other energy tax incentives recommended by the Finance Committee in the recent bill would have been referred briefly to the Energy Committee for consideration, and the intercity bus credit would have been referred to the Commerce Committee. In addition, these tax credits would also have been referred to the Appropriations Committee.

The resolution I am introducing today follows the second route. By requiring greater coordination among Senate committees, without depriving the Finance Committee of its own current jurisdiction, we can take a significant step toward establishing a more rational system for Senate action on the complex issues involved in the wide range of Federal spending programs for energy, jobs, investment, health, education, commerce, housing, transportation and all the other critical issues we face.

We know the increasingly severe restrictions under which the Federal budget must operate. We cannot afford to spend our scarce Federal dollars in wasteful, inefficient, and duplicative ways. It is time that our massive tax spending programs received the same strict analysis and consideration that all other spending programs now receive.

*"Refundable" tax credits are a relatively recent innovation in the tax laws. They are intended to insure that tax subsidies are available even to individuals and corporations whose taxes are so low that they would not otherwise receive the full benefit of the credit. Thus, persons entitled to a refundable credit may use it to reduce their taxes to zero and then obtain a "refund" from the Treasury for the rest of the credit. Persons who owe no taxes get a refund in the full amount of the credit.

SENATE RESOLUTION 327—SUBMISSION OF A RESOLUTION RELATING TO THE EXPORT OF MILITARY WEAPONS TO UGANDA

(Referred to the Committee on Foreign Relations.)

Mr. DOLE submitted the following resolution:

S. RES. 327

Whereas the moral intent of United States foreign policy is comprised, in part, of efforts to advance international human rights observance;

Whereas the present Government of Uganda has been responsible for the brutal execution of thousands of political enemies, either real or imagined, since it came to power in January of 1971;

Whereas the United States Senate, on May 25, 1977, expressed its condemnation of the Ugandan atrocities by means of agreement to Senate Resolution 175; and

Whereas recent reports have revealed that some Ugandan officials are receiving technical assistance and training of a military, paramilitary, or police nature within the United States: Now, therefore, be it

Resolved, That the Senate calls upon the President—

(1) to prohibit the export of weapons and military, paramilitary, and police equipment from the United States to the Government of Uganda, until the President determines that such Government has demonstrated a proper respect for the rule of law and for internationally recognized human rights;

(2) to declare that the appropriate consular officer may not approve any visa application by any official or employee of the Government of Uganda for the purpose of military, paramilitary, or police training within the United States, unless the appropriate official of the Department of State in Washington has reviewed such application and determined that such Government has demonstrated a proper respect for the role of law and for internationally recognized human rights; and

(3) to instruct the United States Ambassador to the United Nations to submit to the General Assembly for consideration during the current session a resolution imposing a mandatory arms embargo on Uganda by all United Nations members.

RESOLUTION ENDORSING RESTRICTIONS ON UGANDAN ASSISTANCE

Mr. DOLE. Mr. President, last week the State Department confirmed that several dozen Ugandan Government officials are currently in the United States for train-

ing programs with private organizations. At least a dozen of these are enrolled in a training course for helicopter pilots run by an American helicopter company located in Texas. According to the report, the Ugandans are government employees training to pilot police helicopters.

There are two disturbing elements to this matter. First, the present Government of Uganda is notorious for its brutal and barbaric treatment of those individuals whom it perceives as political opponents. Both public and private executions have become the standard means for dealing with political opposition since Idi Amin came to power in January of 1971. Both Ugandans and non-Ugandans have suffered the wrath of this capricious dictator. Americans last week were jolted by the uneasy feeling that training programs within our own country may be directly assisting in the brutal repression that has terrorized Uganda.

Second, it is particularly disturbing to me, as I know it is to many of my colleagues, that entrance visas for the Ugandan Government officials were approved without the knowledge of State Department officials in Washington. It seems that visas for foreign government employees traveling in this country for official purposes have been routinely handled by U.S. consular employees in our embassies abroad. Although the State Department says that it has since "tightened up" its visa procedures for Ugandans, future policies in this regard seem uncertain at best. I believe it would be useful for the U.S. Senate to place itself on record with respect to future policy in this area.

For that reason, I am today introducing a Senate resolution which would clearly express the sense of this body with respect to the handling of visa applications submitted by Ugandan Government officials in the future. In addition, it calls for a mandatory embargo on the export of all American military police, and paramilitary equipment to Uganda; and it urges the U.S. Ambassador to the United Nations to present a resolution for consideration imposing a mandatory arms embargo on Uganda by all members of the United Nations. This would, of course, parallel similar action taken by the U.N. Security Council against the Government of South Africa 2 weeks ago.

EARLIER RESOLUTION OF CONDEMNATION

Mr. President, just 6 months ago, on May 25, the U.S. Senate unanimously approved Senate Resolution 175 condemning the brutal and inhumane actions of the current regime in Uganda. That resolution was introduced and skillfully advanced by the distinguished Senator from New Jersey, and ranking minority member of the Senate Foreign Relations Committee, Senator CLIFFORD CASE. The Senate action was, in my opinion, a commendable and highly justified expression of repugnance by this body for the human slaughter that has occurred in Uganda during the past 6 years.

In addition, the Republican National Committee, on September 30 of this year, adopted a human rights resolution at New Orleans calling upon the President to initiate action within the United Nations censuring Idi Amin for his "brutal butchering of political enemies, both real and imagined." That, too, was a commendable initiative emphasizing the need for consistent pursuit of the human rights principle in all our foreign policy endeavors.

A BARBARIC REGIME

Within the past several years, the world has become sadly aware of the unspeakable horrors of the Amin regime in Uganda. The rule of law in Uganda is nonexistent, and financial mismanagement is widespread. Idi Amin has declared himself "President for life" and has undertaken a bloody campaign to eliminate all potential opposition to his totalitarian government. The official intelligence network within the country constitutes a continuous form of harassment and intimidation for Ugandans in all walks of life.

Estimates of the number of Ugandan citizens who have been mercilessly killed since Amin came to power vary, but Amnesty International reports that between 30,000 and 300,000 Ugandans have fallen victim to this reign of terror.

In addition, we know that American businessmen and Church leaders residing in Uganda have been harassed and intimidated unmercifully. Discrimination against Christians and Jews has occurred regularly. For a few days in February of this year, Amin forbade Americans living in Uganda from leaving the country. A concerted international protest fortunately led to a rescission of that order on March 1.

SOVIET AND CUBAN INVOLVEMENT

In search of a source of diplomatic and military support, Idi Amin has turned to the Soviet Union for the purchase of fighter aircraft and tanks as well as Soviet instructors to accompany them. Amin's closest friends on the international scene are the leaders of Cuba and Libya, both international outlaws in their own right. Newspapers in neighboring Kenya have reported that large numbers of Cubans are entering Uganda, and Libya is providing Uganda with economic aid. It will not come as a surprise to many that the brutal Ugandan regime displays a definite pro-Marxist tendency in its foreign relations.

PURPOSE OF RESOLUTION

Mr. President, there are those who shrug their shoulders helplessly and say that there is little we can do to improve the barbaric situations that we know exist in nations such as Cambodia and Uganda today. But I do not subscribe to the theory that our limited capacities necessitate hopeless resignation on our part. I believe that the U.S. Government has a responsibility to speak out, and to continue to speak out against such brutal regimes, and to attempt to focus world attention on their gross violations of basic human rights.

In many cases, our action may be termed "symbolic" or "moralistic." In some cases, when we move to deny technical and military assistance to Uganda, others may fill the void. But I, for one, believe that moral principle and consistency of policy argue for such action in any case. Indeed, I believe the national interest is best served by a policy that encourages the isolation of repressive governments, and by the termination of assistance that directly strengthens the means of repression.

At this time, I believe it is most important that the U.S. Senate go beyond a simple expression of condemnation for the oppressive Ugandan Government. Three weeks ago, our President saw fit to place a mandatory U.S. arms embargo against the Nation of South Africa in response to human rights violations of a different scope and nature. I believe it is all the more important at this time for the United States to establish a mandatory embargo on the export of any military, paramilitary, or police equipment to Uganda. Similarly, the same restrictions should be encouraged among all concerned members in the United Nations. And U.S. visa regulations for Ugandan Government officials should be revised to prohibit technical training for repressive activities in Uganda.

I trust that the Senate Foreign Relations Committee will act expeditiously on this resolution.

Mr. President, I ask unanimous consent that a copy of the Washington Post article of November 9, 1977 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UGANDANS TRAINING IN U.S. ESTIMATED AT SEVERAL DOZEN

(By Richard M. Weintraub)

Several dozen Ugandans are in the United States for training with private organizations, the U.S. embassy in Nairobi, Kenya, said yesterday. The disclosure added to the burgeoning issue of whether the United States has unwittingly been providing assistance for Idi Amin's government.

The State Department confirmed Monday that a dozen Ugandans were in a private training course for helicopter pilots run by Bell Helicopter Co. in Fort Worth, Tex., but department spokesmen yesterday were unable to add to a report from the embassy in Nairobi that as many as 40-to-50 Ugandans are in the United States for other private run training programs.

The State Department said Monday that it is "tightening up" on visa procedures for Ugandans since their travel to the United States is "possibly incompatible" with Uganda's record on human rights.

Rep. Michael T. Blouin (D-Iowa) charged yesterday that the helicopter pilots are "Idi Amin's agents of torture and oppression." He sent a letter to President Carter calling on him to revoke the visas for the Ugandan pilots.

Blouin's office said that more congressmen are expected to join in the appeal.

The White House press office had no comment yesterday on the visas for the Ugandans, but a White House source said that he "wouldn't be surprised" if the President's staff took up the issue.

There was some confusion over just what kind of visa the Ugandan helicopter pilots were issued.

The White House said it was under the impression that tourist visas were involved and one source said, "We're trying to figure out whether we've been had."

The State Department press office said yesterday afternoon, however, that the visas

were for government employees traveling for official purposes.

The department spokesman said that visas of this sort did not have to be cleared in Washington under the procedures in effect at the time. They were issued in late September. The embassy spokesman in Nairobi said.

"There is really nothing unusual about this. Because we do not have an embassy in Kampala we routinely handle official requests from the Ugandan government for visas in Nairobi."

The United States closed its embassy in Kampala, the Ugandan capital, in November 1973, but did not break diplomatic relations.

The State Department had no explanation yesterday as to why the question of human rights considerations had not entered into visa applications by Ugandans before the issue of the helicopter pilots' presence emerged in the press.

A department spokesman said, however, that "we have instructed our posts to refer to Washington for review all future applications for all Uganda officials and employees:"

The spokesman added that the department is reviewing the question of whether the 12 Ugandan pilots can be expelled under a provision that their presence could have "serious adverse effects on our foreign policy."

The State Department said it did not know how many Americans might be traveling or working in Uganda, aside from the 250 missionaries.

AMENDMENTS SUBMITTED FOR PRINTING

REVISION OF TITLE 18, UNITED STATES CODE—S. 1437

AMENDMENT NO. 1624

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY (for Mr. McCLELLAN) submitted an amendment intended to be proposed to the bill (S. 1437) to codify, revise, and reform title 18 of the United States Code; and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON FOREIGN RELATIONS

Mr. ROBERT C. BYRD. Mr. President, on behalf of Senator SPARKMAN, I wish to announce that there will be a meeting of the Committee on Foreign Relations on Tuesday, November 29, 1977, to receive a briefing by Ambassador Paul C. Warnke on SALT negotiations. The meeting will begin at 10 a.m. in room S–116, Capitol.

SELECT COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, the Senate Small Business Committee will continue its hearings on the impact of rising product liability insurance premiums on small business, on November 22, at 9:30 a.m., in room 318, Russell Senate Building. At this hearing, chaired by Senator CULVER, Under Secretary of Commerce Sidney Harmon, will testify on the final report of the Interagency Task Force on Product Liability.

SUBCOMMITTEE ON GOVERNMENT REGULATION

Mr. NELSON. Mr. President, I wish to announce that the Subcommittee on Government Regulation and Small Business Advocacy of the Select Committee on Small Business and the Subcommittee on Economic Growth and Stabilization of the Joint Economic Committee will hold a joint hearing on Senate bill 1726. This bill would amend the Small Business Act so as to declare a national small business economic policy, and to provide for an ongoing program of advocacy and economic research and analysis for small business. It would also increase the exchange of pertinent information and the level of cooperation between the Small Business Administration and other departments, agencies, and instrumentalities of the Federal Government. The hearing will be held on November 21, 1977, beginning at 10 a.m., in room 424, Russell Senate Office Building. The Senator from New Hampshire (Mr. McINTYRE) will chair the hearing.

Further information can be obtained from the committee office, room 424, Russell Senate Office Building, telephone 224–5175.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. BAYH. Mr. President, the Subcommittee on the Constitution has scheduled hearings on S. 1845 proposing legislation to protect the rights of individuals guaranteed by the Constitution of the United States and to prevent unwarranted invasion of their privacy by prohibiting the use of polygraph type equipment for certain purposes, for Tuesday and Wednesday, November 15 and 16, 1977, beginning at 9 a.m. in room 2228, Dirksen Building on Tuesday and 10 a.m. in room 1202, Dirksen Building on Wednesday.

Any persons wishing to submit written statements for the hearing record should send them to the Subcommittee on the Constitution, suite 102–B, Russell Senate Office Building, Washington, D.C. 20510.

ADDITIONAL STATEMENTS

HE NEVER STOPS GIVING

Mr. DOLE. Mr. President, recently the chairman of the National Advisory Committee on Scouting for the Handicapped, William P. McCahill, sent me an article about a most inspiring man. This man's name is Jesse K. Earl, and he has devoted much time and energy into Scouting programs for the handicapped.

Because of his interest in providing handicapped individuals with an opportunity to participate in Scouting, Mr. Earl organized the first troop for handicapped Scouts in the Nevada Area Council. That was in 1961. Since then, his troop has done well. One of Mr. Earl's proudest moments came when his own son became the first handicapped Eagle Scout in the council.

As we approach the holiday season, I think it important for us to recognize the gifts which persons like Jesse K. Earl give year around.

Mr. President, I ask unanimous consent that an article about Mr. Earl which appeared last year in the Ruralite magazine be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KAY EARL: HE NEVER STOPS GIVING

(By Rich Parker)

Kay Earl has an unusual heart condition. For an ordinary man, it's extraordinarily large. As a result, it's his heart that motivates his day-to-day life.

He doesn't stand out in a crowd. His figure is more rotund than slim, his gray-flecked hairline has slowly moved upward, elongating his round face, and there is grease under his fingernails from "fixing everything from lawnmowers to diesels" at Kennecott Copper Corporation's Nevada Mines Division at McGill, Nevada, where he's lived for all but two of his 53 years, and worked for 29.

But he's hardly average. His smile is honest, and the twinkle in his hazel eyes, which are framed by gold-rimmed glasses, is sincere when he talks about the key to a happy life.

"There's much more satisfaction in giving than there is in receiving."

That's a popular theme at this time of the year. A lot of people mouth the words, but it's the exception, not the rule, who practice that theme.

Earl doesn't need a calendar to remind him it's time to polish up his Christmas spirit. His never gets dull. The only difference between December and June is a change of uniform.

During much of the year, it's the khaki of a scoutmaster's garb for a troop of "exceptional" Scouts. When the holiday season arrives, he switches to a bright red Santa Claus suit to entertain the youngsters and hear whispered heart's desires at the Ely, Nevada J.C. Penney store.

He does it because he loves kids.

Being Santa Claus isn't as easy as it appears on the surface. Youngsters possess that unique ability to see through the man into his heart. And they believe what they see.

"The more I play Santa Claus, the bigger thrill I get out of watching kids and seeing the expressions on their faces . . ."

Earl has been holding expectant youngsters on his knee for about 17 years. "I had to stop and think," he laughed, "it doesn't *seem* that long."

"I don't know why they picked me, but I thought it would be a lot of fun doing it. I like kids anyway."

He knows Christmas is for the young at heart. "It's the excitement of Santa Claus coming down the chimney or through the front door and leaving packages for them—the things they would like to have."

Experience has taught him the most exciting time when the magic of Christmas abounds is from ages 5 to 10.

"Those a little younger than 5 have an idea of what it is, but they don't know how to comprehend it. Over 10, they begin to suspect there isn't a Santa Claus and they're on the borderline of knowing it's somebody dressed up in a suit trying to be Santa."

He's heard happy requests, like a desire for a new baby brother or sister. "I tell them to go home and talk it over with mother and dad and then have *them* get hold of Santa Claus."

Then there was a brother and sister who asked Santa for a father for Christmas. There are no ready answers for the faith of a child.

"It makes you stop and think for a few minutes. . . . The only thing I can say in those cases is to keep hoping, and Santa will do the best he can."

But there's an inner reward in sharing the festivities with the young.

"There are times it makes me feel quite humble to know that I am giving gladness and joy to the young people. It rejuvenates me and makes me feel young again."

But his make-believe role at Christmas is only the holiday tinsel on his life.

Every Friday night, he calls the Scouts

of Troop 69 to attention in the Lane City School, where they attend special education classes during the weekdays.

"I first got into scouting in 1956 with Troop 63 in McGill." In 1961, he organized Troop 69.

"I did it because of Kenny's (the eldest of three sons) being handicapped. At the Lane City School, there were several children of Cub Scout and Boy Scout age who wanted to get in."

He's proud of the fact Troop 69 was the first and is the oldest handicapped troop in the Nevada Area Council.

For Earl, Troop 69 is another opportunity of "doing for people, that wouldn't ordinarily have the opportunity to—(and he stopped for a minute to think of the right words)—to have something that they would like to get into."

It's a labor of love which requires about "two or three hours a night" to prepare for the Scout meetings "to actually do a good job of it."

The results of his efforts and dedication are best exemplified in his son, Kenny. When he was 14, he set what some thought was an impossible goal of becoming an Eagle Scout.

"I told him if he wanted it, I would work with him as much as I could, but that he would have to work on his badges and do the best he could on them."

In 1973, Earl and his wife Ona, who is a 17-year Cub Scout worker (currently the Nevada State Cub Scout director and on the District Roundtable for Cubbing) pinned the silver, spread-winged eagle on their son's chest.

"I felt very humbled. That's about the only way I could say it. And it proved the handicapped could obtain that rank if given half a chance."

Kenny is the first and only handicapped Eagle Scout in the council. The pride radiated in Kay's soft voice. "Many people felt he couldn't do it and Kenny proved them wrong."

Kay Earl isn't a very complex man. He lives by a simple, but proven philosophy, that giving, not receiving is the secret to a happy and satisfying life.

If he has his way, he'll be Santa for "as long as they want me" and scoutmaster "for as long as I'm able."

He goes about his activities quietly and unobtrusively, neither seeking recognition nor reward. And he's found the elusive fountain of youth right under his nose—in the youngsters of White Pine County.

On the way to the door, he suddenly stopped as though he had just realized how many Christmases he'd enjoyed. He laughed. "You know, I'm 53 and I feel like I'm 29."

Everybody's journey through life causes a few tears to fall, but you have to believe in his case they've been tears of joy.

BRICKING UP AN ANTITRUST LOOPHOLE

Mr. KENNEDY. Mr. President, as chairman of the Subcommittee on Antitrust and Monopoly, I am pleased to report that the subcommittee has reported to the full Judiciary Committee antitrust legislation which would once again allow consumers, businesses, and Federal and State Governments to recover damages for antitrust violations. On June 9, 1977, the Supreme Court ruled in a case entitled Illinois Brick Co. against Illinois that only those parties dealing directly with an antitrust violator could recover damages. Consumers, governments, or businesses rarely purchase directly from the manufacturer. Consumers and taxpayers in every State were affected by this decision and will thus benefit from any legislation which Congress ultimately enacts.

For many years, antitrust law has allowed persons who purchased indirectly from price fixers (through some kind of middleman, distributor, or retailer) to sue the price fixer. Businessmen, farmers, producers, consumers, and the Federal and State Governments have benefited from this state of the law. State governments alone have collected over $300 million in such cases, and in just one case involving allegations of patent fraud, consumers and other indirect parties collected over $230 million.

However, on June 9, 1977, the Supreme Court held that the State of Illinois could not maintain a civil action for damages to the State against price fixing concrete block manufacturers because the State bought the blocks through a middleman. (The companies had already pleaded no contest in response to Federal indictments.) The State of Illinois had evidence that the middleman passed on to the State the amount of the price fix as part of the cost of the blocks but the court would not even permit proof of that fact.

Courts throughout the country have been interpreting this decision quite broadly. It has been interpreted, for example, to apply to more than just price fixing actions and to apply to sellers as well as buyers.

The States now have well over $200 million claimed in pending lawsuits as damages to the States themselves. The U.S. Government has another $200 million at stake in pending litigation. Well over 95 percent of these damages flow from indirect purchases, not direct. In fact, it is true that, like consumers in the store, the State and Federal Government rarely purchase things directly from their manufacturer or producers. Thus, if the Illinois Brick decision is allowed to stand, State and local governments, as well as the U.S. Government, will be without any remedy whatsoever to compensate for damages.

Many important private actions are also being dismissed or appear likely to be dismissed following the Supreme Court decision. One such case involves ranchers who are suing supermarkets for allegedly fixing the price at which they will buy beef. Because these cattlemen do not deal directly with the supermarkets, dismissal is now being threatened. The Illinois Brick opinion has thus apparently repealed the antitrust laws as far as the cattlemen are concerned, though damages have been estimated in their cases to be over $168 million.

A further irony of the majority's decision in Illinois Brick is that the middleman, the wholesaler, retailer, or contractor, may sue for the entire damages even though he passed on the illegal overcharge to his customer or the government. This is clearly an unfair windfall to the direct purchaser.

The decision in Illinois Brick also directly conflicts with the intent of the parens patriae section of the Hart-Scott-Rodino bill which was passed just last year. The clear purpose of the parens patriae amendment was to enable State attorneys general to act on behalf of ultimate consumers whose individual interests might be too small to justify separate individual lawsuits. Although the Illinois Brick decision did not deal directly with the parens patriae section, the majority opinion's restriction on consumer actions is flatly inconsistent with the whole purpose and spirit of the Hart-Scott-Rodino bill. Moreover, in a footnote, the Supreme Court interprets parens patriae actions as simply a new, procedural device to enforce existing damage claims. This interpretation together with the majority's opinion that most consumers have no existing damage claim because they are indirect purchasers means that the Illinois Brick decision effectively frustrates the clear legislative intent of Congress.

Thirty-six days after the Supreme Court announced its decision, Congressman RODINO, chairman of the House Judiciary Committee, and Senators DANFORTH, MORGAN, and myself introduced corrective legislation in both the House and Senate. Hearings were held over the next 3 months at which testimony was received from all interested parties, including representatives of the business community, the academic world, the judiciary, and antitrust practitioners, as well as State attorneys general. Chairman RODINO has chaired similar hearings in the House.

The record established in these hearings provided a basis for substantial improvement of the original bill. The version which was reported to the full Committee, without recommendation, goes a long way toward solving some of the problems seen by witnesses in the original bill.

The reported bill, like the bill originally introduced, contains a savings clause that would make the legislation apply to any action commenced under sections 4, 4A, or 4C(a)(1) of the Clayton Act which was pending on June 9, 1977 or filed thereafter. This means that by so acting, the subcommittee has provided the Federal district court judges assigned to the pending Government, State and private cases, a basis for deferring any rulings on motions to dismiss on the basis of the Illinois Brick decision pending final legislative action.

I am confident that legislation reversing Illinois Brick will be brought before the Senate for consideration early next session. Indeed, Mr. Justice White invited a legislative response in the majority opinion when he said:

> Should Congress disagree with this result, it may, of course, amend the section to change it.

Whatever the final shape of the legislation, this important first step indicates that the subcommittee believes that the status quo of the pending Government and private cases should be preserved while we continue work on precise statutory language.

It is clear to me that a majority of the Congress, like a majority of the Antitrust Subcommittee, believes that some legislation should be enacted, at least to ameli-

orate, if not completely overturn, the effects of the Illinois Brick case. We have taken the first step toward that goal.

Mr. President, I would also like to insert in the RECORD at this time two recent editorials on this subject.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 31, 1977]

PURSUING THE PRICE FIXERS

The Supreme Court, in an unfortunate decision last June, suddenly created a large new obstacle to the enforcement of the antitrust laws. Even if you can prove that you are the victim of a price-fixing conspiracy, the Court said, you cannot recover damages unless you dealt directly with the fixer. In an economy as complex as this country's, with its vast networks of distributors, that is an extremely serious qualification. In many kinds of industry, it effectively eliminates any risk of damage suits over price conspiracies.

This anomaly stands out clearly in the case that the Court heard. The state of Illinois sued the Illinois Brick Co., charging that it had conspired to rig prices of concrete blocks. The state government had let construction contracts, the contractors had hired masonry subcontractors, and it was the subcontractors who actually bought the blocks from Illinois Brick. They presumably passed the price on, through the contractors, to the state.

Since it's not illegal to pass a rigged price on, the state can't sue the middlemen. Legally, the middlemen could sue the manufacturer. But these subcontractors weren't hurt by the conspiracy, if there was one, and in any case they are unlikely to undertake prolonged litigation against their supplier. For all the Court knew, it might have been the grandest conspiracy in the history of concrete blocks. But nobody, under the Court's rule, would recover anything.

How in the world did the Court arrive at that decision? Well, six of the judges got tangled up in a misconceived effort to apply the logic of an earlier, different case to this one. They were worried, for one thing, about creating multiple liabilities for price fixers if everyone down the distribution chain could sue for triple damages. But trial judges have broad authority to consolidate cases and require plaintiffs to allocate damages among themselves. That, in fact, was what happened in these cases before the Court suddenly halted them.

Fixing prices is a crime, and people who engage in it risk criminal prosecution by the Justice Department. But the Justice Department cannot monitor every price tag or pursue every complaint of conspiracy. To keep markets free and competitive, there is great public interest in encouraging a second kind of enforcement—the civil suit by the consumer. It's the consumer who has the sharpest interest in fair pricing. Consumers can be individuals or corporations or, as in the Illinois case, governments. The effect of the Court's decision, if it stands, is to make price-fixing much less dangerous to the conspirator.

Corrective legislation has been drafted under the leadership of Sen. Edward Kennedy (D-Mass.), and the Carter administration vigorously supports it. The opposition is coming, as usual, from those business organizations that celebrate free competition in theory, but find objections to every attempt at actually enforcing it. The Court's decision is an aberration, with unhappy implications for the American economy. The remedy is a simple two-page bill, and it is needed urgently.

[From the New York Times, October 28, 1977]

BRICKING UP AN ANTITRUST LOOPHOLE

If an appliance store buys an air conditioner or a refrigerator or anything else and then discovers the price has been illegally fixed by manufacturers, it may sue for treble damages under the antitrust laws. But if it manages to pass the rigged price on to a consumer, the consumer is out of luck; he cannot sue.

That, in effect, is what the Supreme Court decided last June when it rejected a suit against an Illinois brick manufacturer. The brick company has allegedly fixed the price of building supplies that it sold to builders, and they in turn passed on the added cost to local governments for which they worked. As "indirect" purchasers of bricks, the Court ruled, the local governments had no right to sue for damages.

The Court's judgment was based on a fear that antitrust defendants might otherwise become liable many times over for the same offense. In a 1968 case, the Court ruled that middlemen—wholesalers, contractors—might still sue manufacturers for price-fixing damages, even if the middlemen had passed on every penny of the actual damage to consumers. Hence, Justice White argued, also to allow the indirect purchasers to sue would open the defendants to treble damage claims from several levels of product distribution.

The difficulty now is that the *Illinois Brick* decision threatens in practice to cripple antitrust enforcement, or to force the Justice Department to seek redress through criminal rather than civil suits. The best deterrent against price-fixing has been the civil suit, often by those wronged indirectly, because of the threat of treble damage payments. The Supreme's Court's ruling will also be devastating to class-action suits brought on behalf of groups of consumers by state attorneys-general. About 95 percent of such pending claims (totaling about $200 million) are based on indirect purchases.

The only remedy appears to be an amendment to the Clayton Antitrust Act, now being considered by both the House and Senate Judiciary Committees. It would restore the right of indirect purchasers to initiate suits—but under safeguards to protect defendants from false or frivolous claims. An individual indirect purchaser—who bought the air conditioner—could sue if it seems worth the time or trouble. State attorneys-general could sue on behalf of the whole class of consumers who bought the air conditioners. But private lawyers would not be able to sue on behalf of a random group of indirect purchasers. Moreover, in response to the Court's concern, the bill would make it impossible for claimants at different levels of product distribution to collect redundant damages.

Some argue that the law as it stands goes far enough. Direct purchasers, they contend, have a powerful incentive to sue conspiring sellers, even when they are able to pass on the excess cost to consumers. But that seems a strange argument, on grounds of equity alone: Why should damages go to middlemen rather than to the people who are actually wronged? In the real world, the direct purchasers are often under pressure to let a price-fix go unprotested. They may be wholesalers who depend on manufacturers for their supplies and fear the loss of distribution rights. Sometimes the wholesalers themselves are vulnerable to antitrust complaints and thus reluctant to risk legal action.

Another argument against the proposed amendment is that it would further complicate antitrust proceedings. In the wake of the *Illinois Brick* decision, the courts need only determine the price-fixing has been proved and then assess damages. The new amendment would give the courts the extra job of dividing the damage award among direct and indirect purchasers. Few antitrust experts, however, foresee much effect on the work load of the Federal courts; dividing damages used to be a routine part of settling antitrust cases. That is not sufficient reason to tolerate a giant loophole in the Clayton Act.

We need effective antitrust laws to deny price-fixers the fruits of their conspiracies and to dampen inflationary pressures on the economy. Overturning the *Illinois Brick* decision would help to achieve those goals.

COST-OF-LIVING INCREASE

Mr. SASSER. Mr. President, on November 4, I sponsored a conference on small business in Tennessee and I unavoidably missed taking part in the official Senate business. Of particular interest to me was an amendment offered by Senator CHURCH which provided for semiannual cost-of-living increases for social security recipients during times of rapid inflation.

I wish to state my support for the Church amendment (unprinted No. 1062). It is an idea which is humane, which makes commonsense, and which translates more clearly Congress intention that our senior citizens must not have their benefits decimated by inflation.

I commend the distinguished chairman of the Senate Special Committee on Aging for his continued concern for our Nation's elderly and I offer my hope that the Church amendment will be retained in conference and signed into law.

In addition, I wish to announce my support for the amendment (UP No. 1056) by Senators BAYH and DECONCINI concerning disability benefits for blind persons. Their efforts on behalf of the Nation's blind who courageously continue to work despite their severe physical handicaps will not be forgotten.

SOLARCAL: A PROPOSAL FOR A PUBLIC SOLAR ENERGY AUTHORITY IN CALIFORNIA

Mr. CRANSTON. Mr. President, developing new alternative energy sources is a challenge for us all. As President Carter stressed in presenting his energy plan last April—

> We need to rediscover the ingenuity and the efficiency which have made our nation prosper, rather than deepening our dependence on insecure imports and increasingly conventional energy supplies.

The State of California, the legislature, citizen groups, and individuals have responded to this challenge with new conservation programs, solar energy incentives, research projects, and proposals to commercialize alternative energy supplies.

One group in California, the California Public Policy Center, has developed a proposal for a public solar energy corporation to provide the economic framework for quickly establishing a broad-based solar energy industry in California and to install solar space and water-

heating systems in millions of homes and businesses.

This proposed Solarcal project is now being reviewed by citizen groups, the legislature, and the State administration. It is a unique approach which I believe will be of interest to the citizens of other States as well as California.

Therefore, Mr. President, I ask unanimous consent that the draft proposal for Solarcal, a public solar energy corporation, be printed in the RECORD.

There being no objection, the draft proposal was ordered to be printed in the RECORD, as follows:

SOLARCAL—A PROPOSAL FOR A PUBLIC SOLAR ENERGY AUTHORITY IN CALIFORNIA

SOLARCAL: MOBILIZING TO SOLVE A CRISIS

Solar energy is an idea whose time has come. It can be the first step in liberating America from the dangerous energy and economic future toward which we are heading.

Solar energy is the alternative to dependence on diminishing global energy supplies. It will create a permanent and plentiful source of energy and save us from the threat of world conflict over resources.

Even more important but less well understood, solar can be an economic alternative to patterns of inflation and joblessness which have haunted America and puzzled the experts for several years.

Skyrocketing energy prices are at the heart of these economic troubles. There is a major energy component in the cost of everything we buy, from food to petrochemicals to shoes. When energy prices rise, for example as natural gas prices have risen by 1000% since 1970, so does the cost of everything else.

Moving to liquefied natural gas or nuclear power will double or triple energy prices in the next decade, quite apart from the danger to the environment these strategies pose. As these costs skyrocket, we are investing precious capital in "energy colonies" abroad and in expensive, exotic technology at home, both of which require fewer and fewer workers.

We will be doomed to ever-increasing joblessness and inflation unless we can bring energy prices under control.

Solar energy means jobs, as tens of thousands are employed manufacturing, distributing and installing solar collectors.

Solar energy means economic growth, as billions of dollars are invested in local economies instead of being exported abroad.

Solar energy means less inflation, as solar costs decrease while conventional energy costs rise.

We have reached a new stage in history in which solar energy has become competitive with other fuels for the first time. The California State Energy Commission has reported that the use of solar energy for space and water heating needs is now "commercially feasible." Top government officials say that solar is "here and now" and the only issue is how, not whether, to speed commercialization.

We are also on the threshold of a major breakthrough in the generation of solar electricity from photovoltaic cells. A recent study sponsored by the Federal Energy Administration, for example, concludes that a $500 million federal purchase program could reduce the cost of solar photovoltaic cells to $2.00 per watt by 1985, comparing favorably to conventional electricity sources.

Although solar is now commercially feasible, we have a long way to go before it can provide a major answer to our economic problems.

The potential market for solar for space and water heating needs, for example, would include the two million housing units that will be built in California over the next decade, plus many of the existing seven million housing units. At present, solar is in place on less than 1,000 units in the state. A crash program to install solar on every feasible roof in California by 1990 would mean installing solar on hundreds of thousands of housing units per year over the next decade.

There also needs to be major technological breakthroughs in the purification and processing of silicon crystals to make the widespread commercialization of solar electricity through photovoltaic cells a reality.

There is no question that it is possible to make the breakthrough to a new solar energy age. Technically, it can be done. What is needed now is the political will to make it a reality.

We have made such an effort in times of crisis in the past.

In World War II, for example, we snapped out of a decade of depression, built tens of thousands of new bombers in one year, and put everyone to work at full production.

In the late 50's, in response to Sputnik, we decided to put a man on the moon, and achieved that goal in less than a decade.

If such national mobilizations are possible for war and outer space, why not for solar energy?

Today we face a threat to the very foundations of our society. Double-digit inflation and unemployment, coupled with decreasing social benefits from an over-taxed citizenry, are an explosive combination no reasonable person can welcome. And as our nation competes with others for declining global energy resources, we are bound to move closer to international confrontation and war.

The time has come for the same kind of mobilization around solar that we once mustered in times of other crises.

President Carter has called the energy crisis the "moral equivalent of war", but has yet to give solar the backing it needs. Only a citizens' movement can do the job.

This proposal for SolarCal, a public solar energy Authority to put solar on every feasible building in California, and to accelerate commercialization of solar electricity, is just this kind of response to crisis.

SolarCal's mandate is to foster a democratic, decentralized solar energy industry in California. SolarCal's goals are to (1) stimulate local economic development, (2) conserve energy and (3) create jobs.

It is an appropriate response to both the greatest challenge and the greatest opportunity of our generation.

THE SOLARCAL PROPOSAL

Section 1: General provisions

1. California faces an energy and economic crisis. A new solar energy industry can help solve this crisis by creating tens of thousands of jobs, conserving energy and stimulating local economic development. Solar energy helps labor, helps minorities, helps business and helps consumers.

2. A statewide "solar mobilization", designed to keep solar energy out of monopoly control and to create a democratic, decentralized solar energy industry, is crucial to solving both our energy and our economic problems.

The public needs to be involved in the solar sector, both to accelerate the development of solar energy and to keep as much of the industry under democratic, decentralized control as possible.

3. The people of California therefore create SolarCal, a cabinet-level state authority mandated to accelerate the development of a new solar energy industry in California. Coordinating the efforts of various state bodies presently designed to promote solar energy, SolarCal will also perform crucial investment functions necessary to make solar a major energy and job-creation alternative.

SolarCal is specifically mandated to encourage the growth of California-owned solar businesses, in as decentralized a manner as possible. SolarCal will support solar businesses serving a specific region, giving priority to those which follow accepted affirmative action and labor union criteria for employment. SolarCal will develop both "active" solar systems and such "passive" techniques as insulation and weatherstripping.

SolarCal does not simply "promote" solar energy. Its function is to oversee the transformation of California's space and water heating from its present reliance on precious natural gas and other fossil fuels to as complete a reliance on solar and other conservation options as possible. To this end, SolarCal will set goals, and coordinate planning and the generation of funds necessary to achieve them.

Section 2: The SolarCal authority

4. SolarCal is a cabinet-level Authority, headed by a Secretary appointed by the Governor, subject to legislative approval and approval by the SolarCal Board of Directors. Board members shall be from the public at large, and shall not have been previously employed by any utility or energy monopoly in the past.

5. The SolarCal Board of Directors, independent of the Secretary, shall consist of five members also appointed by the Governor. The Board shall have full powers over the selection or dismissal of the SolarCal Secretary and department heads. One Director shall be an officer of a labor union. One Director shall be an officer of a recognized consumer or environmental organization. One Director shall be an officer of a small solar business employing union labor and following affirmative action criteria. One Director shall be a tenant occupying low-income rental housing. One Director shall be an architect or engineer experienced in designing low and moderate income housing. The composition of the Board shall reflect the cultural and ethnic diversity of the state, including minorities and women.

Section 3: Planning

6. SolarCal's top priority is to engineer the transformation of California's space and water heating needs from dependence on fossil fuels to solar and other conservation options by 1990. SolarCal is hereby empowered to develop a program for the installation of solar or other conservation equipment for every feasible space and water heating use by 1990.

7. Within three months of enactment of SolarCal, the Authority will carry out a survey of the possibility of providing solar energy and other conservation options for all existing space and water heating needs in the state in:

(a) single-family residences;
(b) multi-family residences;
(c) commercial buildings;
(d) state buildings;
(e) swimming pools.

The Authority will also survey the possibilities of providing solar space and water heating and other conservation options for all new construction.

The Authority will also survey the possibility of providing solar energy for heating water for industrial uses, both for existing and new plants.

The survey will include but not be limited to:

(a) the number of units which can economically use solar to provide either water or space heating needs (cost/benefit analyses shall consider economic benefits to society as a whole);

(b) the cost of providing solar and other conservation options for multi-family, commercial and state buildings, swimming pools and industrial uses;

(c) a year-by-year breakdown of objectives which will result in all California's feasible space and water heating needs being met by

solar and other conservation options over the next decade.

The survey will include, but not be limited to, a list of the number of structures and swimming pools which can be retrofitted with hot water and water/space solar systems, the number of new structures that will be fitted with water and space solar systems, the number of industrial firms that will convert or be started with hot water solar systems.

8. Within six months of enactment of Solar-Cal. the Authority will produce a solar conservation program designed to implement the year-by-year objectives of its survey.

The program will include, but not be limited to:

(a) the costs of implementation which can reasonably be borne by the private sector;

(b) a recommendation of incentives necessary to stimulate the private sector to achieve the recommended objectives;

(c) the costs to be borne by the public sector to achieve those objectives which the private sector cannot reasonably be expected to meet;

(d) recommendations for means of financing the public costs of implementing the plan;

(e) recommendations for mandating solar and other conservation standards for all new construction.

9. Within twelve months of enactment of SolarCal, the Authority will present its program to the Legislature, after amendment through public input and comments by the Public Utilities Commission and Energy Resources and Conservation Development Commission.

10. After enactment of the SolarCal program the Authority shall have the further responsibility of monitoring year-by-year achievement of its objectives and presenting the Legislature with an annual up-date and recommendations for change.

Section 4: Loans to consumers

11. The SolarCal program will include provisions for direct loans to low- and middle-income consumers for whom tax credits and/or private loans will not be sufficient incentive to install solar. The program will seek to amend the charters of existing agencies like CalVet, the California Housing Finance Agency and the Pollution Control Finance Authority to permit them to extend loans to consumers for solar and other conservation equipment.

12. In those instances where existing agencies cannot meet the public needs, SolarCal is empowered to develop low-interest loan programs for consumers. SolarCal will loan at no more than four percent, with the addition of a service charge of less than one percent to be paid to private lending institutions servicing SolarCal loans.

13. The SolarCal program will include provisions giving priority to consumer loans used to purchase solar equipment from firms meeting as many of the following criteria as possible:

(a) solar firms located in the state of California;

(b) solar firms, engaged solely in solar and related services, employing less than one hundred persons engaged in the manufacture, distribution and installation of solar equipment;

(c) solar firms which are not subsidiaries, or partly owned, by larger companies with assets of more than ten million dollars;

(d) solar firms employing union labor and meeting affirmative action guidelines;

(e) solar firms giving priority to hiring persons who have been unemployed for six months or more.

14. Immediately upon enactment, to the extent provided by law, SolarCal will be empowered to extend direct, low-interest loans to cities or groups wishing to install solar as part of a rehabilitation program for public, low-income housing.

15. The years required to repay all SolarCal consumer loans shall be determined to ensure that consumers repay their debt in monthly installments no higher than their monthly utility bills (computed as an average of the twelve months preceeding receipt of a SolarCal loan).

Section 5: Loans to small businesses

16. In the event that existing manufacturing and distributing capability within the state of California is not sufficient to achieve SolarCal objectives, the SolarCal program will include measures to assist California's solar industry to expand. Such measures will include, but not be limited to, recommendations for direct SolarCal loans to California's solar industry.

17. Criteria for such SolarCal loans shall include provisions that loans are extended to:

(a) solar firms located within the state of California;

(b) solar firms engaged solely in solar and related services employing less than one hundred persons engaged in the manufacture, distribution and installation of solar equipment;

(c) solar firms which are not subsidiaries, or partly owned, by larger companies with assets of more than ten million dollars;

(d) solar firms employing union labor and meeting affirmative action guidelines;

(e) solar firms giving priority to hiring persons who have been unemployed for six months or more.

18. SolarCal will make recommendations for loans through existing state agencies like the Economic Development Agency and CalJobs Creation Board. SolarCal will also be authorized to extend direct loans in those cases where these agencies cannot meet the SolarCal objectives.

19. Immediately upon enactment, to the extent provided by law, SolarCal will be empowered to extend low-interest, direct loans to small solar businesses starting up in areas of over 20% unemployment and/or which employ more than 20% of those previously unemployed for six months or more.

Section 6: Loans to cities

20. The SolarCal program will include provisions for loaning to cities willing to implement solar space and water heating programs. SolarCal will loan to city agencies, such as city Water Departments, to purchase solar systems from manufacturers and install them for those customers wishing to purchase them.

21. SolarCal will encourage cities to issue their own municipal bonds, e.g. by offering loan guarantee programs, and will also consider direct loans to cities.

Section 7: Solar manufacture, distribution, and installation

22. In the event that SolarCal objectives cannot be met by the existing private sector, even with SolarCal assistance, SolarCal will itself be empowered to provide for the manufacture, distribution and/or installation of solar systems.

SolarCal may enter the solar business, however, only upon one or more of the following conditions:

(a) that it can demonstrate to the satisfaction of the Legislature that its entry will generate more California jobs and/or economic development than other alternatives;

(b) that it can provide solar systems for needs that will not be met by any other alternatives, e.g. for low-cost housing;

(c) that it can provide solar systems to the consumer for an appreciably lower cost than can be met by the private sector in a competitive bid situation.

23. Immediately upon enactment of SolarCal, the Authority will be empowered to begin a pilot program of manufacturing and/or installing solar systems on selected state buildings, at a cost of no more than one million dollars in the first year. This program will be carried out in conjunction with the appropriate state agencies to give SolarCal practical experience in setting standards, certification and training requirements. Solar systems used in this pilot project may not cost more than systems provided by the private sector.

Section 8: Training

24. The SolarCal survey will list all existing public, union and industry solar training programs being conducted in the state of California. The SolarCal program will include plans for any needed expansion of existing training facilities to meet SolarCal objectives. In addition, SolarCal will establish minimum standards which training institutions seeking SolarCal certification shall achieve.

25. As much as possible, the SolarCal program will include provisions for expanding training by existing public, union and industry institutions. If necessary, however, SolarCal will be empowered to provide funding for new public training institutions.

Section 9: Building standards

26. SolarCal, working with the Department of Housing and Community Development and the Energy Commission, will have the primary responsibility for designing proper statewide building codes for solar installation.

27. In addition, the SolarCal program will include specific provisions for designing incentives into the existing building permit process for builders and developers to "go solar".

Particular emphasis will be given to the enactment of standards for passive enrgy conservation systems.

Section 10: System and installation certification

28. SolarCal, working with the Energy Commission, shall have the responsibility for implementing criteria for testing laboratories certifying solar systems.

29. SolarCal, working with the Department of Consumer Affairs and its Board of Contractors, will have the responsibility of developing standards of certification for firms wishing to install solar equipment. It will also have the responsibility of supervising consumer protection programs involving consumer hot-lines, publications of consumer protection manuals, avoidance of fraud, etc.

30. Immediately upon enactment of SolarCal, the Authority will be empowered to implement such consumer protection measures as a consumer hot-line and a directory of known solar businesses.

Section 11: Solar electricity

31. The SolarCal program will include specific provisions for accelerating the commercialization of solar-generated electricity in the state of California. Particular emphasis shall be placed on encouraging decentralized electricity generation. Under no circumstances will SolarCal funds be used to develop centralized solar energy stations under utility control.

Section 12: Funding

32. The Solarcal program shall include provisions for funding those activities which neither the private sector nor existing public agencies can be expected to fund to achieve SolarCal objectives. Costs for SolarCal activities may include:

(a) a SolarCal consumer loan program;

(b) a SolarCal solar business loan program;

(c) a SolarCal direct manufacture distribution or installation program;

(d) a SolarCal city loan program;

(e) SolarCal training and certification programs.

33. The SolarCal program shall include annual estimates of financial needs for the achievement of its goals and proposals for

sources of funding that include, but are not limited to:

(a) the issuance of general obligation bonds;

(b) the issuance of revenue bonds;

(c) appropriations from the general fund;

(d) a surcharge on utility bills, which may be accumulated through excise taxes on fossil fuels:

34. The SolarCal program shall request specific legislative authority to raise the above funds, as necessary, to accomplish its goals.

35. During the first year of operation. SolarCal will be funded by an appropriation from the general fund of no more than ten million dollars.

HUMAN RIGHTS

Mr. HANSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the Senator from Arizona (Mr. GOLDWATER), and the attachment referred to therein.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY MR. GOLDWATER

On March 25th of this year, President Carter stated that "we have a right to speak out openly when we have a concern about human rights wherever those abuses occur." I thoroughly agree with his statement, but I believe this country has not only a right but a duty to speak out when abuses of human rights occur.

Apparently President Carter does not share my belief because we have not heard anyone in his Administration speaking out against the gross abuses of human rights which are occurring in communist China, Castro's Cuba, North Vietnam, North Korea, and Cambodia. He has adopted a national policy of selective criticism of human rights abuses which is downgrading the whole thrust of perhaps the most important element of his foreign policy stance.

In a recent article in the publication, *Commentary*, Senator Daniel P. Moynihan of New York, had some very important observations to make in an article entitled, "The Politics of Human Rights." Senator Moynihan concerns himself primarily with the handling of human rights problems in the United Nations. What he has to say in one particular passage I believe can also be applied to the performance of the Carter administration on this subject. Let me quote from Senator Moynihan's very scholarly and incisive article:

". . . the selective morality of the United Nations in matters of human rights threatens the integrity not merely of the United Nations, but of human rights themselves. There is no mystery in this matter. Unless standards of human rights are seen to be applied uniformly and neutrally to all nations, regardless of the nature of their regimes or the size of their armaments, unless this is done, it will quickly be seen that it is not human rights at all which are invoked when selective applications are called for, but simply arbitrary political standards dressed up in the guise of human rights."

Because of its importance to the members of this body, I include Senator Moynihan's article in the Record.

THE POLITICS OF HUMAN RIGHTS

(By DANIEL P. MOYNIHAN)

"There's an ideological struggle that has been in progress for decades between the Communist nations on the one hand and the democratic nations on the other. Mr. Brezhnev and his predecessors have never refrained from expressing their view when they disagreed with some aspect of social or political life in the free world. And I think we have a right to speak out openly when we have a concern about human rights wherever those abuses occur."—Jimmy Carter, March 25, 1977.

It is as simple as that. What needs to be explained is not why the United States has raised this standard, but why it has taken so long. Anthony Lewis remarks of the President:

He is giving into just Americans but people in the West generally a sense that their values are being asserted again after years of silence in the face of tyranny and brutality.

But again, what needs to be explained is how those "years of silence" came about, and what they signify. For there were reasons, and deep ones, and they could reassert themselves far more readily than any—perhaps especially the President—might suppose.

Human rights as an issue in foreign policy was by no means central to Jimmy Carter's campaign for the Presidency. It was raised in the Democratic platform drafting committee, and at the Democratic conventions, but in each instance the Carter representatives were at best neutral, giving the impression of not having heard very much of the matter before and not having any particular views.

This is understandable enough, for by 1976 those "years of silence" had done their work. As a tactical or strategic concern of foreign policy, human rights had disappeared so completely from the councils of the West that a newcomer to the field might well never have heard the issue even discussed. Given our celebrated penchant for promptly forgetting even the most recent history, it may serve to record just how nearly total this blackout on human rights had become.

On November 12, 1975, as Permanent Representative at the United Nations, I introduced to the Third Committee of the General Assembly a United States proposal for a worldwide amnesty for political prisoners. The General Assembly, our delegation argued, had already that year taken two important steps in such a direction. A resolution had been adopted calling for unconditional amnesty for all political prisoners in South Africa. The United States had supported that resolution. Further, a resolution had been adopted calling for amnesty for all political prisoners in Chile. The United States had supported that resolution as well. But, we now asked, was there any reason to stop there? There were 142 members of the UN. Were we not all bound by the same standards that bound Chile and South Africa? There were grounds for a concern with universality in this matter which struck us with special force:

The first is that the selective morality of the United Nations in matters of human rights threatens the integrity not merely of the United Nations, but of human rights themselves. There is no mystery in this matter. Unless standards of human rights are seen to be applied uniformly and neutrally to all nations, regardless of the nature of their regimes or the size of their armaments, unless this is done, it will quickly be seen that it is not human rights at all which are invoked when selective applications are called for, but simply arbitrary political standards dressed up in the guise of human rights. From this perception it is no great distance to the conclusion that in truth there are no human rights recognized by the international community.

This concern was not allayed to examining the list of sponsors of the resolutions already adopted on South Africa and Chile. According to the Freedom House Comparative Survey of Freedom, no fewer than 23 of the sponsors of the South African resolution and 16 of the sponsors of the Chilean resolution were countries which held political prisoners themselves.

Moreover, at the other end of the spectrum, but in a discernibly consistent pattern, that same General Assembly had adopted resolutions denouncing our own democracy for violation of human rights, and denouncing the Israeli democracy on the same score. Thus we came to the second of our concerns:

This is the concern not only that the language of human rights is being distorted and perverted: it is that the language of human rights is increasingly being turned in United Nations forums against precisely those regimes which acknowledge some or all of its validity and they are not, I fear, a majority of the regimes in this United Nations. More and more the United Nations seems only to know of violations of human rights in countries where it is still possible to protest such violations.

Let us be direct. If this language can be turned against one democracy, why not all democracies? Are democracies not singular in the degree to which at all times voices will be heard protesting this injustice or that injustice? If the propensity to protest injustice is taken as equivalent to the probability that injustice does occur, then the democracies will fare poorly indeed.

Now it might be supposed that the totalitarian nations would have gone to great lengths to suppress this American initiative. Not at all. There was no need. The other democratic nations did it for them.

There is a "Western" caucus of sorts at the U.N. Somnolent in most matters, it was roused to decisive action by the threat which the American resolution presented to the peace of the UN. A meeting was called. We were asked to explain ourselves. We said we were worried about the perversion of the language of human rights and its transformation into a weapon against democracy. We also said that we thought it a good idea for the democratic world to regain the ideological initiative after the defeat we had just suffered over the Zionism racism resolution. The explanation was greeted with a cold dismay that on the edges verged into anger. It was quickly agreed that if the resolution were somehow to pick up sponsors and to pass, the caucus would immediately insist on a formal undertaking to define the term "political prisoner." I asked would this be carried out along the lines of the recently completed exercise to define "aggression"? Yes. But that, I said, had taken from 1951 to 1974, nearly a quarter-century. Yes. But our resolution called for amnesty, a voluntary act of governments. Inasmuch as no one would be telling governments who their political prisoners were, no formal definition was necessary. The response remained cold the other democracies would not join in sponsoring our resolution. And there the matter ended.

Two points essential to an understanding of the issue of human rights and its political meaning are to be seen in this episode. The first is that the issue of human rights is nothing new to international politics in this age. To the contrary, *as defined by the totalitarian nations*—led in this as in so much else by the Soviet Union, no matter what other issues may divide them at one time or another—the issue of human rights has long been at the center of international politics. In fact, from the time the Soviets commenced to be so hugely armed that their "peace" campaigns lost credibility, and Khrushchev opted for Russian involvement in "liberation" struggles, this issue has been acquiring greater and greater salience. Which is to say that in human rights terms the Western democracies have been attacked without letup. The second point is that the Western democracies, having allowed themselves to be placed on the defensive, finally ceased almost wholly to resist. In the language of diplomatic instructions, this lack of resistance was known as "danger limitation." In truth it was something very like capitulation, a species of what Jean-Francois

Revel has called "Finlandization from within".

If anything is now to come of our initiative in human rights, these points will have to be far better understood. It needs to be understand, for example, that it was a British Labor government which was primarily behind the move in the Western caucus to disown the United States amnesty proposal. Earlier Labor governments would not in all probability have acted in this way. It was said of Ernest Bevin, Britain's first postwar Foreign Secretary, that he regarded Communism as a dissident faction of the Transport and General Workers Union—the point being that such familiarity bred contempt. By the mid-70's, a different kind of familiarity was at work. The Labor party in October 1976, for example, could invite the likes of Boris Ponomarev—head of the international department of the Soviet Communist party and a notorious vintage Stalinist—to London on a "fraternal" visit and arrange to have him received by the Prime Minister and the Foreign Secretary of a Labor government.

What was true of Britain was true of the West in general. Democratic regimes and values were under totalitarian assault in every region of the world, and resistance was everywhere weakening. The great exception was Israel, where Dr. Johnson's adage that the prospect of hanging wonderfully concentrates the mind still seemed to apply. In the West, however, the preferred contrivance for dealing with the prospect of hanging was denial. A stunning instance of just such denial was the Western response to the 1975 resolution of the UN General Assembly equating Zionism with racism. In this case, denial took the form of a refusal to recognize the extent to which Soviet inspiration lay behind the resolution.

A long-established propaganda technique of the Soviet government has been to identify those it would destroy with Nazism, especially with the racial doctrines of the Nazis. Following World War II, for example, pan-Turkish, Iranian, and Islamic movements appeared in the southern regions of the Soviet Union. They were promptly accused of Nazi connections and branded as *racist*. Jews escaped this treatment until the Six-Day War of 1967. The event, however, aroused sufficient pro-Israel, pro-Jewish sentiment within the Soviet Union to evoke the by now almost bureaucratic response. Bernard Lewis writes:

"The results were immediately visible in a vehement campaign of abuse, particularly in the attempt to equate the Israelis with the Nazis as aggressors, invaders, occupiers, racists, oppressors, and murderers."

Within a short period of time, and coincidentally with the introduction of "racist" into currency as a general term of abuse, Soviet propagandists began to equate Zionism *per se* with racism. In a statement released to the press on March 4, 1970, a "group of Soviet citizens of Jewish nationality"—making use of the facilities of the Soviet foreign ministry—attacked "the aggression of the Israeli ruling circles," and said that "Zionism has always expressed the chauvinistic views and *racist* [my emphasis] ravings of the Jewish bourgeoisie." This may well be the first official Soviet reference to Zionism as racism in the fashionable connotation of the term.

Steadily and predictably, these charges moved into international forums. In 1973 Israel was excluded from the regional bodies of UNESCO. In 1974 the International Labor Conference adopted a "Resolution Concerning the Policy of Discrimination, Racism, and Violation of Trade Union Freedoms and Rights Practiced by the Israeli Authorities in Palestine and Other Occupied Arab Territories." The charge of racism was now pressed. In June 1975 it appeared at the Mexico City Conference of the International Women's Year.

One must be present on those occasions to sense their intensity and their implications. It happens that the British critic Goronowy Rees was present at the moment the Third Committee of the General Assembly adopted the Zionism resolution. This is how it struck him:

"There were ghosts haunting the Third Committee that day: the ghosts of Hitler and Goebbels and Julius Streicher, grinning with delight to hear, not only Israel, but Jews as such denounced in language which would have provoked hysterical applause at any Nuremberg rally. . . . And there were other ghosts also at the debate: the ghosts of the 6,000,000 dead in Dachau and Sachsenhausen and other extermination camps, listening to the same voices which had cheered and jeered and abused them as they made their way to the gas chambers. For the fundamental thesis advanced by the supporters of the resolution, and approved by the majority of the Third Committee, was that to be a Jew, and to be proud of it, and to be determined to preserve the right to be a Jew, is to be an enemy of the human race."

Rees was right: evil was loose in that chamber on that day. And it is still abroad in the world. The Zionism resolution was adopted by the General Assembly in November 1975. The following February, the United Nations Commission on Human Rights found Israel guilty of "war crimes" in the occupied Arab territories. The counts read as if they could have come from the Nuremberg verdicts:

Annexation of parts of the occupied territories;

Destruction and demolition;

Confiscation and expropriation;

Evacuation, deportation, expulsion, displacement and transfer of inhabitants;

Mass arrests, administrative detention, and ill-treatment;

Pillaging of archaeological and cultural property; and

Interference with religious freedoms and affront to humanity.

In April 1976, in the Security Council, a representative of the Palestine Liberation Organization spoke of the "Pretoria-Tel Aviv Axis," making an explicit reference to the "axis" between Nazi Germany and Fascist Italy in the 1930's. In May, in the same body, the Soviet Union accused Israel of "racial genocide" in putting down unrest on the occupied West Bank of the Jordan River. The same month, in a General Assembly committee, a PLO document likened Israeli measures to Nazi atrocities during World War II:

"The sealing of a part of the city of Nablus is a violation of the basic human rights . . . reminiscent of the ghettos and concentration camps erected by the Hitlerites." . . .

That the purpose of all this was to delegitimize Israel in the interest of its Arab enemies was of course obvious to everyone. What should have been equally obvious was that assault on Israel—the most vulnerable of the democracies served a more generalized effort to deprive the democratic nations of their legitimacy as democracies. Salami tactics, as the Communists used to say—first one small unit of the democractic world, then the next. For in true Orwellian fashion, the free societies in the world were under attack precisely and paradoxically for not being free. They were attacked for violating human rights. The charge could range from genocide to unemployment, but it always followed the Orwellian principle: hit the democracies in the one area where they have the strongest case to make against the dictatorships.

Representatives of the Soviet Union and other Communist countries are not especially adept at this. But in a diplomatic maneuver which foreshadowed the military strategy of using Cuban troops as surrogates, they could sit back and allow most of the talking to be done by spokesmen from the Third World, some of whom were very good indeed at the Orwellian game. Of course, just as the Arabs had their own good reasons for attacking Israel, quite apart from any benefit to the Soviet Union, so these Third World regimes had their own good reasons for attacking democracy. With a handful of exceptions, the fourscore new nations which have come into the world in the last twenty-five years or so began their existence as constitutional democracies. By now the vast majority have succumbed to dictators and strongmen of one kind or another for whom the opportunity to attack any countries which have remained faithful to their constitutional vows is—to put it mildly—compelling.

Western policy has never seen the new nations in this light. For one thing, there was the tremendous investment of hope in what we saw as the small seedlings of our various great oaks and a corresponding reluctance to think, much less speak, ill of them. Then there was the trauma of Vietnam, which perhaps made it seem even more necessary that we should be approved by nations so very like the one we were despoiling. In consequence we were as thrown by these onslaughts from the Third World as we were when the Russians came up with the Cuban army as an extension of the same school of diplomacy. When in 1975 the Conference of the International Women's Year resolved that Zionism is a form of racism, the senior American diplomat present cabled Washington: "All essential American objectives have been achieved." If American diplomats could fail to recognize so egregious an attack on our own position, and were even unable to recognize that the attack had succeeded, is it any wonder that they were altogether incapable of understanding its general political significance?

Then, suddenly, everything changed. It would be hard to establish just why, but a useful axiom is that of Michael Polanyi: People change their minds. They wake up one day to find they no longer think as they did. Something like this happened in the case of human rights. One could see the evidence, for example, in the drafting committee for the 1976 Democratic platform. Sam Brown, representing what might be termed the McGovernite forces in the party, introduced a resolution demanding that all American military aid be cut off to regimes that did not respect human rights. Brown's resolution was directed against authoritarian regimes of the Right and was in the spirit of the Foreign Assistance Act of 1973 which called on the President to "request the government of Chile to protect the human rights of all individuals." I thereupon spoke for what might be called the Jackson forces in the party. The Jackson amendment to the Trade Act of 1974 was directed against certain policies of the same administration which in effect supported dictatorships of the Left. "To assure the continued dedication of the United States to the fundamental human rights," declared the amendment, no credits were to be extended to non-market economies which denied their citizens the right to emigrate on reasonable terms.

The Brown proposal, we suggested, was too much a convenience for those nations which get their hardware from Czechoslovakia, and want their soft loans from the United States. Why not oppose any form of aid? "We'll be against the dictators you don't like the most," I said across the table to Brown, "if you'll be against the dictators we don't like the most." The result was the strongest platform commitment to human rights in our history. Whether or not it was this commitment which directly influenced the new President to take the offensive on human rights, he began doing so from the very first, in his inaugural address.

The problem now is to sustain the initiative. For not everyone in America—or at any rate in the American government—has changed his mind. The President, unavoidably, is getting the same advice that led to the passivity of his immediate predecessors. The State Department is uneasy about Soviet anger. The cult of the Third World is, if anything, greater now than ever. It is entirely possible the whole initiative will come to nothing if we do not establish a sufficiently firm conceptual base to sustain the inevitable tremor and shock.

Four principles come to mind on which to construct such a base.

First principle: International law and treaty obligations are wholly on our side. That for so long a period we appear to have forgotten this gave an inestimable advantage to the totalitarians. The Soviet reaction to the signs that our memories are stirring has been angry. But this "surprising adverse reaction to our stand on human rights," as the President recently characterized it, will get worse, not better—they would be fools to respond in any other way. The more then should we know and understand that the law is on our side.

The United Nations Charter imposes two obligations on members. The first, which is well known, is to be law-abiding in their relations with other nations: not to attack them, not to subvert them, and so on. But there is a second obligation, which very simply is to be law-abiding in the treatment of one's own citizens. The United Nations Charter requires that members govern themselves on liberal principles, as these principles have evolved and are understood in the Western democracies.

Improbable as this may sound, it happens nonetheless to be true. The Charter, in the main, was drafted by British and American constitutional lawyers. The Preamble speaks of "fundamental human rights," of "the dignity and worth of the human person," of "the equal rights of men and women." Article 1 enjoins the members to promote through the UN:

"respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion."

The meaning of these words, as lawyers say, is entirely discoverable. They mean just what any of us in the Western democracies would assume they mean.

The Russians knew what they were signing. We do well to remember that they began World War II as allies of Nazi Germany, partners in the conquest and partition of Poland. They had a true pro-Nazi past to overcome. In the early days of the United Nations they sought to do this by taking the lead in asserting that members had to be—liberal states! In the first year of the new organization, the question arose as to whether Spain should be admitted to membership. Absolutely not, said Andrei Gromyko in the Security Council: to the contrary, punitive measures should be taken against Spain. Then in December 1946, on the initiative of Poland, the General Assembly adopted a resolution directed to Spain providing that—

". . . if within a reasonable time there is not established a government which derives its authority from the consent of the governed, committed to respect freedom of speech, religion, and assembly, and to the prompt holding of an election in which the Spanish people, free from force and intimidation and regardless of party, may express their will, the Security Council consider the adequate measures to be taken in order to remedy the situation."

Poland and all the Communist members voted in the affirmative. (Spain was not admitted until 1955.)

Today there is not one member of the United Nations in five which can meet the standard of the Polish resolution. And yet it is those very nations who go about attacking members, who do maintain those standards. There is a term for this: the big lie. But clearly, as we have been seeing, a counterattack can be devastating.

This brings us to the second principle: *Human rights is a political component of American foreign policy, not a humanitarian program.* It is entirely correct to say (as was repeatedly said during all those "years of silence" in Washington) that quiet diplomacy is much the more effective way to obtain near-term concessions from totalitarian regimes with respect to particular individuals who seek our help. But the large result of proceeding in this fashion is that the democracies accommodate to the dictators. Concepts of human rights should be as integral to American foreign policy as is Marxist-Leninism to Soviet or Chinese or Yugoslav operations and planning. Yet it seems clear that this is not what the career officers in the State Department who make up the permanent government wish to see, and the signs already suggest that the Secretary of State is not resisting the permanent government.

At Law Day ceremonies on April 30, Cyrus R. Vance delivered his first public address since becoming Secretary of State, and chose for his subject "Human Rights and Foreign Policy." "Our human rights policy," he said, "must be understood in order to be effective." He would "set forth the substance of that policy, and the results we hope to achieve."

This effort was surely in order, for the policy was still singularly unformed. The President's single sentence in his inaugural address—"Because we are free we can never be indifferent to the fate of freedom elsewhere"—had led to press speculation, then queries, then to Andrei Sakharov, the meeting with the Soviet dissident Vladimir Bukovsky, and partial statements such as those in the address at the United Nations on March 17—but still nothing that could be described as a policy. The impression was that of a President responding at successively greater levels of approval, but with no very clear notions of where it would all come out. There is nothing much the matter with this in a democracy. But there comes a time when the agents of policy must be told what to do. This is a Secretary's task, and Vance undertook to perform it.

The result, it must be stated, bodes disaster. The Secretary's speech missed the whole point. For the entire thrust of his speech was to assert that human rights is not a political issue but rather a humanitarian aid program, a special kind of international social work. After rousing the rage of the Muscovite and the scorn of Latin American grandees, after stirring the timorousness of European allies and inducing something between anxiety and fear in smaller capitals around the world, it turned out that all we really intended was to be of help to individuals.

Freud's remark that anatomy is destiny has been used to suggest the importance of organization in government. The Ford administration established a "Coordinator for Human Rights and Humanitarian Affairs" in the office of the Secretary of State. The Coordinator had three deputies: "Refugee and Migration Affairs," "Prisoners of War and Missing-in-Action," and "Human Rights." To reflect the greater salience which these issues are now to have, the Carter administration has asked Congress to make the Coordinator an Assistant Secretary. However, in the past, when this kind of change has been made, it has in fact signaled that the Secretary of State was no longer that much interested in the issue involved, and was turning it over to the bureaucracy. Thus, only a few years ago, coordinators or special assistants for environmental affairs and population matters were to be found in the Secretary's office. But with the fading of those issues, they were turned over to the office of the Deputy Assistant Secretary for Environmental and Population Affairs, reporting to the Environmental and Scientific Affairs. Secretary Vance may not intend to relegate human rights to the destiny of departmental routine, but in organizational terms, this is what he has done.

Rounding out the pattern of a depoliticized conception of human rights, the Secretary in his speech announced:

"We are expanding the program of the Agency for International Development for "New Initiatives in Human Rights" as a complement to present efforts to get the benefits of our aid to those most in need abroad."

He added that the Department's Bureau of Educational and Cultural Affairs would also be involved. He declared our efforts would "range from quiet diplomacy . . . through public pronouncements, to withholding of assistance." We would meet at Belgrade in June to review the Helsinki accords and "to work for progress there on important human issues: family reunification, binational marriages. . . ." He mentioned "that many [*sic*] nations of the world are organized on authoritarian rather than democratic principles." He did not mention totalitarian governments. Nor might he, so long as the foreign service has its way. If the foreign service prevails, the Secretary of State will soothe the Soviet Union and only challenge Ecuador.

Can one already detect this influence not only in the Secretary's statements but even in the President's own more recent words? Only weeks ago, expressing his surprise at the "adverse reaction in the Soviet Union to our stand on human rights," Mr. Carter said: "We have never singled them out. I think I have been quite reticent in trying to publicly condemn the Soviets I have never said anything except complimentary things about Mr. Brezhnev, for instance." But the Soviets are *necessarily* singled out by any serious human-rights offensive—and they know it. They are singled out by the force of their arms: they are the most powerful opponents of liberty on earth today. And they are singled out by the force of their ideology which, since the passing of Nazism and the eclipse of fascism as a school of political thought (Franco Spain having been its last paltry bastion), remains the only major political doctrine that challenges human rights *in principle*. When the authoritarian regimes of the Right violate human rights nowadays, they generally do so not in the name of a different political creed but in the name of national security. They must torture, they say, to uproot guerrillas and terrorists; or they must keep political prisoners to protect themselves against armed subversion from without and within. Unlike the Soviets and their ideological progeny in other countries ruled by Marxist-Leninist regimes, these right-wing regimes do not deride liberty as a "bourgeois" illusion. They commit abominations in practice; the Communist countries commit abnominations on principle. Anyone who cares about human rights will know what type of abomination is the more destructive of those rights.

According to a presidential aide quoted by the New York Times, the President's human rights initiative, among other things, has alarmed the Soviet leadership. The Soviets had "viewed the United States under the Ford and Nixon administrations . . . as running a kind of defensive, rearguard foreign policy of retreat. . . . Mr. Carter and his advisers feel the Soviet leaders have been dismayed by the thought that their concept of the decline of the West might no longer

be valid."[1] If the human rights initiative turns out to be serious, the Soviets will have good cause to be dismayed at the stirring of a new American will to resist the advance of totalitarianism.

But here again, the permanent government can be expected to push in exactly the opposite direction—toward a policy of reassurance and accommodation. Indeed it already has, and with some success, to judge by the President's commencement address at Notre Dame, the first and still most comprehensive statement of the foreign policy of his new administration. The President begins in this speech by reaffirming "America's commitment to human rights as a fundamental tenet of our foreign policy." But when he goes on to explain what this commitment requires of us, he suddenly changes the subject:

"Abraham Lincoln said that our nation could not exist half-slave and half-free. We know that a peaceful world cannot long exist one-third rich and two-thirds hungry."

This is a most startling and extraordinary transition. The first sentence reminds us, truly, that the world today is half-slave and half-free. Out of four billion persons, something approaching a billion-and-a-half live in totalitarian Marxist states. We have come to think of this opposition as the East-West conflict. But then, having thus reminded us of it, the President immediately directs our concern away from this conflict to quite a different matter, that of relations between the industrial North and the developing South. He even calls on the Soviets, as part of the former group, to join in "common aid efforts" to help the latter (although the Soviets accept no responsibility whatever for the plight of the developing world: in their unwavering view it is all our fault).

The implication seems clear: we are to divert our attention from the central political struggle of our time—that between liberal democracy and totalitarian Communism and focus instead on something else. We can do this, says the President, because we are now "free" of the "inordinate fear of Communism" which led us at times to abandon our values for the values of the totalitarians. But was our fear of Communism "inordinate"? And is there nothing to fear from Communism today? Does the President mean to suggest that the military and ideological competition we face from the Soviet Union has declined? If so, why have the Soviets engaged in a massive military build-up? And why do they continue and even intensify their ideological offensive against the West?

Whatever his answer to these questions, the President does state explicitly that it was our "inordinate fear of Communism" which led us to the "intellectual and moral poverty" of the war in Vietnam. This casual connection can also be challenged. Some of us said at the time that the enterprise was doomed, because it was misconceived and mismanaged. Are we to say now—in this, echoing what our enemies say of us—that it was also wrong or immoral to wish to resist the advance of totalitarian Communism?

This brings us to the third principle: Human rights has nothing to do with our innocence or guilt as a civilization. It has to do with our survival. The President has staffed the Department of State and the Department of Defense with curiously opposite groups of persons who have attracted each other in a not wholly reassuring way. Put plainly, the leading foreign-policy and defense-policy officials of the administration are men who made their reputations running the war in Vietnam. The second echelon of officials made its reputation by opposing that war. There is something troubling in his cross-generational relationship. Put plainly once again, the top echelon seems to be seeking absolution from its juniors for what the President himself now calls the "moral and intellectual poverty" of its ideas in the past.

Of the Secretary of State, Hedrick Smith, chief of the New York Times Washington bureau, has reported:

"With the hindsight of history, Secretary of State Cyrus R. Vance, who as Deputy Secretary of Defense played a major role in the American buildup in Vietnam, has publicly said that he now feels that "it was a mistake to intervene in Vietnam." And those who know him well say that the Vietnam war is the single most important experience in shaping this current outlook."

One does not ask of the Secretary that he not be influenced by that experience: only that he be thoughtful about it. (At the University of Georgia Law School, where he spoke on Law Day, he shared the platform with Dean Rusk, a Secretary of State who came to office preoccupied with "the loss of China"—the opposite experience.) The Vietnam war was a mistake because we could not successfully halt a totalitarian advance there not at costs acceptable to a liberal society. But it did not end the expansion of totalitarianism, nor yet the need to resist. If anything, it added enormously to the importance of ideological resistance, and this precisely is the role of "Human Rights in Foreign Policy."

Guilt as a political weapon is but little understood. Still, it should be evident that it is used quite effectively within the United States and against the United States. Some years back Nathan Glazer observed that the political rhetoric of our age was capable of depicting a prosperous and tolerant and reasonably creative society such as our own as utterly detestable—and could persuade many of those best off in this society that this is exactly the case. In 1977 an Associate Justice of the Supreme Court declared in an opinion handed down from that bench that it were better never to be born than to be born an American and go to "second-rate" schools.

The President—any President—will face particularly subtle variations on the theme of guilt, a worldly ex-ambassadorial, Council-on-Foreign-Relations concern that we Americans are such inveterate moralizers. Washington is awash with former cold warriors (they were only *giving* orders) who, having failed so miserably in their monstrously misconceived adventure in Vietnam, have decided that the country really is hopeless, that it has no capacity to resist the advance of totalitarianism, and that the best thing to do is to accommodate and to appease.

There is no way to deal with this save to raise it to the level of awareness, and to repudiate it. Human rights is a weapon in the struggle for the survival of the nation—a nation partly right and partly wrong, as it ever has been and doubtless ever will be. That we have a right and a duty to survive ought to be too obvious to need saying explicitly. That it is not obvious to our political culture is a measure of how savagely our guilt is turned against us.

Guilt has among other things paralyzed us in our relations with the developing world—and this leads to the fourth principle of a sound human-rights policy. *The new nations must be made to understand that our commitment to them depends on their ceasing to be agents of the totalitarian attacks on democracy.*

Only a handful of these nations are Soviet satellites. But a Marxist might well say that time and again they *objectively* support the Soviet cause. The concept to objective political behavior is of course, a favorite debating device of Marxists. Thus, Lucio Lombardo Radice, a leading member of the Central Committee of the Italian Communist party, recently explained in an interview in *Encounter* how Stalin in the 1930's realized the dangers of Nazism and ceased attacking Western Social Democrats. "In the situation existing at the time, Stalin was, objectively speaking, supporting the struggle for freedom, democracy, and peace." The time has come to explain to the representatives of a great many nations for which on other grounds we have a good deal of sympathy that, "objectively speaking," they are supporting anti-Semitism, totalitarianism, and war.

An example was on display this past June at the International Labor Conference in Geneva. The American labor movement is one of the few groups to have sensed early on the drift of world events and Soviet tactics. In 1974, after the International Labor Organization passed a resolution denouncing Israel for racism, the labor movement, supported by the business community, asked that the United States give notice that we would withdraw if such intrusions of anti-democratic politics into the proceedings of ILO did not stop.

The ILO charter requires a two-year notice of intent to withdraw, and this was given in the fall of 1975. The letter made clear that the United States did not want to withdraw. We, after all, had helped to found the ILO at the Paris Peace Conference in 1919. We had joined it when we never joined any other of the League organizations. We have provided the great share of its funds, and it was we who helped turn its attention to the problems of developing nations which now almost exclusively concern it. All we asked was that it stay out of international politics of the kind associated with foul-mouthed excoriations of Israel. This position was characterized by *Trud*, the Soviet labor paper, as a demand by "reactionary circles, and primarily the U.S. delegation . . . to exclude . . . political questions connected with the people's struggle against imperialism, neo-colonialism, and racism."

We got our answer on June 3. "Using a procedural device," the New York *Times* reported, "the Communist and Third World countries blocked action on an American-inspired proposal that the assembly's rules be amended to screen out politically motivated resolutions." With a handful of exceptions, the Third World sided with the Communist world against the democratic world.

On June 22, the Secretary of Labor, Ray Marshall, told a press conference that the United States will now likely leave the International Labor Organization. It is a little heartbreaking to those who have cared much about this organization which once seemed to hold such promise. But why did it happen? Because the Third World *objectively* chose to back Communism against democracy. *They* know this. And they will make a distinct judgment about which way the world is headed depending on whether we make clear to them that we know it.

JEAN-FRANÇOIS REVEL puts the case at the most extreme in his new book, *The Totalitarian Temptation*.[2] He describes a world struggle between a truly revolutionary democratic model of society (to give Secretary Vance his due, he did quote Archibald Mac-

[1] June 26, 1977. The Times may not have known it, but it was onto a government secret here of possibly more interest than the Pentagon Papers. In the first half of the 1970's the Democratic opposition generally attacked the foreign policy of the Nixon-Kissinger-Ford era as aggressive, risk-taking and sometimes mindlessly anti-Communist. In truth, within the Republican administration itself, and at least within the more sophisticated circles of the Democratic opposition, it was understood that, to the contrary, what was going on was precisely a "kind of defensive, rear guard foreign policy of retreat. . . ." Moreover, it was understood that the Russians understood it this way.

[2] See the review by Stephen Haseler on page 79 of this issue.—ED.

Leish: "The cause of human liberty is now the one great revolutionary cause") and a "Marxist-Leninist-Maoist model, with all its little brothers," implementing a brand of totalitarian socialism which Revel calls "unofficial Stalinism." These, Revel writes, are the real reactionaries, but in his view they are winning, because more and more the world finds such regimes to be more attractive:

"Therefore . . . the new American revolution, or the new world revolution that started in America, will probably fail—not because of the United States but because the world steadily rejects democracy."

This is the "worst case," and there are those who are resigned to it and appear already to have made their peace with it. Thus, George Kennan in his new book, *The Cloud of Danger: Current Realities of American Foreign Policy*, asserts that democracy is a North Atlantic phenomenon, and in no way a "natural form of rule for people outside those narrow perimeters." It were folly and worse, he maintains, to go about correcting and improving "the political habits of large parts of the world's population."

This is an arguable point—does it not display a lofty disdain for what is after all a well-documented and universal human aspiration, namely, the desire to be free? But my point is a different one. I believe that Mr. Kennan underestimates the impact *on the democracies* of the totalitarian attack (for example: more than half a dozen *British* universities are now banning Jewish spokesmen from their campuses on the ground that Zionism is a form of racism). Most of the world is not free, and what we can do about that is problematic. But surely we can do something—surely we should do everything—to preserve that part of the world which *is* free. The point, Revel's point, in putting the case at its worst is not to become resigned to the present state of affairs but to elicit countermeasures that will prevent the worst case from coming true. And it is here that the issue of human rights becomes essential.

For the moment our first task is our own defense. An implacable, forceful, and unvarying counterattack—"castigating mercilessly the prevailing mendacity," as Walter Laqueur puts it[3]—whenever the issue of human rights and the nature of our respective societies is raised by our adversaries or their objective allies could yet save the democratic world from "Finlandization from within." Human rights is the single greatest weapon we have left for the defense of liberty. It would be calamitous if we allowed ourselves to be robbed of it by the voices of fear and guilt, inside the government or out.

SHOULD SENATORS BE LIMITED TO TWO TERMS?

Mr. CRANSTON. Mr. President, in the November 14 issue of U.S. News & World Report, the distinguished junior Senator from Missouri and I debate whether there should be a constitutional amendment limiting service in the Senate and the House to 12 years. I oppose such an amendment, Senator DANFORTH supports it. Our reasons are set forth in the article.

In anticipation of the magazine interview, I wondered how many Senators have been elected to three or more terms and whose service to the Nation would have been cut short had such a constitutional barrier been in effect.

There have been 189 such Senators—including 22 sitting Senators—since the birth of the Republic, according to the Congressional Research Service. As you might expect, the list includes many of the great names in Senate history.

Since the subject will be of great interest to my colleagues, I ask unanimous consent that the U.S. News & World Report article and a list of the 189 long-serving Senators—showing their political party, date they entered the Senate, and total years of service—be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LIMIT A LAWMAKER'S TERM IN CONGRESS?

YES—ELECTED OFFICIALS SHOULDN'T BE "PERMANENT FIXTURES IN WASHINGTON"

(Interview with Senator JOHN C. DANFORTH, Republican, of Missouri)

Q. Senator Danforth, why do you favor a constitutional amendment prohibiting any person from serving more than 12 years in the Senate or the House?

A. It would accomplish two things:

First, it's important for elected officials who come to Washington to think of themselves as citizens who are only on leave to their Government—not permanent fixtures in Washington. A limitation on the length of service would say to a person who is elected: "Look, you are not a new resident of Washington—you are a resident of your own State or your own district. You are of the people who sent you here, and you will eventually, whether you like it or not, be returning to them."

The second thing that would be gained has to do with the human tendency to want to preserve yourself in a good job by saying "Yes" to everybody and "No" to nobody. That's one of the problems in Government now.

Q. Are you saying that lawmakers worry too much about getting re-elected?

A. Yes. I would hope that a limitation on service would create a greater sense of independence and a greater willingness to call them as we see them.

Q. But if every second-term Senator were a lame duck, ineligible for a new term, wouldn't the Senate's responsiveness to the public be reduced?

A. No. First of all, the people I know here who have already announced they're not going to be returning have just as great a sense of responsibility to their electorate as those who want to keep running, running and running.

You don't really elect people to be just walking public-opinion surveys. You elect them to exercise their best judgment on behalf of the people who sent them here. So I don't think that there is anything necessarily beneficial about being consumed with the need to touch every base and remain popular on every issue just to get re-elected.

Too many politicians have said "Yes" to too many people for too long. They have attempted to aggregate support from one interest group after another in order to stay here forever.

Q. In most fields, it is assumed that experience sharpens a person's skills. Isn't this true of Government service, too?

A. I had always been told that when you come to the Senate as a freshman, you're supposed to be seen but not heard. But I haven't found that to be true at all. We are expected to start acting like Senators the day we arrive.

Secondly, we've already crossed this bridge with respect to the Presidency. Presidents, as a matter of constitutional law, are to serve no more than two terms.

And third, I wonder if being a Washington type is the kind of experience a person really should have. There is at least as much wisdom spread throughout the country as there is here. I am one who does not believe that Washington has some monopoly on intelligence or on the right kind of experience.

Keeping contact with "real world"—

Q. Even so, shouldn't it be up to the voters to decide whether a legislator deserves another term, instead of mandating a lawmaker's retirement after 12 years?

A. I think there is a trade-off—and the gain would be substantially greater than what would be given up. You would be removing the possibility of one person serving in perpetuity, but in the State of Missouri, for example, there are thousands of people who are fully competent to serve in the United States Senate. This would result in a very minimal reduction in the pool of qualified people.

The gain, again, is the reduced incentive for a member of Congress to try to promise the world. The limitation on terms would change the perception of the job. No matter how much you promised, no matter how good your public relations might be, you know that you would be returning to the workaday world as a matter of constitutional requirement.

That is precisely the kind of message that people here should be given: It is certain that you are going to have to return to the real world and live with the laws you helped enact.

Q. In effect, then, you want to abolish the "professional legislator"—

A. Yes. There's a real problem today in the notion of a professional legislature, and we seem to keep furthering that notion.

Congress is almost always in session. We have just enacted in the Senate an ethics code which, in effect, says that we don't want Senators involved in the workaday world. In the name of ethics, we want them to free themselves from practice of law or practice of medicine or business so they will be available here full time.

I think that is probably moving in the wrong direction. We should view Government as a citizens' army, as made up of citizens who are performing public service for a limited period of time.

Q. Some people say that the perquisites of office, such as newsletters, a staff allowance and ready access to the press, come close to guaranteeing incumbents' re-election—

A. Right. I think the statistics are pretty clear that it's much easier for an incumbent to be re-elected than for a challenger to defeat him. This is another argument for limiting terms, although it is not an argument I rely on.

Q. Do any local or State governments have the kinds of limits on legislative service that you propose?

A. I don't think so. There are limits in some States on Governors serving more than one or two terms, but such limits are not found in the legislative branch.

Q. What are the prospects for your proposal?

A. It's not going to get anywhere unless there's a public outcry for it. The pressure is going to have to come from the people.

NO—"COMPULSORY RETIREMENT IS A WASTE OF TALENT AND KNOW-HOW"

(Interview With Senator ALAN CRANSTON, Democrat, of California)

Q. Senator Cranston, why do you oppose limiting service in the Senate or the House to 12 years?

A. There's a contrary move now in our country to do away with compulsory retirement in most occupations, and I think that's a very, very sound direction for us to take.

Compulsory retirement in private industry is an inefficient waste of talent, know-how and productivity. It is bad for society and bad for business. Much the same could

[3] "The Issue of Human Rights," COMMENTARY, May 1977.

be said about compulsory retirement from Government service.

It should be left up to the voters to decide who can best represent them. If the voters are satisfied with the performance of a Senator or a Congressman, they should not be deprived of his services and experience—nor should the country—by any arbitrary rule.

Q. We have placed a two-term limit on the Presidency. Why shouldn't a similar limit be applied to Congress?

A. Every rule has its exception, and the one exception that I make to the rule of leaving it up to the voters is the two-term limit on the Presidency.

A President who could serve endlessly would have a great opportunity to develop many of the attributes of a dictator. We've had trends toward one-man rule in our country in recent times. The two-term limit is a very solid barrier against that.

We have as much to fear from Government as we have to gain from Government. And the thing to fear from Government is too much power in too few hands. But Congress, given its makeup, will never be a dictatorship. The question does not apply to Congress, where so many people share authority and responsibility.

Q. Advocates of a limitation on service argue that if we did away with "professional legislators," Congress would be more responsive to the needs and wishes of the voters—

A. There are those who say that we've relied on the citizen soldier as the mainstay of our defense, and so we should now rely on the citizen politician in our legislative process. Actually, because of the sophisticated technology of modern warfare, our defense has to depend on highly trained professionals more and more.

Similarly, our Government has grown so complex that the concept of the inexperienced citizen politician is somewhat outmoded—at least to the degree that we shouldn't depend solely on inexperienced legislators. There should be a blend of the old and new in office, and under the present law we have that blend.

Q. So you see a clear need for people with many years of legislative experience—

A. Yes. In matters that involve public affairs and human relations, experience is a vital, indispensable part of the learning process. You learn not only what Government can do, but what it can't do. New Senators sometimes spin their wheels trying things that are impossible, or trying to launch vast spending programs that just won't work. With experience, you learn to focus your efforts where you can accomplish something significant.

John Sherman introduced the Sherman Antitrust Act in his 29th year in Congress. Paul Douglas introduced the Voting Rights Act in his sixteenth year. Clinton Anderson introduced the Medicare Act in his sixteenth year. Jacob Javits, a Republican, introduced the War Powers Act—very significant piece of legislation in the post-Vietnam era—after serving more than a decade and a half in the Senate. Sam Ervin led the Watergate hearings in his nineteenth year in the Senate. Robert Wagner served 22 years; Robert Taft, Sr., 14 years; Stephen Douglas, 14 years; Henry Clay, 27 years; Robert La Follette, 20 years; George Norris, 30 years. All of these careers would have been cut short, and the nation would have been the loser, if we'd had the limit that is proposed.

Problem of the lame ducks—

Q. Don't legislators sometimes get out of touch with the people back home after many years in Washington?

A. If they do, they get tossed out by their constituents. The basic principle of representative democracy is that you elect people who are supposed to be responsive to the people they represent—not necessarily to always do what the people want, but to solicit their views, understand their problems, stay in touch and serve their best interests. Now, if you're in your final six-year Senate term, and the law says you can't run for reelection, you could become totally unresponsive to the people you serve.

Also, a lawmaker who is a lame duck would be less able to accomplish things. If somebody is on his way out, less attention is paid to his leadership. A Senator would be at his peak of capacity only in his first six years, and then he would lose his clout—and so would his constituents—in his second six years.

Q. It is sometimes argued that incumbents have advantages, such as newsletters, staffs and ready access to the press, that come close to guaranteeing re-election. How true is this?

A. I do have concern that incumbents have advantages. I think there are other ways to deal with the problem. On the bill to provide public financing for congressional-election campaigns, I voted to provide challengers more money than incumbents, for example.

Even so, there are plenty of incumbents knocked off on each go-around. It is noteworthy that several of the advocates of a limit on service recently defeated incumbent Senators. We do have new people coming in with new ideas. More than 50 per cent of the House has been here less than six years. More than half of the Senate has been here less than 10 years.

There is no demonstrative need for anything as radical as changing our Constitution to make retirement after 12 years in office mandatory. The voters themselves have been doing a good job of keeping a healthy mixture of "new blood" and experienced "old hands" in Congress.

MEMBERS OF THE U.S. SENATE HAVING 18 OR MORE YEARS

George Aiken, Rep., 1941, 33 years.
Nelson Aldrich, Rep., 1880, 30 years.
William Allison, Rep., 1872, 36 years.
Gordon Allot, Rep., 1954, 18 years.
Clinton Anderson, Dem., 1948, 24 years.
Henry Anthony, Rep., 1858, 26 years.
Henry Ashurst, Dem., 1912, 28 years.
Augustus Bacon, Dem., 1894, 20 years.
Alben Barkley, Dem., 1926, 23 years.
William Bate, Dem., 1886, 19 years.
Wallace Bennett, Rep., 1950, 24 years.
Thomas Hart Benton, Dem., 1820, 30 years.
James Berry, Dem., 1885, 21 years.
Alan Bible, Dem., 1954, 20 years.
Joseph Blackburn, Dem., 1884, 18 years.
William Borah, Rep., 1906, 34 years.
Frank Brandegee, Rep., 1905, 19 years.
Henry Bridges, Rep., 1936, 25 years.
Jesse Bright, Dem., 1844, 18 years.
Matthew Butler, Dem., 1876, 18 years.
Harry F. Byrd, Sr., Dem., 1933, 32 years.
Robert Byrd, Dem., 1958 to present.
Wilkinson Call., Dem., 1878, 18 years.
James Cameron, Rep., 1877, 19 years.
Simon Cameron, Rep., 1844, 19 years.
Howard Cannon, Dem., 1958 to present.
Homer Capehart, Rep., 1944, 18 years.
Arthur Capper, Rep., 1918, 30 years.
Frank Carlson, Rep., 1950, 18 years.
Clifford Case, Rep., 1954 to present.

A COMPREHENSIVE TEST BAN

Mr. BARTLETT. Mr. President, during the next year, the Senate will undoubtedly be debating the merits of a comprehensive nuclear test ban treaty which may prohibit all nuclear testing by the United States and the Soviet Union. The goal of such a comprehensive test ban (CTB) is to restrict the growth of the nuclear technologies of both superpowers. Ratification would require a judgment by the Senate that this ban on testing is in the national interest and that the provisions for verification will be sufficient to insure that the Soviet Union cannot circumvent restrictions to its advantage.

Adequate verification is vital to the success of any arms limitations agreements with a closed, totalitarian society such as the Soviet Union. In the case of a comprehensive test ban, inadequate verification procedures could permit the Soviet Union to conduct those small, routine nuclear tests which permit nuclear powers to maintain confidence in their existing nuclear stockpiles and to prove new concepts. The United States, an open and democratic society, would be less likely and less able to conduct such illegal tests. Over time, secret testing by the Soviet Union could alter the military balance significantly in its favor.

Confidence in the "high technology" nuclear weapons stockpile of the United States requires continuous monitoring of the stockpile by experienced nuclear engineers. Nuclear testing is required to maintain the proficiency of these experts.

To solve a significant fraction of the problems discovered in our nuclear stockpile. The effect of even minor changes in a nuclear weapon, which cannot be avoided in the repair and replacement of stockpiled nuclear devices, is often unexpected and adverse. Therefore, since nuclear tests results often reveal that predictions based upon calculations and laboratory experiments are inaccurate, confidence in our nuclear weapons would decline during a testing moratorium. If the Soviet Union were also unable to test, the quality of their weapons would also be degraded.

From outside the Soviet Union, the Western world is able to detect Russian nuclear explosions in the range of 5 to 10 kilotons if they are conducted in hard rock. In softer soils, the United States might not be able to detect tests five times that size. Thus, without strict verification measures requiring the cooperation of the Soviet Union, Soviet abstention from tests below 10 or so kilotons would have to be taken on faith by the United States.

Unfortunately, Soviet tests below this verification threshold would be adequate for technology maintenance, stockpile repair or renewal, weapons effect tests, and theater weapon development.

This is possible because the problems that arise in the nuclear stockpile generally involve the "fission trigger" used in strategic thermonuclear weapons. Tests of fission triggers and also small theater weapons usually involve yields in the range where the tests would not be observable outside the Soviet Union. Such tests would permit the Soviet Union to maintain its technology, solve problems in its stockpile, and conduct limited research and development.

For these reasons, any test ban treaty must insure that the United States is not limited to testing levels that are lower than those that can be verified. A comprehensive test ban which did not also guarantee that the Soviet Union could not conduct secret, low yield tests would not be in the national security interests of the United States and probably would face serious opposition in the Senate during the ratification debate. In the event that verification could not be nearly absolute, a more limited test ban would be far less dangerous to international stability. Such a limited test ban might lower the test threshold—perhaps down to 15 kilotons or to whatever level could be detected with certainty. This would insure that no nation would obtain a dangerous advantage through circumvention of the testing moratorium.

Preventing the Soviet Union from gaining an advantage during a comprehensive test ban will be vital in the next few years. At the present time, the Soviet Union is continuing to MIRV its large ICBM force and is improving its accuracy. Since SALT I was negotiated, the Soviet Union has deployed four new ICBM's and is in the process of developing an additional four. Certainly, no comprehensive test ban treaty should be ratified by the Senate until after we see what limits SALT II and MBFR will put on Soviet nuclear forces.

With or without SALT II, our Minuteman ICBM force will be seriously threatened in the early eighties. Thus, the United States is likely to be in need of new strategic weapons systems in the next decade—systems such as cruise missiles, MX, and Trident II, which would require at least limited testing of warheads. A comprehensive test ban treaty could greatly hinder these programs and prevent the United States from maintaining parity with the Soviet Union, even if both sides complied with the test ban. Soviet secret testing, or a massive Soviet testing program conducted immediately upon termination of the ban, would make the situation even worse.

The United States must not commit itself to any test ban agreements which would prevent the United States from maintaining the strategic nuclear balance in the face of the massive Soviet buildup, and it must not commit itself to any agreement which cannot be adequately verified. The Senate should begin now hearing testimony concerning the ongoing comprehensive test ban (CTB) negotiations in order to prepare itself to evaluate these questions so vital to our national security.

JOBS AFFECTED BY ENERGY POLICY

Mr. DOLE. Mr. President, several times in the last months you have heard me say that conservation alone will not be enough to solve this Nation's energy problem. We all agree that decreasing our imports is necessary to hold down our balance-of-payments problem. Furthermore, we all agree that a program to decrease imports if designed properly, can result in more jobs at home and a continued healthy American economy.

DECREASED CONSUMPTION CAUSED FEWER JOBS

I emphasize that such a program must be designed properly. The fact is that because of pressures from outside, we have already decreased our consumption over the last few years. But that decrease in consumption was accompanied by a loss of jobs. I am sure that none of us wants a Government program that would result in a repeat performance of that experience. In 1974, we consumed 72.9 quads and we employed 85.9 million people in this country. In 1975, we consumed 71.1 quads and our employment dropped to 84.8 million. We do not need a Government program that will drive imports down and drive unemployment up at the same time.

Since 1974, at least, there has been a direct correlation between the amount of energy consumed in this country and the health of our economy as reflected in GNP and employment. The task before

us is to change that pattern as much as we can through more efficient use of energy, and after that, to maintain our economic health.

PRODUCTION MEANS JOBS

After we have achieved the savings we can through efficiency, there is indeed an acceptable way to decrease our imports. We can simply substitute domestic production for imports. This will result in reinvestment of that saved capital and it will increase the number of jobs in this country.

Now the administration has finally come around to admitting that production might be an important part of a comprehensive energy program, but they have yet to decide what they want to do about production. Certainly there is no provision for increasing production in any of the legislation that the administration has proposed. And I say this fully aware that it is a direct contradiction of what the President continues to tell the American people.

The answer is to deregulate newly discovered oil and newly discovered gas. But the administration proposes neither.

ADMINISTRATION POLICY WILL INCREASE IMPORTS, CONTINUE LOSS OF JOBS

While we have yet to see whether the administration's program will decrease oil imports, and there is reason to think that it will not, we already see the effect of continued regulation of new gas. This country is presently embarked on a road toward dependence on Algerian, Indonesian, and possibly Russian gas. It is frightening to think that our domestic pricing policies have caused a need for foreign gas, in direct conflict with the proposed purpose of the "comprehensive energy program."

I wonder how many jobs will be lost when we are importing a trillion cubic feet of foreign gas at a price of $3.50 per thousand cubic feet, the equivalent of $20 per barrel of oil. And I wonder how many jobs we are creating overseas by funding the construction of the gas plants that will lock us into this new level of energy dependence.

MORE JOBS MEANS A BALANCED PROGRAM

We can decrease our imports and at the same time we can create jobs at home and keep our economy healthy. But it takes a truly comprehensive energy program to do that. What we have is half an energy program. And if we implement half a program, it will effect our economy in a way that will look all too familiar after what we have been through since the embargo. It will result in a loss of jobs to the extent that decreased consumption comes merely from curtailment. It will result in a loss of jobs to the extent that we buy our way into dependence on new overseas sources of gas.

BRIGHT FUTURE FOR GASOHOL

Mr. EAGLETON. Mr. President, for many years alcohol has been used in various blends with gasoline to power internal combustion engines. In many respects it is superior to gasoline and it can be made from just about any kind of organic matter, from garbage to timber. I was pleased to cosponsor with my good friend and colleague from Indiana (Mr. BAYH) a bill to authorize farmers to grow crops for alcohol production on set-aside acreage. I think this is a subject that ought to have the priority attention of this Congress. An article by Jeanne Schinto entitled "Alcohol for Gasoline" appeared in the November 1977 issue of the Progressive. While I do not necessarily subscribe to some of the allegations made in the article, I do think it provides an excellent review of the gasohol issue. I ask that the text of the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ALCOHOL FOR GASOLINE

(By Jeanne Schinto)

U.S. energy policymakers claim to be developing alternative fuels for the future, but they deliberately sidestep a fuel that could be substituted for gasoline today.

Alcohol, or alcohol and water, will run current automobiles whose engines have been slightly modified. A blend of 10 per cent alcohol and 90 per cent unleaded gasoline will run engines without any modifications at all. Alcohols are, in most ways, better fuels than gas—more powerful, more fuel-efficient, delivering better auto performance. Cooler burning, they slow engine wear. Less explosive, they are safer to handle.

Nationwide use of alcohol as fuel would provide significant rewards. It would not only lower American dependence on imported oil and free domestic supplies for production of fertilizers, certain useful plastics, and life-saving drugs, but would also reduce air pollution from auto exhausts—by more than 90 per cent, according to tests of straight alcohol conducted at Stanford University. Experiments at the Massachusetts Institute of Technology show that replacing gasoline with only 5 per cent to 30 per cent alcohol could lower carbon monoxide emissions by 14 to 72 per cent. Such blending of alcohol and gasoline requires no special, energy-intensive process. The two substances need not be heated, cooled, or in any other way altered before they will mix readily. Nor does any significant pollution result from alcohol fuel processing.

Alcohol used as a gasoline substitute, or as an additive, could help solve America's mobile energy problems while providing such bonuses as cleaner air.

Alcohol fuels are readily available. Ethanol (best known as "grain alcohol") and methanol ("wood alcohol") can be made from virtually anything that is now, or was once, alive. The most suitable raw materials include farm crops, farm waste (such as corn stalks), trees and wood waste (pulp and sawdust), ocean kelp, garbage, even sewage.

Nor are alcohol motor fuels anything new. Some of Henry Ford's first automobiles ran on alcohol and most racing cars run on alcohol today. In the 1920s, methanol was used for fuel injection in piston aircraft. During the Great Depression of the 1930s, service stations in Kansas, Nebraska, Missouri, and Illinois sold Agrol, a gasoline and grain-derived ethanol blend. During World War II, American troops fought against Germany's alcohol-propelled war machine.

There are even more international examples. In addition to Germany, more than a dozen countries have used alcohols to a significant degree over the past fifty years. These include Austria, Brazil, China, Cuba, Czechoslovakia, Egypt, Finland, France, Ireland, the Philippines, Poland, Spain, Sweden, and Yugoslavia. In fact, three nations—Brazil, Sweden, and West Germany—have recently moved toward a total switch from gasoline to alcohol.

Brazil, the world's largest producer of sugar cane, an excellent ethanol source, intends to convert 75 per cent of its motor fuel use to alcohol by the year 2000, this year alone, it has budgeted more than $500 million to help meet that goal. All cars in Brazil now run on 2 to 10 per cent alcohol. Next year, government officials say, the blends will be up to 20 per cent.

But in the United States, the Energy Research and Development Administration (ERDA) claims it will take eight to ten years to complete work on any alternative fuel source, and another decade to develop the industry that will produce the fuel. E. Eugene Ecklund, head of ERDA's alternative fuels branch, admits when pressed that the use of alcohols is already feasible, but the agency continues to fund research to prove just that point. In fiscal 1977, the branch spent $1.5 million on basic alcohols testing; this year, it will spend about the same.

U.S. oil companies fiercely oppose these fuels, of course. Exxon and Chevron, especially, raise technical arguments supposedly based on unbiased research. Their claims, however, are easy to counter. Richard Merritt, an alcohols advocate who worked for the auto manufacturers, including Ferrari, for twenty years before the energy crunch took his job away, says, "What the oil companies are doing is taking a chicken and boiling it, waiting until all the meat falls off the bones, then checking the bones for nutrition and saying, 'Nope, no nutrition there. Chicken must be no good.' "

Engineers for Volvo, Volkswagen, and Mercedes-Benz can readily show how minor modifications to present-day fuel and ignition systems will resolve any technical difficulties the oil company researchers may encounter with straight alcohol. Since it has been amply shown that no modifications are needed to operate automobiles on blends of up to 10 per cent alcohol, industry research which identifies problems in that range can only be viewed as self-serving. Ironically, some of the best evidence comes from the oil industry itself: The gasoline that Atlantic-Richfield sells at Arco service stations is 5 to 7 per cent alcohol, added because it enhances engine performance. Arco, however, declines to discuss it.

The basic assumption underlying the oil industry's research is that alcohol fuels can not be used efficiently. That is hardly surprising. What is surprising—astonishing, in fact—is that part of the industry's alcohols research is paid for by ERDA money—"which is like giving the tobacco industry money to study lung cancer," Richard Merritt notes.

In other questionable moves, ERDA has put all its funding into methanol, not ethanol, research, and has concentrated on methanol made not from renewable resources but from fossil fuels—coal and shale oil. This preference raises questions for three reasons. First, the oil industry has formidable coal-mining and the shale deposit holdings; second, making methanol from those materials would entail high-cost, capital-intensive ventures which only the rich oil companies could easily undertake, finally, a mobile energy economy based on methanol made from fossil fuels alone would be just as inflexible and uncertain as our present system.

The U.S. auto industry also slights the potential of alcohol fuels. A case in point is the abrupt cancellation of a research project at MIT after *Science* magazine published its early findings under the title, "Methanol: A Versatile Fuel for Immediate Use." Dr. Thomas Reed, the scientist who headed the 1973 project, asserts it was canceled because MIT yielded to oil *and* auto company interests, and *Science* cautiously tends to concur. Pointing to the "attendant circumstances," which included "the active involvement of an Exxon employe as well as the fact

that the laboratory had received $1 million in grants from Exxon and Ford," *Science* sees the termination in "an ambiguous, and perhaps suspicious, light." (MIT claims the project was killed because it was technically weak and inappropriate for a university, according to *Science*.)

If the project had been allowed to continue, a fleet of 200 cars would have been tested over a period of months—a move that would certainly have drawn significant attention in the national news media and enhanced the credibility of methanol fuel.

It is easy to see why oil companies would oppose an alternative fuel. The rationale behind the auto industry's resistance is less obvious. As alcohol proponents see it, plausible reasons range from the opinion that the auto companies are dinosaurs, opposed to any and all change, to the idea that they are in cooperation and collusion with the oil companies. Auto interests may also oppose alcohols because of the modifications and government control that the transition would necessarily entail. Whatever their motivation, it is the American auto manufacturers who seem to see insurmountable technical difficulties with alcohols, while the European manufacturers—Volvo, Volkswagen, and Mercedes-Benz—do not.

As Dr. Reed of the MIT project has said, "The use of methanol as a motor fuel is no longer a technical question but a political one with implications for our national energy policy." The National Energy Plan submitted by President Carter to Congress last April suggests that the Administration not only ignores or avoids but also misrepresents the alcohol fuels solution. The plan, outlined in a 103-page booklet, contains only one sentence on methanol and not a word on ethanol. The lone methanol reference projects not into the immediate future but into the dark hinterlands of energy thought beyond 1985, along with such exotic technologies as hydrogen fuel, which we know can be made from water but which we have yet to make cheaply, use safely, store and transport efficiently, or adapt to today's autos.

By way of contrast, the National Energy Plan submitted to Congress by Franklin D. Roosevelt thirty-eight years ago devoted two pragmatic chapters to the alcohols. Such fuels were never truly marketable in Roosevelt's time, however, because gasoline was so cheap. Today, the economic arguments raised against alcohols are no more valid than the technical ones.

Maine state researchers, for example, estimate that they can get 2,250 gallons of methanol from one acre of commercial timberland. Accordingly, 10 per cent (or ten billion gallons) of our total yearly gasoline consumption could be replaced by methanol made from less than 1 per cent of our total commercial timber. Working with such quantities, the Maine researchers estimated early in 1975 that the base cost of the fuel would be as little as fourteen cents a gallon. At the time, the base cost of gasoline was exactly twice as much.

The alcohols can be made from other, less valuable, raw materials, however—the 35 per cent of timber used in paper and lumber production that goes completely to waste, for example. (By late 1976, the Maine Office of Energy Resources had hoped to have a pilot plant in operation, producing methanol made from both timber and wood waste, to be utilized not only for mobile energy but for heating fuel as well. However, Maine also hoped to raise the funding for the project from private rather than public sources, and it has not been successful. Consequently, the plant, which would cost $10 million to $30 million, remains frozen in the planning stage.)

"When people quote prices of a dollar and more a gallon for ethanol, they are talking about pharmaceutical alcohol in an extremely high state of purity," says Richard Merritt. "What we need is the cheapest rot-gut kind of alcohol we can get. The cheaper, the less pure, the better it will run your engine." This "rot-gut" quality ethanol can be made from wet, moldy, frost-spoiled, or otherwise below-grade crops.

During some years, the country could make fuel from its surplus farm products. In 1977, for example, eighty million acres of wheat-growing land yielded two billion bushels of wheat, but many farmers still had in storage as much as three-quarters of the massive harvest of the summer before. If distilleries had been built to accommodate the 1977 yield, more than four billion gallons of ethanol could have been produced, and the wheat farmers would have been paid by consumers for what they grew, not by government for what they couldn't sell. And the possibility of many future bin-busting harvests of wheat and other farm crops has been, and continues to be, greatly increased by the development of new, high-yielding plant varieties.

The plants with the best production capabilities are not the grains, however, but sunflowers, sugar beets, and eucalyptus trees. The Senate Agriculture Committee has determined that a city of 250,000 whose residents each drive 10,000 miles a year would need to plant only seven square miles of sunflowers to meet its total annual motor fuel needs.

The presently stored 530 million pounds of unsold tobacco, representing $647 million in price stabilization loans to tobacco farmers, could also be used to run the nation's cars. Much of the surplus is "bottom leaf," the low-grade product picked from that part of the plant which is closest to the ground. Demand for such leaf has declined sharply in the last few years, and growers are wondering if it can ever be sold.

Other sources are even more promising. Union Carbide has been making alcohol from unsorted garbage at an experimental plant in West Virginia—the first of its kind anywhere. And Dr. Reed of MIT has calculated that the solid waste presently generated in the United States could supply about 8 per cent of our total transportation fuel needs.

What the alcohols promise, then, is a highly flexible energy system which could bend and stretch to suit prevailing economic conditions—even personal ones: In a pinch, any of us could make these fuels in our own backyard. Alcohols would also create new and needed markets for farm surpluses and a new use for waste; stimulate small business; provide jobs; clean up the environment, and make the United States energy-independent. In fact, virtually every segment of society would stand to gain from the switch. Only alcohols' opponents would stand to suffer.

But it becomes abundantly clear that energy questions have little to do with complexities in science, technology, and economics, and much to do with one-dimensional politics. Why has the Government yielded to oil and auto interests? It is well documented that the corporations push not only from the outside in but from the inside out. Industry is well represented in ERDA, the Federal Power Commission, the Federal Energy Administration, and the White House.

The situation presents a good case for nationalization. Nationalization explains why Brazil's energy crisis is subsiding. Its alcohol and gasoline are mixed by Petrobras, the government-owned company which has almost full responsibility for finding, producing, and refining Brazilian petroleum. However, given the realistic assumption that nationalization of oil, autos, or any other U.S. industry will not soon be achieved, we can only hope that those who champion alcohols as well as other alternative fuels will not give up.

Would industry retaliate in some way if alcohols were pushed? There is little doubt that the oil companies would try, and they are in a good position to succeed. While they may not have the means of producing alcohols, they do have the means of distribution—their service stations. And production may also be within their reach. The research that the oil companies undertake not only works to postpone our utilization of the alcohols as industry scientists presume to wrestle with technical difficulties and then pass their findings on to government. By pretending to work toward the feasibility of alcohols, the companies have also in effect reserved their right to announce a "breakthrough" and move into manufacture of the fuels whenever they find it advantageous. The industry also has the capital to build distilleries rapidly and, consequently, to monopolize the mobile energy business once again. Finally, there is the fear that the industry would simply buy up any alcohol fuel companies, not for the purpose of selling the alcohol, but to get it off the market.

"The oil companies could sabotage the program very easily," says Scott Sklar, a special assistant to Senator Jacob Javits, a supporter of the alternative source of energy. That is why Sklar and others believe alcohols must be carefully legislated into the American industrial scene.

On Capitol Hill, alcohols appear to be gaining favor. Legislators from the farm states and the Maine delegation are among supporters. Hawaii supports the fuels because the sugar cane business is ailing and alcohols could put it back on its feet (without putting more sugar down anybody's throat). North Carolina is supportive because of the tobacco angle, and Kentucky because it has many inactive bourbon distilleries.

As a result, both the House and Senate have approved legislation, attached to the Agricultural Act of 1977, allocating $24 million for more alcohol research and $15 million for the construction of four pilot distilleries. The victory means little, however, Congress still has not sprung the alcohols from their drawing-board status; it still has not passed legislation encouraging—indeed, mandating—the fuels' production and use, and it has done nothing to defuse the oil industry's awesome powers.

In theory, at least, alcohol legislation on the state level has been somewhat more progressive. In California, a bill was introduced in 1975 to require methanol-gasoline sales by 1980, but it was strongly opposed, and eventually killed, by oil and auto lobbyists. In Nebraska, that same year, successful legislation provided a three-cent-per-gallon reduction in the gasoline tax on Gasohol, which is 10 percent grain-derived ethanol and 90 per cent unleaded gas. Accordingly, the mixture was sold for only five cents more than straight unleaded gas. Since Gasohol delivered 5 to 7 per cent better mileage, its price could be considered equal to, or a little lower than, that of its competitor. That, too, was an experiment, though; Nebraska sells no Gasohol now.

Meanwhile, the Carter White House continues to be safely vague, inexcusably uninformed, or both. Energy Secretary James R. Schlesinger will only say, through spokesman Donald Creed, that he "looks forward" to studying the alcohols "more intensely," but "has made no commitments to any specific projects." And George Hall, another Schlesinger aide, supposedly the alternative fuels expert, when asked by an alcohols proponent last April about Carter's intentions regarding the gasoline substitute, replied, "What's alcohol fuels?"

RESOLUTION OF THE CITY COUNCIL OF TEMPE, ARIZ., SUPPORTING A STRONG CIVIL DEFENSE PROGRAM

Mr. HANSEN. Mr. President, I ask unanimous consent to have printed in

the RECORD a statement by the Senator from Arizona (Mr. GOLDWATER) and the attachment referred to therein.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY MR. GOLDWATER

Reliable reports about Soviet efforts in the field of civil defense are beginning to arouse considerable concern throughout the United States over the indifference of our national government toward our own civil defense posture. Just recently the City of Tempe in my home state of Arizona went on record to express its concern over apathy and indifference at the federal level.

Without objection, I should like to present a resolution adopted by the Tempe City Council for printing at this point in the Record.

RESOLUTION 1463

Whereas, the City of Tempe, Maricopa County, the State of Arizona and the cities of Phoenix, Scottsdale, Mesa, Glendale and Chandler are concerned with the apathy and indifference of our national government toward our Civil Defense posture, and

Whereas, this lack of leadership is reflected in the absence of any stated national policy or guidance. and the success of any local Civil Defense program depends to a large measure on the support and emphasis at the national level, and

Whereas, the Defense Civil Preparedness Agency budget has steadily declined causing erosion of existing programs and a loss of credibility of local as well as national programs, and

Whereas, if we are to preserve freedom and security in the United States today the need for balanced forces of both an offensive and defensive nature is apparent, and

Whereas, a widespread training and education program is needed to inform both the public and industry concerning survival, and

Whereas, the national government as stated in the U.S. Constitution is responsible that its citizens are defended from enemy attack in a manner that will minimize loss of life and property,

Now, therefore, be it resolved by the City Council of the City of Tempe and the chief elected officers of the incorporated cities of Phoenix, Scottsdale, Glendale, Mesa, and Chandler that the Congress of the United States should take the following actions in order to provide the national leadership, guidance and direction necessary for the continued functioning of a viable Civil Defense program for protection of the population and the industrial base:

1. Make known to the public national estimates regarding the probability of occurrence and likely effects of a nuclear attack on this country.

2. Formulate and make public a national policy on passive defense and declare an intent to vigorously support a viable and realistic Civil Defense program in order to restore credibility to the overall program.

3. Ensure that sufficient funds are made available to the Defense Civil Preparedness Agency so that the ongoing programs can be maintained and other programs initiated.

Be is further resolved that the Governor of Arizona indicates his support of this position by taking action in the form of a similar resolution to the Congress of the United States and also by in-state activities which will reflect firm and continued support of a strong Civil Defense Program.

Passed and adopted by the City Council of the City of Tempe, Arizona, this 3rd day of November, 1977.

THE HUMPHREY-HAWKINS BILL

Mr. KENNEDY. Mr. President, I welcome the White House announcement of support for legislation which would bring about a full employment economy. This legislation will be embodied in a modified form of the Humphrey-Hawkins bill, of which I am a cosponsor.

An economy which provides a job for all those who can work must be a fundamental goal of our society. The ramifications of a full employment economy are legion—from increased productivity, to alleviating the plight of the unemployed, to reducing expenditures for unemployment insurance and welfare.

We in Congress have tried to provide the tools to meet this goal. In the last few years, several of my colleagues and I have sponsored major pieces of legislation aimed at reducing the shamefully high unemployment rate. We have passed and expanded CETA job programs, youth employment programs and public works projects. But the unemployment rate remains too high. We need to undertake a full scale attack on this problem, using monetary and fiscal tools and more job creation programs. I applaud the commitment that President Carter is making in this area.

I note that the plan also calls for anti-inflationary measures, and I believe that this is a very good and very feasible idea. Both problems can be conquered. We can have an unemployment rate which is lower than 7 percent and an inflation rate lower than the 6.7 percent of the past 12 months, as well. In the sixties the economic policies of President Kennedy and Johnson brought the unemployment rate down from 6.7 percent to 3.6 percent while the Consumer Price Index averaged just 2.4 percent a year, dropping as low as 1.2 percent.

With the President's support, I hope and believe we can make similar progress on problems now facing our economy. As a member of the Senate Human Resources Committee, I will work for the enactment of full employment legislation.

SALTING AWAY SOVIET NUCLEAR SUPERIORITY

Mr. HATCH. Mr. President, when the SALT talks began, the United States had nuclear superiority. Now after years of negotiation, the Soviet Union has nuclear superiority. Was the function of the SALT talks to legalize Soviet nuclear superiority? I ask unanimous consent that editorials from the November 1 and November 9 issues of the Wall Street Journal be included in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

INVITING A CRISIS

Even as President Carter tries to reassure the nation he has no new initiatives up his sleeve, he is stumbling into a battle likely to dwarf energy, Panama and the rest of his current troubles. Indeed, the emerging strategic arms agreement is likely to provoke the sharpest treaty battle since the epic bitterness over the League of Nations.

While the Soviets are trying to squeeze out a few more drops of blood in the current talks at Geneva, the concessions they won in the Carter-Gromyko bargaining a month ago already insure major opposition in the Senate. The concessions go far beyond anything the Russians would have dreamed of winning from former Secretary of State Kissinger. The draft provisions are open to a whole series of objections, any one of them serious enough to call for a treaty's defeat.

Crucial limitations would be utterly impossible to verify for instance, allowing the Soviets to cheat with impunity. The terms already agreed to would limit the American cruise missile so sharply the promising weapon might not even be worth developing. The treaty would undercut the administration's commendable efforts to revitalize the NATO alliance, instead insuring the further demoralization of our European allies. It would guarantee the Soviets an advantage in missile throw weight in the order of 10–1, posing a severe threat to the American Minuteman missile while precluding substitutes such as the proposed MX missile. Each of these points deserves extended discussion.

The most immediately worrisome aspect of the new agreement, though, is the message it conveys to the Soviets about Mr. Carter and his administration. Last March the administration offered what it regarded as sensible arms control measures. The Soviets rejected these proposals out of hand. The administration's response was to go limping back again and again with new and successively weaker proposals. On the most important issues on the table, the Soviets stonewalled for six months while the Americans caved.

Take, for example, the issue of heavy missiles. The Soviets have 308 heavy missiles, each about seven times the payload of a Minuteman. The U.S. has no such huge missiles, and under the treaty would be prohibited from building any. Since it's difficult to see the utility of such weapons for any purpose except a first strike against the other side's missiles, the Carter administration set out in March to get some limit on this threat in return for concessions on the cruise missile.

In March the U.S. asked for a limit of 150 Soviet heavy missiles, asking them to tear down half the force. By May, the U.S. was willing to allow them to keep the whole force, provided only 190 heavy missiles carried multiple warheads (MIRV). Since this is about the current number of heavy missiles with MIRV, the U.S. in essence asked for a freeze on heavy missiles. When the Soviets rejected the 190 number, the U.S. tried a heavy MIRV limit of 220. With that rejected, it tried 250. Finally, when Mr. Gromkyo arrived in town, the U.S. dropped the whole idea.

Similarly, in March the U.S. insisted on specific treaty provisions on how the Soviets could use their Backfire bomber, which they insist is not an intercontinental weapon though it can fly from the Soviet Union over the U.S. to Cuba without refueling. By September the U.S. agreed to keep Backfire out of the treaty if the Soviets would make a separate promise not to increase its production rate, even though they refuse to say what the current production rate is.

To buy the limits on heavy missiles and Backfire sought last March, the U.S. offered a cruise-missile concession limiting the range of air, land and ground-based cruise missiles to 2,500 kilometers. Bombers carrying cruise missiles would not have been counted against the agred number of MIRV missiles. In the September agreements, if the U.S. builds more than about 120 such bombers it must tear down Miuteman or submarine MIRV missiles. And land-based and sea-based cruise missiles would be limited to a practically useless range of 600 kilometers. In return for scrapping the concessions asked of the Soviets, the Americans are giving larger concessions of their own.

The March proposals were in themselves open to serious question, so the September agreements are drawing serious opposition as they are explained to the Senate. But putting aside the effect on the strategic posture in 1985, the collapse of the American negotiating

position raises dangers in 1977. The lack of resolution Mr. Carter displayed to the Soviets between March and September invites them to try pushing him around throughout the world.

LEAKING SALT

For over a month now we have been reading the secret details of the strategic arms agreement more or less reached by President Carter and Foreign Minister Gromyko. But only in the last few days have we heard anyone complaining about "leaks."

Time magazine had the first scoop on the Carter-Gromyko agreements in its Oct. 10 edition—i.e., the one that appeared on Oct. 3. A suspicious competitor might note that Time's former diplomatic editor is now press spokesman for the National Security Council. The Times article, which provoked no complaints about leaks of sensitive information, was headlined, "SALT: Toward a Breakthrough; the Kremlin changes nyet to da, raising new hopes for detente."

Nor were there complaints about leaks after The New York Time's Oct. 11 story, lined "Major Concessions by U.S. and Soviet on Arms Reported." The Times said that "administration officials" described the concessions to its reporter. The U.S. concession was that no new limits would be placed on the Soviet heavy missile force. The Soviet concession was that the new limits placed on the U.S. cruise missile would be only temporary, pending the next round.

The concern about leaks started Nov. 1, when former arms negotiator Paul H. Nitze released a document with further details of the agreement. Few publications deemed the additional detail worth much newsprint, and indeed devoted more space to the subsequent complaints by treaty advocates, notably Sen. John Culver. It takes no genius to see that the real source of the complaints is not worry about classified information, but worry about Mr. Nitze's clear-eyed interpretation that there were no Soviet concessions, that the "breakthrough" consisted of U.S. capitulation and that the agreement condemns the U.S. to strategic inferiority.

It is telling, though, that advocates of the treaty are suddenly obsessed with "leaks." If in their hearts they felt they had a case, they would be glad to strip away the veil of secrecy and let the public know what has been negotiated in its name.

SUGAR PROGRAM FINALLY TO BE IMPLEMENTED

Mr. CHURCH. Mr. President, some weeks ago, I intended to introduce a sense of the Senate resolution calling on the administration to implement the sugar program mandated by the Food and Agriculture Act of 1977.

The program contained in the farm bill called for a floor price of 13.5 cents a pound. Although I was disappointed that the floor price was lower than the 15¼ cents a pound proposed in the bill I had introduced some weeks before, I supported the farm bill because I felt it offered Idaho's sugar beet growers some protection from distressed-price foreign imports.

Unfortunately, the program envisioned by Congress, a program of import restrictions, was not imposed by the administration upon the signing of the farm bill into law. Instead, a new version of the direct payments program was employed to achieve the floor price. That was not what Congress had in mind when it passed the farm bill.

A number of Senators expressed their dismay over the administration's failure to carry out the directive of Congress and Senators INOUYE, LONG, MATSUNAGA, METCALF, JOHNSTON, and CRANSTON were prepared to join me in introducing a sense of the Senate resolution.

However, we received assurances from the administration that an interim program of import restrictions would be put in place by November 8 and, as a result, did not introduce the resolution. Today such a program is in effect.

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the domestic sugar industry has suffered from distress-priced foreign sugar being dumped into this country;

Whereas foreign sugar is continuing to pour into this country to the detriment of domestic sugar producers;

Whereas the Congress intended that some form of import restriction be imposed on foreign sugar to bring the domestic price up to not less than 13.5 cents a pound when it established a sugar program in the Food and Agriculture Act of 1977;

Whereas the Department of Agriculture has failed to implement a sugar program as Congress intended despite having had over two months to do so;

Whereas an International Sugar Agreement will not achieve the price objectives established by the Congress before late 1978; and

Whereas domestic producers need assurance that the sugar program and the price objectives established by Congress will be achieved if they are to plant sufficient sugar acreage to maintain a viable domestic sugar industry: Now, therefore be it

Resolved, That the Senate of the United States—

(a) strongly urges the Department of Agriculture to immediately implement the sugar program established by the Food and Agriculture Act of 1977 in a manner consistent with the expressed intent of the Congress.

Mr. CHURCH. Although I am pleased that the administration has agreed to take action to help our growers, I realize that this is not the end of the problem. The program the administration will announce shortly is, at best, only a stop gap. A long-term cure for our ailing domestic sugar industry now demands our attention.

What form will that cure take? The administration has just successfully negotiated an International Sugar Agreement which it feels offers a possible solution to the problem of our domestic industry. The State Department has supplied me with a summary of the ISA and I ask unanimous consent that it be printed in the RECORD following these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CHURCH. Although I hope that the agreement will work, I think at the very least, our Nation's sugar producers should be assured that in the event an International Sugar Agreement collapses, not an unlikely prospect in view of the history of such commodity agreements, a fall-back domestic program will remain available to maintain a price floor that insures a viable domestic sugar industry.

The farm bill provides a sugar program of 2 year duration. The International Sugar Agreement is to last 5 years. It is clear that the protection offered by the Farm Bill will not be sufficient.

When the administration sends the International Sugar Agreement to the Senate for ratification, I hope that they will transmit a sugar package. Such a package should include the agreement, implementing legislation, and some form of domestic fall-back program to go into effect should an ISA fail to achieve its goals.

The Subcommittee on Foreign Economic Policy, which I chair, has jurisdiction over the ISA and I intend to expedite hearings on the agreement. However, it would be difficult to consider the agreement without reference to the other pieces of the package so that the Senate might be able to consider the agreement in its proper context.

I hope that the administration will clarify its intentions in this regard in the near future so that Congress may begin work on the long-term solutions to the problems facing our domestic sugar industry at the beginning of the next session of Congress.

EXHIBIT 1

THE INTERNATIONAL SUGAR AGREEMENT—1977

SUGAR IN WORLD TRADE

Sugar is among the most important exports of developing countries.

In 1976, total world trade in sugar amounted to over $7 billion, of which almost $5 billion was from developing countries.

U.S. imports amounted to $1.6 billion, 20 percent of total world imports.

U.S. imports amounted to almost 30 percent of the free market trade covered by an International Sugar Agreement.

SUGAR EXPORTERS

Based on 1976 exports to the free market the largest exporters include Australia, the Philippines, Cuba, Brazil, Thailand, the Dominican Republic, India, and South Africa.

Mauritius, Belize, Cuba, and the Dominican Republic rely on sugar for over 50 percent of their export earnings.

Guyana, Barbados, the Philippines and Fiji rely on sugar for over 25 percent of their export earnings.

Thirteen developing countries depend on sugar for over 10 percent of their export earnings.

BACKGROUND

The United States has been a member of previous International Sugar Agreements (ISAs), including the first Agreement of 1937, but was not a member of the 1968 ISA. Previous agreements were designed to deal with the consequences of world sugar surpluses and to provide supply assurance to importing members. The last full fledged Agreement was negotiated in 1968 and was scheduled to expire in 1973. The agreement has since been extended annually in order to provide statistical data and a forum for negotiations of a new agreement, although its economic provisions have been suspended.

Negotiations for a new agreement began in Geneva in April of 1977, but were recessed without conclusion. Talks were resumed on September 12 and final agreement was reached on October 7, 1977. A total of 74 countries participated in the negotiations, including 33 sugar exporting nations.

WORLD SUGAR MARKET IN 1977

The world sugar market today is considerably changed from 1968 or even 1973. The expiration of the U.S. Sugar Act in 1974, the conversion of the Commonwealth Sugar Agreement into the EC–ACP arrangement, and the reduced Cuban role in the world market have transformed the character of the market.

World sugar production, stimulated by the extraordinary prices of 1974 and 1975, has expanded to nearly 89 million metric tons this year. Consumption is around 86 million tons. There has been a surplus of supply over demand in each of the past three years, and prices have fallen below the cost of production in nearly all countries.

A further surplus is faced in the 1977/78 crop year. This situation is accentuated by the increased consumption of substitute sweetners derived from corn (High Fructose Corn Syrup) which can be produced at highly competitive prices. Furthermore, the European Community has been exporting its own surplus production under the Common Agricultural Policy and re-exporting sugar purchased from the ACP countries, adding to the downward pressure on world prices.

THE PURPOSE

The International Sugar Agreement seeks to stabilize the world market price of sugar between 11 and 21 cents per pound. This translates into a price range of 13.5–23.5 cents within the U.S. when transportation and duty are included.

HOW THE AGREEMENT WORKS

A. To defend the price floor, the Agreement relies on a system of export quotas.

The Agreement will come into force with quotas in effect. Quotas will be set initially at 85 percent of a reference tonnage, which is based approximately on each country's recent export performance to the free market.

If the price fails to reach 11 cents (world basis) within three months, an additional quota reduction totaling 2.5 percent will be made.

No countries will be allowed to export sugar in place of those who cannot fulfill their quotas (shortfall redistribution) until the price reaches 12 cents.

Quotas will remain in effect until the price rises to 15 cents per pound. In the 11-15 cent range, however, quotas will be gradually increased until they are suspended at 15 cents.

Quotas will be reintroduced at 14 cents when the price falls back to that level.

B. When the price is between 15–19 cents, the free market will operate.

C. To defend the ceiling price, the Agreement uses a system of nationally-held reserve stocks.

These stocks will be accumulated when quotas are in effect in the lower part of the price range. The stocks will total at least 2.5 million tons, and will be fully in place no later than three years after the implementation of the Agreement.

When the price reaches 19 cents per pound, one-third of the stocks will be released and shipped to the free market.

At 20 cents a further third will be released. If the price should continue to rise, the final third may be released at the ceiling price of 21 cents per pound.

D. Quota adjustments and stock dispcsals described above may be altered by action of the Council of the Agreement. Votes on the Council allow the U.S. and any one other major consuming country to block propcsals that might be detrimental to U.S. interests.

FINANCING FOR THE AGREEMENT

Exporting countries holding stocks will be loaned funds to defray their storage costs.

These loans will be extended by a Stock Financing Fund which will be part of the Agreement. The loans will be made at a flat rate of 1.5 cents per pound annually of sugar stored.

The Stock Financing Fund will be constituted through the sale of "certificates of contribution." These will be sold at the intial rate of 0.28 cents per pound. The certificates must accompany other customs documents when the sugar is entered into consuming countries. The certificate may be purchased by the importer or the exporter.

NON-MEMBER PROVISIONS

The U.S. and other consuming countries will limit their imports from non-members to 75 percent of recent imports from such countries. This percentage will be reduced to 55 percent if the price is below 11 cents.

BENEFITS FOR U.S. PRODUCERS

The Agreement provides for a 3.7 million ton reduction in exports of member countries. At the minimum quota level, medium and large sugar exporters may ship only 13.1 million tons. This compares with projected 1978 exports from these countries of 16.8 million tons.

This reduction, together with the clear inability of some countries to fulfill even their minimum export entitlements should bring the world sugar market into rough supply/demand equilibrium.

The equilibrium should serve to put the price of sugar into the Agreement price range, which is equal to or above the U.S. domestic support price under the 1977 Farm Bill.

Over the life of the five year Agreement, we would expect the price to average at or about the midpoint of the price range.

BENEFITS FOR CONSUMERS

The Agreement has a large reserve stock to prevent the repetition of the sixty cent plus sugar prices of 1974.

Recent experience has also shown that while sugar prices increases are passed on to consumers, price decreases often are not. Consumers will thus substantially benefit from a stabilized price in terms of what they will have to pay in the future for products containing sugar.

THE UNSETTLED QUESTION OF THE EUROPEAN COMMUNITY

The EC, a major exporter of refined sugar, attempted to join the Agreement on a special basis. Their proposal was not considered adequate. Negotiations between Agreement countries and the EC are likely to be held early in 1978. The Agreement can function effectively without the EC, but would benefit from EC adherence both in terms of export restraint and additional reserve stocks.

EFFECTIVE DATES

The Agreement is due to run for five years, with quotas to be renegotiated at the end of the second year.

Senate ratification of the Agreement will be required. Implementing legislation will also be required.

The quota provisions of the Agreement, however, can begin to function when countries which account for half of the world sugar exports and imports, indicate their provisional acceptance.

The Agreement should begin to operate provisionally on January 1, 1978.

THE COST OF UNEMPLOYMENT: WHAT WE COULD HAVE HAD—AND WHAT WE STILL CAN GET

Mr. HUMPHREY. Mr. President, there are many points of understandable difference between conservatives and liberals, between business and labor, and between Republicans and Democrats.

But for the life of me there is one disagreement reported in the press that makes no sense.

That is, does full employment pay? We hear it reported in the Washington Post that reaching 4 percent unemployment, as called for in the Full Employment and Balanced Growth Act, would entail large expenditures with reference to benefits.

But I suggest the converse is, without question, true. Full employment pays and always has. It is sustained, hardcore unemployment that really costs. The expenditures in programs to get people working and give them the skills to keep working are the same as investments by businessmen. A tractor "costs" a farmer thousands of dollars, but he buys it, because of what it pays in return; the logic of full employment advocates is that simple. As with the farmer, the expenditures for employment gains must be in advance of the benefits.

And what is the evidence?

I cite an excellent new study by Associate Professor of Economics Steven Sheffrin of the University of California at Davis. Published by the Exploratory Project for Economic Alternatives, the brightest new think-tank on the Washington scene, the study chronicles the value of production this country has permanently foregone in the past due to great unemployment—and relates a specter of future loss, still avoidable, if our resolve to lessen unemployment is not established now, and firmly pursued.

Professor Sheffrin questions why the United States cannot sustain an unemployment rate comparable to that prevalent in Europe, usually 2 to 3 percent. But because many doubt the achievability of such a rate in the United States, he also examines what would have happened had we maintained a simple 4-percent growth in GNP over the past 20 years, sufficient to keep unemployment at the average 4.1 percent it was in 1956—a year, incidentally, without war, and before the great productivity increase in the population embodied in the post-Sputnik education surge.

Mr. President, I ask unanimous consent that the results of this exercise be printed, in tabular form, at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

TABLE I.—ANNUAL GNP, ACTUAL AND POTENTIAL, 1956–76

[Dollar amounts in billions]

	European range [1]		4-percent trend [2]		Actual [3]
1956	(4.1)	$911.11	(4.1)	$911.11	(4.1)	$894.79
1957		956.48		946.97	(4.3)	910.98
1958		1,004.11		984.69	(6.8)	909.10
1959		1,054.12		1,024.16	(5.5)	963.82
1960		1,106.62		1,065.24	(5.5)	985.76
1961		1,161.73		1,108.18	(6.7)	1,010.52

Cumulative gap	3,651.77	2,290.88

[1] Gap$_1$: European range GNP less actual GNP.
[2] Gap$_2$: 4-percent trend GNP less actual GNP.

Mr. HUMPHREY. Mr. President, what these tables show, for example, is that in 1976 alone, we washed away forever $290 billion worth of products and services by following outmoded economic theories.

Professor Sheffrin's further research also shows how much tax revenue has been lost. In 1976, for example, the Treasury would have had $98 billion more for the services necessary in a decent and civilized 20th century society. This is, as this Chamber has been repeatedly reminded, due to increased collection from a larger earnings base in the population.

Mr. President, I do not blame the economists—at least not all of them. Professor Sheffrin, for example, is a credit to the emerging schools within that old profession. As with Socrates, it can be said, he makes us think.

Will thinking make us act? The door is open to passage of the revised Humphrey/Hawkins Full Employment and Balanced Growth Act which places the most powerful Government ever on the face of the Earth on record for compassion and commonsense.

Professor Sheffrin's projections show that by the year 2000, reaching the European range 2 percent—which I believe can be done if our sons and daughters are wiser than we have been—would mean $500 billion greater GNP in 1976 dollars than sustaining only a 6.5-percent rate. I respectfully ask all of my colleagues to think of this carefully and in human terms.

Mr. President, I ask unanimous consent that two newspaper articles on the new study be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 6, 1977]

THE COST OF STAGNATION

(By Tom Wicker)

Unemployment rose again last month, from 6.9 to 7 percent. But back in 1956, with the Eisenhower Administration in office and about to be reelected, unemployment in America averaged only 4.1 percent. Had that rate been maintained during the last two decades:

Production of goods and services would have risen by a total of $2.3 trillion, measured in 1976 dollars.

In 1976 alone, the equvalent of 17 percent of that year's actual production would have been added to the Gross National Product.

During roughly the same period (1959–1976), most European unemployment rates (adjusted to United States measurement concepts) were far below the United States average of 5.3 percent: France, 2.5 percent; Sweden, 1.9 percent; West Germany, 1.2 percent; Japan, 1.4 percent. Had American unemployment been reduced to these ranges for the period 1056-1976:

Production of goods and services in the United States would have risen by a staggering total of $3.8 trillion, in 1976 dollars.

Federal tax revenues in the same two decades would have increased by $750 billion.

In 1976 alone, Federal tax revenues would have been almost $100 billion more than they were at the actual 7 percent unemployment rate.

All these calculations have been made by Steven Sheffrin, an economist at the University of California at Davis, in a study prepared for the Washington-based *Exploratory Project for Economic Alternatives*. In an introduction to the study, the project's co-directors, Gar Alperovitz and Jeff Faux, point out how that extra $100 billion in 1976 revenue might have been used:

Anti-poverty programs—16 billion; raising the rate of public anti-pollution spending to $18 billion a year, with a view to cleaning up the environment by 1985; establishing complete national health insurance, at $64 billion a year.

Not many economists today are willing to accept the idea that the United States could achieve a "European range" of unemployment—about 2 percent—and maintain it with stable prices. Mr. Alperovitz and Mr. Faux believe it could be done—but only if the United States could be weaned from an economic strategy that relies mostly on maintaining high unemployment in order to hold down inflation. That strategy isn't working anyway, they argue, and has caused a "tragic loss of needed goods and services that is represented by millions of ablebodied Americans out of work."

In their view, the national debate has been illogically focused on "how high an unemployment rate we must accept, rather than on how low a rate we could achieve were we to make it our priority." And they recall that as late as 1959 a Bureau of Labor Statistics study found that with allowances for those only briefly or seasonally out of work "full employment" would be reached at a 2.1 percent unemployment rate.

Further B.L.S. studies have shown only a small rise in that estimate, to 2.5 percent in the 1967–75 period. And in 1972, the Congressional Joint Economic Committee took testimony from numerous economic authorities that validated a 2.5 percent unemployment rate as a "realistic goal" for full employment in the following decade.

But as unemployment began to rise in the late 1950's, Presidential definitions of "full employment" did too—for example, the Kennedy Administration's "interim goal" of 4 percent in 1962. The Nixon Administration still had a target of 3.8 percent in 1970, but by 1973 a stagnant economy had pushed that up to 4.9 percent. Under President Ford, the "full employment" level was thought to be "perhaps closer to 5.5 percent." Jimmy Carter, who began his campaign in 1975 calling for 2 percent unemployment, has set his Presidential goals at 5.2 percent in 1980 and 4.8 in 1981.

This upward trend in the full-employment definition reflected, to some extent, the increased presence of women and youths in the work force—but Mr. Alperovitz and Mr. Faux believe it also resulted for changing political and economic conditions, particularly the surge of inflation owing to the Vietnam War, worldwide oil and food price increases and other economic "jolts." Now, they argue, the definition of "full employment" is more nearly set by the fear of inflation than by the capacity of the economy.

They contend that if an effective attack were launched on inflation—particularly in energy, food, health and housing costs—by means other than high unemployment, the Federal Government could make a realistic commitment to "full employment"—say, 2.5 or 3 percent unemployment—then take the necessary steps to bring it about through something like the Humphrey-Hawkins bill. Mr. Sheffrin's study suggests the enormous benefits such a policy could yield.

[From the Washington Post, Nov. 7, 1977]

CARTER'S JOBLESS RATE SEEN AS TOO EXPENSIVE

(By Hobart Rowen)

Unless the Carter administration changes its employment policy objectives, the U.S. could lose up to $15 trillion in national output and as much as $3 billion in taxes by the year 2000.

That is the conclusion of a new study of the economic fall-out of high unemployment published yesterday by the Exploratory Project for Economic Alternatives, a Washington research group.

The study said that President Carter had steadily raised the estimate of unemployment that he considers tolerable from 2 per cent to something over 5 per cent. A main conclusion is that the federal government should not accept a jobless rate higher than 2 to 3 per cent.

The study consists of an analysis by assistant professor Steven Sheffrin of the University of California at Davis, and a commentary by project co-directors Gar Alperovitz and Jeff Faux.

Alperovitz and Faux have published other studies recently focusing on new ways of tackling basic economic problems. Their proposals would concentrate an anti-inflation program on price increases for food, housing, energy, and health care that they say affect 70 per cent of the average family budget.

The thrust of the study on unemployment is that the definition of "full" employment has gradually "slipped upward" since the mid-1950s. In 1955–57, the most successful years of the Eisenhower era, unemployment averaged only 4.3 per cent, and the argument was over how low the rate could be pressed. A 2 per cent rate was not thought impossible, the authors recall.

"Our national debate today," says Alperovitz and Faux, "is focused on the sad question of how high an unemployment rate we must accept, rather than how low a rate we could achieve were we to make it our priority."

The authors recount that Carter, in the early stages of his campaign when he was a "Washington 'outsider'", said his goals were 2 per cent unemployment, 2 per cent inflation and a 2 per cent interest rate. Their argument is that a 2 per cent unemployment rate is "not nearly as unrealistic as some may think."

Carter later set 4.5 per cent as a full employment target for 1980, but the mid-year budget review raised the projection to 5.2 per cent.

Taking what he terms a "modestly optimistic" forecast of an average of 5.5 per cent unemployment over the next 25 years, Sheffrin's study shows a loss of $6 trillion in gross national product and $1.3 trillion in taxes, compared to a 2 per cent unemployment yardstick. The $15 trillion loss represents a "worse case" scenario, based on an unemployment rate of 9.9 per cent.

Since 1956, Sheffrin calculates, the failure to maintain the 4.1 per cent rate of the mid-Eisenhower period has cost the nation $2.3 trillion in lost production.

In general, the argument has been made in the last several years that the 4 per cent "interim" unemployment target established by President Kennedy's Economic Council in 1962 as the equivalent of full employment had to be raised to avoid inflation.

Studies by the Brookings Institution, notably one by economist George Perry, suggested that with more women and teenagers in the labor force, serious inflationary pressures would be experienced around a 5 per cent rather than 4 per cent unemployment level.

The last (1976) economic report of the Ford administration said that when the effects of unemployment benefits and welfare payments were considered, full employment was probably in the range of 5.5 to 6.0 per cent.

Columbia economist Philip Cagan, in a study published this past summer by the conservative American Enterprise Institute, said "an effective policy against current inflation gives little leeway for reducing unemployment below the mid-1977 rate of 7 per cent." That level as a definition of full employment has also been endorsed by President Nixon's Economic Council chairman, Herbert Stein.

Alperovitz and Faux argue for a restoration of "the common sense of the years before Richard Nixon took office." Instead of consciously allowing unemployment to rise as a way—probably useless—to attack inflation, they reiterate their plan for "micro" measures to deal with basic price pressures. They also argue for job-training programs of the kind contained in the Humphrey-Hawkins bill.

Without such an approach, they warn that, despite Carter's disavowals, "wage-price controls may be inevitable over the next years."

CAMBODIA: ESCALATION OF BARBARITY

Mr. HATCH. Mr. President, I join with Senator DOLE as a cosponsor of Senate Resolution 323 in protest of the mass murder and total disregard for human rights by the state power in Cambodia. We hear a great deal about human rights and never seem to fail to respond to calls to protest their violation, unless they are committed by Communist states. It seems only a year or two ago that various of our allies recalled their ambassadors from Spain because five terrorist murderers were tried and executed. Apparently states that murder by the hundreds of thousands, instead of by twos and threes, are immune from criticism. I know that Cambodia has its apologists, as does Vietnam, but I am not one of them. I do not believe that the cause of human rights is advanced by our hypocrisy. We cannot be concerned about the situation in South Africa and ignore the situation in Cambodia without lending our support to the strong Communist effort to politicize in their interest the human rights issue. I as unanimous consent that the lead editorial from the November 9 issue of the Wall Street Journal on this subject be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

LORD OF THE FLIES

Soon after the National United Front of Kampuchea took control of Cambodia in April of 1975, reports began to emerge of extensive executions by the teen-age army newly in power, of forced marches into the countryside and of slave labor exacted under literally killing conditions.

For a time it was possible to think that the panic of the moment exaggerated the reports, and that what we were seeing was simply the kind of political vengeance that the world has already gotten very much used to. But all through this year new information has been surfacing to confirm that the early reports were not much of an exaggeration, and the early deaths were not just a single shot of youthful revolutionary exuberance. Even to an international community that we thought had seen just about everything, the new Cambodian regime is emerging as a genuine horror.

First, there's the matter of the sheer numbers of Cambodians who have died at the hands of their new rulers since the spring of 1975. Figuring the real level of deaths there is simply impossible, since upon taking power the NUF simply cut off communications with the outside world to an extent almost unmatched in modern times. But the estimates that have emerged so far seem based on honest and careful attempts to generalize from interviews with refugees, and they are fairly consistent: The ones we've seen range from 800,000 "peace" dead to up to two million. Even most of those observers who refuse to speak of numbers won't discount figures of this order of magnitude.

Then there's the matter of the manner of death. The shootings are unpleasant enough to hear about, familiar though they may be; but seemingly more common has been a slower death from a blow to the back of the neck with an axe or hoe handle, not to speak of even more bizarre indigenous methods. And for every Cambodian who died by immediate murder, observers agree that more have died from their forced labor in the country—from exhaustion and starvation and the fact that the regime refused to provide its people with even rudimentary medical aids, or even to accept such aids from outside.

The Khmer Rouge are reported to have a rationale for this sort of treatment, believing as they seem to that "we can lose one million or two million if we must to create the new Cambodia, and the people whom we lose are those same elements who opposed us in the past or whose minds have been brainwashed by what happened in the past." But just as damning, in its way, is what has happened to those who have survived. The reports only grow grimmer over time as they accumulate detail: The country has become a place of unfathomably systematic brutality. According to one report by Henry Kamm of The New York Times, families have been broken up and see one another only rarely; adult men and women are assigned to separate work groups, children to yet another.

Adults spend 16 hours a day at hard labor. There are no doctors, no schools to speak of, no money and almost no communication among parts of the country. Instead there are stories of children being killed for trying to visit their families or beaten with bicycle wrenches for stealing food.

Witnesses point out how difficult it is to think of what to do with a regime such as this: The government has isolated itself too well for other countries to have much immediate leverage over its actions. But we should be talking to those countries that are beginning to establish contacts with the place. The United Nations shouldn't be permitted to deal with human rights without having put before it the question of Cambodia. And Cambodian government representatives shouldn't be allowed to speak in international forums without being publicly reminded of what they have become. We should have learned by now that it is not permissible to keep quiet when we see emerging signs of holocaust.

NEW URBAN POLICY REQUIRES A DEVELOPMENT BANK WITH EFFECTIVE LENDING AUTHORITY

Mr. HUMPHREY. Mr. President, on November 7, 1977, the New York Times ran an article on the draft report of the administration's Urban and Regional Policy Group.

I agree wholeheartedly with the report's analysis that solving urban problems requires interconnected, complex, and difficult political actions.

Recently, I chaired hearings on issues related to creation of a National Domestic Development Bank. I am dismayed by the reluctance of the administration to create an institution to lend to cities. An urban bank that does not lend to cities on at least an experimental basis does nothing more than add to EDA's existing authority. It is not a step in a new direction.

Change is always difficult. But this administration must take bold steps to bring about change by offering an alternative to the municipal bond market.

Mr. President, I ask unanimous consent that the New York Times article be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNITED STATES REPORT URGES LARGER COMMITMENT TO CITIES AND POOR

(By Robert Reinhold)

WASHINGTON, November 6.—A broad series of recommendations that would strongly influence Federal programs in favor of distressed cities and the poor they house has been made by Government officials concerned with devising a national urban strategy.

The recommendations are contained in a 111-page "working staff draft" that has been forwarded to the White House. The draft, a copy which has been obtained by The New York Times, was prepared by the staff of the Urban and Regional Policy Group, a Cabinet-level panel headed by Patricia Roberts Harris, the Secretary of Housing and Urban Development.

The recommendations have not yet been approved by the Cabinet members or the White House, and they are expected to undergo further discussion and refinement before President Carter announces his promised urban policy early next year.

However, if the basic strategy is accepted, it will represent a turning point in the nation's commitment to its ailing older cities, in the view of the officials who prepared it. As such, the recommendations are likely to

encounter stiff political opposition from various quarters, for they would alter some time-honored practices by which the Federal Government distributes its largess and does business.

Fundamentally, the report would have the Government re-evaluate almost all of its programs and "retarget" them to make them more sensitive to "cities and people in distress."

"Our national urban policy must be a seamless web," the document says, in which employment, economic development, housing and other programs are all "tilted toward strengthening urban America."

While the report deals with a broad array of "options," it lays its heaviest stress on creating jobs for the poor and promoting the economic development of center-city areas. It also urges that strong incentives be devised to encourage states and cities to cooperate better on land use, transportation and other urban concerns.

Confirming earlier reports, the recommendations contain few suggestions for new social programs, despite intense lobbying on the part of black leaders and some mayors.

There is, for example, no direct mention of reducing crime, a factor that many urban leaders say deters economic development in their cities. Also, the report steered clear of two thorny issues—property tax reform and the sharing of tax bases between rich suburbs and declining cities—that are fraught with political problems.

A PRODUCT OF COMPROMISE

The document, which advances proposals in seven broad areas, appears to be the product of compromise after months of sometimes intense debate among officials representing six Cabinet departments. It avoids any "simple centerpiece urban program," saying urban problems are complex and require "a sustained, multiphrased, multipurpose, coordinated Administration response." The report gives no estimate of the price of its proposals, but a source close to the deliberations said that expanded or new programs would probably cost about $10 billion or more.

In recent weeks, the panel has stressed policies that would provide immediate jobs, income and services to the poor, blacks and other members of minority groups. Earlier thinking had largely been preoccupied with long-term economic development of cities.

Among the proposals advanced to help the "hard-core unemployed trapped in our cities" were the following:

Expansion and modification of the existing Comprehensive Employment and Training Act, or C.E.T.A., through which local governments provide public jobs with Federal money. The plans would expand the program by $4.7 billion to enlarge the number of jobs from 725,000 to 1,200,000 nationally by the end of the 1979 fiscal year.

The designation of urban minority unemployed as a "special target group" under C.E.T.A. Under this proposal, $1 billion would be channeled through community-based organizations to create jobs.

A $1 billion Commerce Department program of "soft public works" in neighborhoods. This would go for small-scale maintenance, weatherizing, rehabilitation and other activities that would both upgrade neighborhoods and provide jobs.

INEXORABLE ECONOMIC FORCES

But in the long run, the report said, something must be done to reverse the inexorable economic forces that have left the cities in such poor economic health. "Nothing less than a comprehensive shift in the whole arsenal of Federal actions affecting cities is required if city economies are to function and provide the wealth and work opportunities needed to support local institutions and people," the document stated.

In the past, it said, urban commercial renewal programs have been negated by "new highways carrying wealth and economic activity to the suburbs" and by "a Federal tax law bristling with incentives for employees to leave behind older buildings and machinery in cities for new replacements in suburbs."

"We must eliminate and reverse the suburban tilt which now exists in Federal taxing and spending decisions and other policies which indirectly and unnoticed have hurt cities," the report declared.

As one means of doing this, the officials urged the creation of a new public entity, an urban development bank, or "urbank" in government jargon, with an initial appropriation of $2 billion for its first year. The details of such a bank have been a matter of sharp debate between the Treasury Department and H.U.D. for some time. The version recommended appears to be a compromise between the limited narrow notion embraced by the Treasury and the broad, ambitious program preferred by the housing department.

NO HIGH-RISK LOANS PERMITTED

Under the proposal, the bank would make loans to local governments or private business to develop both manufacturing and service industries in urban areas. It would not be authorized to make "soft," or high-risk loans. That function would remain with the various Federal agencies already equipped to do so. Nor would it be used to provide an alternate source of credit for cities to build sewers and other parts of their "infrastructure."

As for cities that run into credit squeezes, as New York has, the panel urged a "standby" band guarantee authority separate from the urban bank.

The draft also urged a number of revisions in the Federal tax code to redress what it called the "bias" against older cities. Among the suggestions were an additional tax credit of 1 percent to 10 percent for private investment in distressed cities, doubling or tripling of tax deductions for industries operating in cities, elimination of tax advantages enjoyed by single-family homeowners and tax credits for urban homesteaders.

The document also urged the Administration to endorse a "tough policy" concerning the relocation of Federal installations, saying a Government building could be an important catalyst for urban redevelopment. It urged changes in Government procedures so that more such buildings went to distressed areas and fewer left.

It also strongly seconded efforts by the Carter Administration to better "target" money from the massive community development block grant program to needy areas.

ADDRESS BY SENATOR GOLDWATER TO THE NATIONAL COMMITTEE FOR MONETARY REFORM

Mr. HANSEN. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the Senator from Arizona (Mr. GOLDWATER), and also the attached address which he delivered to the National Committee for Monetary Reform on November 10, 1977, in New Orleans, La.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY SENATOR GOLDWATER

I believe I can say without fear of contradiction that the world at the present time is living in what amounts to a monetary nightmare. In fact, the international monetary system has become so extraordinarily complex and so bewildering that I doubt if there is a single human being capable of explaining all of its intricacies. But out of the mess one thing, I believe, is undeniably true: that unsound paper money is at the very core of the economic and monetary problems confronting most of the nations of the world.

I certainly do not hold myself to be an expert in monetary affairs. However, I do have some observations concerning the role of gold in the present state of affairs. I outlined these on November 10th at a meeting of the National Committee for Monetary Reform in New Orleans, Louisiana. Without objection, I should like the contents of that speech printed in the Record at this point.

ADDRESS BY SENATOR GOLDWATER TO NATIONAL COMMITTEE FOR MONETARY REFORM

The national and international monetary system has become so extraordinarily complex and so bewildering, I do not intend to become involved in its intricacies. Indeed, pity the poor legislator who has to thread his way through the current monetary mess in an effort to find a cure for the nation's devastating inflation and monumental indebtedness, or to achieve a balanced budget. I do propose, however, to make a few fundamental observations that may not be ignored without peril to our nation's future.

The moral issue, and I cannot emphasize this too strongly, is basic. Our monetary trouble began, we may now clearly say, due to the influence of two Cornell professors who persuaded President Franklin Roosevelt to raise the price of gold on the premise that this would lift the nation out of a serious depression on the ground that a close relationship existed between the commodity price level and the price of gold. This relationship is true to an astonishing degree. Even today, with the price of gold in the open market about $160 per ounce, the current commodity price level reflects that comparatively high gold price and the inflation plaguing us.

President Roosevelt's action required a confiscation of the gold holdings of citizens and then the raising of the price from $20.67 per ounce to $35.00, a price I understand was selected by the toss of a coin! In any event, it generated a handsome profit for the government of about two billion eight hundred million dollars, but it didn't cure the depression. The step taken was, of course, a devaluation of the dollar, the modern sophisticated version of the ancient reprehensible practice of "coin clipping."

Now, I come to the moral issue, for the devaluation of the dollar impaired the sanctity of many contracts with gold clauses. Senator Carter Glass termed the government's action a "dishonor." When the serious monetary issue reached the Supreme Court, four minority justices, in a scathing denunciation, characterized the devaluation as "counterfeiting." They went on to state that the "loss of reputation for honorable dealing will bring us unending humiliation; the impending legal and moral chaos is appalling." How prophetic! The monetary chaos has been growing for years and is still here with a vengeance. The late Adrian Massie, former chairman of the Chemical Bank, called the devaluation one of the greatest tragedies in American finance. *I agree.*

It is noteworthy that the Roosevelt administration marked the beginning of a parade to Washington of intellectuals drawn from our universities generally infused with a devotion to the still popular Keynesian medicine to cure a depression and to achieve full employment. Keynesianism is a bit subdued nowadays but it is still around.

Another milestone was the commencement of the attack on gold and the gold standard. The restriction on gold ownership, imposed by the "New Deal", took forty years to remove. I am delighted that my party spearheaded this drive in the Congress to restore a basic American freedom. As you undoubtedly know, the President signed into

law recently legislation enabling the use of the gold clause in contracts. This is a logical extension of the right to own gold and marks another important step toward a sound dollar free of wicked inflation. It actually establishes the means of creating a private gold standard! I do not expect any immediate rush to the use of the gold clause which will have to be carefully negotiated in each contract, but I anticipate its growth as a refuge from modern greenback money, as long as it persists.

No one knows how long it will take to return to the gold standard in full flower. Strange as it may seem, gold continues to be a basic measure for other values, particularly in this fiat money age. I am convinced the gold standard is absolutely essential for free enterprise which requires dependable money to function efficiently.

The extraordinary, and to me inexplicable, effort being made nationally, and to a lesser degree internationally, to reduce gold to a purely commodity status has been singularly futile. I have examined available statistics on the gold reserves of nations, and as I anticipated, the overall change in the past three years, or longer, has been trivial. Apparently nations are not being influenced by the anti-gold propaganda.

The reason is probably simple. The inescapable truth is that for thousands of years people have distinguished good money from bad. Gold has a store-of-value quality as money which fiat money does not possess, and quality is even more important than monetary quantity. Gresham's law, that bad money drives out good, is beyond the power of governments to control. Imprisonment and the threat of the guillotine did not assist France with its historic fiat money experience.

Domestic hue and cry to get rid of gold as money is also not meeting with any discernible success. The gold stock of the United States has not changed for many months and at the end of August, the last month for which I could obtain the amount, it stood at 11 billion 658 million dollars when valued at $42 per ounce.

It is not generally known that the Federal Reserve Bank acts as a gold depository for foreign governments. That earmarked gold is not a part of the United States gold reserve. You may be surprised to learn that it amounts to 16 billion 179 million dollars, (also at the $42 rate), which is *much larger than the United States gold reserve.*

I dare say the earmarked gold rests here as a refuge from possible confiscation, European turmoil, and possible war, but the point I wish to make is that this is additional evidence that governments are apparently making no effort to eliminate the precious metal as money, the fervent desire of some in Washington. Please note, too, that the valuation of those gold stocks would be ever so much higher if based upon the open market, now about $160 per ounce. The great potential profit in the event of current sales is obviously no inducement. I don't wonder, as still higher prices may occur as inflation in the dollar persists.

Should the dollar once again become redeemable in gold one might expect the earmarked stock, which bears no interest, to be converted into Treasury bonds, which do. Incidentally, earmarked Treasury securities have risen from 55 billion dollars at the end of 1974 to 75 billion dollars at the end of July of this year, an indication of the esteem in which our fiat dollar is held, fortunately.

Gold is being sold by auction every month by the International Monetary Fund, a sixth of its holdings. The proceeds are being used for the benefit of underdeveloped nations experiencing balance of payment trouble. The International Monetary fund occupies a growing importance internationally. It comprises both hard money and fiat money advocates. The fiat money influence prevailed in the establishment, a few years ago, of special drawing rights, a completely goldless monetary unit to facilitate the adjustment of international trade balances. Behind all the International Monetary Fund's activities is a view sometimes expressed that it should ultimately become a world bank. This bears watching but I doubt that objective can be reached with purely fiat money.

The world is living in a period of monetary irresponsibility. Uncritical acceptance of governmental remedies for unemployment or business and trade difficulties is widespread. One of these, vastly important, I have already mentioned. It is the devaluation of currencies now grown completely respectable and fashionable. Our own government has actually spent taxpayer funds in advertisements, nationally, extolling the virtues of a devalued dollar for the exporter—which is true, of course. A few months ago the Secretary of the Treasury and an Undersecretary of State, pleaded with Japan and Germany to do the reverse—revalue their currencies, so as to reduce exports. They were rebuffed. This would imply that, as might be expected, domestic sovereignty rules supreme. Local interests are overriding. They stand in the part of the creation of a new world currency. Actually, we don't need one. Gold has functioned in that capacity for centuries.

Another fashionable monetary practice is the adoption and promotion of floating currencies. Even though floating introduces a business risk difficult to appraise, I note little, if any, objection from industry. Some companies have, skillfully or luckily, profited from floating, while others have lost. Exxon, for example, showed a loss of 44 million dollars in one quarter recently from currency translation. It had profited earlier. The unexpected devaluation of the Mexican peso with an enviable record of exchange stability, caused losses to many American enterprises—and so it goes. I cannot understand the attitude of businessmen generally, who could not possibly function without rigid standards of all kinds of measurement, yet who endorses fluctuating monetary bases.

Now let me turn to something closer to home. I refer to the fact that we seldom applaud, or reflect upon, the reason for the nation's phenomenal strength and prosperity. It is, of course, the unimpeded commerce between fifty states in the development of their boundless agricultural and mineral resources under free enterprise. There are no floating dollars between, say, Maine and California, or other states. John Exter has pointed out that, thanks to the operation of the Federal Reserve System of twelve regional banks, each with its own distinctly identifiable designation on its Federal Reserve notes, we have a magnificent example to the world of the gold standard at work. Each Federal Reserve Bank settles its accounts with other Federal Reserve Banks through a gold settlement fund at the Federal Reserve Bank of New York, in which each bank participates. In the face of this experience, I cannot understand the desire to substitute naked political power internationally—that is fiat money—for gold.

One serious consequence of the imprisonment of gold is that we Americans have lost the power of the purse. We are virtually helpless in trying to control government expenditures and in trying to achieve a balanced budget. When the dollar was redeemable in gold, citizens were able to express their displeasure over government extravagance by redeeming their paper dollars into gold, thereby diminishing the size of the gold reserve upon which the credit structure of the nation rested.

With fiat dollars there is no need to worry about a balanced budget. The dollar printing press will supply the funds for more social objectives. Of course, this may increase the public debt but that is no obstacle, for the Congress has been raising the public debt limit each year for many years. But the penalty is all around us. It is continuous inflation and possibly an ultimate crash.

Incidentally, a sharp contrast exists between the ease with which the Federal government pays its bills with fiat money, and the predicament of many states and municipalities which lack the power to issue dollars and are compelled to live within their means. This situation forecasts a rush to Washington for aid or relief.

As the dollar, by comparison, is the world's leading currency, it has the grave responsibility of setting an example for soundness and integrity. Prior to World War I, when the gold standard flourished, the pound sterling cleared the commerce of the globe with only a small amount of gold as a reserve. Inflation was absent, or negligible. In recent years a new monetary unit has been created to facilitate trade and the adjustment of balances between nations. It is the completely goldless special drawing right of the International Monetary Fund. As I said earlier, the Fund holds a large amount of gold, a lot of it being sold each month, by auction, to furnish proceeds for the use of underdeveloped nations. Some gold is being returned to the original subscribers. I can only conclude that the International Monetary Fund is also permeated with a desire to eliminate gold as money and that it hopes to become a world bank ultimately on a purely paper monetary base, not surprising in this fiat money age.

I am intrigued by the spectacle of trade among nations regardless of their political composition. Obstacles and monetary differences are readily overcome if the profit possibility is attractive. Oddly enough, while United States policy currently is to downgrade gold, the socialist nations are apparently advocating a return to the gold standard. Who would have believed it, in the light of Lenin's declaration that the way to communize a country was to corrupt its currency and do away with gold; And why not? International commerce requires clearance with money of the highest quality. Gold is still number one.

It is hoped that the Congress will eventually examine our experience after the Civil War, one hundred years ago, when greenbacks prevailed, and the nation was undergoing the depression of 1874, a rather long one. Thanks largely to the courage and initiative of Senator John Sherman, the greenbacks were made redeemable in gold in 1879. Instead of a rush to convert greenbacks into gold, as might have been anticipated, the citizenry actually returned gold to the banks. The story is too long to relate here but it is a challenging one, especially as the sequel was to send the nation on a period of remarkable growth and prosperity until World War I broke out.

The monetary nightmare in which the world is living makes it very difficult for free enterprisers to plan ahead for expansion and the consequent creation of new jobs. What will the dollor be worth a few years from now? No wonder the stock market has been going downhill. It is giving a clear indication that something fundamental is wrong with our economy. I consider it to be a lack of confidence in our dollar, and an apparent unwillingness to submit to monetary discipline on government spending. How does a nation achieve such indispensable discipline? The answer has been admirably given in a study of the Institute of Economic Affairs of Great Britain, entitled "Gold or Paper." It concludes that "Down the centuries no government has maintained the value of its currency without external discipline, of which

the best is the obligation to convert currency into gold. The world has a long way to go before it learns to manage its moneys without gold. A return to gold is not fanciful. The gold standard was not created by international agreement; it grew spontaneously and could do so again—perhaps in the European Economic Community."

This is a good place to stop. I go back to my introductory comment that a serious moral issue is before the nation. I am disturbed over the growth of crime, the tragic immorality, or corruption, exposed in both government and business. But perhaps I should not be surprised, as Andrew Dickson White, in his classic study of fiat money inflation in France, recorded that corruption grew "as naturally as fungus on a muck heap" from the breakdown of the morals of the country at large.

Our founding fathers designed our Constitution and our democratic and republican form of government to guard against the concentration and abuse of power. I fear the growing power within our own government's structure that slowly but surely undermines the morality of the people and even their ability to understand what is happening to their precious freedom before it is all gone.

The wrong use of power has destroyed more governments and deprived more people of freedom than any other action in the history of mankind. In this connection, I fully agree with those who have stated that freedom's silent and most powerful weapon is gold money.

The world will never be crucified on a cross of gold, as William Jennings Bryan once warned, but it could easily drown in a flood of unsound paper currency.

STOP THESE SECRET TAX HIKES

Mr. GRIFFIN. Mr. President, on April 29 of this year, I introduced a bill, S. 1431—the inflation neutralizer—which would automatically adjust personal income tax rates to reflect increases in the cost of living.

Although the inflation neutralizer has yet to receive serious consideration by the Senate, I would like to take this opportunity to point out that it is receiving serious consideration by the public.

Recently, the Reader's Digest published a most incisive article by James Lynn, former Director of the Office of Management and Budget, in which he examines this problem.

I ask unanimous consent that Mr. Lynn's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STOP THESE SECRET TAX HIKES

(By James T. Lynn)

WASHINGTON.—To pay for its current and newly proposed spending, the federal government has programmed a series of regular tax increases that, each year, will add from $350 to $450 to the average family's income-tax bill. These increases will continue indefinitely. In five years, the average family's income tax will increase about 35 percent. . . .

The above is an important story and, even though it has never appeared in your newspaper, it's real. These unannounced tax increases have been occurring year after year for decades. From them, just since 1971, the government has raked in a secret tax windfall of $36 billion. This year alone, it has quietly taken an extra $6 billion out of our paychecks and, by 1980, it will gobble up $40 billion more. Yet these tax increases go unnoticed because they are extracted with marvelous subtlety—as an integral, if unintended, part of U.S. tax law.

At the root of these secret tax hikes is the insidious old numbers game of inflation. While our paychecks may look as if they have been growing—there are higher dollar figures printed on them—every bill in the mail, every ring of the supermarket cash register tells us that the value of these dollars has fallen.

But at the same time, the federal income-tax tables are inflexible, oblivious to inflation. Since the last revision of the tax brackets took place in 1964, the real value of the dollar has been cut almost in half. Personal exemptions and standard deductions have been made more generous—in fixed dollar amounts—but for most families these changes have not offset the declining value of the dollar.

Meanwhile, as Americans have had more inflated dollars added to their incomes, they have moved into higher and higher tax brackets, paying not only more dollars but a greater percentage of their income to the federal government. At the same time, many have found their wage increases entirely eaten up by inflation (which rose by 80 percent in just the past decade). The grim bottomline fact: even though their real before-tax income has not risen, these families have been paying more real taxes.

President Carter has called the U.S. tax system a "disgrace," and his Administration is pushing forward a "tax reform" package that will close some loopholes—while inevitably opening others. But nowhere in this package is what many economists consider the single most fundamental, lasting and useful reform of all—one that deserves the support of Republicans and Democrats alike, one that would benefit literally every taxpayer.

This most vital proposed reform is called "indexing." It is ingeniously simple: Tie the dollar amounts specified in the tax code—the personal exemption, the standard deduction, the low-income allowance, and the brackets themselves—to the Consumer Price Index. If the cost of living goes up ten percent in a given year, the indexed tax brackets would be adjusted accordingly by the Internal Revenue Service, and a family whose increase in income merely kept pace with inflation would not move automatically into a higher tax bracket. This family would continue to pay the same tax percentage each year as long as its real income (measured in constant dollars) remained the same.

Under such a system of indexing, the federal Treasury would still get increased revenues, in proportion with "cost-of-living" income raises. But it would not get the windfall profits it now collects through tax tables that are insensitive to inflation.

To comprehend fully what indexing would mean, consider the present plight of a typical young wage earner with a wife and two children. In 1975 he made $10,000, on which he paid $709 income tax. In 1976 he received a $700 raise, and in 1977 a $750 raise. Meanwhile, inflation increased at a rate of better than seven percent. Let's say this man receives steadily increasing raises amounting to seven percent of his base salary each year until 1980, while inflation continues at seven percent (which is not unlikely, many economists feel). In 1980 he will be making $14,000 a year, but he will have moved to a higher tax bracket and:

His effective tax rate will be 10.2 percent (up from 7.1 percent in 1975).

His actual tax due—$1428—will be more than double what he paid in 1975.

His income after taxes in real dollars (adjusted for inflation) will therefore be $8981—$310 less than it was in 1975.

Thanks to government-caused inflation and to the IRS's remorseless tax structure, this citizen—while receiving five raises and increasing his income by almost half—will wind up 2.5-percent poorer, in terms of real dollars, than he was five years before. That 2.5 percent could feed his family for six weeks.

The fact is that unless we stop inflation—a prospect that unfortunately seems very dim right now—the tax structure will continue gnawing away at our standard of living. And low-income families trying to get by on a minimal standard of living are hit hardest.

A number of countries, including Canada, France, West Germany, Brazil and Denmark, have applied indexing to their income-tax structures. Their experience indicates it has a generally stabilizing influence on the economy. Nobel Prize-winning economist Milton Friedman says that indexing in this country "would largely immunize the income tax from inflation, a result clearly desirable on grounds of equity. But it is even more essential in order to reduce 'taxation without representation'—higher taxes imposed on the citizenry year after year without legislation."

If indexing of income taxes is so simple, so obviously appealing to the taxpayer and voter, why didn't Congress vote such a measure into law years ago? The answer can be found on Capitol Hill, all tied up to the penchant for big spending and the proclivity for political survival.

Rep. Robert Bauman (R., Md.), who has sponsored an indexing bill, notes: "Let's face it. Many of my colleagues see the present system as a goose, hidden away from the public eye, laying golden eggs to help cover the cost of vast new programs. Under the present setup, government rakes in a huge dividend from inflation."

Adds Sen. Robert Griffin (R., Mich.), another indexing advocate: "The wage earner moving into higher tax brackets—with no increase in purchasing power—pays an inflation penalty which Congress does not debate or vote upon."

Without this built-in inflation dividend, Congress knows, sooner or later it would have to slow down its spending increases—either that or vote a tax increase. Experience has shown that the likelihood of either of these things happening is as small as a mosquito's eyelash. Over the past 15 years the federal budget doubled, and by next year it will have doubled again. Yet in all that time there has not been a *single permanent tax increase* voted.

Indexing has failed to arouse some Congressmen because, if passed, it would end one of their favorite vote-garnering activities: legislating illusory "tax cuts." Regularly, with great tumult and shouting, Congress, like the cavalry rides to the rescue of the beleaguered taxpayer with a variety of piecemeal remedies, rollbacks and rebates. For most of the population, these "cuts" never go deep enough to get through the fat of inflation and affect real income.

Look at the Tax Reduction Act of 1975, a measure many lawmakers like to point to as evidence of how they have helped the taxpayer. It was supposed to counteract the 1974–75 recession and "stimulate" the economy by eliminating "excessive" taxes. Actually, the amount of excess taxes cut, $12 billion for individual taxpayers, was almost precisely the amount taxes had gone up on the inflation escalator during the preceding two years. There was no real cut at all.

The public deserves better than tax-cutting charades. Indexing is a simple measure that will redress a subtle but monstrous imposition on the American taxpayer. It is not a cure for inflation; only a halt to deficit spending by the government, plus intensive investment by the private sector, can bring that happy relief. But indexing *is* an important step toward equity for the citizen and accountability for Congress.

NEEDED CHANGES IN FOOD GRADING

Mr. HUMPHREY. Mr. President. Recently the board of the congressional Office of Technology Assessment (OTA) released an assessment report entitled "Perspectives on Federal Retail Food Grading." This assessment constituted the first comprehensive study of our present food grading program. The request for the assessment was made by my good friend and colleague, Senator GEORGE MCGOVERN, chairman of the Select Committee on Nutrition and Human Needs. The objective of the assessment was to try to establish how the Federal food grading program could convey more information to consumers, especially information on the nutritional value of the product.

Today, the grading of food products is receiving much attention. Consumers are asking for more information to help them in making wise puchasing decisions with their limited food dollars. Grading is viewed as a vehicle to provide that information. However, consumers find that the present program is not helpful. There are no standard food grades, such as A, B, C, and there is little relationship between nutrition and grade.

These problems OTA highlighted have been a source of many recent articles on this topic. Recent articles by Goody Solomon, Washington Star; and by Dr. Jean Mayer and Dr. Johanna Dwyer, in their weekly syndicated column appearing in the Washington Post reach to the heart of the issues:

As it now stands, the government's present food grading system rates a D-minus. From the consumers' standpoint, the basic defect in the present system is the assumption that looks alone are enough—that the best looking food should be given the best grade. But this is simply not true; indeed foods with less than perfect appearance may be just as nutritional (or even more so, than those that are prettier).

Regarding the grading of meat which was highlighted in the OTA assessment report, Dr. Mayer and Dr. Dwyer state that—

The grading of red meat is perhaps the most misleading. There are eight grades of meat—U.S. prime, choice, good, standard, commercial, utility, cutter and canner. Only the first three are sold in most stores, and they are based on the age of the animal and degree of marbling—the flecks of fat with the lean portions.

Obviously, there is little relationship between nutrition and this type of grading; in fact, many of us who are involved with good nutrition are concerned about the amount of fat in meat, especially fat that cannot be trimmed away. But this grading system makes it appear that a high fat content is desirable . . .

There's little wonder then that the OTA report did not give the government's food grading system very high marks, but the question is what should be done about it. In this respect, the report offers some very sensible suggestions.

Mr. President, this OTA report is an excellent example of a congressional committee, in this case the Senate Select Committee on Nutrition and Human Needs, working together to call to the attention of Congress an emerging issue of concern to the people of this country. Before this OTA assessment and report, little was heard. Now, the talk of action to overhaul the U.S. food grading program is common. I urge the U.S. Department of Agriculture to step up their review of the food grading program and take into account the concerns expressed in the OTA report. It is worth noting that the U.S. Department of Commerce is in the process of redesigning the classification and grading system for fish. They are using the report from this assessment as a guide for this task as well as some of the food grading panel members.

Mr. President, I ask unanimous consent that the series of articles written by Goody Solomon and the article written by Dr. Jean Mayer and Dr. Johanna Dwyer on this very timely and important topic be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Star, Sept. 21, 1977]

WHY WE NEED FOOD GRADING, AND WHAT KIND

(By Goody L. Solomon)

This is the second of two articles on grading tomatoes. Do we really need food grades considering their shortcomings? For one, multiple terms (A, AA, Fancy, No. 1, Prime and so on) confuse us about which items are the best. For another, the criteria for food grades put a premium on beauty rather than on food values. Then, too, because the system is voluntary, many foods are graded at wholesale but not so labeled at retail and many more are not graded at all.

Yes, we do need food grades, say consumer advocates, but of a different sort from what we have now. They have suggested reforms which the U.S. Department of Agriculture (USDA) consistently rejected for more than a decade.

No more. Assistant Secretary Carol Foreman, herself a former consumer advocate, is in charge of food grades and has started moving toward the long-sought revisions They are:

Make the system mandatory.

Adopt uniform terms for all products—for example, A, B and C or 1, 2 and 3.

Provide for public participation in the establishment of grading criteria.

Create a system for classifying foods by their nutritional values and use it concurrently with the one based on sensory traits such as size and color.

Rod Leonard, executive director of the Community Nutrition Institute, thinks that in time, as people learn to choose foods by nutrition and economy, good looks will no longer merit higher prices.

None of the changes will come quickly or easily. Among the obstacles, before nutritional grades could be formulated, researchers need to analyze individual products and then put their findings into measurements that consumers understand. In addition, uniform terms will be adopted gradually on a product by product basis. And, each broad category (fresh produce, processed foods, dairy items and meats) has its special set of complicated problems.

Furthermore, some of the reforms necessitate authorization and appropriations from Congress. That's where industry objections will get in the way. Especially from processors. Their products are probably the most difficult to grade—and, the advocates say, most in need of the grading—because of the variety of ingredients and because of how processing affects foods.

The National Canners Association argues for the status quo this way: Food grades aren't needed by shoppers since most of them make selections according to their own subjective views of flavor, color, smell and the like. But grading sometimes does aid supermarkets in their wholesale purchases. Nutrition grades are especially unnecessary because we now have that information on labels, which although voluntary, is increasing and already appears on 50 percent of all canned fruits and vegetables. Finally, given these arguments, the extra cost of a mandatory system is unacceptable.

(Under the present voluntary setup, companies pay inspection fees to state and federal governments. These come to an estimated $30 million and $45 million a year, respectively, said a USDA official. With compulsory grading, Uncle Sam would pay for all the administrative and inspection work—an estimated total exceeding $500 million.)

A report by the Office of Technological Assessment (OTA), an arm of Congress, scored a number of deficiencies of current food grades but bolstered the arguments against mandatory requirements. OTA wrote: "For processed foods, OTA's analysis indicated that a mandatory system probably would not produce a positive net consumer benefit. Brand names partially substitute for retail grades. They have allowed society to exercise its perception of quality by selection of one brand name over another. A mandatory grading system would largely duplicate the information brand names currently provide."

Not true, contend consumer advocates. They reason this way:

First off, grading must allow shoppers to make nutritional comparisons. The current scheme of nutritional labeling falls short in what it tells For example, labels list carbohydrates but not sugar and starch; they show data about trace elements that are essential to health despite their tiny amounts. Grading, as Leonard put it, "could become a shorthand way of giving nutrition information."

Next, to be truly useful grades must be required on all products. As for the contention that brand names are a substitute, Leonard said, "Brand names are a device to segment the market. They create oligopolies and oligopolistic pricing (which is) supported by advertising. There's no nutritional difference among brands." But with compulsory grading, he added, the brand name maker would be compelled to find a real distinguishing quality.

[From the Washington Star, Sept. 14, 1977]

GRADING CANNED, STEWED TOMATOES

(By Goody L. Solomon)

The U.S. Department of Agriculture (USDA) has issued a proposal to establish two grades of canned stewed tomatoes. Grade A would contain tomatoes, onions, celery and green peppers that have good color and are free of blemishes. The tomatoes, in particular, would hold their shape. Grade B would be less attractive and perhaps a bit mushy. The aim, said a USDA staffer: to foster uniformity.

But will it? And will the grading help us comparison shop in the supermarket? Consumer leaders think not. In fact, for a long time, they have found so much wrong with all federal food grades that they have been asking for a total revamping of the system.

The issue is beginning to get attention from Congress: Its Office of Technological Assessment (OTA) has issued a report, "Perspectives on Federal Retail Food Grades," which discusses the problems and proposed solutions. Among other things, OTA found "confusing nomenclature for grades and a general lack of information conveyed by them to consumers." Moreover, "Grade designations imply rank," OTA wrote. "One objection to the implication of rank is that a

second or third grade product may in fact be superior to the top grade, depending on its use or relative price."

Those deficiencies are illustrated by the proposal for canned stewed tomatoes. It extols such aesthetic features as color, shape and size, for which we will pay a premium without knowing whether a less attractive product is more nutritious. The grades won't reveal, for example, whether the tomatoes come from California and have less calcium than those grown in the Midwest which, in turn, have less vitamin C. (With peas, to cite another example, small ones win high grades and prices but mature ones offer more food value. And with beef, we pay for extra fat and waste on prime cuts.)

In addition, while the top grade for stewed tomatoes will be A, on other foods it is Fancy, Extra Fancy, No. 1, Extra No. 1, AA, or prime. We have to remember all the food grades (of which, by one estimate, there are more than 400 covering fresh produce, canned and frozen fruits and vegetables, dairy items and meat) in order to recognize when Grade A signifies first class. To further confuse the picture, canned fruits and vegetables had the option of using either Grade A or Fancy and either Grade B or Choice. Two years ago, USDA decided to use only the A and B designations. However, the change is taking place very slowly as individual standards are revised.

Drawbacks of grading also stem from the fact that it is voluntary. One manufacturer may elect to use it while another may not. And the manufacturer who uses it may do so only for his wholesale transactions, never putting any grade on his retail package. Meanwhile, most chain stores have their own criteria for their higher-price vs. lower-priced private labels. Large companies selling nationally advertised brands similarly stay out of the grading program, claiming to have their own quality standards instead. So, we're pretty much on our own to test brands by trial and error.

From the start, food grades were developed to serve agriculture and industry; consumer assistance was an afterthought. Back in 1917, when the first grades were set for fresh potatoes, according to OTA, "the government hoped the grading system would encourage farmers to grow higher quality produce, reasoning that since high quality food would sell at higher prices, the farmer would receive more for what he produced and therefore would be persuaded to grow better quality food."

But more important, said OTA, grading aimed at making wholesale transactions simple and more efficient. It was hoped that cost reductions might lower retail prices.

Over the years, as grades were set for specific products, the Agriculture Department allowed each industry considerable latitude in deciding their grade names as well as the criteria for the grades; thereby encouraging the diversity and confusion that exist today.

Because they primarily serve industry and agriculture, it is not surprising that grades are more widely used at wholesale than at retail. As an illustration, among the most extensively graded products at wholesale are frozen fruits and vegetables, yet at retail we see few if any of those grades.

Even at wholesale, however, grading has been on the decline. For several reasons. (1) The cost charged by USDA for inspecting and grading food products has increased. (2) Under a 1975 agreement, USDA promised to inform the Food and Drug Administration (FDA) of products that did not meet the minimum standards for a grade. As a result, FDA might learn of companies that failed on sanitation counts. Unwilling to take that risk, many companies simply stay out of the grading program. (3) Large processors have not been buying on the open market as they used to because they contract for farmers' total harvests.

Where grades are used, their incorporation into state and federal marketing orders for certain fresh fruits and vegetables further aid business at the expense of the consumer. Florida is a case in point. Its market orders for oranges and tomatoes require that blemished fruits be sold to processors. They cannot be sold at retail and cannot be exported out of the state. The marketing orders also set limits on the size and appearance of fruits shipped out of state. Therefore, large quantities are left to rot on the ground.

That situation puts farmers growing fruits organically at a special disadvantage since, without chemicals, their products don't look quite so pretty. A group of those farmers have been trying to change the marketing order requirements, with no success so far.

To correct the shortcomings of food grades, what specific reforms do consumer advocates recommend? What counterarguments stand in the way? More about that next week.

[From the Washington Post, Sept. 22, 1977]

NUTRITION

(By Dri Jean Mayer and Dr. Johanna Dwyer)

With the start of a new school year, many of us are once again preoccupied with grades and report cards, which in many schools are now much more complicated than the ABC's we got as children. But even though the new grading systems may be harder to understand, they still are based on school performance, and not something as superficial as looks.

When the federal government sets about to grade the food products we buy, the opposite happens: The grades have little or nothing to do with nutritional value or wholesomeness or safety, but are mostly based upon how foods look.

Sen. George McGovern (D-S.D.), chairman of the Senate Select Committee on Nutrition and Human Needs, recently asked the Office of Technology Assessment (OTA) to look into the federal food-grading programs. That agency has just released its report, which clearly shows that congressional action to make food grading more meaningful to consumers is long overdue.

As it now stands, the government's present food-grading system rates a D-minus. From the consumer's standpoint, the basic defect in the present system is the assumption that looks alone are enough—that the best looking food should be given the best grade. But this is simply not true, indeed, foods with a less than perfect appearance may be just as nutritional (or even more so, than those that are prettier).

Actually food grades are not really designed to be helpful to consumers but to simplify pricing structures for the food wholesaler. To further confuse the issue, there are no standard food grades, such as the ABCs of school report cards. Instead many have designations such as "U.S. fancy," "U.S. Prime" and so forth.

The grading of red meat is perhaps the most misleading. There are eight grades of meat—U.S. prime, choice, good, standard, commercial, utility, cutter and canner. Only the first three are sold in most stores, and they are based on the age of the animal and the degree of marbling—the flecks of fat within the lean portions.

Obviously, there is little relationship between nutrition and this type of grading; in fact, many of us who are involved with good nutrition are concerned about the amount of fat in meat, especially fat that cannot be trimmed away. But this grading system makes it appear that a high fat content is desirable.

Why should well-marbled fat be considered "prime?" At one time it was argued that the marbling made meat tender, juicy and flavorful. But now, there are many ways to improve the tenderness of lean beef. There's little wonder then that the OTA did not give the government's food-grading system very high marks, but the question is what should be done about it. In this respect, the report offers some very sensible suggestions.

In judging fresh produce, things like color, shape and smooth, undamaged skins should be important. But only one system should be used, says the report, and consumers would know that it is not a judge of wholesomeness or nutritional value. In addition, more complete nutritional labeling and information should be provided on these products.

As for meat, a system should be devised to provide both a grade and a fat designation, or complete nutrient labeling.

Since there doesn't seem to be an easy way to combine nutritional labeling with grading criteria, the OTA suggests giving A, B, and C grades on the basis of how much meat is left after external fat is trimmed away. But since the amount of fat within the meat also is important, this proposed system is not perfect.

Nutritional labeling for meat is still another possibility, but this is probably a long way off, thus making a meaningful grading system even more important for consumers.

How can you help? For one thing, you can urge your congressman to read the OTA report and to act to simplify the confusing food-grading system. You also can urge him to support the nutritional labeling of more foods.

ERISA REPORTING REQUIREMENTS

Mr. WALLOP. Mr. President, it has come to my attention that the Labor Subcommittee of the Senate Committee on Human Resources is holding oversight hearings on certain pension related issues including the Employee Retirement Income Security Act, ERISA. Several letters to my office have suggested that reporting requirements for small businesses are costly and have resulted in many such businesses terminating retirement plans that they once created for the benefit of their employees.

ERISA requires employers to publish a summary plan description (SPD) which fully describes retirement plans that apply to employees. Lincoln National Life, a Fort Wayne, Ind., insurance company has published a 17-page booklet which provides guidelines for the preparation of SPDs by its customers, but even with such guidelines, legal assistance is often required to comply with the law. In rural States like Wyoming, that assistance is just not available, and even where it is available, it is extremely expensive.

In a thoughtful letter, a constituent of mine has suggested one way of relieving much of the paperwork that ERISA SPD requirements generate: Provide an exemption from the requirement to complete SPDs for employers with fewer than 100 employees. I fully endorse this suggestion and urge that as the Labor Subcommittee looks into ERISA reform, it consider a rules change such as this one which could relieve small businesses from needless burdens.

Because he makes the problem clear, and because his letter provides a good insight into the problems faced by a small businessman, I ask unanimous

consent that a letter I received from George Bryce of Casper, Wyo., be printed in the RECORD. His comments are constructive and deserve full consideration.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CASPER, WYO., *October 6, 1977.*

Re: Summary Plan Descriptions of ERISA and Related Problems

Senator MALCOLM WALLOP,
Dirksen Building,
Washington, D.C.

DEAR SENATOR WALLOP: ERISA was passed to accomplish at least one major objective: To force employers to communicate benefits to their employees. This has led to the Summary Plan Description which must be given to all participants of group insurance programs. My insurance company has issued guideline summary plan descriptions via a 17-page pamphlet which clients are now attempting to digest.

It is difficult for me to believe that it was the intent of Congress to force all employers to put out the attached "ERISA Statement of Rights (required by Federal law regulation)" as part of the Summary Plan Description.

If I were an employer paying for programs of this nature out of profits, I would be insulted by the notion of distributing this type of useless report to my employees. This would be especially true if I had paid money to print booklets and used company time for meetings to have these benefits explained. The statement encourages plan participants and beneficiaries to doubt the decisions rendered by people operating an employee benefit plan. It encourages people to run to Federal courts and Governmental offices when they have questions.

Furthermore, I have a difficult time disagreeing with an employer who wishes to terminate this plan because he is fed up with the paperwork barrage that has been created by ERISA. In fact, the financial summary of the plan does not even exist for 99% of all the plans and requires yet another report to be prepared. This backlash will cause employees to go without quality benefits or eventually further the union cause.

One of my clients with 12 employees paid $5,000 to bring his plan in compliance with ERISA. He will by paying additional fees to have the Summary Plan Description and the Statement of Rights printed and distributed to all his employees. He will be saddled with EBS–1 forms, the 5500 Series forms, annual financial reports, and no one knows what else the non-elected officials in the Department of Labor and the Treasury Department are likely to create. There must be an easier way! Another client sent out ERISA required notices to more than 5,000 negotiated plan participants and former participants. More than ⅔ of the notices were undelivered and returned. The same thing will happen with the Summary Plan Description mailing.

I urge you to do anything in your power to provide for an exemption from both the Governmental forms and the Summary Plan Description of ERISA for employers with fewer than 100 employees.

Very truly yours,

GEORGE BRYCE.

NATIONAL FAMILY WEEK

Mr. HUMPHREY. Mr. President, during the week of November 20–26, we honor our most cherished American institution—the family.

The role of our families has changed dramatically in the history of our country. During America's past, the family fulfilled most physical, social, and emotional needs. A family literally produced food, clothing and shelter for its members, provided education for its children, and defined a framework for social behavior.

If I go back only as far as my own childhood, I can remember examples of how the family served as our primary social institution.

When I was growing up in a small town in South Dakota, parents and children knew each other well. It was natural for children to learn the lessons of life in their most useful form—by observation and participation. I was at my father's elbow constantly, watching him, listening to him; eventually debating with him. It was the finest legacy he could have left me.

Today the family has assumed more of a supplemental role in satisfying basic physical and social needs. In our cities, it often takes a special effort to get the whole family together. Parents at work and in their social lives are often strangers to their children, and their children are strangers to them.

The breakdown of the family unit is occurring at an unprecedented rate throughout this country. According to the most recent data compiled by the National Center for Health Statistics, the divorce rate of our population has doubled in the last decade.

And the extended family in this country is all but extinct. According to a major study, in 1900, 50 percent of the households in Boston included parents, children, and at least one other relative. Today the comparable figure is 4 percent. This is truly a sad occurrence.

Long ago we should have asked: What has been the effect of urbanization on our homes, families, and neighborhoods?

There are many reasons for the breakdown of the family unit—looser morals, a highly mobile society, and an advanced economy that reduces family reliance on its members.

Colin Turnbull, the anthropologist, suggests a theory for the general upheaval we have recently seen in our whole society, of which family disintegration is a part:

"The sorry state of society in the civilized world today, is in large measure due to the simple fact that social change has not kept up with technological change," which is "carrying us with it in an unknown direction leaving our old form of society behind. . . ."

Mr. Turnbull sounds the alarm to an accelerating trend we are beginning to recognize in our society.

However, I do not believe we are as far down the path as Mr. Turnbull fears. We can create and redesign institutions to encourage renewed personal concern among our families and among the bigger family of our society. We can also reaffirm our commitment to the family on an individual level.

The family is the basic moral and economic element of society. It is vital to human development. It is imperative, therefore, that we recognize its importance and accept the responsibility for taking whatever steps are necessary to preserve the family as our most fundamental social institution.

CHANGING THE RULES FOR ERA

Mr. HATCH. Mr. President, ever since the proposal to extend the period for ratification of the Equal Rights Amendment became known, my office has been deluged with letters from across the Nation urging my opposition to such a resolution. This mail, disproportionately from women, expresses strong sentiment, and I think indicates citizens' concern not only for the implications of ERA, but more so for the entire process by which our Constitution can be amended. I believe this Congress would be grossly in violation of basic constitutional principles and procedures if we pass this extension for ERA; we should not legislate last minute rule changes to accommodate a minority viewpoint.

In the November 14 issue of Newsweek, columnist George Will has an excellent commentary on this constitutional issue. I commend it to my colleagues' attention. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the commentary was ordered to be printed in the RECORD, as follows:

STACKING THE DECK ON ERA

(By George F. Will)

It is, perhaps, fitting that advocates of the Equal Rights Amendment want to rig the ratification process. The amendment itself radiates impatience with essential constitutional values, such as respect for the political process and representative institutions.

On March 22, 1972, Congress sent ERA to the states to be ratified or rejected by March 22, 1979. Many states ratified with unseemly speed. But opposition soon crystallized, and the campaign for ERA slowed, then stalled. Thirty-five states have voted for it, three short of the required three-fourths; and three of the 35 have voted to rescind ratification; and there may be more states inclined to rescind than to ratify. Faced with failure, ERA supporters want to change the rules in the ninth inning. They want Congress to allow another seven years for ratification, and they want votes to rescind ratification declared void. This attempt to stack the deck is evidence that ERA lacks the kind of support the Constitution requires for amendments.

The Constitution places a substantial burden on those who would alter it, for the same reason it requires large majorities for treaty ratifications and impeachments: some important decisions should not rest on slender majorities. The essence of this nation's constitutional morality is that amendments should be proposed sparingly, and should succeed only if a predetermined period of deliberation produces a consensus that is (in the Supreme Court's words) "sufficiently contemporaneous" to reflect the will of three-fourths of the states "at relatively the same period." The Court has said Congress is responsible for seeing that the states vote an amendment up or down "within some reasonable time after the proposal." A reasonable span is long enough for ample debate but short enough that the states' decisions will be "contemporaneous."

FOURTEEN YEARS?

The first ten amendments were ratified in 27 months. The average time for subsequent amendments has been nineteen months. No ratification has taken even four years. The most recent amendment, lowering the voting age, took less than four months. Yet ERA advocates demand at least fourteen years.

When the Senate passed ERA its report said a seven-year limit (part of every amendment in the preceding 50 years) "assures that

a ratification reflects the contemporaneous views of the people." It is not clear that Congress can now change the limit. Neither the text nor the history of Article V of the Constitution clarifies the proper extent of Congress's powers in the amending process. ERA advocates say Congress can suddenly revise the ratification rules under which states thought they were operating. But it is more plausible that Article V establishes a process wherein Congress is divested of all power over an amendment once it is submitted to the states. Surely Article V should be construed in the way that makes a "contemporaneous" set of state decisions necessary for amendments. So even it, in the silence of Article V, Congress can assert the unprecedented power to fiddle with ERA's deadline, it would be wrong to do so.

If (and it is a big "if") the 95th Congress need not respect the traditional seven-year limit that the 92nd Congress affirmed, surely one session of a state's legislature should not bind all subsequent sessions from reflecting about and reconsidering ERA *as time allows*, as long as the question is before the nation. ERA supporters dislike this idea because the longer ERA has been debated, the weaker support for it has become.

RUSH TO RATIFICATION

Many ratification votes were perfunctory, even irresponsible. ERA floated through the U.S. House (354–24) and Senate (84–8) with majorities of the sort that do not normally occur when complexities are considered. Most of the 22 states that rushed to ratify it in 1972 did so without any hearings. Hawaii passed it the day it left Congress. Nebraska, scrambling to be second, passed it the day after Hawaii, but did it wrong and had to pass it again six days later. Within three months twenty states had passed it, cavalierly (in several senses of that word). Idaho, Nebraska and Tennessee have rescinded ratification.

ERA advocates say all ratifications, however stale or slapdash, are irrevocable. They say any legislature should be able to reconsider rejection of ERA for *thirteen straight years* (Illinois and Florida have defeated ERA repeatedly), but no legislature should *ever* be able to reconsider ratification. Under that rule, a few late-ratifying legislatures could ram into the Constitution an amendment which, by then, at least three-fourths of the states might *disapprove*. That rule mocks the idea of "contemporaneous" consensus, which can *only* be guaranteed by permitting states to rescind. Dragging out ratification over fourteen years, and dragging states into a "consensus" by disregarding their desire to rescind, produces a sham consensus.

Some, perhaps most, ERA supporters regard it as primarily a "symbol" of a vague national "commitment." Without dwelling on the inadvisability of cluttering the Constitution with symbols, it is important to note that ERA is a symbol of the proverty of "progressivism."

ERA says: "Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex."

COURTS VS. INSTITUTIONS

What would it do? That would depend on the judges construing it. Would women be subject to military conscription? Could they be restricted from combat? Could there be different treatment of the sexes to protect women with regard to alimony and other divorce matters? Could the sexes be treated differently in insurance and pension plans because of actuarial evidence about sex-related differences regarding health problems and life expectancy? No one can answer these or hundreds of similar questions in advance of the flood of litigation ERA is designed to trigger. ERA means either that *no* legal distinctions based in sex are constitutional, or that such distinctions must be justified by important reasons. If ERA means the former, it is absurd. (Women *must* be conscripted *equally?* They cannot have lower insurance premiums because of longer life expectancy?) Obviously it means the latter, and would confer upon the judiciary power to write a detailed code governing treatment of the sexes, removing from representative institutions the making of important judgments about society's values.

ERA is part of a pattern. Today "progressives" rely on litigation rather than legislation. They pursue goals (forced busing, abolition of capital punishment, abolition of restrictions on abortion and pornography, expanded rights for defendants in criminal trials) in courts, not in the political process. The attempt to rig the ratification of ERA, like ERA itself, is characteristic of a political movement that is anemic and impatient and reckless, too weak to win in representative institutions and unwilling to accept defeat.

BRAD MORSE'S EXCEPTIONAL RECORD AS UNDP ADMINISTRATOR

Mr. HUMPHREY. Mr. President, when former U.S. Congressman Bradford Morse assumed his duties as Administrator of the United Nations development program, he inherited an important development agency which was experiencing serious financial difficulties. This was just 2 years ago.

Yet, in 2 years' time, under Brad's aggressive management style, UNDP has made a dramatic recovery.

As reporter Pranay Gupte noted in the November 6 New York Times:

Last year alone he (Morse) raised more than $26 million to help end the program's deficit, and this week he scored yet another achievement—at an annual pledging conference here the agency was able to raise $570 million in voluntary contributions for next year's budget, a record.

Not only has Brad been particularly effective at raising additional contributions to UNDP, he has implemented management practices which have been impressively successful in cutting back the waste and inefficiency of the agency.

As the article pointed out:

. . . He hired a consulting concern to suggest improvements in administration and reductions in costs. This year administrative expenses were lowered by more than 6 percent while personnel cutbacks amounted to 13 percent. Staff travel was severely restricted, Mr. Morse said, and first-class travel eliminated.

Since I view UNDP as an important development agency and one which deserves the strongest support from the United States, I want to take this opportunity to commend Brad Morse for the impressive job he has done over the past 2 years.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 6, 1977]

EX-CONGRESSMAN BRINGS U.N. AGENCY FISCAL HEALTH

(By Pranay Gupte)

UNITED NATIONS, N.Y., November 5.—After years of severe financial problems incurred largely through overcommitments to the third world, the United Nations Development Program has made a dramatic fiscal recovery through management reforms and an aggressive fundraising campaign.

The key figure in the recovery, according to diplomats and other officials here, has been Bradford F. Morse, a former Republican Representative from Massachusetts, who is the administrator of the agency. Last year alone he raised more than $26 million to help end the program's deficit, and this week he scored yet another achievement—at an annual pledging conference here the agency was able to raise $570 million in voluntary contributions for next year's budget, a record.

BUDGET IS ENTIRELY VOLUNTARY

Almost all the major contributors increased their allocations, with the sharpest increase from the United States, which will give $15 million more, or a total of $115 million for 1978.

The budget is wholly voluntary, so according to officials here, the increase in pledges reflects renewed confidence that major contributors seem to hold for the program.

In addition, diplomats here noted that the American increase came at a time when President Carter announced the controversial withdrawal of the United States from the International Labor Organization. As a result the I.L.O. will be losing $20 million, or 25 percent of its annual budget, next year.

Diplomats speculated that the American increase would be one way of offsetting the withdrawal of funds from the I.L.O. perhaps modifying critics at the United Nations who have condemned President Carter's decision to leave the oldest specialized agency connected with the United Nations.

The development program is the single largest international agency to help developing countries not only devise ways for a better economic and social life but also assist them in increasing their output of raw materials and manufactured items. Other officials familiar with the operations of the program also report that it has been plagued by administrative woes and waste. The Food and Agriculture Organization of the United Nations gave a $10 million loan to help it tide over its immediate problems.

Mr. Morse said that his initial task when he took over in January 1976 was to restore the agency's fiscal health. He traveled widely and helped persuade governments to increase contributions, which resulted in raising the more than $26 million last year. The most persuasive argument, Mr. Morse said, was that the program's credibility was at stake.

At the same time he hired a consulting concern to suggest improvements in administration and reductions in costs. This year administrative expenses were lowered by more than 6 percent while personnel cutbacks amounted to 13 percent. Staff travel was severely restricted, Mr. Morse said, and first-class travel eliminated.

The agency, which was formed 12 years ago through a merger of the United Nations expanded program of technical assistance and the United Nations Special Fund, works with more than 140 nations and about 25 international agencies. It supports 8,000 projects in agriculture, industry, education, power production, communications, health, housing and, promotion of women's participation in development.

The agency, which has its headquarters here, makes 80 percent of its assistance available to countries with a per-capita income of less than $600. This has helped to develop new strains of fast-growing, high-protein wheat, corn and rice in 125 nations; a social-security system and a pension plan for a million workers in Pakistan and job-training programs for more than two million men and women in Colombia.

RATESETTING BY STATE UTILITY AGENCIES

Mr. LEAHY. Mr. President, as my distinguished colleague from Louisiana knows, I am greatly concerned about a section of the public utilities portion of H.R. 8444, which deals with ratesetting by State utility agencies. This section, section 515, states that—

> The rates of any electric utility which is a state agency shall be, consistent with section 511(a), based on the total costs of all electric energy generated by all facilities of the entire system of such utility, and all electric energy purchased by such utility which is sold by such utility.

This section defines "State utility agency" as "an agency of a State (not including any political subdivision or agency thereof) which is an electric utility." The reason for my concern stems from the fact that my State buys a substantial amount of hydroelectric power from the Power Authority of the State of New York (PASNY) which is a State utility agency as defined under this section. Section 515 would force PASNY to substantially alter the manner in which the authority sets its rates.

Electricity produced by PASNY is generated from a number of sources. Hydroelectric power represents just one of these sources, and it is the cheapest and most environmentally acceptable source. Currently, PASNY's customers pay for the electricity they buy only according to the cost of the source which generates that electricity. Thus a customer who buys electricity generated by hydroelectric power, which is relatively inexpensive to produce, pays low rates. Another customer who buys electricity generated with oil, which is more expensive to produce, will pay higher rates. Under section 515, PASNY would be required to charge all of its customers one uniform "postage stamp" rate, regardless of what kind of power they actually buy, and regardless of how much that power cost to produce. Thus a customer who bought only electricity that was generated with inexpensive hydroelectric power would be forced to pay for the cost of producing more expensive oil- or nuclear-based electricity in another part of the PASNY system. Is this my distinguished colleague's understanding of this provision?

Mr. JOHNSTON. Yes it is.

Mr. LEAHY. This provision could cost the State of Vermont as much as $10 million in increased power costs, and would obviously have a severe impact on the State's economy. I have already corresponded with my distinguished colleague from Louisiana who chairs the Senate subcommittee that is meeting with the House to address these and other utility rate reform issues. I ask unanimous consent that this exchange of correspondence be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., September 20, 1977.

Hon. J. BENNETT JOHNSTON,
Chairman, Subcommittee on Conservation and Regulation of the Committee on Energy and Natural Resources, Russell Building, Washington, D.C.

DEAR BENNETT: As you know, language has been included in H.R. 8444, the National Energy Act, which would substantially alter the manner in which the Power Authority of the State of New York (PASNY) sets its rates.

Section 515 of the Act provides that the rates of any electric utility which is a state agency be based upon the "average system costs" of electric power generated or purchased for resale by that utility. This provision could cost the State of Vermont, which purchases a substantial amount of hydroelectric power from PASNY, as much as $10 million in increased electric power costs.

I would like to voice my strong opposition to including any such language in the Senate version of the bill, and in any final version of the bill reported by a committee of conference. I would be eager to be of assistance in any way that I can in this effort, and hope that you will not hesitate to call upon me.

Sincerely,

PATRICK J. LEAHY,
U.S. Senator.

COMMITTEE ON
ENERGY AND NATURAL RESOURCES,
Washington, D.C., October 18, 1977.

Hon. PATRICK J. LEAHY,
U.S. Senator,
Washington, D.C.

DEAR PAT: Thank you for your letter of September 20, 1977 concerning section 515 of H.R. 8444, the House version of the National Energy Act. The Subcommittee on Energy Conservation and Regulation heard testimony which was quite critical of this provision during our hearings on public utility rate reform.

Accordingly, S. 2114 as reported by the Committee on Energy and Natural Resources did not contain any provisions similar to section 515. Moreover, no provision of this nature was added on the Senate floor, and if one had been offered the Committee position would have been one of strong opposition.

In view of this I can say with certainty for myself, and with some degree of confidence with respect to the members of the Subcommittee that we will not look with favor on section 515 during the upcoming House-Senate conference on the public utilities portion of the National Energy Act (H.R. 4018).

Thank you for your views on this matter.

Sincerely,

J. BENNETT JOHNSTON,
Chairman, Subcommittee on Energy Conservation and Regulation.

Mr. LEAHY. At this time I again urge my colleague to oppose the inclusion of section 515 in the final version of the bill reported by the conference committee, and offer my assistance in this effort.

Mr. JOHNSTON. I thank my distinguished colleague from Vermont. I assure him that my position with regard to section 515, as stated in my October 18 letter to him, remains unchanged. The bill originally reported by my subcommittee contained no provision similar to section 515. No such provision was added to the bill on the Senate floor. Thus, I think I can say with confidence that the members of the subcommittee will not look with favor on section 515 during the House-Senate conference that will deal with this issue.

Mr. LEAHY. I thank the Senator from Louisiana.

THE FEDERAL GOVERNMENT AND CIVIL RIGHTS

Mr. HUMPHREY. Mr. President, Mr. Drew S. Days III, Assistant Attorney General in the Civil Rights Division of the Department of Justice, recently gave a speech in Chicago before the NAACP Legal Defense and Educational Fund, Inc. In his speech, Mr. Days raised a critical question regarding the activities of the Federal Government to insure civil rights for all.

He pointed out that the Federal Government has frequently assumed the role of defendant in civil rights cases, seeking exemptions from the same anti-discrimination standards it enforces in the State and private sectors. I agree with his view that the Federal Government should, rather, serve as model and leader in advancing the course of civil rights. Public skepticism is justified about the Federal Government's sincerity when it exempts itself from goals it establishes. History has shown that merely passing laws to guarantee equal protection is not enough; affirmative actions are needed to achieve real equal opportunity. Certainly the Federal Government has not demonstrated an absence of need for affirmative actions.

Mr. President, I ask unanimous consent that Mr. Days' speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

WHY NOT THE FAIREST?
(By Drew S. Day III)

The Legal Defense Fund and the Department of Justice seem to share a number of defendants in litigation designed to vindicate civil rghts in America. In fact, when I was appointed by President Carter, I had to disqualify myself in over forty cases in which the Civil Rights Division and LDF were representing the interests of black plaintiffs. But there is one defendant we do not have in common: The federal government. It is about this violator of civil rights that I would like to talk tonight. Posed simply, the question I want to raise is this: "Is the federal government holding itself to the same civil rights standards it enforces in the private and public sectors?"

The federal government is one of the largest employers in the nation; federally-assisted programs receive billions of dollars each year; and countless federal laws and regulations affect every citizen's life. Therefore, it has the highest responsibility to ensure that equal opportunity laws applicable to federal employees and funding programs are enforced in an effective manner.

There was a time when the federal government was looked to as a leader in implementing equal opportunity guarantees. Then with passage of the new civil rights laws in the 1960's, the focus of our efforts was naturally directed outward to the systemic

problems of state and private discrimination. The irony is that while the federal government was placing tremendous pressure on the non-federal sector to comply with federal civil rights requirements, efforts and resources directed toward resolving similar problems "at home" may have been inadequate.

I want to focus on three problem areas in the federal sector which the Carter Administration considers to be primary targets for improvement and the efforts already being made to correct them. They are:

(1) failure to eliminate discrimination against federal employees

(2) failure to ensure that federal funds are not used in discriminatory manner

(3) failure to revise federal laws and regulations which have proven to be sexually-biased.

In 1972 Congress extended the protections of Title VII of the 1964 Civil Rights Act to federal job applicants and employees in the executive agencies, military departments, and in competitive job positions in the legislative and judicial branches. Section 717 of the 1972 Equal Employment Opportunity Amendments provides that "All personnel actions affecting such persons" must be free from any discrimination based on race, color, religion, sex or national origin.

If the Civil Rights Division were to review federal employee statistics as we do in the average Title VII investigation of state and local government employers, suspicions of systemic racial and sex discrimination would be immediately aroused. For instance, there is a total federal work-force of 1.4 million general schedule (GS) ("white collar") employees in the executive agencies. 43 percent are female, 13 percent black and 2.6 percent hispanic. However, when one looks at the grade levels of these groups, the distribution of women and minorities differs considerably from their representation in the total work-force. Whereas only 51 percent of all white collar federal employees are in grades 1–8, 81 percent of the women, 76 percent of the blacks and 66 percent of the spanish-surnamed employees are concentrated in those grades. Comparing these statistics to the upper GS-Grade range, (GS 13–15), we find only 1.8 percent of the women, 4 percent of the blacks and 6 percent of the hispanics in those grades, whereas 14 percent of the total work-force hold GS 13–15 positions.

Between 1972, when Title VII became applicable to the federal government, and 1976, the government was rightfully accused of "working both sides of the street" with respect to Title VII legal standards. While pursuing a vigorous enforcement policy as plaintiff, as defendant we set up a series of inconsistent defense in Title VII suits filed by federal employees against executive agencies. For instance, as defendants, we argued that federal employees were not entitled to a trial de novo in federal court; that all members of a class must have exhausted their administrative remedies prior to filing suit, that federal employees had a greater burden of proof to justify back pay awards; and that retaliation against a federal employee for filing a charge of discrimination was not unlawful under Title VII. This last defense was based on a technical construction of the statute rather than its spirit, and was ultimately struck down by the courts.

On August 31, 1977, Attorney General Bell issued a memorandum for all U.S. Attorneys and agency general counsels putting them on notice that in the future the Department of Justice will take the same position in interpreting Title VII in defense of federal employee cases as it has taken or will take in private or state and local employee cases. Judge Bill stated, ". . . [A]s a matter of policy, the federal government should be willing to assume for its own agencies no lesser obligations with respect to equal employment opportunities than those it seeks to impose upon others." In conjunction with this new policy, the U.S. Attorneys' practice manual on Title VII is undergoing a thorough revision. Thus, a review of the merits of each case rather than an automatic raising of technical defenses will be the focus of our litigation efforts.

Turning to the administrative complaint and adjudication process, we find some more rather disturbing statistics.

The Civil Service Commission reports that in 1976 over 7,000 formal complaints of discrimination were made by federal employees, about half on racial grounds and another 22 percent on sexual grounds. The complaint alleged denial of promotion on the basis of discrimination. Nearly 4,000 investigations and over 1,000 hearings were conducted by the Civil Service Commission in 1976 resulting in approximately 300 findings of discrimination.

Civil Service Commissioner Campbell has been taking an active role in a review of the EEO complaint process, federal affirmative action programs and other civil service procedures by the "Federal Personnel Management Project." He is also examining the impact of the Veteran's preference system on female employment in the civil service. A major issue on the reorganization agenda is finding a structure that will accommodate the two often conflicting interests of the CSC—as employer and as protector of the employees' rights.

Within the Justice Department, we are doing what we can to ensure that no women or minorities are denied equal employment opportunity. The statistical pattern we found in January was less than impressive. As of December 1976, females constituted only 11.5 percent of all Department attorneys. At policy making levels, there were only three women out of a total of 417. Minority attorneys were only 4.0 percent of the entire Department staff; five minorities were in policy-making positions. In May of this year, the Department created an Employment Review Committee charged first with reviewing the files of minority and female attorneys in grade beyond the requisite time who had not been promoted to determine whether discrimination was responsible for the lack of promotion. Secondly, it is authorized to review for a two-year period all proposed employment of attorneys and all promotions of attorneys to GS–13 or above (GS–11 is the normal entry level for attorneys). Contrary to reports published shortly after its creation, the Committee was not established to prevent white male attorneys from being hired or promoted for two years. But it is a serious effort, chaired by Assistant Attorney General Barbara Babcock, head of the Civil Division, and myself to ensure that everyone in the Department gives more than lip-service to affirmative action. I am certain that we will be able to point with pride to a markedly improved pattern by January, 1978.

Title VI is the major statute requiring federal agencies to prevent and eliminate discrimination in federally-assisted programs. Title VI is limited to prohibition of racial and ethnic discrimination, but other special statutes of similar nature cover sex discrimination, e.g., the Revenue Sharing Act and the 1968 Crime Control Act, which authorizes funding by LEAA to law enforcement agencies.

A major problem in the Title VI area has been the historic lack of coordination of federal compliance efforts. Although the Attorney General was assigned a coordination role by executive order, until recently he had minimal "clout" to effect consistent policies.

Throughout the agencies, Title VI responsibilities often were relegated to an undermanned and poorly funded staff which was given ineffective or no training, thereby resulting in ineffective compliance reviews of recipients of federal funds.

A recent survey of agencies with Title VI responsibilities indicates that although they dispense over 80 billion dollars in federal assistance, and spend $40,000,000 to enforce Title VI, only 92 fund termination proceedings have been conducted in the past five years; eighty-six of those proceedings were brought by HEW against local school districts.

Nor have agencies made effective use of their authority to refer matters to the Department of Justice for litigation when voluntary compliance efforts have failed. Another problem has been that for those referrals we did receive, it was frequently necessary to re-investigate because field compliance investigators were inadequately trained in fact-finding and the law.

Evaluating the federal government's Title VI responsibilities from another angle, private plaintiffs have sued federal agencies on numerous occasions, charging inadequate enforcement of Title VI or actual complicity in discriminatory practices. One of the landmark cases of this nature was the Gautreaux case in which HUD was found to have violated Title VI and the Constitution by knowingly sanctioning and assisting the Chicago Housing Authority's racially discriminatory site and tenant selection practices with respect to the Public Housing Program. Another is LDF's Adams litigation alleging failures by HEW to enforce Title VI in the school desegregation area.

In the past year, a number of significant policy changes have been implemented which should greatly improve the federal government's enforcement of Title VI and related statutory provisions.

With respect to Justice's coordination role, President Carter issued a memorandum on July 20, 1977 to the heads of all executive departments and agencies firmly committing this Administration to Title VI enforcement. The memorandum directs agency heads to exert firm leadership in this regard and to insist that their staffs cooperate fully with Department of Justice staff in developing strong and consistent enforcement procedures. The President stated there:

"Title VI of the Civil Rights Act of 1964 writes into law a concept which is basic to our country—that the government of all the people should not discriminate on the grounds of race, color or national origin. There are no exceptions to this rule; no matter how important a program, no matter how urgent the goals, they do not excuse violating any of our laws—including the laws against discrimination."

In late 1976, the Department of Justice issued detailed regulations to provide guidance to agencies enforcing Title VI. We also publish a quarterly Title VI newsletter which provides agencies with up-to-date information on policy changes and significant events.

Last month (September 26–29, 1977), the Civil Rights Division held a Title VI Conference in Washington which offered workshops on various facets of the enforcement process. New Title VI practice manuals were distributed to the participants for the purpose of improving the consistency of enforcement procedures among the numerous Title VI agency or offices.

The Civil Rights Division also is in the process of surveying each Title VI agency to evaluate its compliance efforts. Our findings are then published and we work with the individual agency to eradicate any deficiencies.

Various amendments enacted by Congress to "Title VI-like" legislation are also providing us with increased enforcement powers. For example, in suits brought by the United States for discriminatory use of LEAA funds, termination of funds will occur automati-

cally within 45 days of filing unless otherwise directed by the court. In addition, Title VI litigation brought by the Justice Department under the revenue-sharing statutes should be strengthened as a result of a new agreement with the FBI to investigate alleged violations.

In the manner in which HUD handled the Gautreaux case is symbolic of old federal government ways, the Resident Advisory Board case in Philadelphia represents, in my estimation, a new sensitivity to our civil rights responsibilities. In November, 1976, a trial court found Philadelphia and HUD officials guilty of Fair Housing Act violations. In early January, HUD officials urged Justice to appeal that ruling. After consulting in February with newly-confirmed Secretary Harris, HUD withdrew its request. Instead, HUD subsequently filed a friend-of-the-court brief in the case on behalf of black plaintiffs urging an affirmance. The court of appeals recently affirmed.

A final problem area with respect to the federal government's law enforcement responsibilities concerns the existence of miscellaneous archaic and stereotyped statutes and regulations which result in unequal treatment or benefits on the basis of sex. Some of the major U.S. Code titles in need of reform deal with the military, taxation and social security benefits.

The previous Administration recognized these problems and directed the Justice Department (in 1976) to devise a comprehensive plan to identify and revise discriminatory provisions. A central purpose behind this effort was to speed up the remedial process in advance of final ratification of the ERA. A Sex Discrimination Task Force was created in the Civil Rights Division a year ago to begin the review process. It was funded, however, only in April of this year at the request of the Carter Administration. The Force has a Director and a start-up staff that will shortly reach about 24. We anticipate that its work will not be completed until 1980.

In expressing his support for the work of the Task Force, President Carter stated:

"Federal law should be a model of nondiscrimination for every state and for the rest of the world. The federal government which is actively involved in eliminating sex discrimination in many areas, should not be upholding it in others."

In addition to proposing revisions of statutes containing sex-stereotyped terminology and presumptions, the Task Force is concentrating on several areas where major reform are needed —such as social security as noted above. As recommendations are completed, they will be submitted to the Congress for consideration.

The federal government has a long way to go before it gets out of the business of being a defendant in civil rights cases. But I think the changes I have just described in the areas of employment, federal funding and sex discrimination are strong evidence that this Administration is firmly committed to re-establishing the federal government as the leader in civil rights compliance. We are committed because it is right and because it is absolutely necessary if we are to enjoy any further success in our efforts to end discrimination elsewhere in our nation.

We do not think it unreasonable at all to ask of the federal government, to borrow a favorite locution of President Carter: "Why Not The Fairest?"

SOCIAL SECURITY

Mr. BAYH. Mr. President, one of the most difficult decisions that elected officials must face is the question of increasing the taxes their constituents must pay. In this time of economic uncertainty, we are all painfully aware of the potential impact of assessing more tax dollars that otherwise might have gone to buy the essentials of life—food, clothing, housing, and schooling. At the same time, as responsible legislators, we must address the crippling financial crisis facing the social security system and those retired citizens who depend upon its benefits. It is for this reason that I voted for the Social Security Financing Amendments of 1977.

Under the present law, social security is facing severe financial crises, both in terms of short term funding and long range financing. The social security trust funds do not have current income sufficient to meet the obligations made to beneficiaries. Indeed, the trust funds, if present law were to be maintained, would run a deficit of $5.5 billion a year for 1977 and 1978.

Extensive deliberations by the Senate Finance Committee established that this financial crisis has been brought upon us by three conditions: First, a continuing high unemployment rate; second, a period of soaring inflation; and third, a mechanical problem of overindexing social security benefits for future beneficiaries.

In addressing this fiscal crisis, the Senate Finance Committee sought to accomplish several goals. These goals include protecting the social security system from any threats of bankruptcy, keeping future benefit levels on a par with today's benefits, and renewing the American public confidence in the social security system itself. In trying to reach these goals, the Finance Committee examined three basic methods to reduce short range and long term deficits in the social security system: First, increasing revenues by adjusting the social security payroll tax and the wage base upon which these taxes are assessed; second, reducing social security benefits for future retirees; third, infusing general revenue funds into the social security program.

After examining the pros and cons of these various approaches, the Finance Committee recommended the first of these three policy options as the appropriate fiscal solution for this point in time. The committee rejected the second approach as untenable and the third as impractical. The committee's recommendations, later approved by the full Senate by a vote of 42 to 25, consisted of four basic changes in the current law. First, the amount of earnings subject to employer tax would be gradually increased. Under current law, the employers' share of the social security payroll is collected on the first $16,500. This amount would be raised to $50,000 in 1979 and then increased to $75,000 in 1987. The base will remain at $75,000 until the employee tax base reaches $75,000 at which time the two bases would be equal and would rise together in relation to increases in the average wage.

Second, the amount of earnings subject to employee or self-employment would be increased. Under this provision, there will be a total of $2,400 in employee wage base increases over and above the present law. Four separate $600 increases are scheduled for 1979, 1981, 1983, and 1985. Third, these changes include an increase in the payroll tax rate to 9.20 percent in the year 2011. This is a 1.75 percent increase over existing law.

Lastly, the social security tax rate for self-employment would be increased to 1½ times the rate for employees effective 1981. When earnings from self-employment were made subject to social security tax in 1950, the rate was set at 1½ times the employee rate. This formula was maintained until 1973 at which time the rate for the self-employed was frozen at 7 percent. The action of the Senate would return this rate to its original formula.

While I cast my vote in favor of the committee's proposals, I did so with reservations. Personally, I would have preferred that the committee and the Senate as a whole give more serious consideration to the original Carter administration proposal to ease the fiscal crisis through the partial use of general revenue funds, particularly during times of high unemployment. I would prefer the use of general revenue funds to a straight increase in payroll taxes because I have grave reservations about the impact of these tax increases on both unemployment and the rate of inflation. Most importantly, I am concerned that the burden of these increases in tax may fall on the shoulders of our Nation's workers and small businessmen who can least afford it. My concern is only slightly mitigated by assurances from the Finance Committee that the tax increases have been designed to impact most heavily on those in the higher income bracket.

Despite my deep reservations, I voted for the committee bill. I did so because I want to be able to assure all Americans of a sound and secure social security system. Under the provisions of the legislation as approved by the Senate, the short term deficits facing the social security trust funds will be eliminated. The legislation will place social security cash benefits programs in actuarial balance for the next 75 years based upon current economic and demographic assumptions. No present beneficiary will suffer a reduction of benefits; nor will a future retiree be denied equitable benefits. This is the minimum we can guarantee our citizens.

CAREER EDUCATION CONFERENCE REPORT

Mr. HATHAWAY. Mr. President, I am pleased today to file in behalf of the Senate conferees the conference report on the Career Education Incentive Act. My good friend and distinguished colleague, the chairman of the House Committee on Education and Labor (Mr. PERKINS) is similarly filing an identical version of this report in the House today.

It is my understanding that the Senate will be prepared to approve this conference report at its session next Tuesday, November 22, and that the House will act shortly thereafter, thus clearing the measure for the President's signature during this calendar year.

My colleagues who unanimously approved the Senate version on this measure on October 20 will be pleased to know that virtually all of the features of that bill have been retained through the conference by the conference committee and that the bill which has emerged will thereby lead to fruitful implementation of career education throughout our Nation's schools.

The conferees agreed to the higher funding levels in the Senate bill, to the higher minimum allotment for small States, to the greater emphasis to be placed on elimination of stereotyping on the basis of race, sex, or handicap, and to a specifically funded evaluation of component, to name a few of the differences. Also included is authority for model grants to exemplary career education projects and for dissemination of career education information.

Most important in my view was the retention of the Senate provisions dealing with postsecondary career education demonstration projects. The retention intact of this $15 million annual authorization for discretionary grants to demonstrate the most promising career education programs at this level of education is of critical importance if our students are to receive the skills and information they need to make intelligent and productive career choices.

I appreciate the cooperation of all of the conferees in producing the best possible bill. I am particularly grateful to the distinguished chairman of the Subcommittee on Education, Arts, and Humanities (Mr. PELL) for his steadfast support of career education and for his constant assistance throughout the legislative process.

THE FUTURE OF UNITED STATES-CUBA RELATIONS

Mr. CHURCH. Mr. President, as a member of the Committee on Foreign Relations, I visited Cuba last August. I have recently filed my report on that visit. For the information of the Senate, and other readers of the RECORD, I ask unanimous consent that an excerpt from the report be printed in the RECORD.

I also ask unanimous consent, Mr. President, that several editorials commenting upon the future of United States-Cuban relations be printed in the RECORD. These editorials come from the Idaho Statesman in Boise, Idaho; the Washington Post, the Boston Globe, and the Boston Evening Globe.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DELUSIONS AND REALITY—THE FUTURE OF UNITED STATES-CUBA RELATIONS

I. INTRODUCTION

Today, 90 miles off the coast of Florida lies a land of mystery to most Americans, led by a charismatic politician who is a major figure on the world scene. American citizens regularly obtain more information about developments in China, halfway around the globe, than about events on this island where nearly 10 million people live closer to our shores than Puerto Rico.

Until recently, from the break in relations with Cuba in January 1961, our policy toward Fidel Castro has been to treat his government as a political pariah, unfit for membership in the community of nations. As a consequence, American eyes and ears have been closed to Cuba. However, today the blinders are being lifted and the earplugs removed. Our citizens may now travel to Cuba. The flow to us of first-hand information is increasing.

As a member of the Senate Committee on Foreign Relations, charged with the responsibility for weighing matters governing the course of United States-Cuba relations, I have long felt a need to see Cuba's society and to talk to its leaders on a personal basis. An invitation from Fidel Castro, extended through Cuba's mission to the United Nations, coupled with a congressional recess, enabled me to do so from August 8 to 11, 1977.

No visit of 4 days to any country qualifies a visitor as an expert. But there is much wisdom in the old saying that to see something once is better than to hear about it a hundred times. This report is neither a travelog on Cuba nor a definitive study of the issues of concern to our two nations. Rather, it is a summary of what I saw and heard that I consider pertinent in pondering the future course of U.S. policy.

In my opinion, the cordial reception extended to my party was intended as a clear signal of President Castro's desire for a new era in United States-Cuba relations. Several factors bear this out. The Air Force plane, on which we flew to Havana, was the first U.S. military aircraft to land at a Cuban airport since 1960, I was told. ("Flown in legally, that is," President Castro later remarked.) While there, I was permitted an unprecedented 32 hours with Castro, much of that time while he acted as a highly knowledgeable tour guide, journeying by jeep, car, boat, and helicopter, through the Cuban countryside and adjacent waters. These signs, coupled with Castro's granting of my request to allow island-bound American citizens married to Cubans to return to the United States, together with their families, are all suggestive of his desire to commence removing the barriers that have separated our two countries for the last 17 years.

While in Cuba, I had the opportunity to travel widely through the Havana area and the western end of the island, visiting farms, ranches, schools, and many other facilities, along with the Bay of Pigs, and President Castro's island retreat. On the basis of my observations, the conclusion is inescapable that the Castro revolution is no longer an experiment; it is an established fact. Any new U.S. policy must be based on that reality.

Following the Bay of Pigs fiasco, American policy was built on the delusion that by economic and political pressures, the United States could isolate Cuba and thus bring Castro to his knees. From diplomatic armtwisting to assassination plots, from the imposition of trade embargoes to covert operations designed to sabotage and subvert his regime, American policy sought to stamp out his Marxist society so close to our shores. The policy, however, has failed monumentally. Instead of isolating Cuba from the world at large, we have managed only to isolate ourselves from Cuba.

II. SOME REALITIES IN CUBA TODAY

Cuba, to begin with, remains a regimented state. Cuban jails harbor political prisoners, and Cuban politics are dominated by one man, one party, and one ideology. No organized opposition exists. All public information is controlled by the Government. Cuban newspapers resemble Pravda or Izvestia and are just as dull. Restricted to the dogmatic repetition of the party line, they lack interest, humor or wit. Freedom, as we know and enjoy it in the United States, is conspicuously absent. Furthermore, one wonders whether a totalitarian society, in which the highest political virtue is solidarity, can ever evolve into a free society in which solidarity gives way to individual liberty.

Nevertheless, the evidence of strong popular support for Fidel Castro and his revolutionary goals is too abundant to be denied. We Americans know what ails Cuba, but we have precious little knowledge or understanding of what makes it work.

The perspective with which one views Cuba's society depends on how the water glass is measured, as half full or half empty. Judged by American levels, the average Cuban's glass is half empty. But, to a Cuban, compared with the remembered privation of the past, the glass seems half full and filling rapidly. As one old man put it simply: "You should have seen what it was like before the revolution."

For example, there is no evidence on the streets of beggars, drunkenness, drug addiction, or the prostitution for which Havana was once infamous. In contrast with other Communist nations I have visited, few policemen or soldiers are to be seen. Although there are exhortative slogans on billboards here and there, no posters of Castro appear in public places. Constructive activity abounds in Havana and throughout the countryside, much of it new housing for the expanding population, which has increased from 6 million to 9.6 million since Castro came to power. Housing appears to be adequate and inexpensive. An apartment costs a worker 10 percent of his or her salary regardless of family size. One hundred thousand new housing units are being built this year, we were told.

Self-contained satellite towns are being developed around major cities. We visited the Alamar complex outside of Havana where workers at nearby industrial sites also work part time in constructing new, functional apartment buildings. Nowhere in our travels did we see the huge and hideous slums so often in evidence elsewhere in the developing world, particularly in the major cities of Latin America. Indeed, the contrast between the average dwelling in Cuba and the hovels endured by millions in other Latin nations was striking and, I suspect, instructive as to why Castro enjoys such evident popular approval.

Education and health are now given priority in Cuban development planning. "Five years ago, the military received the highest priority," one Cuban said, "now it is education and health." We were told by education officials that at the time of the revolution, nearly half the adult population was illiterate; now illiteracy is less than 4 percent, consisting essentially of those too old to learn. Schooling is compulsory to age 12, but young people are encouraged to continue in school until they are 17. Adult education is stressed with the objective that, regardless of age, Cubans might always be involved in some type of study program. Physical work is combined with study at the secondary levels. All education, including higher education, is free.

The countryside is dotted with boarding schools, all built alike to save construction costs, where, during weekdays, students combine study with farming, returning to their homes on weekends. These work-study schools are a key element in Cuba's plan to put idle rural land to productive use. We visited, for example, the Empressa Picuara Genetica de Matanzas, started from scratch 7 years ago, lunching there on excellent fish raised as a regularly harvested crop in a farm lake nearby.

Another such school-farm which we visited was an 190,000-acre citrus orchard, Plan Especial de Jaguey, being developed on land that was once rocky and unproductive by students who attend 45 schools scattered throughout the area. Begun 10 years ago, the development, which will not be completed

until 1985–90, already produces more citrus fruit than all of Cuba before the revolution. The entire output is sold to Communist countries.

These were not isolated showplaces. One could see similar developments everywhere while traveling through the countryside. We did visit one showplace, however, the Picadura Valley Granja, a cattle-breeding farm run by Castro's older brother, Ramon. There, Cuban cattle are being crossed with Holsteins to upgrade production of both beef and milk.

Throughout the rural areas there was electric power, produced by oil-fired generators, and many water tanks used for irrigation. It was said that about 45 percent of Cuba's sugarcane crop is now harvested by machine, with more than a third grown on irrigated land.

Still, many foodstuffs are rationed, even sugar (4 pounds a month). But allotments are purported to be ample and designed primarily to insure fair distribution. Prices of basic commodities are subsidized, financed in part by heavy taxes on luxuries. Consequently, there is no inflation in basic food prices. A quart of milk costs less than 20 cents, meat averages 60 cents per pound, rice 18 cents per pound, oil 26 cents per pound, bread 20 cents per pound—and so on. Although Cuba still produces much rum—10 million liters a year are exported, 6 million of that to the Soviet Union—little is consumed in Cuba.

Castro's sense of priorities and his intimate knowledge of details are illustrated by what he related to me about Cuba's lobster production. Cuba, he said, produces 10,000 tons of lobsters a year, all for export markets. "I can buy a ton of powdered milk for $350 and it has 2½ times as much protein as a ton of lobsters. And for each ton of lobsters we sell, I can buy fifteen tons of powdered milk."

Wages for the average factory worker are said to be 160 pesos per month, or about $200 at the current exchange rate. There are significant differences in wage levels between workers and professionals—a doctor makes four times as much as a shop or factory worker—but the system, it is claimed, guarantees a decent standard of living to the lowest paid. Both parents usually work. Health care, like education, is free; medicines are low priced; and public transportation is cheap—bus fare in Havana is 5 cents. Gasoline is rationed and costs 65 cents per gallon for the rationed amount and $2 per gallon for any purchased over that—"to soak up money," it was said. Textiles are also rationed, but new plants are under construction. However, many young people dress stylishly. Mini skirts abound. American music dominates on the radio stations and old American movies are shown on television.

As to transportation, many 1950's vintage American cars are still seen on Havana's streets. However, there are large numbers of cars of more recent vintage as well, including some built in U.S.-owned plants in Latin America. Buses appear adequate but crowded. Many new trucks lumber along the streets and highways. Obviously, attention is being given to improving transportation.

It must be a shared pride in these accomplishments that accounts for Fidel Castro's undoubted popularity. Previous Cuban dictators, such as Batista and Machado, were despised. But criss-crossing the island with Fidel, as I did, is an experience not to be faked nor easily forgotten. He has more facts and figures in his head, and a greater curiosity to acquire still more, than nearly anyone I have ever met. Ranging from an intimate knowledge of Ernest Hemingway's writings to the latest experiments in cattle breeding, his grasp of detail is astounding. He takes to the road like an eager campaigner. He obeys the signal lights, jokes with the pedestrians crossing at the intersections and waves amiably to the people who call out to him as he passes by. Wherever he stops there is pandemonium, as crowds gather around to ask questions, register complaints, or just talk. The people react to him more like a father figure than a head of state. In their faces I could not detect a trace of fear.

One incident will convey something of the flavor of these exchanges. Stopping beside an outdoor basketball court, Castro began to banter with the players. He spotted a short boy, perhaps 12 years old, and shouted to him, "You're too short for basketball."

The boy blanched and I watched him elbow his way forward. Just before we pulled away, the boy gripped Castro's arm, his eyes flashing. "I may be short," he said, "but I can jump."

The President nodded solemnly, holding back his laughter until we left. Then he turned to me and said approvingly, "There's a champion in the making."

Perhaps this easy relationship with the people can be better understood if one takes into account the bitter history of Cuba. It was the last of the Spanish colonies in the Western Hemisphere to win independence, its struggle long and bloody. Before the turn of the century, Castro told me, there were 30,000 Spanish troops stationed on the island—1 soldier for every 3 Cubans. After independence, Cuban governments were corrupt and dictatorial. Batista is thought to have had $100 million on deposit in foreign banks at the time he fled Cuba. Moreover, mammoth foreign ownership of the land left the peasants destitute, while Havana became a haven for the Mafia. Now all this has changed. It is small wonder that the Cuban people see their glass as half full today and believe in Castro's promise of a full glass tomorrow.

III. THE STATE OF UNITED STATES-CUBA RELATIONS

"Those who cannot remember the past are condemned to repeat it," Santayana wrote. As American policymakers measure how far Cuba has come since the Castro revolution, so must they also keep in mind the earlier history of United States-Cuban relations.

Before Castro's rise to power, we regarded Cuba much like a colony. Following American occupation after the Spanish-American War, the United States wrote the Platt amendment into Cuba's Constitution, giving the United States the right to intervene in the island's affairs whenever we saw fit. That amendment stood until 1934. American capital dominated Cuba's economy. It is estimated that during the last year of the Batista regime, U.S. interests controlled 80 percent of Cuba's utilities, 90 percent of its mines and practically all of its oil refining and distribution facilities; 65 percent of its trade was with the United States, while 85 percent of all foreign investment was American. As for Cuba's principal crop, sugar, 40 percent of the sugarcane fields were also American owned. In many ways, the U.S. ambassador was as important as Cuba's own President.

This subordination to foreign ownership was no small element in the growth and appeal of Castro's revolution. And after he marched into Havana in 1959, subsequent U.S. policies may well have been a major—if not the compelling—factor in pushing Castro so far into Soviet hands.

With the expropriation of American-owned properties, the U.S. Government took quick reprisal. Starting with our cancellation of the Cuban sugar quota, we soon obtained, through the Organization of American States, a quarantine of Cuba, endorsed by most Latin governments. In April 1961, the United States sponsored the ill-fated invasion of the Bay of Pigs by Cuban exiles. The dangerous missile crisis involving the Russians came 18 months later.

To be sure, Castro is now—and was during that time—a grassroots Communist. But, as Senator Fulbright warned President Kennedy in arguing against the Bay of Pigs invasion, the Castro regime "is a thorn in the flesh; but it is not a dagger in the heart." Strangely, we still seem to find it simpler and more important to maintain trade and diplomatic relations with such Communist titans as China and the U.S.S.R., than to deal with an island less than 10 minutes by air from Key West.

Beginning in 1974, there have been attempts to break away from this stubborn, self-defeating policy. In August 1975, President Ford lifted the embargo on trade with Cuba by U.S.-owned corporate subsidiaries abroad. The results of this policy are evident in the number of Argentine-made Chevrolets seen today on the streets of Havana. President Carter has stepped up the momentum by removing the ban on U.S. travel to Cuba, stopping the overflights of our surveillance planes and allowing American tourists to purchase $100 semiannually in Cuban goods. Both countries have recently entered into fishing and maritime agreements and opened diplomatic interest sections in each other's capital. Thus a start has been made toward improved relations. But many hurdles remain to be surmounted.

Cubans regard the trade embargo (the "blockade," they call it) as the primary impediment to normalized relations. The origins of the embargo go back to the early sixties when the United States severed diplomatic and economic relations in final retaliation against the expropriation of American-owned property and Castro's growing friendship with the Soviet Union. At the urging of the United States (and later Venezuela), the OAS subsequently helped to legitimatize our embargo by adopting its own sanctions resolution in 1964. That resolution remains on the books, but its edge was taken off in July 1975, when the OAS approved a "freedom-of-action" resolution permitting member nations to reestablish normal ties with the Havana government. The United States supported this resolution and it was then, in the aftermath of its passage, that President Ford authorized overseas subsidiaries of American corporations to trade with Cuba.

Although earlier this year the Senate Foreign Relations Committee approved legislation to permit one-way sales of medicine and food from the United States to Cuba, that provision was deleted from the parent bill in the full Senate when it became clear that even this modest step, which could only work to our advantage, would precipitate an emotional debate with an uncertain outcome. It is generally estimated that, if the whole embargo were lifted, it would result in a two-way trade of about $600 million annually. Immediate study should be given to ways to ease the embargo on a step-by-step basis.

Although Cuba exports about 60 percent of its sugar, 3.5 million tons per year, to the Soviet Union under a long-term, highly advantageous, sales arrangement which currently brings Cuba 30 cents per pound, compared with a world price of 8 cents, and allows the island to buy oil at half the world price, Cuba is still interested in participating in an international sugar agreement. Castro told me that he believed such an agreement, stabilizing the world price at a level above world production costs, would benefit all sugar-producing countries alike, including the United States and Cuba. The positions of our two countries on an acceptable price range appear to be moving in the direction of convergence.

According to the Department of State, there are 751 individuals in Cuba with valid claims to U.S. citizenship; of these, only 84

are exclusively Americans. The remaining 667 are dual nationals. The 84 have been free to leave Cuba but did not do so because the Cuban Government would not allow them to take their families with them. A major objective of my visit was to break the deadlock on this problem. When I raised the matter with Castro in a late night conversation aboard his boat, the *Aguarama*, he responded immediately and positively saying, "if there are 50 or 100 or 300—they may leave with their families and children and uncles and aunts. We have no problem with that. Just give us a list."

All of the 84 individuals in Cuba with exclusive claims to American citizenship were later queried by registered letter, sent by the U.S. interest section in Havana, as to whether they desired to return to the United States. The first 19, along with 36 of their relatives, had been brought to the United States by the time this report was written. It is significant that, notwithstanding that 6 of the 55 were of military age, they were also allowed to leave. All were permitted to take their savings and personal belongings with them. This humanitarian gesture on Castro's part was intended, as he put it, "to continue the positive direction of relations" on which both countries have now embarked.

National television covered the arrival of the first plane from Havana at Homestead Air Force Base, Fla. I am sure that the American people watching the event shared the sentiments of one of Washington's most distinguished ambassadors, Ardeshir Zahedi, of Iran, who wrote to me:

"It was a wonderful and heartening experience to see so many American and Cuban families reunited after so long a period of separation, and the joy and happiness that they so clearly manifested was in turn reflected in the hearts of all of us who had the good fortune to watch their reunion on television."

I also raised the question of Americans in Cuban jails. Of the 23 known Americans in Cuban jails at the time of our visit, including hijackers, drug smugglers and others, the Department of State classifies seven as "political prisoners." Although President Castro said he could not release these prisoners at that time, he told me that he would review their sentences on a case by case basis.

Shortly after our return to the United States, Cuban authorities did release one American prisoner, Byron Moore, who was not classified as "political" but whose release I had requested on humanitarian grounds. Mr. Moore's boat, the "Nita Sue," had been seized in Cuban waters with marijuana aboard.

Subsequently, on October 12th, I was informed by the American Interest Section in Havana that the first American political prisoner and the only woman among the group, Mrs. Maria del Carmen y Ruiz, had been released by the Cuban Government and had appeared at the Interest Section where she spoke briefly with American staff members. Mrs. Carmen y Ruiz was arrested in 1969 and sentenced to 20 years in prison on espionage charges.

These actions, including the first release of an American political prisoner, indicate that Castro is serious in seeking improved relations with the United States.

Perhaps the most complex issue separating us and the Cubans is our claim for compensation for properties expropriated in the revolution. The U.S. Foreign Claims Settlement Commission has approved claims against the Cuban Government totaling $1.8 billion, of which $1.5 billion are held by corporations. With interest, the figure increases to $3.5 billion, or about one-third of Cuba's GNP. The Castro government has indicated that, at the appropriate time, it will present a counterclaim for damages inflicted by the embargo and the Bay of Pigs invasion. Neither Castro nor I dealt at any length with the expropriation issue in our conversations. Since it will require extensive negotiations, no good purpose would have been served by doing so.

As the number of hijackings to Cuba increased in the early 1970's, the United States worked out an antihijacking agreement with Castro's government, providing for the return of hijackers or their prosecution by the receiving country. Since the signing of the agreement on February 15, 1973, there have been no hijackings to Cuba.

On October 15, 1976, Castro announced that the hijacking agreement would be allowed to expire in accordance with its 6-month termination provision. The turnabout was occasioned by the terrorist bombing a few weeks before of a Cuban airliner which cost the lives of all aboard, including members of Cuba's champion fencing team. The bombing so grieved the Cuban people that over a million attended the funeral. Even though Castro agreed with me that President Carter, whom I described as a "good, moral, religious man," would never countenance CIA participation in such a mass murder, he thought it was done by terrorists who had received their training years ago from the CIA. This was also generally believed by the Cuban people, he said, and made it necessary for him to terminate the treaty. Nevertheless, he made it clear that he intended to continue to deal with hijackers as required by the agreement. There would be no substantive changes on Cuba's part, he assured me.

At no time did Castro raise the issue of the Guantanamo Naval Base, although it remains an outstanding problem. The United States continues to send a check to the Cuban Government each year, in accordance with the 1934 lease in "perpetuity," for an annual payment of 2,000 gold dollars. These checks have not been cashed.

IV. BUILDING A NEW RELATIONSHIP

The wall the United States tried to build around Cuba has crumbled. At last count, the Cuban Government maintained regular commercial and diplomatic trading relations with 86 nations. It is high time for us to discard a policy which the world community views, at best, as unworthy of a great nation and, at worst, as petulant and self-defeating.

Cuba's economy did not collapse under our embargo, nor did her people rise up to welcome the American-sponsored invaders at the Bay of Pigs. Instead of dangling at the end of its rope, the Cuban economy appears to be thriving. Wherever we traveled, much activity was evident: new factories, housing schools, hospitals, and roads.

At home and abroad, Castro has consolidated his position as a renowned leader. American opposition has catapulted him into a legendary prominence, as the David who stood off mighty Goliath. Just as the Bay of Pigs solidified public support for Castro at home, so too did our continued harassment of Castro bestow on him an aura he could never have otherwise acquired. Largely because of a blind and obstinate U.S. policy, Castro's stature and influence in the third world has grown far beyond the modest size of the country he governs.

There is a lesson to be learned here. A grand delusion underlaid our former policy toward Cuba. As the new administration attempts to steer a different course, it is essential to avoid still another delusion; namely, that Cuba will pay a heavy price for the restoration of normal relations with the United States. Apparently, there are those who feel that Castro has not shown "proper" appreciation for the steps President Carter has so far taken. In his conversations with me, Castro observed that it was impossible for him to respond in kind. Obviously, Cuba has not engaged in surveillance overflights of the United States, nor has it imposed a trade embargo against us.

If, in order to trade with the United States, anyone expects Fidel Castro to change colors; to abandon his role in Africa; to sever his close ties with the Soviet Union and to pay us in full for our expropriated property, that person has simply exchanged one delusion for another.

To be sure, the restoration of normal relations with Havana, including the lifting of the American embargo, would give certain advantages to both countries. The United States could obtain a share of Cuban purchases of tractors, trucks, farm machinery, rice, medicine and other commodities. We would also begin to exercise a moderating influence in Cuban affairs. Castro, on the other hand, might anticipate selling certain products in the United States, such as nickel, rum and cigars, while saving transportation costs on merchandise purchased and shipped from nearby American ports, as compared, say, to Japanese.

To obtain these benefits, along with an attendant restoration of greater acceptability among the governments of the hemisphere, I believe Fidel Castro may be willing to make further concessions, especially in the field of human rights. He may release, on a case-by-case basis, those six Americans remaining in Cuban jails whom we regard as "political prisoners"; he may consider opening the exit gates to those residents of dual citizenship, American and Cuban, who wish to leave and take their families with them; and he may, following a relaxation of the embargo, agree to negotiate our claims for compensation.

Beyond this, I have serious doubts. As for Africa, Castro views his role there as that of a liberator. His justification for Cuban intervention in Angola reminded me of the arguments I had heard so often from the lips of Dean Rusk and Henry Kissinger, back in the Johnson-Nixon years, defending our own intervention in South Vietnam. Castro appears to be caught up in the same sort of fervor and I was unable to convince him that Angola—like Vietnam—would ultimately prove to be a baited trap. Having found a role on the African stage, Castro is loathe to forsake it.

By the same token, there is no rational basis for believing that Castro will break his immensely beneficial connection with the Soviet Union in order to trade with the United States. His current trading arrangements with the Russians generate about $1.2 billion in subsidies to Cuba each year, according to our own estimates. Cuba receives almost four times the world price for the sugar it sells to the Russians and buys oil from them at $6 per barrel. Under the agreement, if the price of oil goes up, the price of sugar goes up proportionately. "It is," Castro said to me, "the best agreement any developing country could get." Although Cuba is obviously interested in acquiring U.S. technology, its trade with other industrial nations enables it to obtain most of what it needs and can afford.

Accordingly, I do not expect that concessions from Castro in the future are likely to exceed the marginal gains he can reasonably anticipate from the restoration of normal relations with the United States. To demand more than this, is to base our evolving policy toward Cuba on a new delusion.

For nearly two decades, the fractured relationship between the two countries has been exacerbated by offenses on both sides. As with any aggravated wound, the healing process will be gradual. Castro put it this way:

"We are pleased with the development of relations between Cuba and the United States since President Carter took office. We understand realistically that the process of improving relations must be a slow process. There cannot be dramatic changes overnight, but for our part we intend to continue the

positive direction of relations so that eventually Cuba and the United States can solve their problems."

V. RECOMMENDATIONS

Both President Carter and Fidel Castro have now taken the first steps toward better relations. Momentum has been created. It should not be allowed to slacken. By his decision to permit Americans to leave with their Cuban relatives and possessions, Castro has made a good-faith gesture to which the United States should respond. I recommend the following steps worth considering:

1. Expand cultural, sports, educational, and scientific exchange.—There are many opportunities to further mutual interests through exchanges. In November, an American all-star baseball team will tour Cuba; in the spring the Cuban National Ballet will perform in the United States. There should be more such visits. Medical personnel and scientists of both countries, for example, have much to learn from each other.

2. Seek cooperation on antidrug traffic activities.—Smugglers moving cargoes of drugs from Latin America to the United States by boat often travel close to Cuban waters and get caught. There is much common ground here for cooperation in curbing the international drug traffic.

3. Relax the trade embargo.—Careful study should be given to a step-by-step approach to relaxation of the trade embargo.

4. Aggressively pursue antiterrorist activities.—Government agencies should take aggressive action to insure that terrorist activities against Cuba, originating in, or controlled from, the United States, are stamped out.

5. Reciprocal opening of press offices.—Allow a Cuban press office (Prensa Latina) to be established in the United States in exchange for the opening in Havana of press offices of U.S. news organizations.

Such steps, on our part, taken over the next year or two, coupled with reciprocal action on the part of the Cuban Government, will move the healing process along.

When Castro was asked what one ingredient was most needed, he said, "Time."

I agree.

[From the Idaho Statesman]

FRANK AND FIDEL

Sen. Frank Church's trip to Cuba appears to have accomplished a great deal despite the absence of tangible, in-hand agreements. Perhaps the greatest benefit was the chance for Church, a respected, thoughtful participant in the development of America's foreign policy, to take a personal measure of the Cuban leader. This moves Church's thoughts on Cuba away from the abstract and into the realm of first-hand knowledge. Indirectly, President Carter gained in the same way through the information Church relayed to the President.

Castro also benefited in the same manner, both from being able to size up Church as an American foreign-policy leader, and indirectly in being able to gain in his understanding of the Carter administration through Church.

A second benefit derives from the discussions Church and Castro held on problems in the international sugar market. No agreements were even attempted, but the friendly discussions give both sides a better understanding of the problems to be resolved in meetings scheduled later for London. Hopefully, the Church-Castro talks laid a foundation of goodwill that will continue in London without discounting the difficulties to be overcome.

Church also gained Castro's agreement to allow Cuban members of some 80 to 100 families to come to the U.S. where they can be reunited with their families. This gesture of goodwill by Castro again illustrates that progress on normalized relations between the United States and the island nation.

Difficult problems remain between Cuba and the United States, including Castro's insistence on military involvement on the volatile African continent. But the only way these differences can be overcome is by putting one foot in front of the other and seeking reconciliation. Church's trip was one such important step.

Let us hope the process continues. We can only have a positive influence on the actions of Cuba if Castro believes the United States is not out to do him in. To ignore or vilify the Cuban leader is to push him toward behavior that is inimical to our goals in international trade and foreign policy.

[From the Washington Post, Aug. 16, 1977]

AMERICAN-CUBAN LIMITS

Fidel Castro continues to lavish on American visitors what is still one of Cuba's principal assets: his time. The most recent recipient was Sen. Frank Church, on whom the Cuban leader bestowed several days. They seem to have struck a fair bargain. In effect, Mr. Castro decided to let the Cuban families of some 80 American citizens leave Cuba, in return for the respectability conferred by the Church party. He also released two Americans whose boat had recently been captured. Such gestures cost Havana little. They provide a substantial return in "humanitarian" image. And, of course, they transform the lives of the individuals involved.

Sen. Church is a good man to have gone to Cuba. He understands foreign policy and, though personally of a liberal outlook and also the man who disclosed the CIA's attempts to kill Mr. Castro, he is politically in touch with the conservatives who oppose Cuba's Communist regime. He warned his Cuban host that, though small steps are possible and desirable, normalization is a long way off. This is sound advice. Things are moving: Cuba is about to open, on a reciprocal basis, an "interests section" in Washington. But the agreements reached so far touch mainly areas of convenience (fishing, hijacking). Broad support is still lacking here—and perhaps also in Cuba—for full and friendly ties.

In fact, the two countries may be on the verge of running out of easy gestures. Mr. Castro could release the 20 or so Americans in Cuban jails. Mr. Carter could lift the trade embargo partially to permit the sale of food and medicine. Then would come the hard part: a range of steps that would require an American decision to accept the Cuban revolution as authentic and permanent and a Cuban decision once again to act primarily as a member of the inter-American community. Only these steps would lead to a stable and productive long-term relationship.

So long as Cuba remains a treaty partner of the Soviet Union and deploys troops across Africa, it is idle to suggest that Fidel Castro is close to returning to the inter-American fold. But is the United States prepared to extend Havana the economic and political concessions that would signify acceptance of the Cuban revolution? A new Potomac Associates survey raises serious doubts. The American public, it says, "is receptive in the abstract to engaging the Cubans in negotiations about a diplomatic rapproachment, but wants to do so only on terms likely to be unacceptable to Havana." Some Americans see reconciliation as a test of their own maturity but most see it as a process in which benefits flow largely from north to south. Therefore, in the public view, major concessions—in foreign policy and domestic practice—must come from Cuba. It is probably just as well that in neither Washington nor Havana is the improvement of relations the No. 1 priority, for in neither place is that likely to happen soon.

[From the Boston Globe, Nov. 1, 1977]

THE ROAD BACK TO HAVANA

Sen. Frank Church is correct in recommending that the United States end its attempts to ostracize Cuba. The embargo on trade has done nothing to topple the government of Fidel Castro or to reduce his influence with developing countries in Latin America and Africa. It has only succeeded in making him appear the martyr, able to blame economic problems in Cuba on the embargo rather than shortcomings in his style of government.

There has been some progress, as Church noted Sunday in an interview. Fishing agreements have formalized our new 200-mile territorial limits in the strait between Cuba and Florida. And legations have been set up in the two countries as a prelude to a possible exchange of ambassadors.

The Carter Administration has been reluctant to push faster on the trade question, partly because it is trying to restrict Cuban influence in Africa and partly because of the broader question of human rights, frequently abused by the Castro government, according to our standards of political behavior.

But the United States maintains normal relations with scores of countries that do not satisfy our human rights standards. And the United States itself is less than ideally situated for throwing stones on the question of using influence in other countries.

Benefits might accrue to us from normal trade relations. There would be obvious economic gains to both sides from reopening markets. Politically, the Castro government would no longer be able to blame us for its own difficulties. And the regular passage of people and goods should help prevent unpleasant incidents that are common everywhere along closed borders.

One of the problems in the United States is that the business community is divided on how to normalize trade relations. One group contends there should be no resumption until the Castro government comes to terms with those companies whose property was expropriated by the Castro government in 1961. These claims amount to about $4 billion when one includes a claim for a six percent payment of interest on the property taken 16 years ago.

Another business group is willing to press ahead, immediately with normal trade and wait to see what happens on reimbursement. This second group includes some companies that lost property in 1961 but may be willing to waive the claims in part or whole in order to reestablish commerce.

It seems highly unlikely that any more than token claims could be paid under the best of circumstances, since Cuba has piled up enormous international debts—$6 billion to the Soviet Union alone. The lone hope for any compensation seems to lie in expanding Cuba's trade with the rest of the world, including the United States. At some point in the future, normalization seems inevitable. It should come sooner rather than later.

[From the Boston Evening Globe, Aug. 15 1977]

GESTURE FROM HAVANA

Fidel Castro's decision last week to allow some 80 Cuban families of American citizens to leave the island if they choose to do so seems clearly to be a gesture in search of a response.

A likely and appropriate response might be further relaxation of the 17-year-old trade embargo imposed by the US in reaction to Cuban expropriation of American property and other political actions associated with Cuba's socialist revolution.

However, relations between Havana and Washington still seem destined to a slower evolution than many people would like.

That prospect was emphasized by Premier Castro's refusal to budge from his position on several issues during last week's three-day unofficial visit of Sen. Frank Church (D-Idaho) and representatives of the American press.

Castro reportedly told Church that Cuban military activity in Africa would continue. The expeditionary force which took part in last year's power struggle following decolonization in Angola remains in that West African country. Cuban forces are in Ethiopia and at any time could enter the armed struggles along the Rhodesia-Mozambique border.

Despite UN ambassador Andrew Young's assertion to the contrary, Cuba's army in Africa can be destabilizing force to the extent that it is beyond the control of diplomacy.

And most Americans concerned about relations with African countries would prefer to see solutions to the continent's post-colonial problems settled by negotiation rather than war.

Beyond the Cuban military issue, Castro showed no sign of willingness to release Americans held in Cuban prisons, nor was there any word—at least no public word—concerning the standing of people whom both the US and Cuba claim as their citizens.

In the end the small steps should give way to large ones, and ordinary relations between the US and one of the Caribbean region's most influential and dynamic countries will resume.

Castro observed to our reporter in Havana that time is the biggest obstacle to progress. But as long as a willingness exists on both sides to move in positive, cooperative directions, time is less an obstacle than an opportunity for restoring normal Cuban-American relations.

THE RETURN OF THE CROWN OF SAINT STEPHEN TO HUNGARY

Mr. HUMPHREY. Mr. President, the decision by President Carter to return the Crown of Saint Stephen is one which I applaud as being entirely appropriate at this time.

While some controversy has developed as a result of this decision, I think the view of former Hungarian Prime Minister Ferenc Nagy, who was overthrown by the Communists in 1947, places this gesture in its proper perspective. Mr. Nagy, in the November 9 issue of the Washington Post, stated:

> The legitimacy of the regime of which I consider myself the number one enemy, was recognized by the United States long ago. The crown will be given back not to the regime as such but to the Hungarian people . . .

The Crown of Saint Stephen does belong to the people of Hungary. It does represent the people of Hungary. I just do not believe the United States should be in the business of confiscating.

Nobody can deny that Hungary has achieved an impressive record of liberalization in recent years. It is the most liberalized of the Eastern bloc countries, and the average Hungarian does enjoy a remarkable degree of religious, speech and economic freedom.

In June of this year, I wrote to Secretary of State Cyrus Vance, urging that the crown be returned to the people of Hungary. I noted in that letter:

> I believe the time has come to address the question of the return of the Crown to the Hungarian people. After all, it is their national symbol. The American people should welcome this positive, friendly gesture.

I think the President should be commended for his decision.

Mr. President, I ask unanimous consent that a copy of my letter to the Secretary of State be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 28, 1977.

Hon. CYRUS VANCE,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: I want to urge that serious consideration be given to returning the Crown of St. Stephen to the people of Hungary.

The Crown, Hungary's most important national symbol, has been in the safekeeping of the United States since the close of World War II. The U.S. Government has repeatedly acknowledged that it is the property of the Hungarian nation and that the question of its return will be addressed in light of improved U.S.-Hungarian relations.

There can be little doubt that U.S.-Hungarian relations have improved markedly in recent years. We have entered into a Consular Convention to protect American travelers in Hungary. Hungary has settled all claims of American citizens and has paid all its debt arrearages to the U.S. Government, including those from the World War I era. A cultural and scientific exchange agreement was recently signed by our two governments.

The two reports by the Executive branch to the Commission on Security and Cooperation in Europe reflect the fact that Hungary is in the forefront among the Warsaw Pact nations in implementing the Helsinki Final Act, including such Basket Three provisions as divided families, binational marriages and travel.

I believe the time has come to address the question of the return of the Crown to the Hungarian people. After all, it is their national symbol. The American people should welcome this positive, friendly gesture.

Thank you for your consideration in this matter.

Sincerely,

HUBERT H. HUMPHREY.

PANAMA CANAL TESTIMONY

Mr. ALLEN. Mr. President, on October 28, 1977, the Subcommittee on Separation of Powers received the testimony of Mr. Karl Bendetsen on the subject of the Panama Canal Treaties. Mr. Bendetsen is well-known to many Senators, but I might mention that he was Under Secretary of the Army during the administration of President Truman and was for a period of many years Chairman of the Board of the Panama Canal Company. Mr. Bendetsen, after his service in Government, returned to private industry where he became chairman of the board and director of Champion International Corp., a company with facilities in many States and a company employing many thousands of American citizens. Mr. Bendetsen is both a lawyer and an engineer, and his life typifies the best in public service and private initiative.

Mr. Bendetsen's testimony before the Subcommittee on Separation of Powers is, in my judgment, the best existing statement of all of the facts which ought to be considered in assessing the Panama Canal Treaties. The study he has given to this topic is truly remarkable, and the contribution he is making to the public discussion of this issue is invaluable.

Accordingly, Mr. President, I ask unanimous consent that the statement of Mr. Karl Bendetsen be printed in the RECORD so that it will be easily available to the Congress and to interested members of the public.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT RE PROPOSED CANAL ZONE TREATIES

(By Karl R. Bendetsen)

I. INTRODUCTION

By way of introduction, between 1948 and 1952, I served as Under Secretary of the Army. Among my many duties was that of Chairman of the Panama Canal Company. By delegation from The President of the United States to the Secretary of the Army and from him to me, I was made the responsible agent for supervising the reorganization of the Canal Zone and its activities pursuant to an Act of Congress, Public Law 841, 81st Congress, 2nd Session (64 Stat. 1038) approved September 26, 1950. This Act, adopted under the leadership of former Congressman Clark W. Thompson of Texas, constituted the first basic change in the permanent Canal operating organization from that originally established in 1914 pursuant to the Panama Canal Act of 1912.

Under the Act of 1912, in time of peace, the Canal was operated on an appropriations basis, under a single civilian agency as an interoceanic public utility headed by a governor. In war, that Act placed the Canal Zone and all of its functions under the supreme control of the Commanding General of the U.S. Army on the Isthmus.

The concept of the Act of 1950 was significantly different from that of the Act of 1912. A new corporation was chartered by the Congress known as the Panama Canal Company. The Panama Railroad Company, a New York corporation, was merged into the Panama Canal Company. The new company was placed under the control of a Board of Directors under a Chairman. The President of the Company became the general manager of business operations on the Isthmus. The Governor of the Canal Zone serves ex-officio, as President of the Canal Company.

The Panama Canal Company was charged with the operation of all of the transit, toll-making, navigational and commercial activities on a self-sustaining basis. It became the sole taxpayer and was required under the Act to fund all governmental functions in the Zone which were strictly separated from the public utility functions.

Following my resignation as Under Secretary of the Army in the late fall of 1952, I was requested to remain as Chairman. This request was repeated by President Eisenhower in 1953 and I remained as Chairman until the end of that year when the pressure of my other obligations and those associated with the chairmanship of the Canal Company came into conflict, simply because of the unavailability of adequate time to do both.

I will first set forth briefly some important highlights bearing upon the historical background which culminated in the Isthmian Canal Convention between the United States of America and the Republic of Panama signed at Washington November 8, 1903. Having briefly described the streams of influence which converged in that Convention, I will then arrange a series of observations and

comments relative to the pending Panama Canal Treaties.

Immediately upon ratification, and wholly without any consideration whatever, these treaties would:

(a) Extinguish United States jurisdiction in the Canal Zone;

(b) Terminate its juridical, legal and national presence there;

(c) Terminate the all-inherent rights of the United States under the 1903 Convention;

(d) Place all U.S. citizens there resident, including members of the Armed Forces of the United States and their dependents, under Panamanian jurisdiction;

(e) Convey all U.S. right, title and interest in all of the land and all of the fixed installations and property there except for certain temporarily excluded properties; and

(f) In thirty months, terminate all police power and all vestiges of governance, both executive and judicial.

II. HISTORICAL BACKGROUND

A. The treaty of 1846 with Colombia (New Granada)

On December 12, 1846 at Bogotá, a new American chargé d'affaires, Benjamin Allen Bidlack of Wilkes Barre, Pennsylvania, acting entirely without instructions of any kind, on his own initiative, negotiated and signed a treaty. This treaty which he negotiated with the President of New Granada, Sr. Tomás Cipriano de Mosquera, proved to be critical and important. Its vital section was Article XXXV. Under the provisions of this Article, New Granada guaranteed to the United States the exclusive right of transit across the Isthmus of Panama (the State of Panama, a province of New Granada) "upon any modes of communication that now exist, or that may be hereafter constructed." In exchange, the United States guaranteed "positively and efficaciously" the "perfect neutrality" of the Isthmus and New Granada's rights of sovereignty there. It was this agreement by which the Panama Railroad was to be made possible.

The United States Senate did not act on ratification for a year and a half and then only when a new and special envoy was sent to Washington, the very able Pedro Alcantára Herrán to lobby for the agreement. The Bidlack Treaty, as it has been commonly called, was Bidlack's only diplomatic triumph. He died seven months after the treaty was ratified. Prior to Bidlack's appointment as an envoy to Bogotá, he had served briefly as a member of Congress.

B. The Discovery of gold in California and the war with Spain

Although there were dreams and visions of a waterway connecting the Atlantic and Pacific Oceans through some pathway across the Isthmus connecting North and South America, Central America nevertheless remained a backwater until January of 1848, when gold was discovered in California at Sutter's Mill.

There were only three routes to California. They were the Plains across, the Horn around, or the Isthmus over. Thousands chose the "Isthmus over." It was a bruising experience. Many never made it at all—neither the men nor the mules. Uncounted men died of snakebite, cholera, yellow fever and malaria, and of a thousand hardships and miseries. But on they came. After all, it was 13,000 miles around the Horn from New York to San Francisco. It was 5,000 miles by way of the Isthmus. Those who went from New Orleans to San Francisco across the Isthmus were to save 9,000 miles.

So it was the discovery of gold in California that first heightened intensively the interest of the United States in a route across the Isthmus. Ultimately, however, it was not gold; it was the war with Spain and the dramatic voyage of the battleship *Oregon* from the west coast of the United States around the Horn. Our first true battleship, the *Oregon*, was in San Francisco when the *Maine* blew up in Havana harbor and victory in the Caribbean was said to depend on her. Every American was caught up in the excitement. She was a fine vessel and she got there in time to play a part in the Battle of Santiago Bay, but it took her almost seventy days. This was the great catalyst. But much was yet to happen.

C. The Panama Railroad

It was a man named John Lloyd Stephens who visited Nicaragua and the State of Panama. He became convinced that Panama was where the future lay. He organized the Panama Railroad Company, a New York corporation. The railroad was begun in 1850. It was finished five years later at a cost of $8 million, six times beyond anyone's estimate. It was the world's first transcontinental railroad, the most expensive line on earth. A one-way ticket at that time was $25 in gold. It was a bonanza.

Panama had been known as a pesthole since its earliest Spanish settlement. Horror stories came out of Panama as the railroad was pushed ahead. Probably more than 6,000 or maybe even twice that number died in the effort to build it. They died of cholera, dysentery, yellow fever, malaria, smallpox. There was then no cure known for any of them.

Thanks to Benjamin Bidlack and Article XXXV of his treaty, to U.S. initiative, the Isthmus at Panama was spanned. And the United States was obliged, as well as privileged, under the treaty to keep the railroad open and to protect it against all comers, by force of arms if need be. U.S. naval vessels customarily stood off at Colon and Panama City.

D. President Grant

Surprisingly to many who may still think that President Grant had no initiative, it was he who directed a series of practical investigations seeking to find the most advantageous route for an interoceanic canal. He considered such a canal absolutely essential to the future of the United States and of great benefit to the whole world. Grant authorized and directed under the leadership of Admiral Ammen (a friend since boyhood) seven expeditions to Central America between the years 1870 and 1875. Throughout the nineteenth century there had been many theoretical and conjectural claimants to knowledge about where a canal should be built but none of them really knew what he was talking about. Remarkably however, as early as 1552, a Spanish priest designated Panama, Nicaragua, Darien and Tehuantepec as providing the best choices. Among these, he thought Panama and Nicaragua to be favored. The Grant expeditions were carefully done. President Grant commended to the people of the United States "An American Canal, on American soil."

E. The French effort

Much has been written about the French effort led by Ferdinand de Lesseps. He was the hero of Suez, a sea-level canal bearing no real relationship to the gigantic problems at Panama. He organized an International Congress which met in Paris in 1879 to consider an Interoceanic Canal. The Congress wrestled with the problems of which route and whether it should be a sea-level or a lock canal. However, de Lesseps "railroaded" through a decision for a sea-level canal, despite the fact that a French engineer, Adolphe Godin de Lepinay, presented a plan for a lock canal which turned out to be almost exactly the precise canal which the United States ultimately built. It was his plan that was eventually adopted in 1906 by John F. Stevens, the Chief Engineer of the Isthmian Canal Commission appointed by President Theodore Roosevelt. Congress by an Act approved June 29, 1906 formally approved the recommendations of John Stevens after protracted and lively debate on the merits of Lepinay's concept.

The French effort collapsed in 1889 and the Panamanian Isthmus returned to the jungle.

F. The canal at Panama was second choice

In 1899, the United States established the Isthmian Canal Commission for exploration purposes. Rear Admiral John G. Walker was President of the Commission. The objective was to recommend a route somewhere across the Isthmus as well as the type of canal to be built.

Nicaragua was recommended. It had popular support across the United States and very strong support in the Congress, particularly in the Senate under the leadership of then Senator Morgan.

G. The Spooner Act

A period of intensive struggle known as the Battle of the Routes was waged. Finally, however, Congress on June 28, 1902 passed the Spooner Act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans. This Act favored the route across the Province of Panama.

The President of the United States was directed to acquire from the Republic of Colombia "perpetual control of a strip of land" not less than six miles in width from the Caribbean Sea to the Pacific Ocean and thereupon to excavate, construct and "perpetually maintain, operate and protect thereon a canal," which would afford convenient passage of ships of the greatest tonnage and draft then in use. The President was also directed to provide for the perpetual maintenance and operation of the Panama Railroad and to have "jurisdiction over said strip and the ports at the ends thereof to make such police and sanitary rules and regulations as may be necessary to preserve order and preserve the public health thereon and to establish judicial tribunals as may be agreed upon thereon as may be necessary to enforce such rules and regulations."

When the French effort collapsed, a new French company was created by the French to obtain what might be salvaged out of the wreckage of the French effort. The name of this company was the New Panama Canal Company (Compagnie Nouvelle). The Spooner Act provided in Section 3, that when the President had acquired the necessary territory for the United States from the Republic of Colombia, he was authorized to pay the French company $40 million for its rights and equipment and "to the Republic of Colombia such sum as shall have been agreed upon."

It is important to recall however that Section 4 of the Spooner Act provided for an alternative. If the President proved to be unable to obtain for the United States "control of the necessary territory of the Republic of Colombia" he, *the President, was authorized to obtain control by treaty of the necessary territory from Costa Rica and Nicaragua for the construction and the perpetual maintenance, operation and protection of a canal via the Nicaraguan route.*

There followed the adoption of the Spooner Act, after months of arduous negotiation between then Secretary of State Hay and Tomas Herran, charge d'affaires, a very favorable canal treaty for the United States. The treaty was concluded and signed January 22, 1903 and ratified by the United States Senate on March 17 of that year. Colombia did not act.

Communications between Washington, D.C. and Bogota were difficult at best. It took three arduous weeks to reach Bogota over land and the cable connection was intermittent. The Colombian Senate was called into

session on June 20, 1903 to consider ratification of the treaty. However, things did not go smoothly and the Colombian Senate ultimately declined to ratify the treaty. One of the reasons not generally understood was because the rights of the New Panama Canal Company (Compagnie Nouvelle) were due to expire in the course of several months and the Colombians naturally had in mind that upon the expiration of those rights, Colombia would be eligible to receive the $40 million payment scheduled to go to the French company in addition to the $10 million specified in the pending treaty.

It is important to underscore here clearly that the treaty called for a payment of $10 million *and an annuity of $250,000*. Many people have called this annuity rent and many members of the State Department have currently so described the annual annuity as rent. It is not. The $250,000 payment was to be made in lieu of the annual annuity paid to Colombia by the Panama Railroad Company which was itself to be acquired by the United States. It is this same $250,000 annuity, later increased to $2,300,000 which has been paid to Panama.

There were a number of unfortunate misunderstandings between Colombia and the United States which also contributed to the rejection of the treaty. Herran so devoted himself to bringing the ill-fated Colombia treaty to a successful conclusion that sheer exhaustion cost him his life.

H. Was the Panama Canal Treaty forced upon Panama?

A great body of outrageous propaganda has been fabricated and a web of falsehoods has been spun by the Department of State and loudly declaimed by Panama's dictator, all designed to generate false impressions—impressions which many people erroneously entertain.

These false notions are that the Canal Zone was wrested from the Panamanians under duress; that the U.S. Naval forces were brought to bear to obtain the treaty with Panama by which she ceded the Canal Zone in perpetuity. The State (or Province) of Panama seceded from Colombia eagerly and avidly. The leaders knew what they were doing. They sought their own enrichment and the vast benefits they knew would accrue to the new nation by selling and ceding the Zone in perpetuity. They were zealous in their efforts to dissuade the United States from dealing with Nicaragua and Costa Rica to acquire a Canal Zone and construct a canal across the Isthmus there. She seceded. The United States recognized the Republic of Panama. The United States sheltered and defended the fledgling Republic from Colombia after secession.

It is errant nonsense to contend that force was used against the State of Panama soon to become the Republic of Panama to secede from Colombia. It is total fabrication to assert that the Panamanians did not want the treaty.

It is true that Dr. Manuel Amador and Sr. Federico Boyd raised initial objections; it is true that Secretary of State Hay observed that there are provisions to which some Panamanians might object and it is also true that on behalf of Panama the treaty was not signed by a Panamanian. What treaty between nations has ever been unanimously hailed? Very few. This one was unanimously ratified by the Panamanian Parliament before the United States Senate did—Amador and Boyd joined.

I. Was Panama under duress?

Eight men made the Republic of Panama. They were José Augustín Arango, Dr. Manuel Amador, Federico Boyd, Nicanor de Obarrio, Carlos C. Arosemena, Manual S. Espinosa, Tomás Arias, and Ricardo Arias. They knew that following the rejection by the Colombian Senate of the Treaty which had been negotiated with Colombia, the United States would switch rapidly and inexorably to the favored Nicaraguan route.

These men, all citizens of Colombia resident in the State of Panama, desired for themselves and their associates the enormous and continuing benefits to be derived from the United States, from the payments that would be made, the mighty undertaking of construction and the successful operation of the canal. The first meeting of the movement to secede was held July 25, 1903. Following this, Arango, Amador and Arosemena became the nucleus of the conspiracy against Colombia. The people of Panama had a low regard for the government in Bogota.

It should be remembered that under the treaty with Colombia of 1846, pursuant to Article XXXV, the United States had a duty to guard the neutrality of the Panama Railroad. The conspirators never had direct word from any agent of the United States that if they conducted a revolution and seceded from Colombia they would be protected from an attack from Colombian troops, but they believed that this would be the case, as indeed it was.

On November 2, 1903, Commander Hubbard, the Captain of the U.S.S. Nashville, received secret and confidential orders via the American Consul at Colon to:

"Maintain free and uninterrupted transit. If interruption threatens by armed force, occupy the line of the railroad. Prevent landing of any armed force with hostile intent, either government or insurgent, either in Colon, Portobello or other point. Send copy of instructions to the senior officer present at Panama on arrival of U.S.S. Boston. Have sent copy of instruction and have telegraphed Dixie to proceed with all possible dispatch from Kingston to Colon. Government force reported approaching Colon in vessels. Prevent their landing if in your judgment this would precipitate a conflict. Acknowledgment is required."

The uprising occurred at 6 p.m. on the evening of November 3, 1903. The presence of the ships of the United States standing off Panama and Colon prevented Colombia from retaking the Province of Panama. The Panamanians had seceded in order to obtain the Canal and the beneficence of the United States. No pressure had been applied to them at any time. No United States troops were landed. Some Colombian troops joined the rebels. The others voluntarily withdrew. There was no engagement. No shots were exchanged or fired.

The conspirators now having formed a provisional government designated Philippe Bunau-Varilla as their *"Envoy Extraordinary and Minister Plenipotentiary near the Government of the United States of America."* By November 8, 1903, he was installed in Washington ready to negotiate. The conspirators had designated Bunau-Varilla because they felt he was in a position to secure their objective. They were entirely correct. He served them well. They and he had a mutual interest in the outcome and so a pervasive understanding.

At the signing ceremonies of September 7, 1977, Torrijos observed of the 1903 treaty: "It was never signed by a Panamanian."—another blatant effort to generate false impressions and erroneous inference.

The treaty was signed by Secretary of State Hay and Bunau-Varilla November 18, 1903. Its text was cabled to the provisional government and also sent by ship. On November 26, 1903, the provisional government stated that the treaty would be ratified. It was unanimously approved by the provisional government of the New Republic of Panama on December 2, 1903, even though Amador and Boyd had previously and only temporarily been opposed to it for reasons which are not clear. The United States Senate ratified the treaty on February 23, 1904, by a vote of 66 to 14.

J. The treaty

The United States was empowered to construct a canal through a zone ten miles in width. Colon and Panama City were not to be a part of the zone. However, sanitation, sewerage, water supply and maintenance of public order in these terminal cities were placed under United States control. Four little islands in the Bay of Panama—Perico, Naos, Culebra, and Flamenco—were granted to the United States. In addition, the United States had the right to expropriate any additional land or water areas "necessary and convenient" for the construction, operation, sanitation or defense of the Canal. In return, the United States guaranteed the independence of Panama. The treaty granted to the United States *"all the rights, power and authority * * * which the United States would possess and exercise if it were the sovereign of the territory * * * to the exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority."* The State Department contends that this did not put the United States in the place of the sovereign. This amounts to stating that no nation—neither the Republic of Panama nor the United States is sovereign.

The questions of sovereignty and title were presented squarely before the United States Supreme Court in the case of Wilson vs. Shaw, 204 U.S. 24 when it ruled on these questions. In its opinion, the Court stated *inter alia: "It is hypercritical to contend that the title of the United States is imperfect and that the territory described does not belong to this nation * * *."* The territory whereby the Canal Zone was ceded to the United States was ratified by an Act of Congress (33 Stat. 2234).

The Panama Republic had been born under the protection of the United States. It brought the conspirators what they most wanted not only for themselves but for all the people of Panama. Manuel Amador, its first president, inaugurated February 20, 1904, presided over what he described as boom times and an end to centuries of plague. A new nation had been born free of debt. It was a nation with an endowment in the form of $10 million in gold. The government set aside $750,000 for working capital; $2 million for public works. Six million was invested profitably in first mortgages on New York City real estate, the income from which provided adequate revenues for the Republic.

III. THE PENDING TREATIES—THE PANAMA GOVERNMENT AND DEFENSE

A. What would be their immediate effect?

The American people thus far, to the extent that they have been informed at all, have been given the impression that the treaties would be gradual in application. In what amounts to the most important respect of all, in my opinion, this is not so.

If the Panama Canal Treaties were to be ratified by the United States Senate, chief among the immediate results would be:

(1) Article I would provide that the Isthmian Canal Convention between the United States of America and the Republic of Panama signed in Washington November 18, 1903 would be immediately terminated and totally superseded. Whatever rights in and to the Canal Zone which the United States would have following the effective force of the treaty would rest entirely upon new and limited grants made by Panama to the United States.

Clearly there is no moral basis on which to predicate Panama's demand for surrender of the Canal Zone and termination of the 1903 Treaty. Let us now turn to the practical aspects.

(2) The United States would acknowledge the Republic of Panama as sovereign over the territory of what is now the Canal Zone.

(3) The Canal Zone would cease to exist.

(4) United States citizens in the former Canal Zone (employees, military personnel and their dependents) would no longer be under United States jurisdiction. All of them would be under the civil and criminal jurisdiction of Panama. Unless waived by Panama, offenses by any of them would be tried and upon conviction sentenced by Panama.

(5) The United States would cease to have police power in the former Canal Zone.

(6) All police, fire protection, street maintenance, street lighting, street cleaning, traffic management and garbage collection in the former Canal Zone will be provided by Panama. (United States pays ten million dollars per year for this, adjusted upward for inflation in Panama.)

(7) Defense of the Canal becomes joint under a combined Board of senior military officers of equal numbers of Panamanian and U.S. officers.

(8) The Panama Railroad and all other land and fixed properties (not specifically otherwise delineated in the implementary agreements for the life of the new treaty) become the absolute property of Panama at once.

(9) Article III provides that the Republic of Panama, as territorial sovereign, grants to the United States the rights to manage, operate and maintain the Panama Canal in accordance with the terms of the Panama Canal Treaty and its related agreements.

(10) Article XI provides that upon the coming into force of the treaty:

"The Republic of Panama shall resume plenary jurisdiction over the former Canal Zone."

During a 30-month transition period, Panama would *permit* the authorities of the United States to have the primary right to exercise criminal jurisdiction over United States citizen employees of the Panama Canal Commission and their employees and over members of the United States forces and civilian components and their dependents:

(i) for an offense committed during the 30 months within the former Canal Zone and (ii) for any offense committed prior to the effectiveness of the treaty. For the 30-month transition period, the United States shall retain police authority and maintain a police force in the former Canal Zone. The courts may continue to function during the 30-month period except that such courts may not take any new civil cases but may only dispose of pending civil cases."

B. What about the transfer of property?

Article XIII provides that upon termination of the new treaty "The United States of America transfers, without charge, to the Republic of Panama, all right, title and interest the United States of America may have with respect to all real property including nonremovable improvements thereon, not already so transferred when the new treaty becomes effective."

The United States not only receives no compensation, it pays the Republic of Panama for having created the Canal. The treaty states that during the period the new treaty is in force, the United States will provide Panama with a "just and equitable return on the national resources which it has dedicated to the operation, maintenance, protection and defense of the Panama Canal." These payments from revenues require 30 cents per net ton adjusted upward for any increases in tolls over the years. This would amount to from $50 to $60 million per year. In addition, a fixed annuity of $10 million which will constitute a fixed expense of the Panama Canal Commission—over and beyond this, an annual amount of $10 million additional to the extent that operating revenues exceed the expenditures of the Panama Canal Commission. If in any year the expenses do exceed the revenues, this unpaid additional $10 million or any unpaid portion thereof is cumulative, and so that in any year when the operating surpluses exist, such surplus shall be applied to the cumulative backlog. What Panamanian resources?

C. What about defense?

Article IV—Protection and Defense appears to stipulate that the United States during the life of the treaty has the primary responsibility to protect and defend the Canal. As stated above, defense is to be joint. It will NOT be as it is now.

The rights of the United States to station, train and move military forces within the Republic of Panama are very specifically limited by another agreement. This agreement is entitled *"Agreement and Implementation of Article IV of the Panama Canal Treaty."* This collateral agreement which is not called a treaty but which nevertheless would be carried into force by the treaty defines the legal status of our armed forces, the use of areas and installations and the movement of our forces.

With respect to our armed forces, Article VI of this collateral agreement provides *inter alia* the authorities of the Republic of Panama shall have criminal jurisdiction over the members of the Forces (U.S. Armed Forces), the civilian component thereof and their dependents. Within the perimeter of a defense site, offenses committed by such personnel which are criminal acts according to the United States law are by permission of the Republic of Panama subject to the United States. In other cases, Panama also would agree to waive, subject to review, criminal jurisdiction when an act committed off the base is solely against the property or security of the United States.

Acts committed off the base arising out of an official act or an omission in the course of an official act are subject to Panamanian criminal jurisdiction unless waived. The joint committee will review a certificate of the United States that such an offense was committed in line of duty but there is no provision as to what happens if the joint committee does not agree. Quite obviously, the offense would be subject to Panamanian criminal jurisdiction.

The agreement and implementation of Article IV with certain exceptions is not unlike agreements entered into by the United States governing *"Status of Forces"* with nations in which we have stationed our forces on bases in a host country, such as for example the Philippines or the Federal Republic of Germany, Italy or Spain, and to some extent the agreement with Japan. Such agreements can work only if the host country so wishes and so desires. In reading this long supplemental agreement of XXII Articles, it would require an exceptional abundance of goodwill on the part of Panamanians to work at all.

Some provisions such as Article XVIII are somewhat ludicrous, for example. It provides that the United States may furnish educational, sanitary and medical services to the members of its armed forces, their civilian components and dependents. For the most part, it is we who have undertaken to teach sanitation to the Panamanians and it is quite difficult to understand why on a military base for the duration of the main treaty it must be by permission. I do not think this is the case in other Status of Forces treaties, some of which in the past I have negotiated myself for the United States.

D. Other defense aspects of importance

Of the fourteen military bases now in the Canal Zone, only four will remain available to the United States and these will be under direct Panamanian civil and political jurisdiction. As previously noted, Article IV of the agreement and implementation of Article IV of the treaty indicates that whereas the U.S. forces have responsibility for control of entry to defense sites, the Republic of Panama may share in the exercise of this control in a manner to be agreed upon in the Joint Committee. Any signs which delineate the existence of a defense site used by the United States are to be in English and Spanish and on each sign it will be necessary to say and state in both languages that "The sign is erected under the authority of the Republic of Panama."

The emplacement of any type of nuclear armament whatsoever is prohibited to the United States under paragraph 6 of Article IV of the agreement and implementation of Article IV of the treaty.

Even within defense sites, the Panamanian flag occupies the position of honor and is flown on each of them. Flying the flag of the United States is permitted but the joint committee will determine the manner of displaying the flags. *At the entrance to a defense site, only the flag of Panama will be flown.*

E. There is no right to intervene after treaty expiration

Much has been said by the State Department and by The President concerning long-term defenses. It has been unequivocably asserted that even following the expiration of the proposed new treaty, the United States will have the right to defend and protect the neutrality of the Canal.

It is alleged that a grant of right to the United States to this effect is contained in the auxiliary agreement entitled "Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal." *No such right is granted and no such right would exist authorizing the United States to intervene for the defense or the neutrality of the Canal after the pending treaty expires.* All it says in this regard is found in Article IV: "The United States of America and the Republic of Panama agree to maintain the regime of neutrality established in this treaty, which shall be maintained in order that the Canal shall remain permanently neutral * * *."

F. What about enemy, ships in time of war?

Whereas now in time of war, as in the past, the United States could deny entry and passage of the vessels of any nations with whom we might be in a state of war, once this treaty and its collateral and subordinate agreements have been ratified, no such right will exist. The proposed agreements specifically authorize the passage of the vessels of war and auxiliary vessels of any and all nations in peace or war.

Dr. Romulo Escobar Bethancourt declares that the United States has no right to deny passage to an enemy vessel. He denies that the United States has any right to guarantee the neutrality of the Canal. He denies that the United States may say when the neutrality of the Canal has been violated. He stated publicly:

"We did not want that with the excuse of neutrality, the United States would maintain a guarantee over the State of Panama. This was another cause of discussion that kept the negotiations detained until the United States gave up on the idea of having a guarantee of neutrality over the Canal."

United States officials say that we have some sort of an "understanding" with the Panamanians that Article IV means that the United States does have a "right." Dr. Escobar, the chief negotiator, and the real center of power in Panama says this is not so.

It will be recalled by many that Mr. Kissinger said that he had an understanding with the Soviets as to the meaning of a certain critical provision of the SALT I Treaty.

It developed, however, that the Soviets denied that there was any such understanding and certainly did not restrain themselves from action respecting strategic weapons and missile sites that would have been a direct violation of the alleged "understanding."

G. Does this treaty generate friendly relations with Panama?

If we have opened up a new era of cordial relations with Panama, how is it that Dr. Escobar continues to defame and slander the United States before his own people in Panama at every conceivable opportunity? With combustible rhetoric he continually incites the students into confrontation and does so with regard to the period after the treaties take effect. He characterizes the United States as a reluctant and imperialist nation. On August 12, 1977, he advised these students that if they are disenchanted with what he described as some of the "ugly features" of the new treaties, they should strike out on their own. In this enlightening address, Dr. Escobar said to the students:

"In the past when we set bombs against our oligarchy (in Panama), when we challenged the regimes established in our country we never asked anyone for permission, you have never asked anyone for permission * * *. When one wants confrontation, one puts his knapsack on his back, his bomb at his waist and goes to stage the confrontation."

The United States personnel (military, civilian and dependents) will be totally subject to the sovereign power and jurisdiction of the Republic of Panama. Fixed installations and the property not temporarily and specifically otherwise designated will be immediately theirs.

There is nothing in any of the treaties that could possibly prevent the Panamanians from nationalizing the entire operation whenever it chose as did Egypt, contrary to its obligation in the case of Suez. When Britain, France and Israel undertook to enforce the commitments of Egypt, it was the United States that prevented these nations from so doing. We thus laid the foundation not only for what is happening to us now but for that which will lie ahead whenever the Panamanians consider it in their special interest to do so. The Panamanians largely despise the United States. They remember the precedent of Suez.

As noted, the treaty provides for joint defense under a joint Board composed of equal numbers of Panamanian and U.S. officers, No one is in command. As in all such cases, the host country which will also be the sovereign possesses the absolute power of decision. This would seem to place a high premium on friendly relations, shared objectives and philosophies, and an abundance of goodwill. Is it there? Consider the following:

At Fort Cimmaron, there is a Panama National Guard Training Center. The soldiers in training have a chant. Perhaps for them, it is similar, for example, to the chant of U.S. Army Airborne units: "Airborne, Airborne All the Way." It is different, however, in Panama. It goes like this:

"Que Muera Gringo
Gringo Abajo
Gringo Al Paredon"

translated into English, this means:

"Death to the gringo
Down with the Gringo
Gringo to the wall"

Mutual trust? Joint defense: A friendly climate with an abundance of goodwill?

When Torrijos was returning from the treaty signing ceremonies convened with such fanfare, he had something else on his mind other than a feeling of warmth and cooperative friendship with the United States. The English translation of a message sent to Castro as reported by the Spanish news agency on September 10, 1977 follows:

"In returning to my country and flying over the sky of Cuba, I salute you with my everlasting friendship; I wish that the Cuban people under your well-aimed direction will continue its forward march towards progress. In Latin America, your name is associated with the sentiments of dignity that is channeled to the termination of all forms of shameful colonialism."

The friendly words of the head of the Panamanian government? Friendly to the United States, that is?

IV. OTHER VITAL CONSIDERATIONS

A. We are assured that the canal is or soon will be obsolete—not so

We are soothingly assured that the Canal in reality is obsolete and really is not important to our security or our economy. It is true that our thirteen largest aircraft carriers cannot transit the Canal. All the rest of our surface and undersea naval ships can do so and plans for future construction of frigates, cruisers and destroyers will all remain canal-configured.

The Canal is one of the four vital choke points of the world. The Canal as a U.S. waterway which we are free to use and deny to our enemies in wartime gives the United States a striking, strategic advantage that Russia can never have. Geography dictates that the Soviets divide their navy into four separate fleets incapable of mutual support or reinforcement. Only between the Indian Ocean and the Mediterranean via the Suez Canal can the Soviets shift warships as they frequently do.

We have relied heavily on the Panama Canal in every serious military crisis of the century as a means of concentrating our fleet in areas of greatest danger. We need the anchorage facilities there that we now have. We need the airfields there.

I have heard it argued that it is obsolete because supertankers cannot transit the Canal. Supertankers? No supertanker can even enter any port of the United States. Supertankers were designed expressly to go around the Cape of Good Hope. If we were relegated to Drake Passage around Cape Horn or through the Straights of Magellan through the Tierra del Fuego, a very hazardous route, our defense would be impaired as would our sealane life lines. Our Alaskan oil will go through the Panama Canal. Very large tankers, in fact most of the tankers afloat in the world, can transit the Canal. The first Alaskan oil cargo will shortly transit the Canal.

B. What do the Soviets say about the canal?

I quote from the edition of the Weekly Review of the Intelligence Digest of August 24, 1977 published by Intelligence International Ltd., 17 Rodney Road, Cheltenham, Gloucestershire, England:

"Perhaps the most revealing insight into Communist strategy involving the Panama Canal has come from a Soviet Army officer, a Major Sergei Yuworov, writing in the official Soviet military organ Red Star. As reproduced in the Cuban magazine Bohemia, Major Yuworov wrote: 'Due to its privileged location as the juncture between South America and the rest of the continent, including the Canal that permits United States warships to operate simultaneously in the Atlantic and Pacific, it—the Canal Zone—must be considered by the Soviet Union as a priority Zone. A second zone (from which to attack Panama) is the Central American Isthmus, located to the north of Panama. The Canal itself can be attacked as well from Colombia.' As a third choice, Yuworov points to 'converting Cuba, and implicitly Puerto Rico, into bases from which Moscow's plan can be consummated.'"

Quite a mouthful from a Soviet officer writing in the Red Army's official journal!

On the question of defense, it is absurd to say that by ceding the Canal to the Panamians, our capacity for defending the Canal and guaranteeing its security will be increased. With the property in the hands of an irresponsible government or a government dominated by Marxists as Panama's government is, it could decide to close the Canal to our ships of war, to our navy, and where would we be then? The proposed treaty as already stated specifically permits the ships of a nation in a state of war with the United States to transit the Canal.

C. Will the new treaty protect from or expose canal to sabotage?

One of the forcefully repeated arguments made by The President and the State Department is that if we do not surrender the Canal through this treaty, Panamanians will sabotage the Canal, whereas the new treaty will eliminate this hazard. Well, this type of reasoning should expose itself to real question. Sabotage by whom? There are far left radical students in Panama today who object to the proposed treaty and there was a crazed Panamanian in Stockholm who immolated himself simply because the treaty gives to the United States the right to manage it and underwrite the costs until 1999 and provides for a limited U.S. presence there. It is very difficult now to sabotage the Canal. It will not be difficult after the pending treaty is ratified and the Zone ceases to exist. It is almost impossible now. It will be easy if the treaty is ratified. Certainly after the treaty is approved, they would have a far better opportunity to sabotage the Canal than now when we give up substantially all of our police power in the Zone because there will be no Zone—it will all be Panama.

If Panamanians with or without the tacit approval of its Marxist-dominated government were to sabotage the Canal, it would cut off about 25% of Panama's gross national product. The indirect benefits flowing to Panama now are at this level. The Panamanians know that their livelihood depends upon the continued operation of the Canal as it stands now. Attempts at sabotage in the past have been thwarted by our own police and security forces which under this treaty we will no longer be able to maintain. So, in fact, for those radical students who consider the United States an imperialist power, as does Dr. Escobar, this treaty increases the opportunity for sabotage and surrenders a vital, strategic and tactical defense instrumentality of the United States which we cannot afford to surrender.

The Panamanians themselves have enjoyed nearly the highest standard of living on the average of any other nation in Latin or Central America due to the beneficence of the United States, and they know it. Most Panamanians who are fearful to speak out—they are afraid of their dictatorship—know that their government could not effectively operate the Canal anyway, but their lips are sealed by their fear.

D. Who is Omar Torrijos and how did he come to power?

Omar Torrijos did not seize power from the old oligarchy nine years ago. That coup was led by Majors Boris Martinez, a subordinate of Torrijos, who was kept innocent of the coup because of his excessive drinking problem. Major Martinez was an active, determined Communist.

When the Communist party of Panama, however, headed by Romulo Escobar Bethancourt, Juan Materno Vasquez and Marcellino Jaén decided on March 6, 1969 to purge Martinez, Jaén, who is married to Torrijos' sister Toya, persuaded Bethancourt and Vasquez to make Torrijos the head of the national guard, and later in 1972 the chief of government. Martinez was purged because he wanted to move too fast, faster than Bethancourt, the brains of the Communist party in Panama, thought they should move. He felt they could obtain much more by moving more slowly and not risk a countercoup.

Torrijos has been frequently described as the son of rural schoolteachers. This is correct. Both his mother, Joaquina, and his father, José, have been identified as founders of a Communist cell in Veraguas Province. It is now the most powerful and influential cell in Panama.

Omar Torrijos was a member of the Marxist organization of "Young Veraguas" when he attended the normal school of the Province of Veraguas. Drew Pearson on November 19, 1968 later identified him as a member of the Communist party of Panama. During July 1977, a Soviet economic mission to Panama confirmed a treaty establishing a free zone for the Soviet Union in Panama. A discussion took place at that meeting in which the Soviets stated they would consider financing and constructing a new sea-level canal for Panama across the Isthmus.

E. What about a sea-level canal? Is one needed for defense?

Immediately after World War II, the idea of a sea-level canal was thought to have great urgency from a defense standpoint during the immediate reaction to the atomic bomb. Many studies since then have established that both a lock canal and a sea-level canal are obviously equally vulnerable to atomic attack and that both require extensive protection with air cover and sea forces, antisubmarine, surface and submarine. For all of this, we need the air fields in the Zone and we need the bases there over which we are surrending control.

A sea-level canal across the Isthmus would be a foolhardy undertaking because of the geology of the Isthmus, let alone the nature of the Panama government. The uniquely intractable geologic formations were primarily the cause of the French collapse. It was only because of the superior capabilities and resources of the United States that we were able successfully to excavate the main channel known as the Culebra (Gaillard) cut. Not only that, it would be foolhardy to undertake it after this treaty goes into effect, if it does go into effect, given the characteristics of the Panamanian Marxist dictatorship with its axes with Moscow and Havana.

F. We should not agree to refrain from negotiating for and creating a new canal in Nicaragua

What is even more foolhardy about the treaty if it is ratified is that *we commit ourselves not to construct another canal between the oceans anywhere else during the life of the treaty. We also agree not to negotiate with any third state for a new route in the western hemisphere (Article XII).*

If the United States were to undertake to establish a canal which would accommodate vessels of deeper draft and broader beam, it should be created in Nicaragua, not Panama. The geology is different and though the distance from shore to shore is longer, the land bridge is no longer than the narrow neck of the Panamanian Isthmus. In Nicaragua, either a sea-level or a lock canal could be built.

Because of the Pacific sea snake and other marine life indigenous to the Pacific Ocean, a sea-level canal might well imperil the important food fisheries of the Atlantic. There is no mixing of the seas now.

G. Would this usher in a new era of cordial and friendly relations with all of the nations of Latin America?

The President, Secretary Vance, negotiators Bunker and Linowitz and other spokesmen endlessly repeat the theme that the proposed treaties would establish an era of good feeling, of friendly, cordial and constructive relations with all of the nations of the western hemisphere. There is no doubt that this is in fact NOT so.

These assertions have been made because of the presence in Washington for the signing ceremonies of most of the heads of government or chiefs of state of Latin America at President Carter's invitation extended through the Secretary General of the Organization of American States to attend the signing ceremony. Their presence is not evidence which supports these extravagant claims.

Only four Latin American states have supported Panama's demand for this treaty. Torrijos knows it too. He has so stated.

In May of 1977, very likely around May 15, twenty Mexican women journalists visited Panama and were received by Torrijos. Among these journalists was one, Marlise Simons, a Dutch journalist now living in Mexico City. Ms. Marlise Simons was once on the staff of the Washington Post.

On May 19, 1977, the Washington Post printed a byline article by Marlise Simons with regard to the mentioned interview with Torrijos. *In it she quoted Torrijos as having stated to the twenty Mexican women journalists that he was supported by only four Latin American nations in his quest for the Panama Canal. He named them as Venezuela, Colombia, Costa Rica and Mexico.*

The news stories of these twenty journalists were widely reported in the Latin American press.

It is well known that the chiefs of state and heads of government of our Latin American neighbors do not feel themselves in a position to have declined the President's invitation regardless of their feelings regarding the proposed treaty. To my knowledge, to my certain personal knowledge, there are several Latin American states, the governments of which are against these treaties. They can hardly bring themselves to believe that the United States government could bring itself to do this. They consider that it will foster an increase and not a decrease in terrorist and subversive activities in their own states. They consider that Panama and Cuba form an axis with Moscow. They consider that their own security will be diminished by these actions. I wish I could quote which nations, but it should be evident that I am not in a position to do so. I should add that they consider that these treaties will be followed by an insistent demand on the part of Fidel Castro that the United States abandon its naval base in Guantanamo. When one has in mind the Soviet view of the Caribbean Sea, the Panama Canal, the entire Isthmus, we would do well to avoid any action which would increase the pressure on the United States to abandon Guantanamo.

They cite an article in the Washington Evening Star of twenty years ago in May of 1957 which carried a story that the Soviet Union had launched a propaganda offensive against the United States and Central America to incite Panama into demanding control of the Panama Canal. It worked.

They wonder why Linowitz was appointed as a negotiator in view of his general reputation as favoring unilateral disarmament by the United States.

When Bunker and Linowitz returned from Panama in triumph to be received by President Carter on a Sunday, it was later learned that the treaties had not yet been drafted, and that there were great complexities and difficulties with language translation that would take many days before the general agreements which had been initialed could be put into treaty language. Yet within a few days after their return, it was announced that The President had read every word of the treaties and stated that he was well satisfied. *How could The President have read every word of nonexistent treaties?*

According to the World Bank, Panama's external debt is in excess of $1,600 million. The rank and file of Panamanians have not benefited. Where has the money gone? Who are the principal lenders? And who did benefit?

In any event, Panama is close to bankruptcy. The proposal is that we yield to unjustified demands wholly devoid of any moral basis by a nearly bankrupt, Marxist-oriented, Communist-affiliated, Yankee-hating nation.

H. To whom is it proposed we surrender?

Is the Senate of the United States familiar with the recent statement of Marcellino Jaén, a Marxist and a member of the ruling Marxist triumvirate who installed Omar Torrijos? He is, as it will be recalled from the foregoing, a brother-in-law of Omar Torrijos. On July 19, 1977 when Panama signed an economic pact with the Soviet Union, he stated publicly and I quote:

"With the signing of this document that constitutes the final draft of an agreement in which the governments of the U.S.S.R. and Panama have participated, is an event of deep historic significance, not only for our country but for the American continent as well, who are always facing strong forces that represent a philosophy that is contrary to the destiny of Latin America."

Let us remember, it is not really Omar Torrijos, a man with a heavy drinking problem with whom we are dealing—it is Romulo Bethancourt Escobar, Marcellino Jaén and the Leninist-Marxist party of Panama supported by Cuban agents of Fidel Castro with whom we are dealing. *It should also be noted that it was reported that during the negotiations with U.S.S.R. completed on July 19, 1977 as stated above, that there was an extended discussion on July 16, 1977 not only for the financing and construction for Panama of a new sea-level canal by the U.S.S.R. but also for the establishment of a Soviet naval base in Panama.* In Article XII of the proposed treaty, it will be recalled, the United States may not negotiate with any other state to create a new canal. Panama undertakes NO reciprocal obligations.

We are frequently admonished that we must appease the Panamanian demands or face violence. *In 1974, the then Ambassador of Panama to the United States said that if Panama is unsuccessful in its demand for the Canal and the Zone, "there will be no canal for anybody, not for us, not for the United States, not for the world."*

Is it not clear that we propose to surrender in order to appease? In so doing, we do not enhance our security and defense—we critically impair both. And we would create conditions wherein sabotage would be easy, whereas it is difficult—next to impossible now except by a transiting vessel.

I. What about Colombia?

There are those who say that if any nation has a reason to be critical of the United States it is Colombia by reason of the events of 1903. What should be realized is that in 1922 the United States and Colombia amicably settled their differences in a treaty negotiated during the Wilson Administration. Under it, Colombia obtained certain transit rights through the Canal and it referred to the Canal Zone *"title to which is now vested entirely and absolutely in the United States."* Under that treaty, the United States paid Colombia $25 million in five annual installments as an indemnity for the loss of Panama in return for Colombia's agreement to recognize the independence of Panama. The $25 million was paid and accepted. Any legal question about our acquisition in 1903 was put permanently at rest. So also was any moral question.

J. Do we pay rent to Panama? Absolutely not

Members of the State Department and other government officials seeking to push the American people into a misunderstanding, hopefully to obtain ratification, cite as "proof" of the fact that the Canal Zone does not belong to the United States that the United States has always paid rent to Panama. The fact is—the United States is not

and never has been obligated to pay rent. The $250,000 per year required by the original treaty of 1903 was in lieu of the $250,000 per year annuity which had been agreed to be paid to Colombia in the Hay-Herran treaty, in consideration of the grant by Colombia to the United States of the right forever to operate the Panama Railroad. Inasmuch as the Panamanian conspirators who seceded from Colombia were aware of this, they expected and received not only the $10 million payment which Colombia would have received but also the $250,000 railroad operating annuity which Colombia would have received. The annuity over the years has been increased but it is not and never has been at any time rent. It is now $2.3 million.

K. What about the watershed which is essential to the operation of the lock system of the canal?

The canal lock system cannot operate without a constant and abundant supply of huge quantities of fresh water. These water sources are Madden, Miraflores and Gatun Lakes and the Chagres River. Protection of the watershed unquestionable and certain is indispensable to the future operations of the Canal. Without such assured protection, the requisite availability of vast amounts of flowing fresh water would vanish. Approximately two-thirds of this vital watershed lies in the Canal Zone itself. As you know, upon the coming into force of this pending treaty, the Canal Zone would wholly cease to exist and would become Panamanian property under its sovereignty and jurisdiction with small parts by permission of Panama set aside for use and occupancy by the United States in carrying out its "management contract" to operate the Canal until the year 2000 at the sole cost and expense of the United States.

The contiguous land area portion of this watershed lies outside the Zone in Panama. This important one-third portion of the watershed which lies outside of the Zone boundary has been virtually destroyed by a relentless assault on the flora. By whom? By Panamanian peasants and farmers living in these areas. The Government of Panama knows about this and does nothing about it. When the Canal Zone ceases to exist as it will, these assaults may well continue and be carried forward into the remaining two-thirds of the watershed. In that case, and there is nothing in the treaty to prohibit this, the jungle will disappear as it has in the other thirds and the Zonian two-thirds of this irreplaceable watershed will progressively become desertized as the contiguous one-third is becoming.

While Article VI entitled *Protection of the Environment* provides for a joint commission on the environment to be established with equal representation from both sides, the Commission only concerns itself with the implementation of certain provisions of the treaty and does not concern itself with that which would then be going on within Panama (in what was formerly the Canal Zone) as the implementation of the treaty by the parties relates only to those areas temporarily reserved for the use and occupancy of the United States for housing, for military bases, some training and for canal operations. This Article has no application specifically to the protection of the watershed, all of which will lie in Panama and none of which would come under the active care of either party once the treaty goes into force. These lakes and the river now in the Zone—those portions now in the Zone—would survive by themselves if left alone, but will not survive at all if they are treated in the same way as the portions of the watershed which have always been in Panama have been treated during the years since the Canal commenced operation. So the treaty has no protective environmental provisions in this regard—certainly no enforceable ones—and Article VI by its plain language clearly does not have this subject in mind.

L. What about the allegations of the vulnerability of the Panama Canal to sabotage or the threats of sabotage if the proposed treaty is not ratified?

On September 12, 1977, General Omar Torrijos said that the Canal "is as indefensible as a newborn baby." Is this true? The answer is "No, it is not true." Since 1942, the Canal has been provided with protective and with emergency devices capable of putting ships through the Canal even if every gate and every lock were to be destroyed. A bomb, a conventional bomb, that is, could not disrupt Canal traffic for an extended period of time. Neither could a ship which exploded within the locks stop traffic for extended periods. The dams also have special protection from outside attack. So long as the Canal Zone continues to exist, sabotage of the lock system is next to impossible in such a manner as to put the Canal out of commission for an extended period. When the Canal Zone ceases to exist, which it will upon the coming into force of this treaty, these protective devices will themselves become vulnerable. Present jurisdiction plus the included police power and the protective shield of the ten-mile wide zone are essential.

The treaty makes no provision for the continuation of the Zone in order to assure or more particularly to avoid the creation of a vulnerable situation which will arise when both the Zone and U.S. police power become extinct. The treaty, if approved, will extinguish both. This is a fatal flaw. Contrary to the contentions of the proponents, the continued existence of the Canal Zone and our jurisdiction assure the security of the Canal. The treaty will strip away that security and render the Canal vulnerable to the attack of saboteurs and terrorists.

M. The Protocol of 1914 to the 1903 treaty

If the proposed treaty is confirmed by the Senate, the United States will no longer have a treaty right to deny passage to belligerent ships. To the contrary, the United States will be obligated to allow such vessels to transit the Canal if they can reach its approaches. The United States now possesses that right and always until now considered it to be a valuable right. Soviet naval power is multiplying and over the last 25 years ours has been steadily diminishing both relatively and absolutely. Why would we then agree to forego this valuable treaty right?

On October 10, 1914, an agreement between Panama and the United States was signed whereby belligerent ships could be denied the use of Panamanian waters and Canal Zone waters. Ships using Panamanian waters would be denied the use of Canal Zone ninety days. This would make more attractive to such belligerent vessels to sail around the Horn.

This agreement indirectly had the effect of modifying the neutrality provisions of the 1903 treaty and I am told with the tacit consent to Britain with whom in 1901 the second Hay-Pauncefort Treaty superseded the first treaty upon assurance to Britain who surrendered her rights to construct a canal in return for a promise that ours would be neutral and open. *I might add, by the way, that the words of neutrality in the 1901 Hay-Pauncefort Treaty with Britain are not dissimilar from those incorporated in the neutrality treaty which the Administration contends gives the U.S. the right to intervene in defense of the Canal after the year 2000.* I have never heard anyone contend that the Hay-Pauncefort neutrality treaty with Britain in 1901 gave Britain the right to intervene in the Canal Zone which is U.S. territory. In an agreed minute to the principal pending treaty which minute has reference to paragraph 1 (c) of Article I (covering abrogation of prior treaties and the establishment of a new relationship) this 1914 agreement would cease to exist. It would be expressly abrogated and the United States would lose its existing treaty rights whereby belligerent vessels can be denied the use both of Panamanian and Canal Zone waters. This is a very important treaty right which should be preserved and carried forward perpetually.

N. The transfers of property and the payments to Panama

The proposed treaties would cede and surrender and transfer to Panama without consideration vast properties outright, including the Panama Railroad. This would be done immediately upon the coming into force of the principal treaty, if it is confirmed by the Senate. The Railroad is vital to Canal operations, maintenance and Canal emergencies. Also included in the immediate transfer to Panama and its sovereign jurisdiction to the exclusion of the United States would be all of the land areas of the Zone. These land areas which were ceded to the United States are U.S. territory subject to the exclusive right of the United States to exercise sovereignty over them. Not only that—lands within the Zone which was ceded by the 1903 treaty in perpetuity were later purchased by the United States from the individual Panamanian owners who owned land within the ten-mile wide Zone.

Between the coming into force of the treaty and the year 2000 and perpetually thereafter, all of these lands will belong to Panama from the beginning. The United States will have the use and occupancy, not the title, and no jurisdiction of limited small areas for housing and Canal transit operations in order to carry out "the management contract" which the United States undertakes in the form of this treaty—at its own sole cost and expense. The transfer of title is not delayed until the year 2000.

The Canal Zone immediately ceases to exist. We cede it lock, stock and barrel immediately. These valuable properties become Panama's free, including the important Panama Railroad which the United States should continue to operate so long as the United States has the obligation to operate. Certainly the Canal Zone as is in all respects, including U.S. jurisdiction, should remain intact until the year 2000.

Not only are lands an extensive operating asset given forthwith without any consideration whatsoever, but also under paragraph 4 of Article XIII, the United States is committed to pay annually over the 22-year period to Panama $60 million or more out of revenues and $10 million a year for the municipal services Panama will undertake to provide. *This latter $10 million per year is indexed to the rate of Panamanian inflation!* This paragraph goes on to say that all of this is "a just and equitable return."

These payments which could aggregate $1.6 billion over the 22-year period are in accordance with the treaties stated to be in addition to all of the other transfers of property which in and of themselves are made wholly without consideration to provide in accordance with paragraph 4 of Article XIII "a just and equitable return on the national resources which it [Panama] has dedicated to the efficient management, operation, maintenance, protection and defense of the Panama Canal * * *" What management? What operation? What maintenance? What protection and defense? It should be borne in mind that these required payments which are cumulative may not be generated from tolls because in the year 1976 after increases in tolls between 1974 and 1976 of approximately 50%, the operations were in deficit. Unless tolls are increased still further by substantial percentages, which would not seem to be justifiable, and the tolls do not generate the payments that Panama expects and the treaty provides, the deficit will be paid nevertheless by the U.S. Treasury.

This means, of course, it will be paid by U.S. taxpayers; by your constituents out there—in the south, in the midwest, in the mountain states, in the far west, in the northeast. These people already have to be either very rich or very poor even to be sick or to help send their sons and daughters to college today. Not only that, of course the investment of the United States in the Canal Zone, presently between $5 and $6 billion, will also be on the backs of the U.S. taxpayers—never to be recovered as was intended by Congress and promised to the American citizens by the Act of 1950.

Traffic through the Canal is estimated to grow at 3% to 3½% per year. This percentage is very probably substantially below the rate of inflation which the United States will endure by reason of the monetization of the Federal deficits and therefore without substantial increases in toll rates, a growth of 3½% per year in the volume of traffic would not ever overcome the current deficit which will be further increased by these cumulative payments which over time would aggregate $70 million per year. The treaty imposes upon the United States all of the burdens and accords none of the benefits. At the same time, it gravely impairs the security of the Canal, rendering it highly vulnerable to acts of sabotage whenever these seem to be in the interest of radical students of terrorists or of unstated Marxist reasons approved by Moscow.

There are no provisions to insure any sort of good faith performance upon the part of Panama. There are no adequate provisions to protect the operations there and adequately to secure the Canal during the 22-year period when the United States bears the burden at its own sole cost and expense under conditions wherein the United States assumes great responsibility but surrenders to Panama all of its authority. Panama becomes the exclusive sovereign over the entire area. It becomes the host country, the host nation. The United States has a management contract responsibilities without commensurate authority which cannot be successfully discharged.

O. What about the assertions that if this treaty is not ratified, the United States will face another Vietnam?

There have been repeated allegations from official sources in the Administration that the United States will face another Vietnam in Panama if the proposed treaty is not ratified. The President has stated that if the treaty is not ratified, he will defend the Canal Zone even if it requires 100,000 troops. At a later time, this figure was raised to a higher number. It was said that the Canal would be defended even if it requires 200,000 troops. Is there any validity to such allegation?

Panama is a relatively small country of approximately 1.5 million people. Its resources are limited. A major guerrilla war comparable to Vietnam is wholly beyond her resources. She could not mount such an operation unless she were to be substantially and continuously supplied with vast quantities of ammunition, weapon systems, communications equipment, an elaborate guerrilla command structure and huge numbers of personnel. These would have to be provided by another nation. Do the proponents of this treaty seriously assert that a major offensive of this nature would be launched against the U.S. Canal Zone, that is to say, against U.S. territory with the direct support of another nation or nations? By whom?

It is not clear that if some other nation or nations provided the support for such a major attack upon U.S. territory that it would risk the beginning of World War III? Does it not seem that it is an imposition upon the citizens of the United States to induce them to support the Senate of the U.S. in ratifying the proposed treaty by suggesting that the United States will face another "Vietnam War" in Panama if it is not ratified?

P. The proposed treaty cannot be considered in isolation from our past defeat in Vietnam and from other aspects of U.S. credibility

If we are induced to approve this treaty by a Marxist-dominated government, this would be another building block in the structure which the Soviets have been successfully and relentlessly erecting to fence in the United States and subject her to Soviet will. As every Russian knows, and as every member of the Politburo and Soviet Aparatchik believes devoutly, all non-Marxist social and governmental systems are anathema to the Soviet Union and the United States is the enemy. Somehow there are many people in the United States and seemingly within the government of the United States who apparently do not understand this. *They do not understand or appreciate that we are at the mid-stage of a shift in relative power and influence to the Soviet Union that is of historic proportions, and which promises, unless arrested severely, to have enduring significance.* The rise in Soviet standing in the world can be traced almost exclusively to the increase in relative Soviet military capabilities. *She has projected her power through Cuba to Panama.*

There are many other ways of dealing fairly and equitably with Panama as a neighboring state short of immediately surrendering the U.S. territory embodied in the Canal Zone and simultaneously terminating our jurisdiction there.

If we are induced by the will-o'-the-wisp of wishful thinking that Marxists can ever be appeased by the proposed treaty or by anything less than our surrender to their will, we will have crossed the Hubicon and will expose the Canal to whatever may be the Marxist design. Whether ratification is approved or refused will make no difference in Marxist objectives and designs. However, it will make a *quantum* favorable difference in the capacity of the United States to retain its independence if ratification is declined. The United States will have the respect of most of the nations in the western hemisphere and of western Europe and of our allies in the far east if we otherwise deal fairly and equitably with Panama while declining absolutely to surrender our territory as proposed by the pending treaties in reliance upon Marxist promises.

The proposed treaty is wholly against our national interest. The consequences will be wholly adverse. There is no such thing as world opinion. On the other hand we are being closely watched by our remaining friends and allies. To them the proposed treaty cannot be brewed in isolation. If confirmed, it will be viewed by friends, neutrals and foes alike as yet another U.S. surrender. No observer will regard it as an act of noble purpose and of magnanimity.

Q. If the canal is to be transferred to Panama on December 31, 1999 certain amendments are essential

If the Senate in its wisdom ultimately decides that the Canal should be nevertheless transferred to Panama at the end of 1999, then these considerations are vital:

First, that the watershed be protected;

Second, the necessity for providing protection of the Canal from sabotage and acts of terrorism;

Third, the maintenance of the right to deny passage to belligerent ships;

Fourth, the necessity that the United States be free to negotiate for and build a canal elsewhere on the Isthmus;

Fifth, the requirement that the United States have authority commensurate with its responsibility between now and the end of 1999 which in turn requires that the Canal Zone and U.S. protection continue to exist until then. Neither the Canal Zone nor any of the fixed or operating properties should be given to Panama until the end of the 20th century.

Meanwhile, progressive measures would be taken to train and employ Panamanians so that at the end of the century Panama would man all positions and be in a position to take over. At that time, U.S. protection would come to an end. The Zone would be existinguished. All properties would be conveyed. Thereafter, the United States should be prepared to accept the Canal at risk and whatever other consequences might ensue. With these considerations in mind, the treaties should be amended as follows:

1. No transfers of jurisdiction, authority or property should occur until December 31, 1999 and the Canal Zone should remain intact, with all and in full the properties and the facilities, under the authortiy of the United States to the exclusion of the exercise of jurisdictional authority by Panama during the 22-year transitional period.

2. During this period and until December 31, 1999, the 1903 treaty as amended by amendatory treaties, minutes, notes, understandings and executive agreements prior to the signing of the proposed treaties and their minutes, notes and subordinate agreements would remain in full force and effect.

3. The treaties should be amended further to provide that Panama agrees that she will not grant or accord to any other nation any military, naval or air bases in Panama or in Panamanian waters and that she will not permit the stationing of naval, air or military forces or of quasi or paramilitary forces of any other nation in Panama or of such individuals or units, other than individual diplomatic personnel, except as agreed to by the United States during the transition period ending December 31, 1999.

4. Article XII, paragraph 2(b) should be deleted. The United States should be free to negotiate for and build an Isthmian Canal if it so desires outside of Panama.

5. The neutrality treaty should be amended to make clear that the United States may take such measures as it believes necessary for the defense of the Canal at any time after the year 2000 and to this end as in the case with other friendly countries, Panama should in the mutual defense interest of the parties, provide after the year 2000 air, naval and military bases in order to give meaning to the defense of the Canal following its surrender at the start of the year 2000.

6. The treaties should be further amended for the payment of an increased annuity to Panama during the transition period but no other payments should be made. Accordingly, Article XIII, paragraph 4, should be deleted.

7. Specifically, the protocol of 1914 which provides the United States with treaty rights to deny belligerent ships of any class or nature, whether warships supporting logistic ships, maintenance ships, fleet trains, etc. the use of the waters of Panama and of the Canal, should remain in full force and effect. To this end, the treaty should be amended so as to strike the provisions by amending Article I, paragraph 1, as follows:

Strike the words "Upon its entry into force," substitute therefor "On January 1, 2000."

Strike Articles III, IV, V, VII, VIII, IX.

Amend Article X by striking paragraph 1 thereof and substituting therefor the following: "During the transition period ending December 31, 1999, the United States agrees to provide for an orderly phasing-in to all positions of Panamanians so that as of January 1, 2000 all operations will be conducted by Panama and by Panamanian em-

ployees or other personnel hired by Panama. To this end, the United States will progressively establish during the transition period employment and labor regulations which will contain terms, conditions and prerequisites for all categories of employees of the Panama Canal Company whose positions will be fully absorbed when the Panama Canal Company ceases to exist on January 1, 2000.

The foregoing amendments necessitate in addition that the following additional amendments be made in order that all remaining provisions be compatible with each other:

Strike Paragraph 8 of Article X.

Strike from Paragraph 9 of Article X the words "Panama Canal Commission" wherever it appears therein or elsewhere in the treaty and substitute "Panama Canal Company."

Strike Article XI.

Strike Article XII.

Strike Article XIII.

8. Add an additional Article providing that all minutes, executive agreements, implementation agreements, letters of understanding and all other understandings associated with the pending treaties, including the agreements and implementation of Article III and Article IV are to be set forth in detail as an attachment to the proposed treaties and incorporated by reference in the Panama Canal Treaty so that any and all amendments to any of the foregoing will require the advice and consent of the Senate of the United States of America.

V. RECAPITULATION

A. While the treaty of 1903 was not signed by a Panamanian as Torrijos stated during the signing ceremonies in the Pan American Union on September 7, 1977, it was signed by a duly appointed *Minister Extraordinary and Plenipotentiary* designated by the government of the New Republic of Panama, namely Philippe Bunau-Varilla. The Panamanian government ratified the treaty December 2, 1903. The United States Senate did not ratify it until February 23, 1904.

B. Thereafter, Tomás Arias, the Secretary of the new government of Panama sent a note to the United States government:

"The Government of the Republic of Panama considers that upon the exchange of ratifications on February 26, 1904 of the treaty for opening an interoceanic canal across the Isthmus of Panama, its jurisdiction ceased over the Zone."

C. As cited above, in 1907 the U.S. Supreme Court ruled that the Canal Zone was "ceded" and that the United States owned it absolutely.

D. The presence of the U.S. Naval forces off of Colon and Panama City were to prevent the landing of Colombian troops. No United States troops were landed. Panama was neither under duress nor coerced. It sought independence and avidly sought the treaty. In fact, some Colombian troops joined the Panamanians.

E. In 1936 and 1955, the 1903 treaty was expressly reaffirmed in further treaties which made certain minor adjustments to the treaty of 1903. The amendatory treaties were duly ratified.

F. One expects remarks from Torrijos such as he made during the September signing ceremonies that "United States recognized the need to correct an error instead of prolonging for an eternity an injustice and to correct an historical mistake." This is the kind of language he uses to fire up his people.

What error? What injustice? What historical mistake?

Where would Panama be today were it not for the events of 1903? Probably still a part of Colombia. If thinking Panamanians were really aware of their history, they would feel gratitude toward the United States. Both Panama and Colombia have derived tremendous benefits from the Canal. So has the rest of the world.

G. Shortly after the Wilson Treaty with Colombia mentioned above which was not ratified until 1922, and sometime during 1923, Charles Evans Hughes, then Secretary of State, said

"It is an absolute futility for the Panamanian government to expect any American administration, no matter what it is, any President, or any Secretary of State, ever to surrender any part of these rights which the United States has acquired under the treaty of 1903."

H. CLOSING SUMMARY

Congress in 1902 in the Spooner Act empowered President Roosevelt to acquire from Colombia land across the Isthmus of Panama for a ship canal if Colombia would grant perpetual control.

A treaty for a 10-mile wide zone was negotiated by the plenipotentiaries of Colombia and the United States but the Colombian Senate rejected the treaty in August of 1903 for several reasons cited heretofore. Later on, when it was too late, Colombia wanted to accept it.

On November 3, 1903, Panama, a restless province of Colombia, started a revolution, wholly bloodless as it turned out. President Roosevelt, to protect the Panama Railroad and to protect American citizens from imminent violence, kept Colombian troops at a distance with a nearby show of gunboats and marines. No United States forces were landed. Some Colombian troops joined the revolution.

A new Panamanian government was formed on November 4, 1903. Two days later, on November 6, 1903, Secretary of State John Hay officially recognized the Republic of Panama. No pressure whatsoever or of any kind had been put upon Panama by the United States.

On November 18, 1903, Secretary Hay concluded and signed a treaty with the Panamanian Minister Extraordinary and Plenipotentiary in Washington, D.C. on substantially the same terms and on identical money terms previously offered Colombia. It guaranteed the independence of Panama.

The treaty was unanimously ratified by the new Panamanian government on December 3, 1903; the U.S. Senate gave its advice and consent to the treaty on February 23, 1904.

The United States under the treaty paid $10 million for the 10-mile wide zone across the Isthmus and an annuity for the right to operate the Panama Railroad (as explained heretofore—not in any sense rent) of $250,000. This annuity was increased in a 1955 treaty to $2,300,000. The treaty describes the zone as "lands granted" to the United States. Panama has repeatedly stated that the zone was "ceded."

The U.S. Supreme Court in 1907 ruled the Canal Zone was ceded and that the United States had perfect title.

Under Articles VI and XV of the 1903 treaty through a Joint Commission, the United States bought the land from the owners of the land within the Zone and acquired title in all cases in fee simple. Substantial amounts of money were paid to these owners.

Having first rendered the disease-infected Canal Zone habitable by a three-year sanitation program that conquered both the death-dealing yellow fever and malaria (largely) the United States completed the Canal in 1914 at a then cost of $366,650,000. The first ship passed on August 3, 1915. The United States has an investment there now of approximately $6 billion.

In 1922, Colombia, the nation that felt aggrieved by the events of 1903, made a complete settlement fully adjusting all differences in a treaty negotiated during the Wilson administration and ratified in 1922 for which the United States paid Colombia $25 million.

Before closing, I comment on the report concerning the alleged bugging of the Panamanian negotiations. Thre was no finding that such did NOT occur. If it did and if pressure was applied by the Panamanians to Bunker and Linowitz upon discovery of the bugging by the Panamanians, who could be naive enough to suppose that either Bunker or Linowitz would reveal that they have been blackmailed into proposing the pending treaties and implementing agreements in their present form? Incidentially, the latter can be freely amended so as to modify the treaties themselves once the treaties are ratified.

During his 1976 camapign, President, then candidate, Jimmy Carter, stated unequivocally:

"I would never give up complete control or practical control of the Panama Canal Zone."

The proposed treaties would immediately extinguish all U.S. control, practical or other. Panama would forthwith become the sovereign, exercising all sovereign power and control. Sovereign power and control are inseparable. If we surrender power as the treaty provides, we lose control.

In effect, we have a management contract at our expense for the next 22 years with the same responsibilities we now have for canal operations but with no control or authority. The latter would be vested in the host country—Panama—as it always is. Over that period, we have the privilege of disbursing to them somewhere between $70 and $80 million per year while underwriting all costs of operation, maintenance, repair and rehabilitation. Over and beyond these amounts, collateral agreements not covered by the treaties for economic aid and other purposes could, over the 22-year span, aggregate as much as $2.2 billion. Panama's population is 1.5 million. This aggregate would approximate nearly $1467 per capita for each Panamanian. On a per capita basis for the United States, this would be the equivalent of a payment of $322 billion.

Arguments that technically the United States is not the sovereign, notwithstanding that it now possesses in perpetuity the exclusive right to exercise sovereign power (to the exclusion of the exercise of such power by Panama) are meaningless and border on the absurd. These arguments are neither germane nor sensible. *Unless the present power of the United States over the Canal Zone (and therefore over the Canal itself) remains undiminished, the government of the United States would place itself in the untenable position of accepting responsibility without authority.* This we must *not* do. There can be no compromise here. It would not work. It never has whenever it is required to work.

The proponents contend that the language in the neutrality treaty which states that the parties will maintain "the regime of neutrality" gives the United States the right of intervention if necessary. These words are similar to those of the Hay Pauncefort Treaty of 1901 between Great Britain and the United States. No one has ever contended that this gave rise to any British intervention rights. And as noted hereinbefore, Dr. Escobar flatly denies that the words confer on the United States any such rights and he also *flatly denies that the United States may decide what would constitute a breach of neutrality.* In the premises, the word "neutrality" in Panamanian eyes would apply to everybody as the treaty itself states. So that the Soviets or their proxies, the Cubans, can be provided with naval base facilities at Colon or Panama City or both, and Panama undertakes no obligation not to be "neutral" in favor of Cuba and the U.S.S.R. Soviet naval facilities in Panama were discussed as recently as July 16, 1977 as hereinbefore mentioned, while the Soviet delegation was in Panama to conclude an economic treaty with Panama—naval facilities *and* a sea-level canal.

The real issue, the real choice, is whether we should stay or leave altogether. The answer should be clear. We cannot leave. We cannot surrender in the face of threats and duress even if there were an explosion if the treaties are not confirmed. But there will also be violence if the treaties are confirmed. The Panamanian radicals, encouraged by Escobar, promise this already. United States influence in this vital area is seriously impaired by the extension of Communist power and influence outward from Cuba and by our past defeats and retreats. The western world and our allies in the far east already doubt our resolve and will to defend ourselves. And so too, perhaps, do the Soviets.

There is ample room to deal fairly and equitably with other but much less important problems on the Isthmus without these treaties.

IMPROVING CLIMATE OF SOVIET-AMERICAN RELATIONS

Mr. KENNEDY. Mr. President, on November 2, Soviet President Brezhnev made an important report to the Supreme Soviet, marking the 60th anniversary of the Bolshevik Revolution. I join with the administration in welcoming his positive statements on foreign issues and his promising initiatives to cease the testing of all nuclear explosives.

Since President Carter's address at Charleston, S.C., which I strongly supported last August, we have witnessed a steady upturn in Soviet-American relations. This upturn has been reflected in the policy statements of both sides and in the recent discussions of Secretary Vance and Foreign Minister Gromyko.

In my view, President Brezhnev's speech is the latest confirmation of this important trend. I believe we can all agree with him that—

International Relations are now at a crossroads, as it were, which could lead either to a growth of trust and cooperation, or to a growth of mutual fears, suspicion, and arms stockpiles. Both sides must opt for the cooperative road, the road of peace and not war.

I observe particularly that President Brezhnev calls for agreement on a moratorium covering nuclear explosions for peaceful purposes along with a ban on all nuclear weapons tests for a definite period. This is an important step forward, to be welcomed by all supporters of a comprehensive test ban, including in particular those of us who have cosponsored Senate Resolution 124 under consideration in this Chamber. This welcome development makes it very timely for the United States, United Kingdom, and the Union of Soviet Socialist Republics to complete the CTB negotiations underway in Geneva. The Congress should assist this process by acting favorably on our CTB resolution, and its counterpart in the House, early next year.

In pressing our CTB negotiations to an early conclusion, it will be important for us to remove the dangerous distinction between so-called peaceful nuclear explosions and nuclear weapons, if we are not to undermine vital efforts to prevent the spread of all nuclear explosives. There is new hope that this may now be possible—and that we can move to an early CTB agreement in Geneva serving as the basis for a permanent and comprehensive prohibition of all nuclear tests. We must always bear in mind the fact that PNE's cannot be distinguished from weapons: both can be used for military purposes.

If we can successfully conclude not only a CTB but a new SALT agreement, we will have made a major contribution to nuclear arms control and to the future development of our bilateral relationship. I welcome the important progress made in the Vance/Gromyko discussions, I commend the administration for its careful consultations on their results for arms control, and I am hopeful that the Senate will support the new SALT accords when they are submitted for ratification.

By demonstrating through actions their opposition to military superiority and their support of the approximate equilibrium of military strength, the Soviets can make an important contribution to the confidence of the American public in these accords.

Beyond our vital security interests will be our continued concern for human rights, including freedom of expression and movement. I believe that we should pursue this legitimate concern both bilaterally and at the Belgrade meetings on European security and cooperation—constructively, consistently and without confrontation. Our efforts will inevitably be helped by the positive atmosphere and substance of relations which is developing between us.

Mr. President, I request unanimous consent that the foreign policy section of President Brezhnev's report be printed in the RECORD, so that all Members will have an opportunity to make their own judgment about its content and significance.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

THE FOREIGN POLICY OF THE USSR AND INTERNATIONAL RELATIONS

The Soviet Government was born under the sign of Lenin's Decree on Peace, and ever since then our country's foreign policy has been one of peace. Objective historical conditions have dictated its concrete content: peaceful coexistence of states with different social systems.

In our day the principles of peaceful coexistence have taken fairly firm root in international affairs as the only realistic and reasonable principles. This is a result of the changed correlation of forces in the world—above all, of the increased might and international prestige of the Soviet Union and the entire socialist community. It is also a result of the successes of the international working-class movement and the forces of national liberation. It is, finally, a result of the acceptance of the new realities by a definite segment of the ruling circles in the capitalist world.

At the same time, it is a result of the tremendous work done in recent years by the Soviet Union and the other countries of the socialist community to reorient international relations toward peace.

The salutary changes in the world, which have become especially appreciable in the 1970s, have been called international detente. These changes are tangible and concrete. They consist of recognizing and enacting in international documents a kind of code of rules for honest and fair relations between countries that erects a legal and moral-political barrier to those given to military gambles. They consist of achieving the first—if only modest, for the present—understandings blocking some of the channels of the arms race. They consist of a ramified network of agreements covering many areas of peaceful cooperation between states with different social systems.

The changes for the better are most conspicuous in Europe, where good-neighborly relations, mutual understanding and the mutual interest of the nations and their respect for one another are gaining in strength. We highly appreciate this achievement and consider it to be our duty to safeguard and consolidate it in every way. Therefore, we attach great significance to cooperation with such countries as France, the Federal Republic of Germany, Britain and Italy—with all the European states, large and small, belonging to a different social system.

It is natural, too, that we attach great significance to relations with the United States. There is much that divides our countries—from the socioeconomic system to ideology. Not everyone in the United States likes our way of doing things, and we, too, could say a great deal about what is going on in America. But if differences are accentuated, if attempts are made to lecture each other, the result will only be a buildup of distrust and hostility, useless to our two countries and dangerous to the world as a whole. At the very inception of the Soviet state Lenin made it clear to the American leaders of the time that "whether they like it or not, Soviet Russia is a great power" and "America has nothing to gain from the Wilsonian policy of piously refusing to deal with us on the grounds that our government is distasteful to them" (*Lenin Miscellany*, Vol. XXXVII, p. 254, in Russian). This was true half a century ago. It is all the more true today.

Life itself requires that considerations of a long-term character, prompted by a concern for peace, be decisive in Soviet-American relations. This is the course we follow, and this is what we expect in return. There is no lack of will on our part to continue developing relations with the USA on the basis of equality and mutual respect.

International relations are now at a crossroads, as it were, which could lead either to a growth of trust and cooperation, or to a growth of mutual fears, suspicion, and arms stockpiles, a crossroads leading, ultimately, either to lasting peace or, at best, to balancing on the brink of war. Detente offers the opportunity to choose the road of peace. To miss this opportunity would be a crime. The most important, the most pressing task now is to halt the arms race which has engulfed the world.

Regrettably, the arms buildup continues and acquires ever more dangerous forms. New modifications and types of weapons of mass destruction are being developed, and it is well known on whose initiative this is being done. But every new type is an equation with several unknown quantities in terms of political as well as military-technical or strategic consequences. Rushing from one type of arms to another—on the strength, evidently, of the naive hope of retaining a monopoly on them—only tends to step up the arms race, deepen mutual distrust and hamper disarmament measures.

In this connection I would like to reiterate, most forcefully, something I said earlier. The Soviet Union is effectively looking after its defense capability, but it does not, and will not, seek military superiority over the other side. We do not want to upset the approximate equilibrium of military strength existing at present, say, between East and West in Central Europe, or between the USSR and the USA. But in exchange we insist that no one else should seek to upset it in his favor.

Needless to say, maintaining the existing

equilibrium is not an end in itself. We are in favor of starting a downward turn in the curve of the arms race and gradually scaling down the level of the military confrontation. We want to reduce substantially and then eliminate the menace of nuclear war, the most formidable of dangers for humanity. That is the objective of the well-known proposals of the Soviet Union and other socialist countries.

Today we are proposing a radical step: that agreement be reached on a simultaneous halt in the production of nuclear weapons by all states. All such weapons—whether atomic, hydrogen or neutron bombs or missiles. At the same time, the nuclear powers could undertake to start the gradual reduction of existing stockpiles of such weapons and move toward their complete, total destruction. The energy of the atom for peaceful purposes exclusively—that is the call the Soviet state is making in the year of its sixtieth anniversary to the governments and peoples.

There is another important problem that has a direct bearing on the task of reducing the danger of nuclear war, namely, that of seeing through to the end the work of banning nuclear weapons tests, so that no such tests are conducted underground as well as in the atmosphere, in outer space, and under water. We want to achieve progress in the negotiations on this matter and bring them to a successful conclusion. Therefore, we state that we are prepared to reach agreement on a moratorium covering nuclear explosions for peaceful purposes along with a ban on all nuclear weapons tests for a definite period. We trust that this important step on the part of the USSR is properly appreciated by our partners at the negotiations and that the road will thus be cleared to concluding a treaty long awaited by the peoples.

The Soviet Union is confidently following the road of peace. It is our active and consistent stand that the contest between socialism and capitalism should be decided not on the field of battle, not on the munitions conveyors, but in the sphere of peaceful work. We want the frontiers dividing these two worlds to be crossed not by missiles with nuclear warheads, but by the threads of broad and diversified cooperation for the good of all mankind. By steadfastly pursing this policy, we are carrying out one of the main slogans of the October Revolution and behests of Lenin: Peace to the Peoples!

If it should prove possible to solve the major problem—that of preventing another world war and establishing durable peace—new vistas would open for the inhabitants of the Earth. The preconditions would appear for solving many other vitally important problems that are arising before mankind as a whole in our day.

What are these problems?

One such problem, for example, is that of providing enormous masses of people with food, raw materials and energy sources. It will be borne in mind that, according to available estimates, the population of the Earth will have increased from four billion to six billion by the end of the century. Another problem is that of ending the economic backwardness left by colonialism in the Asian, African, and Latin American countries. This is necessary for the normal future development of the relations between states and in general for the progress of humanity as a whole. Last but not least is the problem of protecting man from the many dangers with which further uncontrolled technological development threatens him, in other words, the preservation of nature for man.

These are very real and serious problems. With every new decade they will become more acute, unless a rational collective solution is found for them through systematic international cooperation.

In our day the world is socially heterogeneous—it is made up of states with different social systems. This is an objective fact. By its inner development and by its approach to international relations the socialist part of the world is setting by its approach to international relations the socialist part of the world is setting a good example of the lines along which the major problems arising before mankind can best be solved. But, needless to say, it cannot solve them for the whole of humanity. What is needed here are purposeful efforts by the people of every country, broad and constructive cooperation by all countries, all peoples. The Soviet Union is wholeheartedly for such cooperation. In this—if one looks deeper—lies the essence of the foreign policy course that we call the course of peaceful coexistence.

WHY WE CAN'T LEAVE KOREA—WITHDRAWAL FROM THE KOREAN PENINSULA HAS FEW, IF ANY, PLUSSES

Mr. HUMPHREY. Mr. President, earlier this year when President Carter announced his intention to begin withdrawing U.S. troops from Korean soil over the next 5-year period, I expressed serious misgivings over the soundness of this policy. Having studied the policy over the past months since it was announced, I am even more convinced that it poses serious problems for us.

This concern was heightened after I read an article which appeared in the October 2 New York Times magazine. The article, entitled "Why We Can't Leave Korea," was written by Donald S. Zagoria, professor of Government at Hunter College.

In my estimation, what the President hopes to avoid in Korea—the potential for another ground war in Asia—will only be enhanced by his withdrawal policy.

I urge my colleagues to study carefully Professor Zagoria's views on this important matter. I think he spells out very effectively the implications of this policy decision.

During August of this year, at my request, the Foreign Assistance Subcommittee sent two staff members to Korea and a number of countries in Asia to study the implications of the President's decision. That report should be available soon, and I must advise my colleagues that the staff trip did nothing to allay my concern.

As my colleagues are well aware, I have tremendous respect for the President and have found myself in agreement with most of his policies. However, I must respectfully express my disagreement with his policy on Korea. I think it raises more questions than it answers and, after all, the foreign policy of the United States should be one in which there should be no uncertainty whatsoever as to what our intentions are.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times Magazine, Oct. 2, 1977]

WHY WE CAN'T LEAVE KOREA

(NOTE.—South Korea is not South Vietnam, and pulling our troops out, as President Carter wants to do, would intensify rather than diminish the risk of becoming involved in another Asian land war.)

(By Donald S. Zagoria)

Albert Wohlstetter once remarked that not the least of the tragedies of Vietnam would be the "lessons" we learned from it. More dryly, historian James C. Thomson made the same point. The only lesson we should learn from Vietnam, he said, is never again to fight a nationalist movement dominated by Communists in a former French colony. Unfortunately, all the indications are that President Carter's sudden and fateful decision to withdraw the United States Second Infantry Division from South Korea stems from a Vietnam trauma that still has the President and many of his younger aides in its grip.

For the past quarter of a century, Korea has been without war. During this period, the 36 million people of South Korean have enjoyed some of the fastest economic growth of any nation in history. South Korea today is one of just a few developing countries with an income distribution more equal than Sweden's; rural poverty has been drastically reduced; and, because of this spectacular economic progress, the continuing hostility of North Korea and the unnerving effect of the South Vietnamese collapse, President Park Chung Hee has won gruding acceptance of his authoritarian rule from a majority of South Korean citizens.

Much of this success story has been made possible by the presentence of one American division in South Korea, positioned squarely between North Korea and Seoul and giving strong credence to the American pledge to defend the South against any new attack from the North. Yet on Jan. 16, 1975, two weeks after leaving the Statehouse in Atlanta and barely a month after declaring his intention to run for President, Jimmy Carter told a group of newspapermen that he favored pulling American troops out of South Korea. And in January 1977, scarcely more than a week after President Carter took office, Vice President Mondale announced during a visit to Japan that American ground troops would be withdrawn from the Korean peninsula.

There had clearly been no time for a review of this crucial decision by the Joint Chiefs of Staff, the American military in Korea, the State Department or the President's own top security advisers. Anyone even noddingly acquainted with the strategic views of Zbigniew Brzezinski, the new head of the National Secrity Council, will find it difficult to believe that Brzezinski could have favored the move. It was very much Carter's own idea.

At top levels of government, the President's appointees were too new in office to offer much criticism. The new Director of Central Intelligence, Adm. Stansfield Turner, did oppose the decision in private, according to reports, and, tempering his views in public, told The Boston Globe: "My position is that we have a balance of deterrence [between North and South Korea] today; when you withdraw forces, that in some measure diminishes it." At intermediate levels, there was little enthusiasm for the plan. At a meeting of Asian scholars and governmental experts that was held at the State Department shortly after the withdrawal announcement, Stanley Karnow, a journalist with long experience in Asia, asked why the decision had been made in such haste. He was answered with the embarrassed refrain than this was the President's policy. Similarly, at a meeting of the Council on Foreign Relations early this year, a Pentagon Asian specialist who had previously favored keeping troops in Korea until there was a stable peace, and who was now supporting their withdrawal, replied, when I asked him why he had changed his mind: "One does

not argue with the President of the United States."

Among the American military, the shock produced by the decision was even greater. Gen. John K. Singlaub, chief of staff of the United States forces in Korea, spoke up against the policy in public. He was promptly transferred to another post. Yet in mid-July, the chairman of the Joint Chiefs of Staff, Gen. George Brown, testified before Congress that the Carter pullout was in "fundamental" conflict with the chiefs' recommendation that only 7,000 of the 33,000 ground troops in South Korea be withdrawn over the next five years.

And in Congress, the decision has by no means won the popular approval Carter had apparently expected. The Senate, by a vote of 79 to 15, refused to endorse the plan. In the House, the Armed Services Committee is considering legislation to block the withdrawal.

The unfavorable reaction within the American Government was rooted in the widespread expert opinion that the North Korean dictator, Kim Il Sung, is still determined to reunify Korea on his own terms. For that same reason, the reaction among American diplomatic and military officials was nothing compared with the dismay in Japan. Korea is separated from Japan by a narrow strait, barely wider than the distance between New York and Philadelphia. The strategic peninsula has been the object of wars among neighboring powers, including Japan, in 1895, 1905, 1945 and 1950. Should South Korea fall to the North, Japan would be as shocked as the United States was when Castro agreed to let the Russians place nuclear missiles in Cuba.

Virtually the entire Japanese defense and foreign-policy establishment opposes Carter's decision. In April, seven legislators of both major parties sponsored a resolution declaring that the pullout would be "an invitation to instability in the Korean peninsula . . . and Northeast Asia as a whole." One high-ranking Japanese defense official told me last June that while American credibility in Asia had been diminished in Vietnam, the Korean pullout plan had finished it off. What especially bothers the Japanese is that Carter made the decision without consulting them—even though, as a Presidential candidate, he had made a big issue of President Nixon's failure to inform the Japanese of the switch on China in 1972.

The biggest shock of all, of course, was to South Korea itself. While Americans enjoy the fruits of détente and are separated by two oceans from any potential enemy, the South Korean capital lies in the shadow of North Korean artillery, 25 miles away. The flying time between the demilitarized zone (DMZ) and Seoul is three minutes. Ever since the 1953 armistice agreement, South Koreans have been living under a state of siege. As of last July 16, North Korea has been charged with no fewer than 40,662 violations of that compact. In 1968, Northern commandos penetrated to within 150 yards of the Presidential Palace in Seoul. In 1974, a North Korean agent killed President Park's wife as she stood beside him.

Moreover, few South Korean families have forgotten the Northerners' brutality during the Korean War. Seoul changed hands four times in the course of the hostilities; whenever the North held the city, it carried out mass roundups and executions; countless families in the South were affected. The millions of refugees who fled the North during the war have bitter memories of their life in that Communist country. They may be ambivalent about President Park—as are many South Korean intellectuals—but they have no mixed feelings about Kim Il Sung.

South Korean consternation over the prospects of American withdrawal was expressed succinctly by Dr. Kim Junyop, director of Korea University's prestigious Asiatic Research Center, a man respected by the Government and the opposition alike. Kim wrote: "First of all, to an outsider, it is not clear at all what the purpose of withdrawal really is. . . . I do not believe that Washington has yet offered a satisfactory explanation of why the troops had better be withdrawn. To save money? To improve security? To support democracy? To promote détente? To appease Pyongyang? To please Korea's critics? What conceivable, rational purpose could be really served by withdrawal is a question I find impossible to answer."

Even our principal adversaries in Russia and China must be uncertain about the plan. Russian officials have privately described Kim Il Sung to me as a "hot potato," and when I warned against the possibility of Kim's sucking them into a new war, they would often reply that the presence of massive American power on the Korean peninsula acted as a deterrent on Kim. The Russians are bound to be ambivalent about a weakening of that deterrent. As for the Chinese, they warned Kim Il Sung against any new adventures when he journeyed to Peking, looking for Chinese support, in the promising era he saw opening up after the fall of South Vietnam. The American presence in South Korea appears to have been viewed in Peking as an indication of American willingness to fight—with consequences costly to North Korea and China alike. An American withdrawal would deprive the Chinese of this argument and would weaken their leverage on their troublesome ally.

What, then, is the reasoning behind President Carter's surprising decision? One can only guess. A debate within the Administration would have given some insight into the President's thinking, but the casual manner in which the decision was sprung makes it more difficult to fathom.

The case for the Administration was stated authoritatively last June 10 in testimony before the House International Relations Committee by Under Secretary of State Philip Habib. In the first place, he said, there was no need to prolong the stationing of American ground forces in South Korea because the country, with its impressive economic growth, was increasingly capable of defending itself. Moreover, American naval, air and key support units would remain in the general area or in position to strike swiftly, if need be, and that would provide sufficient deterrent against any miscalculation on North Korea's part. In addition, the Administration would ask Congress to offset the pullout of the Second Division by authorizing compensatory sales of $1.8 billion in military equipment to Seoul. Finally, Habib argued, the general international situation favored a withdrawal at the present juncture, inasmuch as it would not be in Russia's or China's interests to encourage or support actions by Pyongyang that would increase the risk of war.

So much for why, in the Administration's official view, it would be safe to put an end to the American troop presence that has spanned a quarter of a century. But what of the positive case for withdrawal? Why does the Administration consider it to be to our advantage to terminate the arrangement at this time? Habib was asked that question by a committee member, Lee Hamilton of Indiana, and his answer, in full, was: "I don't think it is necessarily desirable to keep people in place when they don't necessarily serve the purpose that you have them there for. I think also that you are better able to maintain your commitments not only in Korea but elsewhere in Asia if you can demonstrate that what you are doing is, what you might say, necessary to maintain commitments not additional to or just because it has been done before. I think our credibility with the Congress and with the public, and the credibility of our deterrent, will be increased if we maintain it at the level necessary and adequate."

There may be another and more fundamental reason—the President's intense desire to avoid being drawn into yet another land war in Asia. Neither Carter nor the State Department has publicly advanced this explanation—it would hardly serve American interests in that part of the world to do so—but a variety of evidence points that way.

Carter appears to have been influenced to considerable degree by an argument for withdrawal presented to him at a January 1975 meeting at the Brookings Institution by Barry M. Blechman, a Brookings researcher. Blechman characterized the American ground forces in Korea as a dangerous tripwire likely, if sprung, to get the United States automatically into war; he told Carter that "we should take out the nukes right off and phase out the ground troops over four or five years." Carter, as President, told his energy chief, James Schlesinger, one evening that President Truman, President Johnson and President Nixon were all prevented from concentrating on more urgent problems because of Asian land wars, first in Korea and then in Vietnam, and that he was determined not to repeat their mistake. If North Korea did attack South Korea, he said, he would certainly respond with American air and naval forces, and he could not understand why there should be any doubt about his intention to do so. Still more recently, press leaks of certain secret documents suggest that one reason for the withdrawal is to give the Administration greater flexibility in deciding whether to intervene against a Communist invasion should one occur.

The problem is that avoiding a new land war in Korea and deterring the North Koreans from starting such a war are opposite sides of the same coin: By striving to insure the first, Carter weakens the second. American air and naval forces cannot provide the same deterrent as ground troops. As one American official in Korea put it, "Warplanes are like geese. They can honk and fly away." If we rely on air power alone, it will raise questions about our true intentions in case of a new Korean conflict. Such ambiguity could well increase the risk of war by tempting Kim Il Sung into some new venture.

Kim Il Sung runs one of the most repressive, militarized and capricious political systems in the world. He is aging. His words and actions, and the stupefying cult of personality in which he basks, contain a strong hint of paranoia. He may well be emboldened to try to take over the South once and for all before he dies.

One factor pressuring him to act soon, if he is to act at all, is economic. By 1981, if present economic trends continue, South Korea's gross national product will be six times that of the North. The Northern economy is in grave difficulties because of balance-of-payment problems that have forced the North to default on its international obligations. If these difficulties persist, the strain of maintaining the North's commanding lead over the South in arms production may prove too great—to say nothing of the political consequences of a visible and ever-widening gap in economic growth. It is generally believed that when the North called off a dialogue with the South begun in 1972, it was partly because too many Northerners were going south and witnessing for themselves the impressive results of South Korea's economic development. According to one anecdote, a Northern visitor said to his Southern host in 1972 that the South must have had a hard time importing all the cars in Asia into Seoul in order to impress the Northerners. Not so, was the response. What was difficult was bringing in all the tall buildings.

As the North falls farther and farther behind economically, the temptation for Pyongyang to achieve a "final resolution" of the Korean problem will grow. And, in fact, there is much hard evidence that Kim Il Sung is actively preparing for the war option. Since the middle of the 1960's, Pyongyang has been spending huge sums on developing a modern war industry. Since 1970 alone, Pyongyang has tripled its tank strength and enlarged its air force by one-third. As of 1972, North Korea ranked second in the world in the number of men under arms in proportion to the total population. In recent years, the North has constructed a massive network of underground tunnels and bases in order to harden its defenses against air attack, and it has dug invasion tunnels under the DMZ.

Since 1973, the North Koreans have redoubled their efforts to achieve an independent capacity to manufacture key weapons systems, such as tanks and heavy artillery, so as to make them less dependent on Russia or China in the event of war. Even before this extraordinary effort, the North had a clear advantage over the South in tanks, artillery, aircraft and naval vessels; now it is manufacturing its own tanks, rockets, cannon, armored cars, submarines and high-speed gunboats.

Kim Il Sung recently told an American professor of Korean origin that the international situation is developing in North Korea's favor, that South Korea was becoming increasingly isolated, that "revolutionary forces" in the South were growing, that the South was in the process of disintegration, and that serious "contradictions" between the United States and South Korea were inevitable. The statement would be less disquieting if it reflected nothing more than ignorance or misjudgment, but it seems to be a product of Kim Il Sung's extraordinary optimism that, one day, all Korea will be his.

Down the years, Kim Il Sung has adamantly opposed all American, Japanese and South Korean efforts to stabilize the situation on the Korean peninsula. He opposes the American and South Korean notion of having both Koreas join the United Nations; he opposes Kissinger's idea of a four-power conference to draw up a permanent peace agreement; he warns his allies Russia and China not to recognize South Korea, even though the United States and Japan are prepared to recognize North Korea in exchange; and he contends that North Korea is the "sole sovereign state" in the Korean peninsula, a position so outrageous that not even the Russians have bothered to endorse it. Could there be any clearer indication of Kim Il Sung's ultimate goal?

Once American ground forces are gone, a blitzkrieg attack by North Korean armor and infantry against Seoul could well be successful, even against American air opposition. In 1950, the North captured Seoul in three days; if the South Korean capital fell again, the United States would be faced by agonizing decisions. Would we bomb Seoul and risk destroying it completely? Would we bomb other targets in North Korea and invite almost certain Soviet and Chinese intervention? Or would we advise the South Koreans to press for the best cease-fire terms they can get? The latter course would, in all likelihood, be urged by many prominent Americans, even though it would surely lead to the subjugation of the South by the North. Obviously, the least dangerous and painful course for us is to continue to deter the North from starting a war.

Apart from the risk of hostilities, there are other serious hazards involved in removing American combat forces from Korea:

(1) By such a move, we would tell the people of Asia that while we are prepared to shed American blood for Europeans, we are not prepared to do the same for Asians. Apart from the racist overtones of such a signal, it would contribute to Asian suspicions that the United States has no long-term interests in the Pacific and is not a reliable partner for any Asian nation.

(2) Japanese doubts about American readiness to honor the mutual-security pact binding the two nations would intensify. The Japanese reaction would almost certainly be a nationalistic lurch to the right or the left, followed by rapid rearmament or an accommodation with the Soviet Union.

(3) China would have increasing reservations about the dependability of the United States as a Pacific power willing and able to help counterbalance growing Soviet strength in that region. This could undermine Chinese interest in normalizing relations with the United States, and it could increase the chances of a Sino-Soviet accommodation.

(4) South Korea and North Korea would be locked in a new arms race over which we would have less and less control. The South has already allocated a whopping 30 percent of its next year's budget for arms. Eventually, the South would seek to develop a nuclear-weapons capability. That, in turn, would almost certainly trigger similar efforts on the part of North Korea, Taiwan and Japan.

(5) The Soviet Union, sensing the decline of American power in the region, would become more active, both politically and militarily.

There is another aspect to consider. By withdrawing our pro quo, the Administration removes an excellent bargaining chip which could have been used to coax the North Korean leadership into accommodation with the South. We will never know what Kim Il Sung might have paid for this withdrawal because we never bothered to ask. There is, after all, the possibility that Kim, beset as he is by chronic economic difficulties, might be forced into an accommodation with Seoul if our policy gave him no other alternative—particularly if he got American and Japanese trade and credits in return. Many South Koreans and other Asians simply cannot understand why, if we are really concerned about South Korean security, we would throw away the biggest bargaining advantage we have for bringing about a political settlement. Is it any wonder that many of these Asians conclude that we are just looking for a way out of our moral and contractual commitment?

The advantage of a pullout that appears to weigh so heavily with the President—that it will deacrease the risk of "another Vietnam"—can thus be seen, on closer examination, to be illusory: Its more likely effect will be to increase the risk of involvement in a new Asian land war. What other positive advantages to us may withdrawal be said to offer, the hapless Philip Habib's rambling answer aside?

Would it save us money? The Pentagon estimates that South Korea would need as much as $8 billion in additional equipment to offset the withdrawal, and that about $2 billion of this would have to come from the pockets of American taxpayers.

Would it improve the "human rights" situation in South Korea? Park rewrote the Constitution and gave himself emergency powers in the early 1970's after President Nixon removed the Seventh Division from Korea; Park's argument was that greater internal control was necessitated by the resultant increase in the danger of war with the North. Removal of the Second Division would enable Park to rationalize even more extreme measures against his domestic opponents. Representative Donald Fraser of Minnesota, a leading American critic of Park's authoritarian rule, favors a continued American troop presence in South Korea in order to maintain American leverage on Park. For similar reasons, virtually the entire South Korean opposition, including the most vocal of the dissidents, want the Americans troops to stay.
